  - bbcb752f99 Merge deployment when umask is non-standard. Fixes #28830
- **PR #29124**: (rallytime) Back-port #28130 to 2015.8 @ 2015-11-23 17:31:00 UTC
  - **PR #29120**: (alexproca) Import keypair (refs: #29124)
  - **PR #28130**: (bogdanr) Ec2 upload public key and updated instances size list (refs: #29124)
  - 994d8bd71a Merge pull request #29124 from rallytime/bp-28130
  - e290e4a3f PyLint Fix
  - 9d8e5c8b4d Added missing comma
  - 4a7ee98a8 Documented import_keypair for the ec2 driver
  - 715c12014c Added a bunch of instance sizes and updated some outdated ones
  - 506ff01f65 Import public key
- **PR #29076**: (RealKelsar) We can’t query installed use flags for a non installed pkg @ 2015-11-23 16:19:40 UTC
  - d9c32011b4 Merge pull request #29076 from RealKelsar/2015.8
  - f3d1ba1509 We can’t query installed use flags for a non installed pkg. Also one if is enough...
  - 96566d050 We can’t query installed use flags for a non installed pkg
- **ISSUE #29100**: (quantonganh) boto_ec2.exists does not use region when checking? (refs: #29070)
- **PR #29097**: (rallytime) Back-port #29070 to 2015.8 @ 2015-11-22 17:03:04 UTC
  - **PR #29070**: (quantonganh) boto_ec2: missing region when checking existence of an EC2 instance (refs: #29097)
  - 1931870f26 Merge pull request #29097 from rallytime/bp-29070
  - 3b20d2adc boto_ec2: missing region when checking existence of an EC2 instance
- **PR #29090**: (gtmanfred) clean up novaclient module @ 2015-11-21 15:43:58 UTC
  - bb28b9186b Merge pull request #29090 from gtmanfred/2015.8
  - 2a45b9d2 clean up novaclient module
- **PR #29095**: (terminalmage) Add warning about pygit2 API instability @ 2015-11-21 15:38:59 UTC
  - 4ff54c6429 Merge pull request #29095 from terminalmage/pygit2-warning
  - 139f5ba4c3 Add warning about pygit2 API instability
• **PR #28919**: (cro) Update Philips Hue proxy minion to support `__proxy__` instead of proxymodule stored in `__opts__` @ 2015-11-21 15:31:36 UTC
  - 27160b0454 Merge pull request #28919 from cro/hue_proxy_backport
  - 8823225c81 Add "versionadded"
  - 6bd9f8d2c6 Backport philips_hue proxy module to 2015.8, use `__proxy__` instead of opts['proxymodule']
  - 0945d35b52 Add the license
  - a8be2d7382 Fix the docstring
  - 13a8973f94 Validate if "requests" are around. NOTE: this will be changed soon!
  - 835e84181b Fix the documentation
  - 68accf6180 Allow view status from all lamps, if not specified
  - 96adca9ca9 Fix lint issues
  - cd00ecd99f Remove dead code
  - 6a082b6b5 Implement static grains for the Philips HUE
  - 5dc3c3e09fc Bugfix: show all devices, if no specific IDs were passed
  - 76e862d7d Implement color temperature
  - a2d87a18cc Fix the documentation
  - adeeb49d4 Implement brightness
  - a2b1a71e01 Fix crash if the controller is down
  - a7d5aafbe3 Update documentation for the color settings
  - 15f38e180d Add more preset colors
  - 44339f3dc3 Implement color setter with transition
  - 0f4d5b9eac Implement effects method
  - f34190174 Implement alert function
  - e095b4c7f Separate device (lamps) getter
  - 37ed834a63 Implement lamp rename
  - 66b155c3db Enhance `_set` method so it can set more than just lights status
  - 8e94ad5c1 Enhance internal ping report on failures (device is not reachable)
  - 3bf79e6920 Implement blink function
  - 33437d6d60 Use blink on internal ping
  - a8e4c2162c Fix bug: call in a proper order, if all devices
  - a98d5187f8 Remove the debug
  - a1244223bf Enhance switch method
  - e902764e25 Switch all lamps if IDs are not passed
  - 1e50be9155 Fix bug: crash, if only one lamp ID is passed
  - c0e6706d9a Implement status
  - 6d8e6d6e23 Fix lint
- db053bd8b Add licence
- 2abdb19934 Implement proxy minion configuration
- 1a75be3f71 Cleanup code
- 1a46a180bc Implement light switch ON/OFF
- cc5ee382e5 Implement lights method.
- bbe4160b2 Add constants class-struct
- 7a8d72de3f Implement device state change
- d769bc85a7 Implement available device listing
- c9e7f4dc18 Cleanup code
- 5503b6f02e Implement Philips HUE wrapper caller for Minion Proxy
- 1b11d1ec74 Initial implementation of Philips HUE proxy

• ISSUE #28810: (syedaali) test.ping is not available (refs: #29065)

• ISSUE #28761: (syedaali) Numerous module import errors in /var/log/salt/minion (test,oracle,archive) (refs: #29065)

• ISSUE #25756: (nshalman) Esky builds on SmartOS broken in 2015.5 branch (refs: #25946, #25923)

• PR #29065: (cachedout) Handle failures inside python’s inspect if a module is reloaded @ 2015-11-20 18:10:42 UTC
  - PR #25946: (sjorge) Fix for salt.utils.decorators under esky (refs: #29065)
  - PR #25923: (sjorge) Fix for salt.utils.decorators and module.__name__ under esky (refs: #25946)
  - 88c0354c0c Merge pull request #29065 from cachedout/issue_28810
  - 4767503eb2 Remove trailing whitespace
  - c5b66f048 Handle failures inside python’s inspect if a module is reloaded

• PR #29057: (paulnivin) Add local file support for file.managed source list @ 2015-11-19 21:57:34 UTC
  - 714ef8ff27 Merge pull request #29057 from lyft/file-manage-local-source-list
  - 3d7aa9cd8 Support local files in list of sources
  - d175061c5d Add tests for file.source_list with local files
  - 4f8e2a30fe Update documentation to clarify URL support for lists of sources with file.managed

• ISSUE #28981: (mimianddaniel) 2015.8.2 import pagerduty error (refs: #29017)

• PR #29017: (jfindlay) pagerduty runner: add missing salt.utils import @ 2015-11-19 19:28:35 UTC
  - f4f43381fc Merge pull request #29017 from jfindlay/pager_util
  - 5cc06207fe pagerduty runner: add missing salt.utils import

• PR #29039: (anlutro) Allow passing list of pip packages to virtualenv.managed @ 2015-11-19 19:13:50 UTC
  - 1c61bce0a6 Merge pull request #29039 from alprs/feature-virtualenv_pip_pkgs
  - f9bf51382 allow passing list of pip packages to virtualenv.managed

• PR #29047: (schwing) Fix salt.modules.gpg.import_key exception: 'GPG_1_3_1 referenced before assignment' @ 2015-11-19 19:07:36 UTC
  - b692ab1cfb Merge pull request #29047 from schwing/setup-pip-pkg-exception
- 813afe66e0 Fix 'GPG_1_3_1 referenced before assignment'

**PR #29050:** (terminalmage) Make git_pillar global config option docs more prominent @ 2015-11-19 19:06:38 UTC
- 813afe66e0 Merge pull request #29050 from terminalmage/issue29015
- 20da0579a4 Make git_pillar global config option docs more prominent

**PR #29048:** (nmadhok) Fix incorrect debug log statement @ 2015-11-19 19:04:10 UTC
- 4b3b2fe1e7 Merge pull request #29048 from nmadhok/patch-1
- 9489d6c366 Update vmware.py

**PR #29024:** (jfindlay) cache runner test: add new unit tests @ 2015-11-19 19:02:54 UTC
- e52c117368 Merge pull request #29024 from jfindlay/run_test
- 0c0be3ea6 cache runner test: add new unit tests

**PR #28967:** (cro) Fix some issues with password changes @ 2015-11-19 18:57:39 UTC
- bceca8d8608 Merge pull request #28967 from cro/fx2_switch
- 67b5b9b8d2 Add docs on automatic lockout on failed auth attempts.
- 8a3ceca4d95 Lint.
- 04095e3b74 Prevent stacktrace if something goes wrong retrieving inventory
- 67b5b9b8d2 Don’t need to get grains at init time here now that we are confirming username and password differently.
- e4200c8f8a Switch from admin_password and fallback_admin_password to a list of passwords to try.
- 4b382e977d Add 'versionadded'

**ISSUE #8516:** (xoJiog) salt-ssh not working with nodegroups and lists (refs: #29020)

**PR #29020:** (basepi) [2015.8] Add special list-only nodegroup support to salt-ssh @ 2015-11-18 21:15:50 UTC
- 14b5d0ed0f Merge pull request #29020 from basepi/salt-ssh.nodegroups.8516
- 6433abf366 Rename ssh_nodegroups to ssh_list_nodegroups
- bceca8d8608 Properly save minion list in local_cache for ssh jobs
- 4b1bf7d5e2 Add support for comma separated list matching in salt-ssh
- 65cc6528c8 Add "nodegroup" matching to salt-ssh
- 688a78c08c Add new ssh_nodegroups config

**ISSUE #28911:** (ccmills) GitFS numeric tags cause errors with environments (refs: #28970)

**PR #28970:** (terminalmage) Properly handle non-string saltenvs @ 2015-11-18 20:38:41 UTC
- 89801b172a Merge pull request #28970 from terminalmage/issue28911
- ec64ec85d6 Force file_roots environments to be strings
- b629014c7e Properly handle non-string saltenvs

**ISSUE #28945:** (rallytime) Dell Chassis State Example Improvements (refs: #28959)

**PR #28959:** (rallytime) Add blade password example and make note of timeout @ 2015-11-18 19:39:04 UTC
- 83c54351c9 Merge pull request #28959 from rallytime/fx-28945
- 2f326b57bf Clarify chassis password functionality
- 3614a88811 Add blade password example and make note of timeout

- **PR #29000**: (kiorky) [Mergeable] Fix up LXC @ 2015-11-18 18:02:47 UTC
  - d8dc81bb2c Merge pull request #29000 from kiorky/2015.8_lxc
  - a4d197821a LXC: doc
  - 43fbb0eff02 lxc: remove useless and error prone uses_systemd knob
  - 7ec08cd41c Fix bootstrap delay kwarg exchange

- **ISSUE #28995**: (timcharper) systemd.get_all broken on non-bsd systems / salt-bootstrap failure (refs: #29014)

- **PR #29014**: (jfindlay) systemd module: remove unneeded col command @ 2015-11-18 17:58:59 UTC
  - eedd5067c3 Merge pull request #29014 from jfindlay/sysctl_col
  - d75e4d5d21 systemd module: line wrap function comment
  - 960d2b936d systemd module: remove unneeded col command

- **PR #28983**: (basepi) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2015-11-18 00:49:36 UTC
  - ac85cfd8d0 Merge pull request #28983 from basepi/merge-forward-2015.8
  - f1e80ab943 Merge remote-tracking branch 'upstream/2015.5' into merge-forward-2015.8
  - eedd26d763a Merge pull request #28949 from whiteinge/sync-sdb
    - b0ec9ab25b Add sync_sdb execution function
  - 43da1bc4ce Merge pull request #28930 from twangboy/fix_28888
    - 5c4a9eadaa Added missing import mmap required by file.py
  - 2488b873b8 Merge pull request #28908 from rallytime/doc-convention-spelling
    - 60e6edd777 A couple of spelling fixes for doc conventions page.
  - 827a1ae020 Merge pull request #28902 from whiteinge/json-keys
    - 9745903301 Fix missing JSON support for /keys endpoint
  - d23bd49130 Merge pull request #28897 from rallytime/bp-28873
    - 077e671ead Fix salt-cloud help output typo
  - a9dc86ca6 Merge pull request #28871 from basepi/mdadm.fix.28870
    - 323bc2d2ac Fix command generation for mdadmassemble
  - ec7fd539b Merge pull request #28864 from jfindlay/2015.5
    - 648b697951 add 2015.5.7 release notes
  - bed45f4208 Merge pull request #28731 from garethgreenaway/27392_2015_5_scheduler_return_job_master
    - 771e9f7b6f Fixing the salt scheduler so that it only attempts to return the job data to the master if the scheduled job is running from a minion’s scheduler.
  - 06f4932876 Merge pull request #28857 from rallytime/bp-28851
    - aa4b193f87 [states/schedule] docstring: args, kwargs -> job_args, job_kwargs
  - 0934a52b34 Merge pull request #28856 from rallytime/bp-28853
  - 37e9ab2683c Typo (with → which)

- **PR #28969**: (rallytime) Back-port #28825 to 2015.8 @ 2015-11-17 20:43:30 UTC
- PR #28825: (s0undt3ch) Take into account a pygit2 bug (refs: #28969)
  - f172a0ee03 Merge pull request #28969 from rallytime/bp-28825
  - 40f4ac5b21 Add missing import
  - 2e43da1578 Take into account a pygit2 bug
- ISSUE #28784: (chrigl) iptables.get_saved_rules tests pretty much useless (refs: #28787)
- ISSUE #28783: (chrigl) iptables.get_saved_rules does not handle family=ipv6 (refs: #28787)
- PR #28787: (chrigl) closes #28784 @ 2015-11-17 15:54:04 UTC
  - 1e921f4e4 Merge pull request #28787 from chrigl/fix-28784
  - 8639e3e9c3 closes #28784
- PR #28944: (rallytime) The ret result must contain 'name', not 'chassis_name' for the state compiler. @ 2015-11-17 15:34:21 UTC
  - d63344575a Merge pull request #28944 from rallytime/dellchassis-state-name-fix
  - f3ea01bfbf Make sure dellchassis.blade_idrac has a name arg and a ret['name']
  - fb718539e9 The ret result must contain 'name', not 'chassis_name' for the state compiler
- PR #28957: (terminalmage) Fix version number for new state option @ 2015-11-17 15:33:50 UTC
  - fce9f8995 Merge pull request #28957 from terminalmage/fx-fix-28957
  - f159000de2 Fix version number for new state option
- PR #28950: (DmitryKuzmenko) PR 28812 which test fix @ 2015-11-17 15:32:16 UTC
  - PR #28812: (ismb) Enhance 'which' decorator reliability (refs: #28950)
  - 5b680c938 Merge pull request #28950 from DSRCompany/pr/28812_which
  - 18571000c5 Fix which test in PR'28812'_
- PR #28934: (terminalmage) git.latest: Add update_head option to prevent local HEAD from being updated @ 2015-11-17 15:16:15 UTC
  - fac34efed Merge pull request #28934 from terminalmage/issue27883
  - 6a35a39ca5 Add update_head option to git.latest
  - 3787fed0 Change return output of git.fetch to a dict
  - 9ca0f8f440 Add redirect_stderr argument to cmd.run_all
- PR #28927: (rallytime) Update dellchassis state example to use correct jinja syntax @ 2015-11-17 15:12:28 UTC
  - 7da93aad5b Merge pull request #28937 from rallytime/chassis-doc-fix
  - d53713ddha We only need one fancy pillar example to match our state.
  - e2926b1996 Update dellchassis state example to use correct jinja syntax
- ISSUE #27961: (ahammond) aggregate: False should disable aggregation even when state_aggregate: True enabled (refs: #28889)

- PR #28889: (jfindlay) state compiler: relax aggregate conditional check @ 2015-11-16 17:39:24 UTC
  - 16ebda999e Merge pull request #28889 from jfindlay/aggregate
  - eb9970019a state compiler: relax aggregate conditional check

- ISSUE #24803: (cachedout) Rewrite GPG renderer tests (refs: #25470)

- PR #28921: (rallytime) Back-port #25470 to 2015.8 @ 2015-11-16 17:38:59 UTC
  - PR #25470: (jfindlay) #24314 with tests (refs: #28921, #25470)
  - 91a327bbce Merge pull request #28921 from rallytime/bp-25470
  - a5eeec74c20 Change Beryllium to 2015.8.3 release
  - 5ce61abf57 rewrite GPG unit tests
  - 7aa424209e reduce globals in GPG renderer for easier testing
  - de5b6682ef log error and return ciphered txt on decrypt error
  - 6af344fe3 updated logic to properly detect GPG_KEYDIR path
  - bc9750b85e refactor gpg renderer; removing dependency on python-gnupg

- PR #28922: (rallytime) Change 2015.8.2 release note title to reflect proper version @ 2015-11-16 16:47:33 UTC
  - 3707eb1e7c Merge pull request #28922 from rallytime/release-notes-ver
  - 61029f8db1 Change 2015.8.2 release note title to reflect proper version

- ISSUE #23971: (dumol) Problems disabling a service in SLES11 SP3. (refs: #28891)

- PR #28891: (jfindlay) rh_service module: fix logic in _chkconfig_is_enabled @ 2015-11-16 02:44:14 UTC
  - 23eae0d9e0 Merge pull request #28891 from jfindlay/chkconfig_check
  - e32a9aab85 rh_service._chkconfig_is_enabled unit tests
  - 5a93b7e53c rh_service module: fix logic in _chkconfig_is_enabled

- ISSUE #24019: (dumol) SUSE Linux Enterprise Server 11 SP3 not detected as SLES. (refs: #28892)

- PR #28892: (jfindlay) grains.core: correctly identify SLES 11 distrib_id @ 2015-11-16 02:30:30 UTC
  - 8e66acd97e Merge pull request #28892 from jfindlay/sles_grain
  - 1cfd500ec9 grains.core: correctly identify SLES 11 distrib_id

- PR #28910: (lorenengordon) Fix winrepo command in windows pkg mgmt doc @ 2015-11-16 02:29:12 UTC
  - cf929c3847 Merge pull request #28910 from lorenengordon/patch-1
  - 64655938b3 Fix winrepo command in windows pkg mgmt doc

- PR #28896: (rallytime) Back-port #28855 to 2015.8 @ 2015-11-15 00:43:15 UTC
  - PR #28855: (tampakrap) fix the os grain in sle11sp4 to be SUSE instead of SLES (refs: #28896)
  - 7a4fb9a790 Merge pull request #28896 from rallytime/bp-28855
  - baf238f270 fix the os grain in sle11sp4 to be SUSE instead of SLES

- PR #28895: (rallytime) Back-port #28823 to 2015.8 @ 2015-11-15 00:43:07 UTC
• PR #28823: (tampakrap) Add support for priority and humanname in pkrepo zypper backend (refs: #28895)
  - 64dc3c23e0 Merge pull request #28895 from rallytime/bp-28823
  - d167a6b83d Add support for priority and humanname in pkrepo zypper backend

• ISSUE #28754: (kt97679) service.enabled fails on xen server (refs: #28885)

• PR #28885: (kt97679) fix for: service.enabled fails on xen server #28754 @ 2015-11-14 04:55:38 UTC
  - a45ce78e20 Merge pull request #28885 from kt97679/2015.8
  - 7d0f171cb fix for: service.enabled fails on xen server #28754

• PR #28880: (terminalmage) Add "profile" loglevel @ 2015-11-14 02:07:25 UTC
  - 58b57e77be Merge pull request #28880 from terminalmage/profile-logging
  - e628524d07 Add @wraps decorator
  - cae9fa7307 Add profile logging for template rendering
  - c62572f70 Add decorator to do profile-level logging for a function
  - 5a2b94ace39 Add "profile" loglevel

• ISSUE #28881: (basepi) salt-ssh stacktraces on first run (refs: #28882)

• PR #28882: (basepi) [2015.8] salt-ssh: Check return type to make sure it’s an error @ 2015-11-14 00:14:46 UTC
  - 5dc7fcb70 Merge pull request #28882 from basepi/salt-ssh.stacktrace.28881
  - f1a1cad607 Check return type to make sure it’s actually an error

• PR #28867: (rallytime) [fx2 grains] Grains functions should return dictionaries @ 2015-11-13 21:14:13 UTC
  - 430e9376f6 Merge pull request #28867 from rallytime/fx2-grains-patch
  - 022cf5d230 [fx2 grains] Grains functions should return dictionaries

• ISSUE #28859: (mhoogendoorn) ebuild.install runs refresh_db() when refresh=False is given. (refs: #28863)

• PR #28863: (mhoogendoorn) Fix ebuild.install causing extra refresh_db calls. @ 2015-11-13 18:46:03 UTC
  - 304072456e Merge pull request #28863 from mhoogendoorn/fx-issue-28859
  - eca09b89a4 Fix ebuild.install causing extra refresh_db calls.

28.2.55 Salt 2015.8.4 Release Notes

Version 2015.8.4 is a bugfix release for 2015.8.0.

Known Issues

- `*__in requisites (issue #30820)

  This issue affects all users targeting an explicit `- name: <name>` with a `_in` requisite (such as `watch__in` or `require__in`). If you are not using explicit `- name: <name>` arguments, are targeting with the state ID instead of the name, or are not using `_in` requisites, then you should be safe to upgrade to 2015.8.4.

  This issue is resolved in the 2015.8.5 release.

Security Fix

CVE-2016-1866 Improper handling of clear messages on the minion, which could result in executing commands not sent by the master.

This issue affects only the 2015.8.x releases of Salt. In order for an attacker to use this attack vector, they would have to execute a successful attack on an existing TCP connection between minion and master on the pub port. It does not allow an external attacker to obtain the shared secret or decrypt any encrypted traffic between minion and master. Thank you to Sebastian Krahmer <krahmer@suse.com> for bringing this issue to our attention.

We recommend everyone upgrade to 2015.8.4 as soon as possible.

Core Changes

- Support for IAM roles added to S3 module

- Added option `mock=True` for `state.sls` and `state.highstate`. This allows the state compiler to process sls data in a state run without actually calling the state functions, thus providing feedback on the validity of the arguments used for the functions beyond the preprocessing validation provided by `state.show_sls` (issue #30118 and issue #30189).

```
salt '*' state.sls core,edit.vim mock=True
salt '*' state.highstate mock=True
salt '*' state.apply edit.vim mock=True
```

Changelog for v2015.8.3..v2015.8.4

- **PR #30615**: (jfindlay) add 2015.8.4 release notes @ 2016-01-25 18:11:02 UTC
  - 1c6c394d0e Merge pull request #30615 from jfindlay/2015.8
  - e4043403e4 add 2015.8.4 release notes
- **PR #30612**: (rallytime) Back-port #29940 to 2015.8 @ 2016-01-25 17:52:43 UTC
  - PR #29940: (dr4Ke) file.line: better diff (refs: #30612)
  - ec50581aad Merge pull request #30612 from rallytime/bp-29940
  - 3ebb8249d7 file.line: better diff
• PR #30613: (basepi) Fix minion/syndic clearfuncs @ 2016-01-25 17:40:59 UTC
  - 48373e0ea9 Merge pull request #30613 from basepi/minion_clearfuncs_2015.8
  - a3c3182f39 Correctly handle clearfuncs on the syndic
  - 098e4353d Correct handle clearfuncs on the minion

• ISSUE #29601: (seanjnkns) pillars not merging properly with 2015.8.3 (refs: #30062)

• PR #30609: (seanjnkns) Fix documentation for pillar_merge_lists which default is False, not ... @ 2016-01-25 17:15:45 UTC
  - PR #30602: (seanjnkns) Remove recurse_list from pillar_source_merging_strategy and add pilla... (refs: #30609, #30458)
  - 89b43de1b Merge pull request #30609 from seanjnkns/backport_30602
  - 9924acdc43 Fix documentation for pillar_merge_lists which default is False, not True. From PR #30602

• PR #30584: (julianbrost) file.line state: add missing colon in docstring @ 2016-01-25 16:37:38 UTC
  - 24ead2bfe1 Merge pull request #30584 from julianbrost/fix-doc-file-line-missing-colon
  - 2ab36c79f5d file.line state: add missing colon in docstring

• PR #30589: (terminalmage) Merge 2015.5 into 2015.8 @ 2016-01-25 16:20:41 UTC
  - a7ba2df5e2 Merge pull request #30589 from terminalmage/2015.5-2015.8
  - d6a9551b1b Merge branch '2015.5' into 2015.5-2015.8
    * a823e21428 Merge pull request #30582 from terminalmage/dnf-repoquery-multiple-targets
      - 410da789f8 yumpkg.check_db: run separate repoquery commands when multiple names passed
    * 8e56be7fe4 Merge pull request #30548 from jacobhammons/doc-fixes
      - 03c51bb54f Added placeholder release notes for 2015.5.10 Changed old doc links from docs.saltstack.org to docs.saltstack.com
    * 1afaf4e5b5 Merge pull request #30530 from terminalmage/yumpkg-dnf-cleanup
      - 258671bf5c 2015.5 tweaks from #30529

• PR #30599: (multani) Documentation formatting fixes @ 2016-01-25 15:37:46 UTC
  - 3a55d11916 Merge pull request #30599 from multani/fix/docs
  - 03b8e4ac3c For doc formatting of salt.states.module
  - 4602e63b9f Fix doc formatting for yaml_idiosyncrasies
  - 0efb77b0c4 Fix doc formatting of salt.modules.parted
  - a323a2f9e2 Add missing salt.queues.* documentation
  - 24656cf4ba5 Remove non-existing documentation
  - 814e6ac304 Fix documentation markup in salt.modules.osquery
  - d2614de619 Fix documentation markup for salt.modules.ipmi
  - 276eb3a843 Fix GCE documentation

• ISSUE #10157: (martinb3) salt-cloud actions don’t have very useful error messages (refs: #30554)

• PR #30554: (rallytime) Make the salt-cloud actions output more verbose and helpful @ 2016-01-22 20:23:18 UTC
- b1e604add3 Merge pull request #30554 from rallytime/fix-10157
- 6fa952f16d Make the salt-cloud actions output more verbose and helpful

- **PR #30549**: (techhat) Salt Virt cleanup @ 2016-01-22 18:45:18 UTC
  - 2eb5a3803d Merge pull request #30549 from techhat/virtcleanup
  - 9baab73cd0 Fix copy pasta
  - 6413c11f29 Salt Virt cleanup

- **PR #30553**: (techhat) AWS: Support 17-character IDs @ 2016-01-22 18:41:46 UTC
  - f63b183e43 Merge pull request #30553 from techhat/awsid
  - a95bfb4bc Support 17-character IDs

- **PR #30532**: (whiteinge) Add execution module for working in sls files @ 2016-01-22 17:25:16 UTC
  - 05d05263ab Merge pull request #30532 from whiteinge/slsutil-mod
  - a57d9984e4 Add slsutil to doc index
  - 155966c9d2 Add execution module for working in sls files

- **PR #30529**: (terminalmage) Merge 2015.5 into 2015.8 (refs: #30530) @ 2016-01-22 17:19:39 UTC
  - 1da1bb9afc Merge pull request #30529 from terminalmage/2015.5-2015.8
  - e85ad690fb Lint fixes
  - 43829ecce6 Docstring tweaks
  - 92d5a2a49c Fix spelling
  - fdc60fc04a Modify pkg.group_installed to reflect changes in yumpkg.py
  - a118eb5d2e Merge branch '2015.5' into 2015.5-2015.8
  - 7798d42272 Merge pull request #30484 from terminalmage/dnf-yumpkg-2015.5
    - 330e26d1da Hide get_locked_packages
    - 5a637420e8 Backport DNF support to 2015.5 branch

- **PR #30526**: (twangboy) Added FlushKey to make sure it’s changes are saved to disk @ 2016-01-22 02:33:13 UTC
  - 3666fa76d Merge pull request #30526 from twangboy/reg_flushkey
  - 23085ffbbb Added FlushKey to make sure it’s changes are saved to disk

- **PR #30521**: (basepi) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-01-21 23:05:03 UTC
  - cdc731b8c5 Merge pull request #30521 from basepi/merge-forward-2015.8
  - f22f5ff851 Fix lint
  - 117fb205de Merge remote-tracking branch 'upstream/2015.5' into merge-forward-2015.8
    - b348f804b1 Merge pull request #30512 from jfindlay/repo_test
      - 66f06f2bd3 disable pkgrepo test for ubuntu 15.10+
    - 9348dfe8 Merge pull request #30478 from jtand/pip_8_update
      - 6227368830 Convert version to int, instead of comparing strings to ints
      - 20384a4810 Added InstallationError to except block
      - baa274bca9 Updated pip_state to work with pip 8.0
• a30147c64f Merge pull request #30482 from borgstrom/pyobjects_recursive
  - 2c55a7580b Fixup lint errors
  - b46df0e4b5 Allow recursive salt:// imports
  - 51bfa16173 Add test to prove that recursive imports are currently broken
• 5c7cc51937 Merge pull request #30459 from jfindlay/pkg_tests
  - fb997f590 modules.pkg: disable repo int test for ubuntu 15.10
• dd2ceb4c07 Merge pull request #30443 from jtand/boto_vpc_5
  - 2f77152479 Boto uses False for is_default instead of None
• 62d9ddced Merge pull request #30420 from attiasr/patch-1
  - 4de343c5a1 Backport #26853

- PR #30485: (justinta) Updated pip_state to work with pip 8.0 on 2015.8 @ 2016-01-21 22:55:38 UTC
  - 019af349af Merge pull request #30485 from jtand/pip_8_update_2015.8
  - 9cb17332fa Updated pip_state to work with pip 8.0 on 2015.8
- PR #30494: (isbm) Zypper: info_installed — ’errors’ flag change to type ’boolean’ @ 2016-01-21 22:55:05 UTC
  - 3259fde362 Merge pull request #30494 from isbm/isbm-zypper-nfoinst-bool-fix
  - 4d7659270e Place the boolean check
  - 58db1c3b16 Fix typo
  - 43254a993 Update docstring according to the boolean flag
  - a7d3e0d5ad Change ’errors’ flag to boolean.
- PR #30506: (jacksontj) Properly remove newlines after reading the file @ 2016-01-21 22:53:57 UTC
  - 596892326d Merge pull request #30506 from jacksontj/2015.8
  - e1dea6f843 Properly remove newlines after reading the file
- ISSUE #30444: (dnd) Cloning linode server with salt-cloud fails trying to create disk config (refs: #30508)
- ISSUE #30432: (dnd) Cloning linode server with salt-cloud requires payment term (refs: #30508)
- PR #30508: (rallytime) Fix Linode driver cloning functionality @ 2016-01-21 22:53:36 UTC
  - 15c7aed46 Merge pull request #30508 from rallytime/linode-clone-fixes
  - d26ed74bde Make sure the correct profile parameters are being checked when cloning
  - 1d7e229377 Fix Linode driver cloning functionality.
- PR #30522: (terminalmage) Update git.list_worktree tests to reflect new return data @ 2016-01-21 22:34:20 UTC
  - 79528c59c3 Merge pull request #30522 from terminalmage/fix-worktree-tests
  - ea0ca70187 Add git.list_worktrees unit test
  - 393015edbb Remove git.list_worktrees tests
- ISSUE #30465: (alandrees) Nested imports with pyobjects (refs: #30483, #30482)
- PR #30483: (borgstrom) Pyobjects recursive import support (for 2015.8) @ 2016-01-21 15:55:27 UTC
  - 119f025073 Merge pull request #30483 from borgstrom/pyobjects_recursive-2015.8
  - 788b672e3a Fixup lint errors
e148ea2d52 Allow recursive salt:// imports
6bbac64d3a Add test to prove that recursive imports are currently broken

- **PR #30491:** (jacksontj) Add multi-IP support to network state @ 2016-01-21 15:51:42 UTC
  - d8d19cf75d Merge pull request #30491 from jacksontj/2015.8
  - 82213555ca Normalize yaml spacing to 2 space
  - 3d1469b8d9 Add example of multiple addrs/ipv6addrs to docs
  - 91c8a1b4e4 Add support for multiple IP addresses per interface to rh_ip

- **PR #30496:** (anlutro) Fix KeyError when adding ignored pillars @ 2016-01-21 15:51:03 UTC
  - 56332ca504 Merge pull request #30496 from alprs/fix-ignored_pillars_keyerror
  - bbcb783621 fix KeyError when adding ignored pillars

- **PR #30359:** (kingsquirrel152) Removes suspected copy/paste error for zmq_filtering functionality @ 2016-01-20 18:42:42 UTC
  - e425cbd654 Merge pull request #30359 from distil/zmq_filtering_bug_fix
  - 44fbff15b Removes suspected copy/paste error.

- **PR #30448:** (cournape) Fix osx scripts location @ 2016-01-20 17:59:29 UTC
  - 13add7142 Merge pull request #30448 from cournape/fixed-osx-scripts-location
  - 3c27ab5310 BUG: fix osx .pkg script locations to match the .plist files.
  - ed9ab683d3 BUG: fix missing sudo when linking certify cert.

- **ISSUE #22820:** (VynceMontgomery) some docs missing again (cf #22720) (refs: #30457)

- **PR #30457:** (rallytime) Remove fsutils references from modules list @ 2016-01-20 16:43:50 UTC
  - 2b7d20ee7 Merge pull request #30457 from rallytime/fixed-22820
  - 3288ff104d Remove fsutils references from modules list

- **ISSUE #30442:** (ssplatt) salt-cloud linode query only lists private or public IP, not both (refs: #30453)

- **PR #30453:** (rallytime) Make sure private AND public IPs are listed for Linode driver @ 2016-01-20 16:41:51 UTC
  - e706b71871 Merge pull request #30453 from rallytime/fixed-30442
  - a1f88f4fe Make sure private AND public IPs are listed for Linode driver

- **ISSUE #29601:** (seanjnkns) pillars not merging properly with 2015.8.3 (refs: #30062)

- **PR #30458:** (rallytime) Back-port #30062 to 2015.8 @ 2016-01-20 16:40:23 UTC
  - **PR #30062:** (seanjnkns) Remove recurse_list from pillar_source_merging_strategy and add pillar_merge_list (bool)
  - 73f372dc98 Merge pull request #30458 from rallytime/bp-30062
  - 9665d655f Set (pillar_)merge_lists to default for PR #30062
  - 7ea4dbf478 Fix lint for PR30062
  - e44a30620b Remove recurse_list from pillar_source_merging_strategy and add pillar_merge_list (bool) instead

- **PR #30468:** (timcharper) make note of s3 role assumption in upcoming changelog @ 2016-01-20 16:28:04 UTC
• PR #30470: (whiteinge) Add example of the match_dict format to accept_dict wheel function @ 2016-01-20 16:26:16 UTC
  - c611541916 Merge pull request #30470 from whiteinge/match_dict
  - 5034e13f5d Add example of the match_dict format to accept_dict wheel function

• ISSUE #28017: (ThomasZhou) Using salt-cloud nova driver, raise error: SaltNova’ object has no attribute ’_discover_extensions’ (refs: #30450)

• PR #30450: (gtmanfred) fix extension loading in novaclient @ 2016-01-19 21:16:32 UTC
  - d70e6b312a Merge pull request #30450 from gtmanfred/2015.8
  - 4aa6faaf48 fix extension loading in novaclient

• ISSUE #30150: (rapenne-s) file.line reset permissions to 600 (refs: #30212, #30168)

• PR #30212: (abednarik) Fix incorrect file permissions in file.line @ 2016-01-19 21:15:48 UTC
  - 0af5e16809 Merge pull request #30212 from abednarik/file_line_permissions
  - dec15d1357 Fix incorrect file permissions in file.line

• ISSUE #29918: (WangWenchao) UnicodeDecodeError when saltutil.sync_modules for Windows salt-minion 2015.8.3 (refs: #29947)

• PR #29947: (jfindlay) fileclient: decode file list from master @ 2016-01-19 20:36:32 UTC
  - 3c12b451fe Merge pull request #29947 from jfindlay/remote_decode
  - b9241f6b6b state: use simple string formatting for messages
  - f6162f168c fileclient: decode file list from master

• ISSUE #30203: (terminalmage) Update salt.modules.git.list_worktrees() to use ‘git worktree list’ for Git >= 2.7.0 (refs: #30363)

• PR #30363: (terminalmage) Use native ”list” subcommand to list git worktrees @ 2016-01-19 20:35:41 UTC
  - 6e8b1e89a5 Merge pull request #30363 from terminalmage/issue30203
  - ee4091166 Fix redefined variable
  - 5f95851987 Use native ”list” subcommand to list git worktrees
  - 911105f27c Fix incorrect missing gitdir file detection

• PR #30445: (justinta) Boto uses False for is_default instead of None @ 2016-01-19 18:28:18 UTC
  - dfb9dec84f Merge pull request #30445 from jtand/boto_vpc_8
  - 00943f1e6 Boto uses False for is_default instead of None

• PR #30406: (frioux) Add an example of how to use file.managed/check_cmd @ 2016-01-19 18:23:49 UTC
  - f9b3f3038 Merge pull request #30406 from Zip Recruiter/check-cmd-example
  - 92e0d77a9a Add an example of how to use file.managed/check_cmd

• PR #30424: (ismb) Check if byte strings are properly encoded in UTF-8 @ 2016-01-19 17:52:25 UTC
  - 05ad3dce94 Merge pull request #30424 from isbm/ismb-zypper-utf-8-errors
  - a0f263f411 Clarify the error message
- 12f8e93247 Update documentation accordingly.
- 1d384b60ab6 Add error handling to the RPM broken strings
- cf0dad3a6c Rename keywords arguments variable to a default name.
- 26aa801342 Check if byte strings are properly encoded in UTF-8

• ISSUE #30051: (joejulian) glusterfs.status fails with glusterfs 3.7 (refs: #30075)

• PR #30405: (justinta) Updated glusterfs.py for python2.6 compatibility. @ 2016-01-15 22:50:06 UTC
  - PR #30075: (joejulian) Convert glusterfs module to use xml (refs: #30405)
  - 1bace55e45 Merge pull request #30405 from jtand/glusterfs_py26
  - a332e06c4a Fixed lint error
  - 522b4990ef Updated the rest of glusterfs.py for python2.6 compatibility
  - 971ce58cd6 updated list_peers to be python2.6 compatible

• PR #30396: (pass-by-value) Remove hardcoded val @ 2016-01-15 22:03:53 UTC
  - cb1c0958bd Merge pull request #30396 from pass-by-value/remove_hardcoded_val
  - dd90b325e7 Get vm info
  - 9430ad1465 Remove hardcoded value

• PR #30391: (justinta) Added else statements @ 2016-01-15 19:17:55 UTC
  - PR #30389: (justinta) Older versions of ipset don’t support comments (refs: #30391)
  - 60737c970e Merge pull request #30391 from jtand/ipset
  - 345b056406 Fixed lint error
  - c20f9b6a87 Added else statements

• ISSUE #30277: (webtrekker) [salt-cloud] Error actioning machines: 'ascii' codec can’t encode character u'\xa0' in position 20 (refs: #30374)

• PR #30375: (rallytime) Wrap formatted log statements with six.u() in cloud/__init__.py @ 2016-01-15 18:41:55 UTC
  - PR #30374: (rallytime) Wrap formatted log statements with six.u() in the VMware module (refs: #30375)
  - 6ac1f6cf54 Merge pull request #30375 from rallytime/fix-cloud-log-formatting
  - 5e7f0c428b Wrap formatted log statements with six.u() in cloud/__init__.py

• PR #30384: (isbm) Bugfix: info_available does not work correctly on SLE 11 series @ 2016-01-15 18:31:57 UTC
  - c478148b60 Merge pull request #30384 from isbm/isbm-zypper-info-avaible-fix
  - c7bc20e865 Split information, that is compatible with the Zyper’s output on SLE11.

• PR #30376: (pritambaral) Fix FLO_DIR path in 2015.8 @ 2016-01-15 18:25:49 UTC
  - 9fc2df82bd Merge pull request #30376 from pritambaral/flo-dir
  - 534879e79f Revert "Raet Salt broken when config moved to package directory"

• PR #30389: (justinta) Older versions of ipset don’t support comments (refs: #30391) @ 2016-01-15 17:41:02 UTC
  - 3ac3804ddc Merge pull request #30389 from jtand/ipset
  - fac6c3f6ae Fixed some typos from testing
  - 67d4997316 Older versions of ipset don’t support comments
• **PR #30373**: (basepi) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-01-15 16:23:38 UTC
  - 4cc9422bf8 Merge pull request #30373 from basepi/merge-forward-2015.8
  - 5b53bf2597 Merge remote-tracking branch 'upstream/2015.5' into merge-forward-2015.8
    * 5a923b3aa9 Merge pull request #30364 from rallytime/fix-30341
      * 79bcf151cb Add TLS version imports and add linode driver documentation notices
        * f037fd9c27 Merge pull request #30184 from rallytime/bp-30166
          * fa6b1b3022 adding split_env call to cp.hash_file to pick up saltenv in file query parameter
        * 1d8413fd2f Merge pull request #30291 from thegoodduke/for_fix_ipset
          * 62d6cfc561 ipset: fix test=true & add comment for every entry
    * 92889db638 Merge pull request #30248 from jfindlay/2015.5
      * 741f7aba31 add 2015.5.9 release notes
    * 7a329d89d7 Merge pull request #30237 from jacobhammons/man-pages-prev
      * 24314c45c3 Updated man page and doc conf.py copyright year to 2016
      * fe3da1c174 Updated man pages and doc version for 2015.5.9
    * 2c0b725924 Merge pull request #30207 from rallytime/rabbitmq_states_doc_fix
      * 8d48c24182 Use correct spacing in rabbitmq state examples
    * b49cf910f4 Merge pull request #30184 from rallytime/remove-incomplete-func
      * c3390955b0 Updated doc site banners
  * 7a329d89d7 Merge pull request #30237 from jacobhammons/man-pages-prev
    * 24314c45c3 Updated man page and doc conf.py copyright year to 2016
    * fe3da1c174 Updated man pages and doc version for 2015.5.9
  * 2c0b725924 Merge pull request #30207 from rallytime/rabbitmq_states_doc_fix
    * 8d48c24182 Use correct spacing in rabbitmq state examples
  * b49cf910f4 Merge pull request #30184 from rallytime/remove-incomplete-func
    * c3390955b0 Updated doc site banners
• **PR #30372**: (jacobhammons) Updated man pages for 2015.8.4, updated copyright to 2016 @ 2016-01-14 23:18:40 UTC
  - a9edeb194a4 Merge pull request #30372 from jacobhammons/man-pages
  - 891ddafcb0 Updated man pages for 2015.8.4, updated copyright to 2016
• **PR #30370**: (rallytime) Remove incomplete function @ 2016-01-14 22:49:45 UTC
  - e77585de1e7 Merge pull request #30370 from rallytime/remove-incomplete-func
  - e220fa5125 Remove incomplete function
• **ISSUE #23215**: (lichtamberg) Rbenv: gem.installed not using correct ruby version if it’s not default on 2015.02 (refs: #28702)
• **PR #30366**: (rallytime) Back-port #28702 to 2015.8 @ 2016-01-14 21:10:03 UTC
  - **PR #28702**: (dnd) Pass RBENV_VERSION in env dict, and protect shlex.split (refs: #30366)
    - eb1ec9d732 Merge pull request #30366 from rallytime/bp-28702
    - 4f2274a275 Remove extra line
    - 048b13cf73 Pass RBENV_VERSION in env dict, and protect shlex.split
  - **PR #30361**: (cro) Flip the sense of the test for proxymodule imports, add more fns for esxi proxy @ 2016-01-14 20:54:08 UTC
    - 40594ef0f0b Merge pull request #30361 from cro/esxi-proxy2
    - 8f7490ca98 Missed return statement.
    - 389ede9e3e Lint
- 9db34d0ffe Lint
- b5c7a46f7a Lint
- 1a3b1f2626 Don’t use short variables
- b80577182a Remove stub functions.
- 58f7fc3285 Don’t use single character variables.
- e712664bcf Better comment.
- 9e9a37d0d4 Indentation.
- 6c9bf76e19 Revert earlier vmware change for ssl cert checking.
- db8a281ab8 Flip the sense of the test for items (modules, etc) loaded by the proxy. Now load everything a regular minion would load, and only check to make sure __proxyenabled__ is present for proxymodules and grains
- 00c4ef6ec2 Need a list
- 0da7a6d6d1 Recreate the pr

- **PR #30267: (isbm) Fix RPM issues with the date/time and add package attributes filtering @ 2016-01-14 18:00:01 UTC**
  
  - f4118be6e4 Merge pull request #30267 from isbm/isbm-zypper-isotimefix
  - 18281e7e0b Add "*time_t" as a separate attributes
  - 4105157cfd Add *time_t to the docs
  - 78e16a7b00 Construct RPM query dynamically
  - 6992d74806 Update documentation for the valid package attributes
  - 6710e4900d Use renamed variable (filterAttrs to attr)
  - b68e1228e9 Remove unnecessary check for the "name" key
  - e5b3e77186 Remove key transformations
  - 9ac52c9123 Add zone to the ISO from unix time
  - d352c08305 Fix lint: unused import
  - d571381f76 Update the documentation for the Zyper module
  - 5651a043e6 Update documentation for lowpkg
  - 7ed80e83f3f Replace "*_date_iso" with "*_date" and use Unix time as "*_date_time_t"
  - b2b21f877a Add epoch (note: this is empty on SUSE systems)
  - 0eebe10d9a Clarify description
  - a745d9ecdf Fix syntax for the documentation in zyper module
  - c95c2d24db Fix the documentation syntax
  - 1fb84538b1 Update documentation
  - 43ebff4dd7 Return build date in Unix ticks
  - bdaa1e46de Add package architecture attribute
  - ba64df4def Update documentation
  - 6e3743dce6 Incorporate lowpkg.info into info_installed
- b72b8d5323 Fix the documentation
- 181314b20e Add filtering per attributes feature
- 39e70ef762 Fix ISO and Unix time of the package for RPM systems on C locale.

- **ISSUE #30330**: (JensRantil) salt.state.file.absent doesn’t document recursiveness (refs: #30360)
- **PR #30360**: (jfindlay) file.remove, file.absent: mention recursive dir removal @ 2016-01-14 17:30:26 UTC
  - b61cb7a238 Merge pull request #30360 from jfindlay/remove_doc
  - a21ccdd2700 file.remove, file.absent: mention recursive dir removal

- **ISSUE #26845**: (maio) Postgres module (user_exists) doesn’t work with PostgreSQL 9.5 (refs: #30221)
- **PR #30221**: (mbarrien) No rolcatupdate for user_exist in Postgres>=9.5 @ 2016-01-14 16:52:49 UTC
  - ba8d128025 Merge pull request #30221 from mbarrien/postgres-9.5
  - a8f2b2c7998 No rolcatupdate for user_exist in Postgres>=9.5 #26845

- **PR #30358**: (terminalmage) Add libgit2 version to versions-report @ 2016-01-14 16:37:28 UTC
  - 4787c2c9ad Merge pull request #30358 from terminalmage/libgit2-version
  - 89fe571791 Add libgit2 version to versions-report

- **PR #30346**: (pass-by-value) Prevent orphaned volumes @ 2016-01-14 16:37:08 UTC
  - af2ddf5d31c Merge pull request #30346 from pass-by-value/aws_vols_attach
  - 19fcede3ee2 Prevent orphaned volumes

- **PR #30349**: (rallytime) Back-port #30347 to 2015.8 @ 2016-01-14 16:26:37 UTC
  - **PR #30347**: (rallytime) Merge #30231 with updates to dependency documentation (refs: #30349)
  - **PR #30231**: (nmadhok) Fix issue where pyVmomi 6.0.0 raises SSL Error for systems using Python2.7+ (refs: #30347)
  - bccbf93b5b Merge pull request #30231 from rallytime/hp-30231
  - df70afdaa3 Merge #30231 with updates to dependency documentation
  - a7c2ad5005 Fix issue where pyVmomi 6.0.0 raises SSL Error for systems using Python2.7+

- **PR #30340**: (anlutro) Make sure all ignore_missing SLSes are catched @ 2016-01-13 22:50:34 UTC
  - **PR #19429**: (ryan-lane) Add new ignore_missing option to pillar top (refs: #30354)
  - 7ee61f6d02 Merge pull request #30354 from alpris/fx-pillar_ignore_missing
  - 2f662bc8d make sure all ignore_missing slses are catched

- **PR #30356**: (nmadhok) Adding code author @ 2016-01-14 16:23:08 UTC
  - 4bdade6010 Merge pull request #30356 from nmadhok/patch-1
  - 581e5f5dc7 Adding code author

- **PR #30340**: (justinta) Updated seed_test.py for changes made to seed module @ 2016-01-13 22:50:34 UTC
  - d5b8776355 Merge pull request #30340 from jtand/seed_test_fix
  - ee764ee952 Updated seed_test.py for changes made to seed module

- **ISSUE #26478**: (rasathus) nested upstart services are not supported (refs: #26511)

- **PR #30339**: (jfindlay) Backport #26511 @ 2016-01-13 22:35:17 UTC
- PR #26511: (rasathus) Adds support for nested upstart scripts in the form of subfolder/service. (refs: #30339)
- 3bbed62d07 Merge pull request #30339 from jfindlay/bp-26511
- 89d9c5e38 Adds support for nested upstart scripts in the form of subfolder/service. This is implemented via an os.walk through the /etc/init folder, rather than the previous glob for *.conf method.

- ISSUE #28339: (boboli) salt-call state.highstate fails with ZMQError when minion has no id set in /etc/salt/minion (refs: #28423, #28431)

- PR #30343: (rallytime) Fix 2015.8 from incomplete back-port @ 2016-01-13 21:56:26 UTC
- PR #30187: (rallytime) Back-port #27606 to 2015.8 (refs: #30343)
- PR #28431: (plastikos) Use a broader test for unset "id" (refs: #30343)
- PR #28423: (cachedout) Fix issue with empty str as default minion id (refs: #28431)
- PR #28189: (plastikos) Always get default option settings from salt.config (refs: #30343, #28431)
- PR #28131: (cachedout) Set a fallback HWM (refs: #30343)
- PR #27606: (plastikos) RFC: Add additional ZMQ tuning parameters necessary for 1k+ minions per master [WIP] (refs: #30343, #30187)
- 6079a9ee6e Merge pull request #30343 from rallytime/fixed-2015.8
- 5ee9d5067 Use a broader test for unset "id"
- 460a3c98cc Additional corrections to use option defaults directly from salt.config
- 4e53e0bf6 Always get default option settings from salt.config
- 94e6f88af Set a fallback HWM

- PR #30342: (eliasp) Correct whitespace placement in error message @ 2016-01-13 21:32:26 UTC
- 7276d808ff Merge pull request #30342 from eliasp/2015.8-log-message-format
- 8e3736ac7 Correct whitespace placement in error message

- ISSUE #30250: (mbarrien) npm.bootstrap state runs even when test=True (refs: #30257)

- PR #30308: (rallytime) Back-port #30257 to 2015.8 @ 2016-01-13 19:20:13 UTC
- PR #30257: (abednarik) Add test in npm state. (refs: #30308)
- 10b5728f84 Merge pull request #30257 from rallytime/bp-30257
- 0b0d73756e Fix typos in npm module.
- deeeb71dda Add test in npm state.

- PR #30187: (rallytime) Back-port #27606 to 2015.8 (refs: #30343) @ 2016-01-13 19:03:11 UTC
- PR #27606: (plastikos) RFC: Add additional ZMQ tuning parameters necessary for 1k+ minions per master [WIP] (refs: #30343, #30187)
- afa61c03db Merge pull request #30187 from rallytime/bp-27606
- 8ef6d6c6fd Add additional ZMQ tuning parameters necessary for 1,000+ minions per server. Start collecting tuning parameters together in the master config file.

- PR #30223: (serge-p) adding support for DragonFly BSD @ 2016-01-13 18:24:29 UTC
- 7e89a460e4 Merge pull request #30223 from serge-p/patch-11
- ec798acbcd Update pkgng.py
Adding support for DragonFly BSD

- **ISSUE #28396**: (ymote) salt-cloud parallel provisioning (-P option) failed on 2015.8.1 (refs: #30238)

- **ISSUE #23824**: (kiorky) salt.crypt broken in develop (refs: #23825)

- **PR #30238**: (rallytime) Reinit crypto before calling RSA.generate when generating keys. @ 2016-01-13 18:22:11 UTC
  - PR #23825: (kiorky) Fix crypto (refs: #30238)
  - 5a8da62008 Merge pull request #30238 from rallytime/fix-28396
  - 419df455b Reinit crypto before calling RSA.generate when generating keys.

- **ISSUE #24237**: (Grokzen) Minion schedule return data missing some fields (refs: #30246)

- **PR #30246**: (dmacvicar) Add missing return data to scheduled jobs (#24237) @ 2016-01-13 17:51:49 UTC
  - 15707e0ac8 Merge pull request #30246 from dmacvicar/dmacvicar-2015.8-24237
  - c462139dbb lint: E8713(test-for-membership-should-be-not-in)
  - 5a1b2ca486 include the ‘success’ field in scheduled jobs return data (part of #24237)
  - f72a4ca42d add retcode to scheduled jobs return data (part of #24237)

- **PR #30292**: (thegoodduke) ipset: fix test=true & add comment for every entry @ 2016-01-13 17:49:16 UTC
  - PR #30170: (thegoodduke) ipset: fix comment and test (refs: #30291, #30292)
  - 8706720148 Merge pull request #30292 from thegoodduke/ipset
  - 49d70bff16 ipset: fix test=true & add comment for every entry

- **ISSUE #30240**: (snw1968) firewalld inconsistent permanent option used for services but not ports - other options required (refs: #30275)

- **PR #30275**: (abednarik) Add permanent argument in firewalld. @ 2016-01-13 17:44:43 UTC
  - ea607675f5 Merge pull request #30275 from abednarik/firewalld_portsPermanent
  - e34ff5f1da Add permanent argument in firewalld.

- **PR #30328**: (cachedout) Fix file test @ 2016-01-13 17:42:22 UTC
  - f02b44757 Merge pull request #30328 from cachedout/file_test
  - dcfba51556 Lint
  - b9921128af Kill pointless tests
  - 63e1570a3 Fix test_managed

- **PR #30310**: (pass-by-value) Empty bucket fix @ 2016-01-13 17:30:45 UTC
  - edd94ae2c Merge pull request #30310 from pass-by-value/empty_bucket_fix
  - aef5a899c Add fix for else code path
  - 9398c44945 Check and report empty S3 bucket

- **PR #30211**: (techhat) Execute choot on the correct path @ 2016-01-13 16:53:40 UTC
  - f23f0f30d Merge pull request #30211 from techhat/tmppath
  - 11ac2ff0b Revert "We’re putting the keys directly in place; -c isn’t used"
  - e75b48f5ff We’re putting the keys directly in place; -c isn’t used
  - 5d7a0f68d81 Execute choot on the correct path
• ISSUE #3086: (tkunicki) salt-cloud ec2 spot requests fail with userdata_file in config or profile (refs: #30304)

• PR #30309: (rallytime) Back-port #30304 to 2015.8 @ 2016-01-13 16:41:53 UTC
  - PR #30304: (tkunicki) add spot_prefix to UserData param (refs: #30309)
  - 5154c71127 Merge pull request #30309 from rallytime/bp-30304
  - 4a8cc87b47 add spot_prefix to UserData param

• PR #30278: (nmadhok) If datacenter is specified in the config, then look for managed objects under it @ 2016-01-13 15:29:36 UTC
  - 1624d6cebd Merge pull request #30278 from nmadhok/2015.8-samename-objects-fix
  - b0e86afa00 get_mor_by_property needs container_ref to be a positional parameter
  - 56dfc63f91 If datacenter is specified, start all searches under datacenter
  - fc77b738e If datacenter is specified then look under it instead of looking under inventory root folder

• PR #30305: (jacobhammons) Changed examples to use the "example.com" domain instead of "mycompan... @ 2016-01-12 20:42:10 UTC
  - fc9304f7f8 Merge pull request #30305 from jacobhammons/example-domain
  - 53d17f1f85 Changed examples to use the "example.com" domain instead of "mycompany.com" or "company.com"

• PR #30249: (mpreziuso) Fixes performance and timeout issues on win_pkg.install @ 2016-01-12 20:14:54 UTC
  - 3bd02a89f8 Merge pull request #30249 from mpreziuso/patch-2
  - d66e610534 Fixes lint issues
  - 3251424838 Fixes performance and timeout issues on win_pkg.install

• PR #30217: (pass-by-value) Make sure cloud actions can be called via salt run @ 2016-01-12 20:11:13 UTC
  - 461a741e14 Merge pull request #30217 from pass-by-value/cloud_actions_dispatch
  - 16f8e05bc Fix pylint error
  - d5b1b60b99 Add CLI Example
  - 5264449f6b Make sure cloud actions can be called via salt run

• ISSUE #9569: (clearclaw) How can a binary file, such as a license key, be distributed via Pillar? (refs: #30268)

• PR #30268: (terminalmage) Optimize file_tree ext_pillar and update file.managed to allow for binary contents @ 2016-01-12 20:09:19 UTC
  - 4a6b5f3f329 Merge pull request #30268 from terminalmage/issue9569
  - 724b2f36ce Add file_tree/file.managed/contents_pillar example to FAQ
  - 854cd7d9978 Remove old FAQ item referencing gitfs bug in 0.16.x
  - e9ad709f9 salt.states.file.managed: Allow for binary contents
  - 1ba448b619 salt.pillar.file_tree: Optimizations, deprecate raw_data
  - 650c0a5f5c salt.modules.file: Improve docstrings

• ISSUE #29078: (Reiner030) boto_secgroup didn’t work as expected in Debian Jessie (refs: #30155)

• PR #30245: (rallytime) Boto secgroup/iam_role: Add note stating us-east-1 is default region @ 2016-01-12 20:04:31 UTC
- **PR #30155**: (rallytime) Update boto_secgroup and boto_iam_role docs to only use region OR profile (refs: #30245)
  - dbe7bdcc9a Merge pull request #30245 from rallytime/botosecgroup-docs
  - 406a138ff6 Boto secgroup/iam_role: Add note stating us-east-1 is default region

- **PR #30299**: (rallytime) ESXi Proxy minions states are located at salt.states.esxi, not vsphere. @ 2016-01-12 20:03:31 UTC
  - 6b183778f1 Merge pull request #30299 from rallytime/esxi-proxy-doc-fix
  - db68fc48a8 Fix CLI Example syntax
  - 1cbf92f798 ESXi Proxy minions states are located at salt.states.esxi, not vsphere.

- **PR #30202**: (opdude) Fixed the periodic call to beacons @ 2016-01-12 19:58:44 UTC
  - 903289d3fb Merge pull request #30202 from Unity-Technologies/hotfix/beacon_periodic
  - ea7a86f7a7d Fixed the periodic call to beacons

- **PR #30303**: (jacobhammons) Changed notes to indicate that functions are matched using regular ex... @ 2016-01-12 19:15:16 UTC
  - 48d2bd9e78 Merge pull request #30303 from jacobhammons/pcre-match
  - e5079ab4c9 Changed notes to indicate that functions are matched using regular expressions instead of minions

- **ISSUE #29684**: (snarfmonkey) Upgrade from 2015.8.1 to 2015.8.3 via apt for Ubuntu 14.04 causes Dulwich-backed gitfs to stop working (refs: #30284)

- **PR #30284**: (terminalmage) salt.utils.gitfs: Fix Dulwich env detection and submodule handling @ 2016-01-12 19:11:36 UTC
  - 675ac4b43f Merge pull request #30284 from terminalmage/issue29684
  - a746014f7e salt.utils.gitfs: Fix Dulwich env detection and submodule handling

- **PR #30280**: (jfindlay) add state mocking to release notes @ 2016-01-12 19:10:40 UTC
  - 8f65e822d7 Merge pull request #30280 from jfindlay/state_mock_doc
  - 22c1129f02 modules.state.sls,highstate: mock versionadded
  - 934de30939 add state mock to 2015.8.4 release notes

- **ISSUE #30117**: (MadsRC) Service beacons fails with Stacktraces (refs: #30273)  
  - PR #30273: (rallytime) Back-port #30121 to 2015.8 @ 2016-01-12 19:10:16 UTC
    - PR #30121: (MadsRC) Patch for issue #30117 (refs: #30273)
    - c9ade42d10 Merge pull request #30273 from rallytime/bp-30121
    - c8c3cf2015 I fail at linting... Fixed my uppercase/lowercase problem
    - 0877b35026 Fixed some linting issues
    - 8ec36497a1 Added note about systemctl and uncleanshutdown. Also fixed line length of comments to max 80 characters as per PEP0008
    - a50428d02c On an unclean shutdown, if uncleanshutdown is given a path, an key:value of shutdown:unclean is added to the returned data. The documentation states that the key should be ‘uncleanshutdown’ and that the value should either be True or False. This is fixed in the code
51b57f1820 Fixed issue number #30117 - When no parameters are given to a service, the service object is of type None and thus isn’t iterable. This is contrary to the documentation which states that there are default values. Default values added as False

**PR #30301:** (cachedout) Accept whatever comes into hightstate mock for state tests @ 2016-01-12 18:33:14 UTC
- 3a5a84a790 Merge pull request #30301 from cachedout/fix_state_tests
- 2c62b464b1 Accept whatever comes into hightstate mock for state tests

**ISSUE #28586:** (zmalone) file.append does not differentiate between tabs and spaces (refs: #30156)

**PR #30282:** (cachedout) Fix file.append logic @ 2016-01-12 18:27:30 UTC
- PR #30156: (abednarik) Add option in file.append to ignore_whitespace. (refs: #30282)
- 8438d19815 Merge pull request #30282 from cachedout/fix_30156
- 3f633ff15e Lint
- 99dd11dec2 Remove debugging
- 35ef585c54 Fix logic error in file.append

**PR #30289:** (cro) Fix problems with targeting proxies by grains @ 2016-01-12 18:16:57 UTC
- 530c9ec66c Merge pull request #30289 from cro/proxy_grains_fix
- 8362d76440 Add comments.
- 4e50962642 Merge branch 'proxy_grains_fix' of github.com:cro/salt into proxy_grains_fix
  * 61bb6a9a14 Lint.
  * 7c35333509 Force a grains sync after we load the proxy’s grains.
  * 2855ba7da5 Disallow non-proxyenabled modules and grains
- 8fd8f3beb7 Lint.
- 144f0e02e5 Force a grains sync after we load the proxy’s grains.
- 5ecf85017b Disable non-proxyenabled modules and grains

**PR #30293:** (cro) Ensure we don’t log stuff we shouldn’t @ 2016-01-12 18:04:25 UTC
- 75b83453ec Merge pull request #30293 from cro/proxy_log_cleanup
  - b358fe370c Merge remote-tracking branch ’origin/proxy_log_cleanup’ into proxy_log_cleanup
    - c9a5680427 Add unused ’output_loglevel’ kwarg. This is here for when we alias cmd.run_all directly to __run_all_quiet in certain chicken-and-egg situations where modules need to work both before and after the __salt__ dictionary is populated (cf dracr.py).
    - 8c46de12e4 Ensure we don’t log stuff we shouldn’t.
  - 3267d92216 Add unused ’output_loglevel’ kwarg. This is here for when we alias cmd.run_all directly to __run_all_quiet in certain chicken-and-egg situations where modules need to work both before and after the __salt__ dictionary is populated (cf dracr.py).
  - 6a86bdc6da Ensure we don’t log stuff we shouldn’t.

**PR #30279:** (cachedout) Allow modules to be packed into boto utils @ 2016-01-12 16:53:54 UTC
- 46681658e0 Merge pull request #30279 from cachedout/boto_pack
- 11d27ba694 Mock config module in utils test
- 62a1818287 Lint
- cf440036dd Remove unused import
- 36d55ea0ad Allow modules to be packed into boto utils

**ISSUE #29951**: (Reiner030) boto_ec2 params needed (refs: #30186)

**PR #30186**: (rallytime) Update CLI Examples in boto_ec2 module to reflect correct arg/kwarg positioning @ 2016-01-08 19:00:45 UTC
- 54b9641330 Merge pull request #30186 from rallytime/fix-29951
- a943b505cc Update CLI Examples in boto_ec2 module to reflect correct arg/kwarg positioning

**ISSUE #28586**: (zmalone) file.append does not differentiate between tabs and spaces (refs: #30156)

**PR #30156**: (abednarik) Add option in file.append to ignore_whitespace. (refs: #30282) @ 2016-01-08 16:07:23 UTC
- 1256fd11e1 Merge pull request #30156 from abednarik/ignore_whitespace_file_append
- af68086e5e Add option in file.append to ignore_whitespace.

**PR #30189**: (rallytime) Back-port #30185 to 2015.8 @ 2016-01-07 23:32:05 UTC
- **PR #30185**: (cachedout) Fix #30118 (refs: #30189)
- **PR #30118**: (thatch45) State mock (refs: #30185, #30189)
- ad7522e98d Merge pull request #30189 from rallytime/bp-30185
- 70681bf03b Fix for mock state PR #30118
- f9480f66d8 change arg to mocked to try test suite collision fix
- 2fbdca703 fix some typos
- 6f757b8c81 Add Mock to state.sls
- fb0cbd185e fix issue where the name may be in 2 places
- 5f0326e521 Start on the state mock system

**ISSUE #9319**: (gravyboat) Update Reactor docs with an example using salt-cloud from the commandline. (refs: #30215)

**ISSUE #8146**: (basepi) Make implications of extra accepted keys on timeouts more obvious (refs: #30215)

**ISSUE #6853**: (Psycojoker) Salt formulas should be way more visible in the documentation (refs: #30215)

**ISSUE #4381**: (mlister2006) peer_run: glob, pcre matching. Better docs (refs: #30215)

**ISSUE #2229**: (alekibango) how to debug zeromq problem with hanging salt communication? (refs: #30215)

**ISSUE #15042**: (cvrebert) percent signs not escaped in cron commands (refs: #30215)

**ISSUE #14946**: (ryan-lane) reload_modules not documented in global state arguments documentation (refs: #30215)

**ISSUE #13777**: (gravyboat) Update top module docs with more concise examples (refs: #30215)

**ISSUE #13036**: (tminn) salstack tomcat module (refs: #30215)

**PR #30215**: (jacobhammons) Assorted doc bug fixes @ 2016-01-07 21:53:27 UTC
- 8f30f7045a Merge pull request #30215 from jacobhammons/doc-issues
- 44ce704206 Updated zmq_monitor docs
- 0d211d397 Assorted doc bug fixes
Salt Documentation, Release 3000.1

- **ISSUE #30204**: (anlutro) salt can't find local cache return file (refs: #30206)
- **PR #30206**: (cachedout) Revert "Fix incorrect file permissions in file.line" @ 2016-01-07 17:55:48 UTC
  - 2000800915 Merge pull request #30206 from cachedout/revert_30168
  - ee786293e7 Revert "Fix incorrect file permissions in file.line"
- **PR #30190**: (jacobhammons) Updated doc site banners @ 2016-01-06 22:37:34 UTC
  - 5632cc6679c Merge pull request #30190 from jacobhammons/banners
  - 26602ba1f18 Updated doc site banners
- **ISSUE #30171**: (jamus) Python 2.7 dependency in x509.py (refs: #30180)
- **PR #30180**: (jfindlay) modules.x509._dec2hex: add fmt index for 2.6 compat @ 2016-01-06 19:48:50 UTC
  - 9a83247992 Merge pull request #30180 from jfindlay/2.7x509
  - 907469d04a modules.x509._dec2hex: add fmt index for 2.6 compat
- **PR #30179**: (terminalmage) Backport #26962 to 2015.8 branch @ 2016-01-06 19:48:30 UTC
  - PR #26962: (ctrlrsf) Add --state-verbose command line option to salt cmd (refs: #30179)
  - 65165b5d20 Merge pull request #30179 from terminalmage/bp-26962
  - 0f2021f52 Fix pylint warnings: unnecessary parens after if keyword
  - 2ec71216a1 Add --state-verbose command line option to salt cmd
- **ISSUE #29654**: (schaarsc) ssh_auth should report missing source (refs: #29693)
- **PR #29693**: (abednarik) Handle missing source file in ssh_auth. @ 2016-01-06 17:13:06 UTC
  - 27df7276bc Merge pull request #29693 from abednarik/handle_missing_source_in_ssh_auth
  - fc042e3cf4 Handle missing source file in ssh_auth.
- **ISSUE #29078**: (Reiner030) boto_secgroup didn’t work as expected in Debian Jessie (refs: #30155)
- **PR #30155**: (rallytime) Update boto_secgroup and boto_iam_role docs to only use region OR profile (refs: #30245) @ 2016-01-06 17:09:50 UTC
  - f9863d9fb Merge pull request #30155 from rallytime/boto-secgroup-docfix
  - f0381a9559 Update boto_secgroup and boto_iam_role docs to only use region OR profile.
- **ISSUE #29905**: (Reiner030) pillar referencing for boto profiles seems not completely working right / docu missing (refs: #30158)
- **PR #30158**: (rallytime) Move _option(value) calls to __salt__['config.option'] in boto utils @ 2016-01-06 16:35:59 UTC
  - c3e68e2e73 Merge pull request #30158 from rallytime/fix-29905
  - 3321c5d4b0 Move _option(value) calls to __salt__['config.option'] in boto utils
- **ISSUE #29770**: (Ch3LL) disk.usage does not work on AIX (refs: #30160)
- **PR #30160**: (dmurphy18) Fix parsing disk usage for line with no number and AIX values in Kilos @ 2016-01-06 16:34:45 UTC
  - ec09a6812 Merge pull request #30160 from saltstack/aix_dskusage
  - 8450df0483 Fix parsing disk usage for line with no number and AIX values in Kilos
- **ISSUE #29919**: (abcfy2) State grains.append cannot append to a non-exist grain name. (refs: #30162)
• **PR #30162**: (rallytime) Update list_present and append grains state function docs to be more clear. @ 2016-01-06 16:33:25 UTC
  - f808ffbbbd Merge pull request #30162 from rallytime/fix-29919
  - 9bbd129c60 Update list_present and append grains state function docs to be more clear

• **ISSUE #28923**: (aabognah) passing argument with ‘=no’ to file.line (refs: #30163)

• **PR #30163**: (rallytime) Add warning about using "=" in file.line function @ 2016-01-06 16:32:39 UTC
  - 83245930a6 Merge pull request #30163 from rallytime/fix-28923
  - 0e4f91fca2 Add warning about using "=" in file.line function

• **PR #30164**: (basepi) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-01-06 16:28:59 UTC
  - 106efd258a Merge pull request #30164 from basepi/merge-forward-2015.8
  - d73a7d6c4d Merge remote-tracking branch 'upstream/2015.5' into merge-forward-2015.8
    * 9363d6f5b6 Merge pull request #30125 from abednarik/update_user_home
      - 56544a77f6 Update user home event when createhome is set to False
    * 1a5d585d91 Merge pull request #30127 from jsutton/clarify-documenation-for-random_master
      - 01dbf385ef Adding random_master to reference and updating master_shuffle. Adding master_shuffle to the minion example config file as it is needed for multi-master PKI.
    * 28b1bbbe77 Merge pull request #30110 from markckimball/fix-verify_ssl-in-joyent-cloud
      - e1c08eb269 Fixed flag sent to salt.utils.http in order for verify_ssl to work appropriately.
    * 040412b0b1 Merge pull request #30093 from zmalone/pillar-notes
      - cbf658afe Noting that file_roots and "state tree" should both be avoided, because in some environments, the actual states show up another level down. Adding notes about why this is undesirable.
    * 25edefc93a Merge pull request #30097 from cachedout/note_on_password_process_list
      - 58ace884ef Note concern about cleartext password in docs for shadow.gen_password
    * 6b1c3a6bf2 Merge pull request #30089 from mpreziuso/patch-1
      - 50533add40 Fixes terminology and adds more accurate details about the algorithms
    * 200d09385d Merge pull request #30086 from cachedout/issue_29921
      - 8c29e2dd6a Document that gitfs needs recent libs
    * 404414bf57 Merge pull request #30070 from cachedout/issue_27835
      - 60431e342a Add documentation on debugging salt-ssh

• **ISSUE #30150**: (rapenne-s) file.line reset permissions to 600 (refs: #30212, #30168)

• **PR #30154**: (Oro) Fix file serialize on windows @ 2016-01-05 18:08:40 UTC
  - bed38da02b9 Merge pull request #30154 from Oro/fix-file-serialize-windows
  - 071a67f8a Fix file serialize on windows
• **PR #30144**: *(rallytime)* Added generic ESXCLI command ability to ESXi Proxy Minion @ 2016-01-05 16:23:38 UTC
  - 7d51d8bb46 Merge pull request #30144 from rallytime/vsphere-esxcli-cmd
  - 2f9ec5db96 Added generic ESXCLI command ability to ESXi Proxy Minion

• **ISSUE #29994**: *(adithep)* dockerng.push should not auto tag :latest (refs: #30142)

• **ISSUE #29993**: *(adithep)* Dockerng as a whole is not compatible with v2 registries. (refs: #30142)

• **PR #30142**: *(terminalmage)* Fix dockerng.push, and allow for multiple images @ 2016-01-04 22:53:50 UTC
  - 1a21b3d46b Merge pull request #30142 from terminalmage/issue29994
  - 66698986e4 Fix dockerng.push, and allow for multiple images

• **ISSUE #30051**: *(joejulian)* glusterfs.status fails with glusterfs 3.7 (refs: #30075)

• **PR #30075**: *(joejulian)* Convert glusterfs module to use xml (refs: #30405) @ 2016-01-04 20:33:58 UTC
  - 5419699bd2 Merge pull request #30075 from iodatacenters/2015.8_gluster_usexml
  - 01a8e7ee10 Convert glusterfs module to use xml

• **PR #30129**: *(optix2000)* Clean up __uptodate() in git state @ 2016-01-04 20:23:18 UTC
  - a6d94358ed Merge pull request #30129 from optix2000/2015.8
  - c65bac4909 Properly fix concat list issue in git state

• **PR #30139**: *(rallytime)* Back-port #29589 to 2015.8 @ 2016-01-04 20:22:47 UTC
  - PR #29589: *(abednarik)* Added lxc in virt-what list. (refs: #30139)
  - 68dfa0f5de Merge pull request #30139 from rallytime/bp-29589
  - 2c73990ff2 Added lxc in virt-what list.

• **ISSUE #28814**: *(peter-slovak)* The "virtual" grain detection with virt-what on LXC incorrectly yields "physical" (refs: #29589)

• **PR #30139**: *(rallytime)* Back-port #29589 to 2015.8 @ 2016-01-04 20:22:47 UTC
  - PR #29589: *(abednarik)* Added lxc in virt-what list. (refs: #30139)
  - 68dfa0f5de Merge pull request #30139 from rallytime/bp-29589
  - 2c73990ff2 Added lxc in virt-what list.

• **ISSUE #29833**: *(iMilnb)* salt minion won't start: Non valid IP address match on BSD alias format (refs: #30124)

• **PR #30124**: *(abednarik)* Update regex to detect ip alias in OpenBSD. @ 2016-01-04 19:48:28 UTC
  - dd8d3ef6b Merge pull request #30124 from abednarik/fix_openbsd_ip_alias
  - 595a12977d Update regex to detect ip alias in OpenBSD.

• **PR #30133**: *(stanislavb)* Fix typo in gpgkey URL @ 2016-01-04 19:29:57 UTC
  - c3014bca44 Merge pull request #30133 from stanislavb/fix-gpg-key-url-typo
  - d81f6f2706 Fix typo in gpgkey URL

• **ISSUE #29912**: *(rterbush)* s3 ext_pillar fails if key and keyid are not provided (refs: #30126)

• **PR #30126**: *(stanislavb)* Log S3 API error message @ 2016-01-04 19:22:39 UTC
  - c06671a259 Merge pull request #30126 from stanislavb/2015.8

• **PR #30128**: *(oeuftete)* Log retryable transport errors as warnings @ 2016-01-04 19:15:31 UTC
  - aeec21ea65 Merge pull request #30128 from oeuftete/fileclient-attempt-error-to-warning
- a5d99b13e1 Log retryable transport errors as warnings

- **ISSUE #28171**: (srkunze) cron.rm cannot remove @special entries (refs: #30096)

- **PR #30096**: (cachedout) Add rm_special to crontab module @ 2016-01-01 00:56:08 UTC
  - 941bcaed07 Merge pull request #30096 from cachedout/issue_28171
  - 259a0582ac Add docs
  - ad9424820e Add rm_special to crontab module

- **PR #30106**: (techhat) Ensure last dir @ 2016-01-01 00:52:54 UTC
  - cb0f80831f Merge pull request #30106 from techhat/seeddirs
  - 01d1a49937 Ensure last dir

- **PR #30101**: (gtmanfred) fix bug where nova driver exits with no adminPass @ 2015-12-31 13:45:16 UTC
  - 6bc968db9a Merge pull request #30101 from gtmanfred/2015.8
  - 1b98f7af38 fix bug where nova driver exits with no adminPass

- **PR #30090**: (techhat) Add argument to isdir() @ 2015-12-30 22:41:02 UTC
  - 3652dbae76 Merge pull request #30090 from techhat/seeddirs
  - f7c7d9c7c2 Add lstrip
  - c70257163b Add argument to isdir()

- **PR #30094**: (rallytime) Fix doc formatting for cloud.create example in module.py state @ 2015-12-30 22:40:24 UTC
  - a12bd4a3b0 Merge pull request #30094 from rallytime/module_state_doc_fix
  - 818ee322b9 Fix doc formatting for cloud.create example in module.py state

- **PR #30095**: (rallytime) Add the list_nodes_select function to linode driver @ 2015-12-30 21:06:58 UTC
  - d7f4b5438 Merge pull request #30095 from rallytime/select_query_linode
  - 4731d9442e Add the list_nodes_select function to linode driver

- **ISSUE #28763**: (cybacolt) grain saltversioninfo not returning values by index (refs: #30082)

- **PR #30082**: (abednarik) Fixed saltversioninfo grain return @ 2015-12-30 18:23:17 UTC
  - dce64c0868 Merge pull request #30082 from abednarik/fixed_grain_saltversion_index
  - 882e9ac9ed Fixed saltversioninfo grain return.

- **PR #30084**: (rallytime) Back-port #29987 to 2015.8 @ 2015-12-30 18:19:09 UTC
  - **PR #29987**: (pass-by-value) Make sure output file works for salt cloud (refs: #30084)
  - 5602ba8833 Merge pull request #30084 from rallytime/bp-29987
  - 16e1df90e9 Make sure output file works for salt cloud

- **PR #30071**: (rallytime) Merge branch '2015.5' into '2015.8' @ 2015-12-29 23:18:00 UTC
  - 654cab0314 Merge pull request #30071 from rallytime/merge-forward-2015.8
  - 3947548e5 Additional spelling fixes for boto_vpc module
  - f7e58a241c Merge branch '2015.5' into '2015.8'
    * 84db12212d Merge pull request #30059 from mpreziuso/patch-1

---

28.2. Previous Releases 5013
• 1cb1c2da07 Fixes wrong function scope
  • 1c6c9b1a06 Merge pull request #30025 from jtand/boto_tests
    • e706642152 Skipping some Boto tests until resolved moto issue
  • 0f91021c59 Merge pull request #29949 from aletourneau/2015.5
    • cf855fe262 Fixed trailing white spaces
    • 864801e002 fixed version
    • 041d9346c4 Enhanced netscaler docstring
  • 229d3eb60b Merge pull request #29941 from cachedout/boto_spelling
    • b11bf07b8 Fix spelling error in boto_vpc
  • 69c5ada636 Merge pull request #29908 from cachedout/issue_29880
    • 4cd77b4118 Allow kwargs to be passed to pacman provide for update func
  • ad0de4d563 Merge pull request #29909 from abednarik/freebsd_pkgng_non_interactive_fix
    • 8ac213001a FreeBSD pkgng fix for non-interactive install.

• PR #30067: (ryan-lane) Pass in kwargs to boto_secgroup.convert_to_group_ids explicitly @ 2015-12-29 23:04:33 UTC
  • 1bf9853808 Merge pull request #30067 from lyft/boto-elb-stable-fix
  • ae22ed1b4 Pass in kwargs to boto_secgroup.convert_to_group_ids explicitly

• PR #30069: (techhat) Ensure that pki_dir exists @ 2015-12-29 23:03:23 UTC
  • 0a37c4de1a Merge pull request #30069 from techhat/seeddirs
  • 0f05d49dbe Ensure that pki_dir exists

• ISSUE #30045: (AkhterAli) salt-cloud make syndic not possible. (refs: #30064)

• PR #30064: (rallytime) Add Syndic documentation to miscellaneous Salt Cloud config options @ 2015-12-29 20:15:45 UTC
  • 896655602e Merge pull request #30064 from rallytime/fx3-30045
  • 6176f385e5 Spelling fixes
  • 83c05729d6 Add Syndic documentation to miscellaneous Salt Cloud config options

• PR #30049: (rallytime) Add some more unit tests for the vsphere execution module @ 2015-12-29 17:07:41 UTC
  • baddaca93 Merge pull request #30049 from rallytime/esxi-unit-tests
  • 1a83147986 Remove unnecessary import block
  • 695107ae6e Add some more unit tests for the vsphere execution module

• PR #30060: (rallytime) Back-port #27104 to 2015.8 @ 2015-12-29 17:06:58 UTC
  • PR #27104: (hexedpackets) Remove only the file extension when checking missing cached nodes. (refs: #30060)
    • cedee772d7 Merge pull request #30060 from rallytime/bp-27104
    • f0566c4b8f Remove only the file extension on cached node files instead of replacing every ’.p’ substring.

• ISSUE #28540: (whiteinge) The rest_cherrypy automodule docs are hard to digest (refs: #30048)

• PR #30048: (jacobhammons) Remove internal APIs from rest_cherrypy docs. @ 2015-12-28 23:24:13 UTC
• ISSUE #29960: (anlutro) Circular import in salt.utils.jinja (refs: #30043)

• PR #30043: (rallytime) Be explicit about importing from salt.utils.jinja to avoid circular imports @ 2015-12-28 21:35:18 UTC
  - 3c63527313 Merge pull request #30043 from rallytime/fix-29960
  - a157c78bc8 Be explicit about importing from salt.utils.jinja to avoid circular imports

• PR #30038: (rallytime) Back-port #30017 to 2015.8 @ 2015-12-28 20:41:45 UTC
  - PR #30017: (anlutro) Change how alternatives states check for installed (refs: #30038)
  - 6cdca314c7 Merge pull request #30038 from rallytime/bp-30017
  - aab35b883e Add versionadded directive for new check_exists function.
  - ca290ec3e1 change how alternatives states check for installed

• PR #30036: (rallytime) Back-port #29995 to 2015.8 @ 2015-12-28 20:41:04 UTC
  - PR #29995: (ruxandraburtica) Location from profiles not correctly set (refs: #30036)
  - e8a6e7bc86 Merge pull request #30036 from rallytime/bp-29995
  - 129a6d7b9f Added vm_ to the get_location query.
  - af8d01a367 Updated ec2 file to correctly propagate location.

• PR #30035: (rallytime) Back-port #29895 to 2015.8 @ 2015-12-28 20:20:58 UTC
  - PR #29895: (pass-by-value) Do not SSH to the instance if deploy is False (refs: #30035)
  - 27b0bd2c34 Merge pull request #30035 from rallytime/bp-29895
  - 09f208fe63 Do not SSH to the instance if deploy is False

• PR #30034: (rallytime) Back-port #29893 to 2015.8 @ 2015-12-28 20:20:51 UTC
  - PR #29893: (pass-by-value) Add info about VolumeType (refs: #30034)
  - 9e385369b7 Merge pull request #30034 from rallytime/bp-29893
  - 2fcd1590b8 Add info about VolumeType

• PR #30033: (rallytime) Back-port #29876 to 2015.8 @ 2015-12-28 20:20:42 UTC
  - PR #29876: (abednarik) Updated Cloud msc section. (refs: #30033)
  - 4d4df692a Merge pull request #30033 from rallytime/bp-29876
  - a257249789 Add versionadded to SSH Port docs
  - 0bb83e51aa Updated Cloud msc section.

• PR #30029: (terminalmage) git.latest: Fix handling of nonexistent branches @ 2015-12-28 19:39:29 UTC
  - a5f7d9c2fc Merge pull request #30029 from terminalmage/git.latest-nonexistant-branch
  - 0b958949f9 git.latest: Fix handling of nonexistent branches

• PR #30016: (anlutro) Properly normalize locales in locale.gen_locale @ 2015-12-28 15:33:48 UTC
  - e7fe24dc64 Merge pull request #30016 from alprs/fix-gen_locale_normalize
  - 75eb4511d3 properly normalize locales in locale.gen_locale

28.2. Previous Releases
• PR #30015: (anlutro) locale module: don’t escape the slash in \n @ 2015-12-28 15:31:20 UTC
  - 9061e95f4 Merge pull request #30015 from alprs/fix-gen_locale_escaped_newline
  - 5799729ae locale module: don’t escape the slash in n
• PR #30022: (gqgunhed) Two minor typos fixed @ 2015-12-28 15:22:24 UTC
  - b871ce5310 Merge pull request #30022 from gqgunhed/winrepo_typo
  - a052f016e fixed minor typos and a :ref: link
  - e47db1a076 Merge remote-tracking branch 'refs/remotes/saltstack/2015.8' into winrepo_typo
  - 0c4c8b9b5c Merge remote-tracking branch 'refs/remotes/saltstack/2015.8' into 2015.8
• PR #30026: (anlutro) states.at: fix wrong variable being used @ 2015-12-28 15:21:23 UTC
  - 4b8ac20d45 Merge pull request #30026 from alprs/fix-at_without_tag_job
  - c0fe9c09bd states.at: fix wrong variable being used
• PR #29966: (multani) Fix bigip state/module documentation + serializers documentation @ 2015-12-23 15:06:46 UTC
  - a3410f3f41 Merge pull request #29966 from multani/fix/docs
  - e63e3672a4 doc: fix documentation link for salt.serializers
  - 23ef472a07 bigip: fix documentation formatting, remove warnings during doc building
• PR #29904: (twangboy) Improvements to osx packaging scripts @ 2015-12-22 21:40:23 UTC
  - PR #29858: (twangboy) Osx build (refs: #29904)
  - 8f8c8cedd0 Merge pull request #29904 from twangboy/osx_build
  - 0be53953af Added function to download and check hashes, added hash files
  - 7f0b87bfb3 Added pre/post flight scripts (not running)
  - 9eeb6da7bd Improvements to osx packaging scripts
• PR #29950: (multani) boto_iam: fix deletion of IAM users when using delete_keys=true @ 2015-12-22 18:43:07 UTC
  - 9522bdf4a5 Merge pull request #29950 from multani/fix/states.boto_iam-delete-user
  - 516c8661f4 boto_iam: fix deletion of IAM users when using delete_keys=true
• PR #29937: (multani) Fix states.boto_iam group users @ 2015-12-22 17:33:02 UTC
  - be95d4d79a Merge pull request #29937 from multani/fix/states.boto_iam-group-users
  - 5c86a78d75 boto_iam: handle group’s users empty list by removing all users of the group
  - f3461053d boto_iam: passes connection information down to callees
• PR #29934: (multani) Fix state.boto_iam virtual name @ 2015-12-22 17:16:25 UTC
  - 4f2cc5eba7 Merge pull request #29934 from multani/fix/boto_iam
  - 503ed4e178 Fix state.boto_iam virtual name
• ISSUE #29933: (Reiner030) boto_rds.absent misses pillar variables for final backup (refs: #29943)
• PR #29943: (cachedout) Check args correctly in boto_rds @ 2015-12-22 17:15:48 UTC
  - b36302291d Merge pull request #29943 from cachedout/issue_29933
  - 8bab5ea4aa Check args correctly in boto_rds
• **PR #29924**: (gqgunhed) fixed: uptime now working on non-US Windows @ 2015-12-22 15:03:17 UTC
  - 02ed5b8fd1 Merge pull request #29924 from gqgunhed/gqgunhed-2015.8
  - b67c3b45e1 removed duplicate datetime line
  - ed8ee91dfc fixed: uptime now working on non-US Windows

• **PR #29883**: (serge-p) fix for nfs mounts in _active_mounts_openbsd() @ 2015-12-21 18:26:49 UTC
  - 5e44639334 Merge pull request #29883 from serge-p/patch-6
  - dd93324f24 Update mount.py
  - 9d059a1eae5 fix for nfs mounts in _active_mounts_openbsd()

• **ISSUE #29866**: (tony) spm(1) command should obey Saltfile (refs: #29894)

• **PR #29894**: (techhat) Support Saltfile in SPM @ 2015-12-21 18:03:07 UTC
  - 08fd81cc3d Merge pull request #29894 from techhat/spmsaltfile
  - 279ec61274 Support Saltfile in SPM

• **PR #29856**: (rallytime) Added some initial unit tests for the salt.modules.vsphere.py file @ 2015-12-21 17:12:20 UTC
  - 4f46255044 Merge pull request #29856 from rallytime/esxi-unit-tests
  - b908ebd123 Added some initial unit tests for the salt.modules.vsphere.py file

• **PR #29855**: (rallytime) Back-port #29740 to 2015.8 @ 2015-12-21 17:11:28 UTC
  - **PR #29740**: (kiorky) Type mess in git.latest (refs: #29855)
  - 096fec6182 Merge pull request #29855 from rallytime/bp-29740
  - 4c5e277367 Type mess in git.latest

• **PR #29890**: (multani) Various documentation fixes @ 2015-12-21 16:25:15 UTC
  - 02ab9b8858 Merge pull request #29890 from multani/fix/docs
  - 5a0a9b1e0 Fix documentation typo for pillars
  - f2b41d04d7 Fix rendering issues for Cherrypy netapi documentation.
  - 6922da46dc doc: fix warnings + some rendering issues

• **PR #29850**: (basepi) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2015-12-18 21:33:49 UTC
  - 50f48c4bf3 Merge pull request #29850 from basepi/merge-forward-2015.8
  - 7402599c62 Merge remote-tracking branch 'upstream/2015.5' into merge-forward-2015.8
  - f43f3d166c Merge pull request #29730 from rallytime/fix-24698
    - 120fd5fd0 Update docker-py version requirement to 0.6.0 for dockerio.py files
  - c393a4175a Merge pull request #29715 from rallytime/fix-23343
    - a0ed857c37 Install correct package version, if provided, for npm state.
  - 1310f2b62c Merge pull request #29721 from terminalmage/nested-output-multiline-fix
    - 761be9cb93 Fix display of multiline strings when iterating over a list
  - 52cc07cc09 Merge pull request #29646 from rallytime/fix-29488
    - c5f9e9351 Don't stacktrace on kwargs.get if kwargs=None
• PR #29811: (anlutro) influxdb: add retention policy module functions @ 2015-12-18 17:19:02 UTC
  - 05d2aaaef2 Merge pull request #29811 from alprs/feature-influxdb_retention
  - 51088d938a add tests, rename a function to more closely mirror influxdb
  - 785da17a67 missing comma
  - 7e9e9a1030 influxdb: add retention policy module functions

• ISSUE #29396: (Ch3LL) Windows 2012 Multi-Master ZMQError (refs: #29814)

• PR #29814: (basepi) [2015.8][Windows] Fix multi-master on windows @ 2015-12-18 17:16:52 UTC
  - 7eefaac58a Merge pull request #29814 from basepi/multi-master.windows.29396
  - 2405501d75 Add documentation for tcp ipc_mode and multi-master
  - 307e867980 For tcp ipc_mode, give each minion different pub/pull ports
  - 5a21893e82 Fix ipc_mode check in windows

• PR #29819: (rallytime) Add esxi module and state to docs build @ 2015-12-18 16:20:27 UTC
  - fb4eb28645 Merge pull request #29819 from rallytime/esxi-docs
  - e7c5863468 Add esxi module and state to docs build

• PR #29832: (jleimbach) Fixed typo in order to use the keyboard module for RHEL without systemd @ 2015-12-18 16:04:57 UTC
  - e865c787a4 Merge pull request #29832 from jleimbach/fix-keyboard.py-for-rhel-without-systemd
  - 7b72b3c52c Fixed typo in order to use the keyboard module for RHEL without systemd

• PR #29803: (rallytime) Add vSphere module to doc ref module tree @ 2015-12-17 18:52:56 UTC
  - 404f3bb93 Merge pull request #29803 from rallytime/vsphere-docs
  - 3b7f5540ec Add vSphere module to doc ref module tree

• ISSUE #29751: (ether42) mod_hostname behavior is systemd dependant (refs: #29767)

• PR #29767: (abednarik) Hosts file update in mod_hostname. @ 2015-12-17 18:31:18 UTC
  - 9b4c2194f6 Merge pull request #29767 from abednarik/network_mod_hpstname_fix
  - eebd3e3e4a Hosts file update in mod_hostname.

• ISSUE #29631: (joshughes) pygit2: git submodules cause traceback in file_list (refs: #29772)

• PR #29772: (terminalmage) pygit2: skip submodules when traversing tree @ 2015-12-17 18:23:16 UTC
  - 0c65eeb82b Merge pull request #29772 from terminalmage/issue29631
  - 8c4ea6b0d pygit2: skip submodules when traversing tree

• PR #29765: (gtmanfred) allow nova driver to be boot from volume @ 2015-12-17 18:20:33 UTC
  - 1b430b251f Merge pull request #29765 from gtmanfred/2015.8
  - e95f7561c5 cloudnetworks should be making public_ips a list
  - ec7e45fbbf add documentation for boot from volume on nova driver
  - eafcc5e3ac Add boot from volume for openstack nova

• PR #29773: (l2ol33rt) Append missing wget in debian installation guide @ 2015-12-17 17:29:18 UTC
  - c4f226f31e Merge pull request #29773 from l2ol33rt/debian_install_docfix
- 64cb4b0540 Append missing wget in debian installation guide

- **PR #29800:** (rallytime) Back-port #29769 to 2015.8 @ 2015-12-17 17:28:52 UTC
  - PR #29769: (pass-by-value) Add documentation about scopes (GCE) (refs: #29800)
  - aca4da3abc Merge pull request #29800 from rallytime/bp-29769
  - 10bfc8cb0 Add documentation about scopes (GCE)

- **PR #29775:** (paulnivin) Change listen requisite resolution from name to ID declaration @ 2015-12-16 22:56:03 UTC
  - ab61f78295 Merge pull request #29775 from lyft/listen-id-declaration-resolution-stable
  - ff3a809e11 Change listen requisite resolution from name to ID declaration

- **PR #29754:** (rallytime) Back-port #29719 to 2015.8 @ 2015-12-16 17:25:51 UTC
  - PR #29719: (gqgunhed) fixed: include all items from kern.disks split (refs: #29754)
  - 5af64b64f2 Merge pull request #29754 from rallytime/bp-29719
  - ed275977e3 fixed: include all items from kern.disks split

- **PR #29713:** (The-Loeki) Pillar-based cloud providers still forcing use of deprecated 'provider' @ 2015-12-16 14:51:31 UTC
  - PR #29753: (The-Loeki) Fix CloudStack cloud for new 'driver' syntax (refs: #29713)
  - b3f17fda8c Merge pull request #29713 from The-Loeki/patch-1
  - 35fe2a5c18 lint fix
  - dfa6b8186 Update __init__.py
  - 65e2d9a1e Pillar-based cloud providers still forcing use of deprecated 'provider'

- **ISSUE #14634:** (Sacro) 'unless' documentation isn’t logically plausible (refs: #29729)

- **PR #29729:** (rallytime) Further clarifications on "unless" and "onlyif" requisites. @ 2015-12-16 14:45:06 UTC
  - 1f4810be0f Merge pull request #29729 from rallytime/fix-14634
  - 45b77fb288 Add note about shell truthiness vs python truthiness
  - 3bfb87c031 lint fix
  - 1c9866c12 Further clarifications on "unless" and "onlyif" requisites.

- **ISSUE #29741:** (akissa) Pillar Sqlite3 examples incorrect (refs: #29737)

- **PR #29737:** (akissa) fix pillar sqlite3 documentation examples @ 2015-12-16 14:41:57 UTC
  - 7084f79199 Merge pull request #29737 from akissa/fix-pillar-sqlite3-examples
  - 1c9866c12 fix pillar sqlite3 documentation examples

- **ISSUE #29743:** (akissa) Pillar Sqlite3 does not honour database config option when using salt-call (refs: #29743)

- **PR #29743:** (akissa) fix pillar sqlite not honouring config options @ 2015-12-16 14:40:27 UTC
  - e977096409 Merge pull request #29743 from akissa/fix-pillar-sqlite3-does-not-honour-config
  - 6184f1a1e fix pillar sqlite not honouring config options

- **ISSUE #29152:** (guettli) docs for states.postgres_user.present: name and password twice? (refs: #29723)

- **PR #29723:** (rallytime) Clarify db_user and db_password kwargs for postgres_user.present state function @ 2015-12-15 23:58:43 UTC
- 2cea0b0a2d Merge pull request #29723 from rallytime/fix-29152
- 8d8fd0a27 Clarify db_user and db_password kwargs for postgres_user.present state function

**ISSUE #29154:** (guettli) [Docs] for cmd.run. Missing link to details for "stateful" (refs: #29722)

**PR #29722:** (rallytime) Link "stateful" kwargs to definition of what "stateful" means for cmd state. @ 2015-12-15 23:25:48 UTC
- 30eab23c43 Merge pull request #29722 from rallytime/fix-29154
- 5c045a86af Link "stateful" kwargs to definition of what "stateful" means for cmd state.

**ISSUE #29091:** (gravyboat) Salt pillar best practices should show 2 matchers in base (refs: #29724)

**PR #29724:** (rallytime) Add examples of using multiple matching levels to Pillar docs @ 2015-12-15 23:02:32 UTC
- c9ca1a371e Merge pull request #29724 from rallytime/fix-29091
- 45008f62ef Add examples of using multiple matching levels to Pillar docs

**PR #29726:** (cachedout) Disable some boto tests per resolution of moto issue @ 2015-12-15 22:15:35 UTC
- 4985cc57f1 Merge pull request #29726 from cachedout/disable_moto_2015_8
- d19825eb2f Disable some boto tests per resolution of moto issue

**ISSUE #25723:** (jamesog) file.directory fails in test mode when using recurse ignore_files (refs: #29708)

**PR #29708:** (lagesag) Fix test=True for file.directory with recurse ignore_files/ignore_dirs. @ 2015-12-15 19:15:14 UTC
- aba2abf6e Merge pull request #29708 from lagesag/file-directory-test-mode
- a872b5eef PyLint fix #25723
- 3e46cb9213 Fix test=True for file.directory with recurse ignore_files/ignore_dirs.

**ISSUE #29199:** (hubez) 2015.8.1 and 2015.5.6: salt-minion self-restart doesn’t work in daemon mode. Works when not a daemon (refs: #29642)

**PR #29642:** (cachedout) Correctly restart deamonized minions on failure @ 2015-12-15 19:02:40 UTC
- 7e38dec0ad Merge pull request #29642 from cachedout/issue_29199
- 8b2c681df Sleep before restart
- 4105e2abf Correctly restart deamonized minions on failure

**PR #29599:** (cachedout) Clean up minion shutdown @ 2015-12-15 19:01:35 UTC
- bd918394c3 Merge pull request #29599 from cachedout/clean_minion_shutdown
- 0b917971e Log at debug level instead
- a04280ceb3 Re-raise error to preserve restart behavior
- dc480e332a Clean up warning on failed master ping.
- 049a3d8b8b Additional fixes.
- 8a4969b730 Clean up minion shutdown

**PR #29675:** (clinta) allow returning all refs @ 2015-12-15 18:55:36 UTC
- 31eb291caf Merge pull request #29675 from clinta/git-ls-remote-noref
- f8c4b0c76 version updated
- 73b169e7dd lint, remove trailing whitespace
- 8400e68426 allow returning all refs

• PR #29683: (rallytime) Catch more specific error to pass the error message through elegantly. @ 2015-12-15 18:41:54 UTC
  - 7ce50533d3f Merge pull request #29683 from rallytime/vsan_fixes
  - afc03079e Catch more specific error to pass the error message through elegantly.

• PR #29687: (basepi) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2015-12-15 18:38:46 UTC
  - 30499e4896 Merge pull request #29687 from basepi/merge-forward-2015.8
  - b51cb59c0 Merge remote-tracking branch 'upstream/2015.5' into merge-forward-2015.8
    * f606c23ea8 Merge pull request #29673 from rallytime/fix-29661
      - e4af7a1157 Default value should be False and not 'False'
    * f77c8e7baf Merge pull request #29527 from jfindlay/2015.5
      - 1a8044f0c9 2015.5.7 notes: add note about not being released

• ISSUE #27611: (benburkert) PR #26818 broke git.latest with :mirror/:bare (refs: #29681)

• PR #29681: (clinta) fix bare/mirror in git.latest @ 2015-12-15 18:37:16 UTC
  - 3c427e82bf Merge pull request #29681 from clinta/git-mirror
  - b387072a6f fix bare/mirror in git.latest

• PR #29644: (rallytime) Fixed a couple more ESXi proxy minion bugs @ 2015-12-14 18:36:28 UTC
  - fe0778dad5 Merge pull request #29644 from rallytime/esxi-fixes
  - 577d5487a3 Fixed a couple more ESXi proxy minion bugs

• PR #29645: (rallytime) Back-port #29558 to 2015.8 @ 2015-12-14 18:11:38 UTC
  - PR #29558: (ruxandraburtica) Returning security group when no VPC id is given (refs: #29645)
  - ef2c9e36f61 Merge pull request #29645 from rallytime/bp-29558
  - 2cf934342 Replaced tabs with spaces.
  - 5e7e3f682 Returning security group when no VPC id is given, even if the group is not in EC2-classic.

• ISSUE #29630: (ev3t3) Fresh minion install (2015.8.3) returns service __virtual__ is False errors on salt-calls (refs: #29632)

• ISSUE #29581: (zmalone) Complaints about pyOpenSSL version on Saltstack 2015.8.3 (refs: #29632)

• PR #29632: (jfindlay) reduce severity of tls module __virtual__ logging @ 2015-12-11 20:11:32 UTC
  - a2a7f1527b Merge pull request #29632 from jfindlay/tls_virt
  - 3e0da052fd modules.tls.__virtual___. don’t spam everyone’s error log
  - 76a20e780 modules.tls.__virtual___. refactor cert path comment
  - 0a0532e598 modules.tls.__virtual___. remove redundant parens

• ISSUE #29598: (javicacheiro) Duplicated MTU entry added (refs: #29606)

• PR #29606: (abednarik) Fixed duplicate mtu entry in RedHat 7 network configuration. @ 2015-12-11 17:24:45 UTC
  - f6f3aa6613 Merge pull request #29606 from abednarik/remove_duplicate_mtu_entry_rh7_net_template
- afb2f887ba Fixed duplicate mtu entry in RedHat 7 network configuration.
- **PR #29613**: (rallytime) Various ESXi Proxy Minion Bug Fixes @ 2015-12-11 17:18:58 UTC
  - c7e73bc4c8 Merge pull request #29613 from rallytime/esxi-fixes
  - aa5dd88b6f Various ESXi Proxy Minion Bug Fixes
- **ISSUE #26364**: (cedwards) [freebsd] TCP transport not working in 2015.8.0.rc3 (refs: #29628)
- **PR #29628**: (DmitryKuzmenko) Don’t create io_loop before fork @ 2015-12-11 17:15:11 UTC
  - a56c763423 Merge pull request #29628 from DSRCompany/bug/26364_freebsd_tcp
  - 729ffca3e6 Don’t create io_loop before fork
- **PR #29609**: (basepi) [2015.8][salt-ssh] Add ability to set salt-ssh command umask in roster @ 2015-12-10 22:52:27 UTC
  - 41b8117237 Merge pull request #29609 from basepi/salt-ssh.umask.29574
  - 0afa5b0d5d Add cmd_umask to roster docs
  - 5c03f892bc Allow setting the cmd_umask from within the roster
- **ISSUE #29586**: (basepi) Orchestrate doesn’t handle minion error properly (refs: #29603)
- **ISSUE #29546**: (jefferyharrell) Can’t seem to get orchestrate to recognize a failed state (refs: #29603)
- **PR #29603**: (basepi) Fix orchestration failure-checking @ 2015-12-10 21:23:57 UTC
  - 1e39f5ab1 Merge pull request #29603 from basepi/orchestrate.failures.29546
  - 2bdcaada27 Remove unnecessary and
  - 501f91a388 Fix error in failure checking for salt.state within orchestration
- **ISSUE #29584**: (kwilliams057) dockerng image-present fails when trying to pull from registry (refs: #29597)
- **PR #29597**: (terminalmage) dockerng: Prevent exception when API response contains empty dictionary @ 2015-12-10 19:57:42 UTC
  - b5b80b9324 Merge pull request #29597 from terminalmage/issue29584
  - d68067b5db dockerng: Prevent exception when API response contains empty dictionary
- **ISSUE #29585**: (job) cidr argument in salt.modules.network.ip_addrs6() is broken (refs: #29587)
- **PR #29586**: (rallytime) Back-port #29587 to 2015.8 @ 2015-12-10 19:57:18 UTC
  - PR #29587: (job) Fix the 'cidr' arg in salt.modules.network.ip_addrs6() (refs: #29596)
  - fb54ced7 Merge pull request #29586 from rallytime/bp-29587
  - bf75ce363 Fix the 'cidr' arg in salt.modules.network.ip_addrs6()
- **PR #29588**: (rallytime) Added ESXi Proxy Minion Tutorial @ 2015-12-10 16:17:51 UTC
  - 08dd663a27 Merge pull request #29588 from rallytime/esxi-proxy-tutorial
  - 5a2b260d3 Added ESXi Proxy Minion Tutorial
- **ISSUE #29557**: (arthurlogilab) [modules/nova] AttributeError: 'module' object has no attribute 'discover_extensions' when using nova.image_list (refs: #29572)
- **PR #29572**: (gtmanfred) [nova] use old discover_extensions if available @ 2015-12-09 17:35:42 UTC
  - fe5bd23863 Merge pull request #29572 from gtmanfred/2015.8
  - d0ffa520f4 use old discover_extensions if available
• ISSUE #29009: (LoveIsGrief) git.latest doesn’t checkout submodules (refs: #29545)

• PR #29545: (terminalmage) git.latest: init submodules if not yet initialized @ 2015-12-09 16:19:42 UTC
  - ecb60ba05 Merge pull request #29545 from terminalmage/issue29009
  - 6619503ae6 git.latest: init submodules if not yet initialized

• PR #29548: (rallytime) Back-port #29449 to 2015.8 @ 2015-12-09 16:19:07 UTC
  - PR #29449: (AkhterAli) Adding message for null public IP (refs: #29548)
  - 3b2c93a2e5 Merge pull request #29548 from rallytime/bp-29449
  - 3715cd7d65 Adding message for null public IP

• PR #29547: (rallytime) Refactored ESXCLI-based functions to accept a list of esxi_hosts @ 2015-12-09 16:08:03 UTC
  - fd67903bf9 Merge pull request #29547 from rallytime/esxi-proxy
  - 469648dd07 Refactored ESXCLI-based functions to accept a list of esxi_hosts

• PR #29563: (anlutro) Fix a call to deprecated method in python-influxdb @ 2015-12-09 16:00:24 UTC
  - 21437f9235 Merge pull request #29563 from alprs/fix-influx_deprecated_method
  - 7c69c177ed update test
  - 46d7d92069 Fix a call to deprecated method in python-influxdb

• PR #29565: (bdrungr) Fix typos and missing release note @ 2015-12-09 15:59:21 UTC
  - f29e0a7021 Merge pull request #29565 from bdrung/2015.8
  - b96d8ff1d9 Minor update to release notes for missing fix
  - e72354aaac Fix typo specific --> specific
  - 5708355762 Fix typo comparsion --> comparison

• PR #29540: (basepi) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2015-12-08 21:27:01 UTC
  - 25d3a75d8c Merge pull request #29540 from basepi/merge-forward-2015.8
  - e59364ad1d Fix failing unit test
  - 9673fd0937 Merge remote-tracking branch 'upstream/2015.5' into merge-forward-2015.8
  * 867d550271 Merge pull request #29539 from basepi/merge-forward-2015.5
    * 2c9c4ba430 Merge remote-tracking branch 'upstream/2014.7' into merge-forward-2015.5
    * 85aa70a6cb Merge pull request #29392 from jacobhammons/2014.7
    * d7f0db1d88 updated version number to not reference a specific build from the latest branch
  * de7f3d5a59 Merge pull request #29504 from rallytime/fx-12072
    * 8357c95dc2 Document userdata_file option for EC2 driver
  * 65deba8bb5 Merge pull request #29507 from rallytime/ec2-doc-fix
    * 90b4823bc2 Switch volumes and del_*_on_destroy example ordering
  * 0918c9294f Merge pull request #29469 from abednarik/doc_note_for_saltcloud_connection_timeout
    * 8e5c3e366a Added Documentation note in salt cloud.
  * e43c7c05a6 Merge pull request #29461 from dmyerscough/fix-resource-limits

28.2. Previous Releases
85a8a3b033 Fix resource limits, systemd sets the default number of open files to 4096 causing master to complain about limits when you have a large number of keys

4a0040c1b4 [Doc] Add note for SVN state

PR #29499: (rallytime) Initial commit of ESXi Proxy Minion @ 2015-12-08 21:10:13 UTC
3ae096b7ac Merge pull request #29499 from rallytime/esxi-proxy
d8b1ba3991 Make sure ESXCLI gating is correct in vsphere __virtual__
55589f8021 Provide some more inline comments for longer functions
baf2f8ce7a Pylint fix
- 763ae5d676 VMotion functions, gate ESXCLI requirement, allow protocol/port for ESXCLI function
- d909df254e Bug fixes for esxi states
- 7102677679 Bug fixes and move ntp and ssh service start/stop/restart to single funcs
- 77b37add84 Added syslog_configured state, and some minor bug fixes
- df49f533f6 More state functions and a couple of bug fixes
- a50c74cefe2 Merge pull request #13 from cro/esxi-proxy
  - 87fc980f33 Add syslog config and network firewall rules enable
- 42be49f481 Merge pull request #11 from cro/esxi-proxy
  - d858642f05 Add documentation.
  - 43879d1dfe Functions for setting network coredumps
- 7d7d2afa7f Initial commit of ESXi state and refactored vsan_add_disks to include a get function.
- bc945a48db Add execution module functions to upload ssh key for root and retrieve ssh key for root.
- 238b0f5bea Update error return policy and add service running/policy functions
- 9ba019419 Initial commit of ESXi proxy work.
  - PR #29526: (jfindlay) 2015.8.2 notes: add note about not being released @ 2015-12-08 21:09:50 UTC
    - 873f6a9460 Merge pull request #29526 from jfindlay/2015.8
    - 9176f850c 2015.8.2 notes: add note about not being released
- ISSUE #29484: (m7v8) patchlevel detection broken for openSuSE (refs: #29531)
- PR #29531: (jfindlay) grains.core: handle undefined variable @ 2015-12-08 21:07:38 UTC
  - 3de61c3655 Merge pull request #29531 from jfindlay/suse_patch
  - 1ad5a088fc grains.core: handle undefined variable
- ISSUE #29486: (m7v8) Pull request breaks our setup (umask) (refs: #29538)
- ISSUE #29005: (fcrozat) non-standard umask breaks salt-call call in salt-ssh (refs: #29126)
- ISSUE #28830: (fcrozat) non-standard umask breaks salt-ssh deployement (refs: #29126)
- PR #29538: (basepi) [2015.8] [salt-ssh] Remove umask around actual execution for salt-ssh @ 2015-12-08 20:45:58 UTC
  - PR #29126: (fcrozat) Fix deployment when umask is non-standard (refs: #29538)
  - 1d8014411a Merge pull request #29538 from basepi/salt-ssh.umask.29486
  - 5edfa014f5 Remove umask around actual execution for salt-ssh
- ISSUE #28715: (mlalpho) Tagging Resources with boto_rds (refs: #29505)
- PR #29505: (rallytime) Update boto_rds state docs to include funky yaml syntax for "tags" option. @ 2015-12-08 17:05:02 UTC
  - fb02fc1ef1 Merge pull request #29505 from rallytime/fix-28715
  - f43f851a92 Update boto_rds state docs to include funky yaml syntax for "tags" option.
- PR #29513: (bdrung) Drop obsolete syslog.target from systemd services @ 2015-12-08 16:05:01 UTC
  - 38888add5e Merge pull request #29513 from bdrung/2015.8
  - b1a4ade618 Drop obsolete syslog.target from systemd services
- **PR #29500**: (rallytime) Back-port #29467 to 2015.8 @ 2015-12-07 23:24:00 UTC
  - **PR #29467**: (serge-p) Update module.py (refs: #29500)
  - 148dad6674 Merge pull request #29500 from rallytime/bp-29467
  - ca0be8bf0 Update module.py
- **ISSUE #29001**: (olfway) debconf.set doesn’t support ”prereq” in states (refs: #29463)
- **PR #29463**: (abednarik) Add **kwargs to debconf.set. @ 2015-12-07 19:56:05 UTC
  - 9d11acc7db Merge pull request #29463 from abednarik/debconf_fix_prereq_support
  - b17f1fed43 Add **kwargs to debconf.set.
- **ISSUE #29311**: (Reiner030) Feature Request: System uptime also in seconds (refs: #29399)
- **PR #29399**: (jfindlay) modules.status: add human_readable option to uptime @ 2015-12-07 19:53:52 UTC
  - 7ef6dd140 Merge pull request #29399 from jfindlay/second_up
  - 1903124814 modules.win_status: add reason to virtual ret
  - 35ba7da470 modules.status: add reason to __virtual__ return
  - 48e7be0eb modules.status: add in_seconds option to uptime
- **PR #29433**: (cro) Files for building .pkg files for MacOS X @ 2015-12-07 19:47:23 UTC
  - 042daf91b8 Merge pull request #29433 from cro/mac_native_pkg
  - 8e191ae264 Add web references
  - 5f1459d708 Update mac packaging
  - 092b7ddd0a First crack at build files for Mac OS X Native package
- **ISSUE #29445**: (shawnbutts) salt.loaded.int.module.nova.__virtual__() is wrongly returning None. (refs: #29455)
- **PR #29455**: (jfindlay) modules.nova.__init__: do not return None @ 2015-12-07 19:44:00 UTC
  - 5ff3749108 Merge pull request #29455 from jfindlay/nova_none
  - 19da8233c8 modules.nova.__init__: do not return None
- **PR #29454**: (jfindlay) rh_service module __virtual__ return error messages @ 2015-12-07 19:32:15 UTC
  - 289e9d169e Merge pull request #29454 from jfindlay/rh_service
  - 9975508f86 modules.rh_service.__virtual__: handle SUSE osrelease as num
  - d7ab7bf51f modules.rh_service: __virtual__ error messages
- **PR #29476**: (tbaker57) Doc fix - route_table_present needs subnet_names (not subnets) as a key @ 2015-12-07 18:47:22 UTC
  - cb465927d6 Merge pull request #29476 from tbaker57/boto_vpc_docfix
  - 36946460b8 Fix - don’t specify ‘name’ key inside the list - just the subnet names
  - 5caba775a Doc fix - route_table_present needs subnet_names (not subnets) as a key
- **PR #29487**: (rallytime) Back-port #29450 to 2015.8 @ 2015-12-07 17:25:23 UTC
  - **PR #29450**: (pass-by-value) Raise error if dracr password is above 20 chars (refs: #29487)
  - 6696cf6eb5 Merge pull request #29487 from rallytime/bp-29450
  - 2c55c5ff1 Raise error if dracr password is above 20 chars
• **ISSUE #29133**: (cedwards) FX2 proxy-minion dellchassis idrac state incomplete (refs: #29441)

• **PR #29441**: (rallytime) Make sure docs line up with blade_idrac function specs @ 2015-12-05 16:30:27 UTC
  - a1ff5aabc Merge pull request #29441 from rallytime/fix-doc-dellchassis
  - cf62361830 Make sure docs line up with blade_idrac function specs

• **PR #29440**: (rallytime) Back-port #28925 to 2015.8 @ 2015-12-05 00:21:26 UTC
  - PR #28925: (pass-by-value) Fx2 firmware update (refs: #29440)
  - 6cc6ff76c30 Merge pull request #29440 from rallytime/bp-28925
  - b57a57c48e Lint fixes
  - 7cea3af4bf Support multiple hosts
  - 0be3620715 Set kwarg
  - b732ab5102 Add doc for new state
  - 61dd0b7a2 Make sure creds are set before racadm update
  - 929e679b25 Add firmware update state to dellchassis
  - 6356a3b99 Raise error
  - 820ad7b3df Validate file existence
  - 94704304ce Add firmware update functions to module

• **ISSUE #29425**: (paclat) services for older OEL releases. (refs: #29435)

• **PR #29435**: (galet) Grains return wrong OS version and other OS related values for Oracle Linux @ 2015-12-05 00:19:11 UTC
  - 129d4557c3 Merge pull request #29435 from galet/2015.8
  - fda81c6f8e Grains return wrong OS version and other OS related values for Oracle Linux
  - c494dd5fc3 Grains return wrong OS version and other OS related values for Oracle Linux

• **ISSUE saltstack/salt#29313**: (rmatulat) state/host.present and alias-assignment to multiple IPs fails (refs: #29430)

• **PR #29430**: (rmatulat) Fix host.present state limitation @ 2015-12-04 23:08:20 UTC
  - e2b4d63f1e Merge pull request #29430 from rall0r/2015.8
  - d3daccf4a2 Fix host.present state limitation

• **PR #29417**: (jacobhammons) Repo install updates @ 2015-12-04 02:39:41 UTC
  - ab890b632a Merge pull request #29417 from jacobhammons/repo-install-updates
  - d58182c56a updated repo path for RHEL installation
  - 5e54359869 Updated Debian, RHEL / Cent, Ubuntu installation instructions with new repo structure for 2015.8.3. Added CVE-2015-8034 to release notes.

• **PR #29402**: (techhat) Add rate limiting to linode @ 2015-12-03 20:27:10 UTC
  - cb1e2e6e73 Merge pull request #29402 from techhat/ratelimit
  - 80a4d9307 Add rate limiting to linode

• **ISSUE #19332**: (QuinnyPig) Nondeterminism in Pillar (refs: #29400)

• **PR #29400**: (twangboy) Fix #19332 @ 2015-12-03 20:25:16 UTC
- 8fe39d0ef8 Merge pull request #29400 from twangboy/fix_19332
- 7bdddaca53 Fixed grammer
- d96d00a09 Fix #19332

- **PR #29398**: (cachedout) Lint 29288 @ 2015-12-03 18:03:53 UTC
- d2c0fcbe97 Merge pull request #29398 from cachedout/lint_29288
- 3b003e5295 Lint #29288
- 386459ac6d Merge pull request #1 from jfindlay/glustest
  - 4d6c71a80 modules.glusterfs: fix start_volume unit test
- f336c44630 Bootstrap failed, retrying
- bd72cb3ea Set default GlusterFS version to 6
- 443bfc6a81 Fixed volume status for >= 3.7 in glusterfs.py

- **ISSUE #29116**: (johnsocp) Unresolvable masters in the minions masters list cause minion to raise an error (refs: #29331)

- **PR #29331**: (DmitryKuzmenko) Bugfix - #29116 rae.t dns error @ 2015-12-03 17:10:40 UTC
- 5b8e7820ac Merge pull request #29331 from DSRCompany/bug/29116_rae.t_dns_error_2
- 8c2b217af5 Make pylint happy
- e5672ee716 Don’t exit if no master found
- 1c324f5467 Don’t fail if can’t connect to master

- **PR #29390**: (jacobhammons) updated version numbers in documentation @ 2015-12-03 17:02:05 UTC
- 7bc6b1210d Merge pull request #29390 from jacobhammons/2015.8
- 486935b233 updated version numbers

- **ISSUE #25446**: (DmitryKuzmenko) Stack overflow on LazyLoader deep copying (refs: #29381)

- **PR #29381**: (nmadhok) No need to deepcopy since six.iterkeys() creates a copy @ 2015-12-03 15:54:52 UTC
- fd677e1d58 Merge pull request #29381 from nmadhok/2015.8-runtime-fix
- f109689196 No need to deepcopy since six.iterkeys() creates a copy

- **PR #29349**: (cro) Fix mis-setting chassis names @ 2015-12-03 00:56:54 UTC
- 2973025058 Merge pull request #29349 from cro/fx2_name_fix
- 95d6d72a5d Fix mis-setting the name of the chassis.

- **ISSUE #29236**: (sjorge) network.mod_bufsize has wrong docstring (refs: #29237)

- **ISSUE #29235**: (sjorge) network.get_bufsize has wrong docstring (refs: #29237)

- **ISSUE #29234**: (sjorge) network.dig should only be available if we have the `dig` binary (refs: #29237)

- **ISSUE #29233**: (sjorge) network.default_route does not seem to honor the family parameter (refs: #29237)

- **ISSUE #29232**: (sjorge) network.active_tcp seems linux specific (refs: #29237)

- **ISSUE #29231**: (sjorge) docstrings in salt/utils/network.py are incorrect (refs: #29237)

- **PR #29334**: (rallytime) Back-port #29237 to 2015.8 @ 2015-12-02 19:37:31 UTC
  - PR #29237: (sjorge) Module network fixes (refs: #29334)
- 17d80c051a Merge pull request #29334 from rallytime/bp-29237
- 598226def1 fix unit test (attempt 1)
- a461d7bf12 changed from Boron to 2015.8.4, so this can be backported
- 3892b12514 fix up a few remarks from jfindlay
- 2f940e22aa also we should keep returning [] for other systems
- 4953f58894 forgot to remove a debug line, how embarasing
- e963e0c3b fix docs in salt/utils/network.py #29231 - looks like this got copied at some point
- 3888bb403f fixup network.default_route with family set on SunOS #29233
- c0e6ea98a6 fix network.active_tcp on SunOS (we fake it until we make it) #29232
- 92f881284e add decorator to network.dig #29234
- 77950eb55c fix docstring for get_bufsize #29235
- 52fb80cd18 fix docstring for mod_bufsize #29236

• ISSUE #28990: (adithep) Dockerng volume (refs: #29300)
• PR #29300: (ticosax) [dockerng] Add support for volume management in dockerng @ 2015-12-02 17:48:53 UTC
  - 5ec7947595 Merge pull request #29300 from ticosax/dockerng-volumes
  - 80d085ea92 fix typo
  - cb9cb463b0 Provide states for managing docker volumes
  - dff6fa1fb2 Add execution module to manage docker volumes

• PR #29218: (clan) check service enable state in test mode @ 2015-12-02 15:31:00 UTC
  - 99b7d87688 Merge pull request #29218 from clan/service_state
  - a1250a9729 check service enable state in test mode

• PR #29315: (jfindlay) dev tutorial doc: fix markup errors @ 2015-12-01 21:42:17 UTC
  - 08ced73b13 Merge pull request #29315 from jfindlay/docs
  - e8e23dc444 dev tutorial doc: fix markup errors

• PR #29317: (basepi) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2015-12-01 21:28:30 UTC
  - a3a463ff8b Merge pull request #29317 from basepi/merge-forward-2015.8
  - 0d90dd3a19 Merge remote-tracking branch 'upstream/2015.5' into merge-forward-2015.8
  - 14e94b3593 Merge pull request #29316 from basepi/merge-forward-2015.5
    * 33f40b3c47 Merge remote-tracking branch 'upstream/2014.7' into merge-forward-2015.5
    * d2fb2109a3 Merge pull request #29296 from douardda/patch-3
    * d2885390f4 Use process KillMode on Debian systems also
  - 6a2ffbb7c Merge pull request #29216 from clan/file_search_on_proc_file
    * 91a20c07a1 try mmap first
    * 8a4f2053e remove extra space to fix lint failure
    * d34e6b1a9a use read only if has read() method
    * 3209c1c9b5 size is 0 doesn’t mean no data, e.g, /proc/version

28.2. Previous Releases

5029
Salt Documentation, Release 3000.1

- d6aaae8d7b Merge pull request #29261 from attiasr/patch-1
  - 7a99b90596 add log and return if pkg already installed

28.2.56 Salt 2015.8.5 Release Notes

Version 2015.8.5 is a bugfix release for 2015.8.0.

Important: About this Release Salt 2015.8.5 is identical to the 2015.8.4 release with the addition of a fix for issue #30820, fixed by PR #30833. See here for the 2015.8.4 release notes.

Known Issue in boto_* execution modules

This release contains an issue that causes the boto_* execution modules to display a __salt__ not defined error (issue #30300). This issue will be fixed in an upcoming release, but can be manually resolved by completing the following:

1. Download the boto_* execution modules that you would like to update from the 2015.8 branch of Salt. A complete list of affected modules with the specific changes is available in `pull/30867`.
   A simple way to get the updated modules is to download a zip file of the 2015.8 branch from GitHub. The updated modules are in the salt\modules directory.
2. Place the boto_* modules into salt://_modules.
3. Run the following command to sync these modules to all Salt minions:

   ```
salt '*' saltutil.sync_modules
   ```

Changelog for v2015.8.4..v2015.8.5

- c7db4350d5 Fix regression in scanning for state with 'name' param

28.2.57 Salt 2015.8.7 Release Notes

Version 2015.8.7 is a bugfix release for 2015.8.0.

Note: Salt 2015.8.4, 2015.8.5, and 2015.8.7 were all released within a short period due to regressions found soon after the releases of 2015.8.4 and 2015.8.5. See here for the 2015.8.4 release notes, and here for the 2015.8.5 release notes.

Change to Epoch Support for YUM/DNF

For `pkg.installed` states, on Linux distributions which use yum/dnf, packages which have a non-zero epoch in the version number now require this epoch to be included when specifying an exact version for a package. For example:

```
vim-enhanced:
  pkg.installed:
    - version: 2:7.4.160-1.el7
```

The `pkg.latest_version` and `pkg.list_repo_pkgs` functions can be used to get the correct version string to use, as they will now contain the epoch when it is non-zero.

Changelog for v2015.8.5..v2015.8.7

  - 31412920fc The call to cp.get_url needs the saltenv, if you’re using environments other than base, it will fail.
  - a8694014a9 Fix regression in git_pillar when multiple remotes are configured
  - 2243f25be5 Properly set the default value for pillar_merge_lists
28.2.58 Salt 2015.8.8 Release Notes

Version 2015.8.8 is a bugfix release for 2015.8.0.

**Important:** Version 2015.8.8.2 was released shortly after 2015.8.8 to fix several known issues. If you installed 2015.8.8 before 03/30/2016, you likely have installed 2015.8.8 and can optionally upgrade (find out which version you have installed using `salt --version`).

**Statistics**

- Total Merges: 313
- Total Issue References: 146

**Security Fix**

**CVE-2016-3176** Insecure configuration of PAM external authentication service

This issue affects all Salt versions prior to 2015.8.8/2015.5.10 when PAM external authentication is enabled. This issue involves passing an alternative PAM authentication service with a command that is sent to `LocalClient`, enabling the attacker to bypass the configured authentication service. Thank you to Dylan Frese <dmfrese@gmail.com> for bringing this issue to our attention.

This update defines the PAM eAuth service that users authenticate against in the Salt Master configuration.

**Read Before Upgrading Debian 7 (Wheezy) from 2015.8.7 to 2015.8.8**

Before you upgrade from 2015.8.7 on Debian 7, you must run the following commands to remove previous packages:
sudo apt-get remove python-pycrypto
sudo apt-get remove python-apache-libcloud

Note that python-pycrypto will likely remove python-apache-libcloud, so the second command might not be necessary. These have been replaced by python-crypto and python-libcloud with ~bpo70+1 moniker.

Read Before Upgrading Debian 8 (Jessie) from Salt Versions Earlier than 2015.8.4

Salt systemd service files are missing the following statement in these versions:

```
[Service]
KillMode=process
```

This statement must be added to successfully upgrade on these earlier versions of Salt.

• ISSUE #31890: (damon-atkins) salt/fileclient.py get_url should include the URL in any error message (refs: #31922)

• PR #31922: (cachedout) For 2015.8 head @ 2016-03-16 19:07:11 UTC
  - 390ef9feaf Merge pull request #31922 from cachedout/issue_31890_1
  - da075d9341 For 2015.8 head

• PR #31904: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-03-16 17:23:54 UTC
  - 03eb72655 Merge pull request #31904 from rallytime/merge-2015.8
  - f8bb4b1211 last pylint!
  - 892591a39c More pylint fixes
  - 35b2076584 Pylint fixes
  - 1a1ce05186 Merge branch `2015.5` into `2015.8`
  * 440e0dcb0 Merge pull request #31825 from jfindlay/udpate_pylintrc
    - 9a14e02766 Updated beacons/sh.py to work with enumerate()
    - 0ecec691a0 Adjusted beacons to work with enumerate better
    - f509b4113e Fixed final lint error
    - 5945b3f11f Fix and disable pylint errors
    - 06aef6e55 Fixed pylint errors on jboss state and module
    - de96b97c8 Fixed more pylint errors, and disabled some more
    - c07b0a20b5 Merge branch `lint_fixes` into udpate_pylintrc
    - 2e6a152308 Fixed lint error in lxc.py
    - 908ca14a39 Fixed lint error in ssh_py_shim
    - 404c1b50f7 Changed range(len()) to enumerate()
    - 1e135866566 Changed range(len()) to enumerate()
• 9ccce7a9a5 Added more disables
• 9c1aab3b4e Updated .testing.pylintrc to match newer versions of pylint
• 471c9444a3 Merge pull request #31900 from rallytime/fix-psutil-warning
  • 22403d69ae Add "python module" clarification to ps __virtual__ warning.
• c44c1b5e59 Merge pull request #31878 from rallytime/fix-psutil-warning
  • 44b29f72a1 Make sure __virtual__ error message is helpful when psutil is missing
• 5c5926768 Merge pull request #31852 from rallytime/merge-2015.5
  • 1470de17fa Merge branch '2014.7' into '2015.5'
  • 218c902091 Merge pull request #31834 from jfindlay/2014.7
  • 358fad0c8 add 2014.7.8 release notes
• a4236cd04 Merge pull request #31833 from jfindlay/2014.7
• 6910fccc84 add 2014.7.9 release notes
• c5e7c0953 Merge pull request #31826 from gtmanfred/2014.7
• d73f70bb2 Remove ability of authenticating user to specify pam service
• 0cc1d5603 Merge pull request #31827 from gtmanfred/2015.5
  • 979173b89a Remove ability of authenticating user to specify pam service
• 8cf0b9eb3d Merge pull request #31810 from whiteinge/saltenv-jinja-var
• cb72b1924o Fix outdated Jinja 'env' variable reference

• PR #31906: (sibreidba) Win_dacl module: fix FULLCONTROL / FILE_ALL_ACCESS definition @ 2016-03-16 15:20:19 UTC
  • a4b3462346 Merge pull request #31906 from sbreidba/win_dacl_fixes
  • 54d81b9b42 Fix FULLCONTROL / FILE_ALL_ACCESS definition (bugfix and code simplification). Use consistent mechanism for obtaining user SID. Allow wildcarding (via optional parameters) for a variety of methods (get, rm_ace, check_ace).

• PR #31745: (isbm) Fix the always-false behavior on checking state @ 2016-03-15 23:02:20 UTC
  • b66b6a9693 Merge pull request #31745 from isbm/isbm-always-minion-errcode-2-fix
  • 1882e1c96c Adjust test
  • f96c8f85e Keep first level away from lists.
  • baaed05b8 Fix PEP8 continuation
  • 1db61ea59a Fix the always-false behavior on checking state (there are always lists at some point!)

• PR #31911: (rallytime) Merge #31903 with pylint fix @ 2016-03-15 20:35:35 UTC
  • PR #31903: (terminalmage) Use remote_ref instead of local_ref to see if checkout is necessary (refs: #31911)
  • d05c3aeb99 Merge pull request #31911 from rallytime/merge-31903-with-pylint
  • 85e5ac8d11a Merge #31903 with pylint fix

• PR #31883: (paiou) Fix scaleway cloud provider and manage x86 servers @ 2016-03-15 20:31:18 UTC
  • 8194a8b54 Merge pull request #31883 from mvpstars/scaleway-x86
- 1662a080e1 Update scaleway cloud provider to manage x86 servers

• **PR #31903**: (terminalmage) Use remote_ref instead of local_ref to see if checkout is necessary (refs: #31911) @ 2016-03-15 20:04:56 UTC
  - 142c47c50d Merge pull request #31903 from terminalmage/fix-git-pillar
  - a2f9940e1c Use remote_ref instead of local_ref to see if checkout is necessary

• **PR #31845**: (sakateka) Now a check_file_meta deletes temporary files when test=True @ 2016-03-15 19:55:21 UTC
  - ffd65c36e5 Merge pull request #31845 from sakateka/check_file_meta_clean_tmp
  - 5b30336b89 Now a check_file_meta deletes temporary files when test=True

• **ISSUE #31791**: (alexbleotu) Proxy minion starts spinning after running state.highstate (refs: #31846)

• **ISSUE #31728**: (bgridley) Custom grains syncing problem with proxy minion which causes high CPU utilization (refs: #31846)

• **PR #31901**: (rallytime) Back-port #31846 to 2015.8 @ 2016-03-15 19:12:43 UTC
  - **PR #31846**: (cro) Proxy infinite loop (refs: #31901)
  - 7428c73724 Merge pull request #31901 from rallytime/bp-31846
  - 1edd6ce302 Extra comment.
  - 6ce2f03b11 Fix event bus flood caused by unexpected recursive call.

• **PR #31905**: (terminalmage) Update versionadded directive @ 2016-03-15 18:43:06 UTC
  - 37f1ce9be2 Merge pull request #31905 from terminalmage/update-versionadded
  - dcc196c9e1 Update versionadded directive

• **PR #31902**: (rallytime) Update versionadded tag for new funcs @ 2016-03-15 18:41:08 UTC
  - **PR #31857**: (sjorge) gen_password and del_password missing from solaris_shadow (refs: #31902)
  - 35f6407d11 Merge pull request #31902 from rallytime/update-version-31857
  - 5cd09150cd Update versionadded tag for new funcs

• **PR #31888**: (terminalmage) Fix salt.utils.decorators.Depends @ 2016-03-15 17:09:54 UTC
  - 1be9c91761 Merge pull request #31888 from terminalmage/fix-depends-decorator
  - 394410e2b0 Add integration test for depends decorator
  - caa3cc1007 Fix salt.utils.decorators.Depends

• **PR #31857**: (sjorge) gen_password and del_password missing from solaris_shadow (refs: #31902) @ 2016-03-14 20:29:51 UTC
  - d357e4ea44 Merge pull request #31857 from sjorge/solarish_shadow
  - 38231303f3 .9 release as mentioned by rallytime
  - 3e25f70968 fix version added
  - d768ed25b4 develop, 2016.3 and 2015.8 has missing gen_password and del_password for shadow module

• **PR #31879**: (cro) Clarify some comments @ 2016-03-14 19:59:35 UTC
  - 1b0b2d3f1a Merge pull request #31879 from cro/idrac_fixes_0314
  - 42ef3a7970 Extra comment.
• ISSUE #8927: (brutasse) file state: unable to use contents_pillar with template: jinja (refs: #31815)
• ISSUE #26944: (boltronics) file.managed contents and contents_pillar should support a template rendering engine (refs: #31815)
• ISSUE #14664: (jacksontj) Unable to have a template with file.managed contents (or contents_pillar) (refs: #31815)
• PR #31815: (dr4Ke) Fix template on contents 2015.8 @ 2016-03-14 17:41:46 UTC
  - fb81btea23 Merge pull request #31815 from dr4Ke/fix_template_on_contents_2015.8
  - dcd6f5a5a9 test for file.apply_template_on_contents
  - 10d88296d file.managed: templating contents, not just files
• PR #31818: (anlutro) Prevent event logs from writing huge amounts of data @ 2016-03-14 17:27:47 UTC
  - aa120cb716 Merge pull request #31818 from alprs/fix-event_logging_spam
  - 83fa136da7 work on event logging
• ISSUE #31293: (deuscapturus) Git Pillars lose HEAD reference over time (refs: #31836)
• ISSUE #29239: (timwsuqld) Occasionally git_pillar pull fails causing incorrect results of highstate (when running highstate for multiple minions) (refs: #31836)
• PR #31836: (terminalmage) Fix git_pillar race condition @ 2016-03-14 15:48:28 UTC
  - f2445bd6bd Merge pull request #31836 from terminalmage/issue31293
  - 5048fa857c Fix duplicate output
  - 155b84b88a salt.fileserver: Add ability to clear checkout locks
  - af4108dd1 Pass through the lock_type
  - 3d7796d5dd salt.runners.cache: Add ability to clear checkout locks
  - 8e086099f5 salt.utils.gitfs: rewrite locking code
  - 06b212519c Add GitLockError exception class
  - ad04ccfb93 Strip whitespace when splitting
• PR #31824: (rallytime) Back-port #31819 to 2015.8 @ 2016-03-13 19:59:32 UTC
  - PR #31819: (mchugh19) raise error on unsupported distro (refs: #31824)
  - 5464be07b1 Merge pull request #31824 from rallytime/bp-31819
  - 4d516adade raise error on unsupported distro
• ISSUE #24559: (iacopo-papalini) salt-cloud - Azure - should be possible to specify virtual network & subnet in profile (refs: #31856, #24569)
• PR #31856: (szeestraten) Adds missing docs for Virtual Network and Subnet options in salt-cloud Azure cloud profile @ 2016-03-13 19:06:52 UTC
  - PR #24569: (iacopo-papalini) Fix Issue #24559 - salt-cloud - Azure - should be possible to specify... (refs: #31856)
  - 7781b357e0 Merge pull request #31856 from szeestraten/add-missing-docs-for-azure-cloud-profile
  - a1a2229405 Adds missing docs for Azure cloud profile
• PR #31839: (jfindlay) add 2015.8.8 release notes @ 2016-03-11 23:23:34 UTC
  - 3f88f3a8cf Merge pull request #31839 from jfindlay/2015.8
• PR #31828: (gtmanfred) Remove ability of authenticating user to specify pam service @ 2016-03-11 20:40:37 UTC
  - 46bdd10a56 Merge pull request #31828 from gtmanfred/2015.8
  - 7c3134a3d3 Remove ability of authenticating user to specify pam service

• ISSUE #30489: (chris-martin) influxdb_user.present fails: "InfluxDBClient’ object has no attribute 'get_list_cluster_admins" (refs: #31787, #31770)

• PR #31787: (anlutro) Fix user_create and db_create for new versions of influxdb @ 2016-03-11 15:19:22 UTC
  - 3d370b471c Merge pull request #31787 from alprs/fix-influxdb_user
  - 6a5211c8d8 don’t swallow exceptions
  - a7e9c1e381 fix db_create for influxdb 0.9+
  - 5a8a45d4b fix create_user for new versions of influxdb

• PR #31800: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-03-10 20:49:53 UTC
  - 7fb2331ebc Merge pull request #31800 from rallytime/merge-2015.8
  - 44c15f0b16 Merge branch '2015.5' into '2015.8'
  - 970ef0e445 Merge pull request #31744 from brejoc/fix-attribute-error-with-older-libcloud/2015.5
    * bb29dc2283 Added version to libcloud depends statement
    * 87f9534fce Added log message with update suggestion for libcloud
    * 72eabf46cd Fix for AttributeError with libcloud <0.15
  - df2d3ba5d Merge pull request #31740 from terminalmage/issue31666
    * aef5864cd Fall back to False when pillar_opts not set
    * fe19d77eb4 Add default value for pillar_opts on minion
  - e22f5c0a26 Merge pull request #31750 from rallytime/bp-26170
    * 3c11234a05 Make sure variable is a dictionary before popping something from it.
  - 9162925dd0 Merge pull request #31689 from rallytime/bp-29467
    * 1f8f4cb99b Update module.py

• PR #31797: (Ch3LL) Change pkg name to less for suse pkg.info_installed test @ 2016-03-10 19:08:16 UTC
  - 75db2ed40 Merge pull request #31797 from Ch3LL/fix_pkginfo_test
  - 910f0d9fbc change pkg name to less for suse

• ISSUE #31617: (tampakrap) service.running fails on sle11 sp3 and sp4 (refs: #31629, #31793)

• PR #31793: (xopher-mc) fixing init system detection on sles 11, refs #31617 @ 2016-03-10 18:42:27 UTC
  - 138b72bfbf Merge pull request #31793 from xopher-mc/fix_sles_state_service_module
  - d242cb19b4 fixing init system dectection on sles 11, refs #31617

• PR #31786: (isbm) Bugfix: zypper doesn’t detect base product on SLE11 series @ 2016-03-10 18:12:46 UTC
  - 2f28c166dd Merge pull request #31786 from isbm/isbm-zypper-list-products-sles11
  - ee1a002673 Update test case to cover SLE11 and SLE12
  - 4b134fb2ab Add SLE11 product info snapshot, rename previous
- 3c5fc857b2 Bugfix: on SLE11 series base product reported as additional
- **ISSUE #31776**: (gtmanfred) ProxyMinion does not close connections (at least with esxi proxy) (refs: #31780)
- **PR #31780**: (gtmanfred) use already created vsphere connection @ 2016-03-10 17:41:53 UTC
  - d6f69623c Merge pull request #31780 from gtmanfred/2015.8
  - 070ea0f70 use already created vsphere connection
- **ISSUE #31772**: (sibreida) win_dacl state causes state.apply output to be YAML, not highstate (refs: #31779)
- **PR #31779**: (sibreida) win_dacl state & module: return comment field as strings, not lists. @ 2016-03-10 17:41:08 UTC
  - a067de3712 Merge pull request #31779 from sbreida/win-dacl-highstate-output-2015.8
  - aeb2bfcf6 win_dacl state & module: return comment field as strings, not lists.
- **ISSUE #31563**: (sjorge) regression in 2016.3 from today? (refs: #31723, #31707)
- **PR #31723**: (sjorge) file_ignore_regex is a list, not bool @ 2016-03-09 23:36:10 UTC
  - PR #31707: (sjorge) Fix incorrect default types for master_tops and file_ignore_regex (refs: #31723)
  - baeefac252 Merge pull request #31723 from sjorge/2015.8-file_ignore_regex
  - df1ba94cb file_ignore_regex is a list, not bool
- **ISSUE #27960**: (The-Loeki) salt-cloud CLI 2015.8 borks out with SaltClientError: 'timeout' (refs: #31747)
- **PR #31747**: (techhat) Use get_local_client with MASTER opts, not MINION @ 2016-03-09 23:14:58 UTC
  - cd43ef919c Merge pull request #31747 from techhat/issue27960
  - 44c100d610 Use get_local_client with MASTER opts, not MINION
- **PR #31688**: (whiteinge) Various SMTP returner fixes @ 2016-03-09 22:40:37 UTC
  - 286ea1f61b Merge pull request #31688 from whiteinge/smtp-renderer
  - 7667b6a81 Check if we have a StringIO and grab the string instead
  - 17b8cd755f Add a default for the subject
  - 26479bee24 Clean up the SMTP returner docstring and show an actual config example
  - 74563f17ed Make sure the email subject and body are strings
  - fc69d08e8e Default to just 'jinja' for the SMTP renderer
  - 2af7cd2789 Add missing 'port' to smtp options
- **PR #31752**: (rallytime) Back-port #31686 to 2015.8 @ 2016-03-09 21:23:01 UTC
  - PR #31686: (myii) Fix typo in example for section winrepo_dir_ng (refs: #31752)
  - 1dd982e5c Merge pull request #31752 from rallytime/bp-31686
  - e4df5d9a55 Fix typo in example for section winrepo_dir_ng
- **PR #31733**: (jacobhammons) docs to clarify cloud configuration @ 2016-03-09 20:54:10 UTC
  - ec90294442 Merge pull request #31733 from jacobhammons/cloud-docs
  - 209c641a41 Made udpates as suggested by @rallytime
  - 26d4991cb3 moved previous intro to new quick start topic (topics/cloud/qs.rst) added new intro that explains the salt cloud configuration files added an inheritance and minion startup state example to topics/cloud/config.rst

28.2. Previous Releases

5043
• ISSUE #26498: (rallytime) [salt-cloud] Able to create multiple VMs with the same name across providers (refs: #31754, #31775)

• PR #31775: (techhat) Show correct provider/driver name @ 2016-03-09 20:53:10 UTC
-92ba7f3495 Merge pull request #31775 from techhat/correctmsg
-0c143356b44 Show correct provider/driver name

• ISSUE #26498: (rallytime) [salt-cloud] Able to create multiple VMs with the same name across providers (refs: #31754, #31775)

• PR #31775: (techhat) Check all providers, not just the current one @ 2016-03-09 18:38:19 UTC
-249a3602eb Merge pull request #31775 from techhat/issue26498
-08c61446b7 Check all providers, not just the current one

• ISSUE #31639: (mshirley) salt-cloud digital ocean api v2 doesn’t implement all available actions (refs: #31735)

• PR #31735: (rallytime) Add reboot, start, and stop actions to digital ocean driver @ 2016-03-09 17:57:58 UTC
-7ad521f7a5 Merge pull request #31735 from rallytime/fix-31639
-67d1aa6740 Remove experimental/incomplete function
-b209623ca9 Add reboot, start, and stop actions to digital ocean driver

• ISSUE #30489: (chris-martin) influxdb_user.present fails: "InfluxDBClient' object has no attribute 'get_list_cluster_admins" (refs: #31787, #31770)

• PR #31770: (anlutro) Fix influxdb user functionality for version 0.9+ @ 2016-03-09 17:09:26 UTC
-fd3610c6a4 Merge pull request #31770 from alprs/fix-influxdb_user
-1349bdd2e8 fix influxdb user functionality for version 0.9+

• PR #31743: (Talkless) Fix parentheses mismatch in documentation @ 2016-03-08 18:01:23 UTC
-c0868307df Merge pull request #31743 from Talkless/patch-1
-26ff46dbc6 Fix parenthesis mismatch in documentation

• PR #31162: (isbm) Remove MD5 digest from everywhere and default to SHA256 @ 2016-03-07 19:11:36 UTC
-826f6a6582 Merge pull request #31162 from isbm/isbm-md5-to-sha1
-9d4abed0c Fix PyLint
-327ea11139 Add daemons unit test to verify hash_type settings
-f3aecc0b22 Standardize logging
-51f556243d Verify if hash_type is using vulnerable algorithms
-95ec634f00 Report environment failure, if any
-63eedefe54 Use mixin for the daemon classes
-82dd383630 Create a mixin class that will be reused in the similar instances (daemons)
-36da83f6a Use MD5 hash algorithm by default (until deprecated)
-584325797c Remove SHA1 in favor of SHA256
-373493c13f Remove SHA1 for SHA256
-d5cb4dd424 Remove sha1 to sha265
-73b835e01 Add note to the Tomcat module for SHA256
- efb78f1055 Remove SHA1 to SHA256 by default
- 6198976ed0 Use SHA1 by default instead of MD5
- 73f26f76ce Use SHA1 hash by default in Tomcat module, refactor for support different algorithms
- 0d4e4e3f18 Use SHA1 hash by default
- 78571f7703b Use configurable hash_type for general Key fingerprinting
- f0d931f4d0 Use hash_type configuration for the Cloud
- 95cb59dec7 Set default hash as SHA1 in config and explain why.
- 8f9543c292 Set config hash_type to SHA1
- 785717703b Use configurable hash_type for general Key fingerprinting
- 413eca124d Set default checksum for key fingerprint to SHA1

**ISSUE #30528:** (UtahDave) Missing Minion notifications missing from job cache (refs: #31670)

**PR #31670:** (terminalmage) Write lists of minions targeted by syndic masters to job cache @ 2016-03-07 18:51:53 UTC

- a13f3c71bd Merge pull request #31670 from terminalmage/issue30528
- 6e5e5a5c3e Pass syndic_id to save_minions()
- cb9211e377 Add config to save_minions() to pass a syndic ID
- 1d39ee69b Skip events with minion lists but no jid
- 6a13e92f77 lint fixes
- 0f175a4edfd salt.returners.sqlite3_return: add no-op save_minions() func for API compatibility
- f8664103b1 salt.returners.redis_return: add no-op save_minions() func for API compatibility
- 0eaa1b76c22 salt.returners.postgres_local_cache: add no-op save_minions() func for API compatibility
- d6d794b484 salt.returners.postgres: add no-op save_minions() func for API compatibility
- 82750ab699 salt.returners.pgjsonb: add no-op save_minions() func for API compatibility
- d8906d78 salt.returners.odbc: add no-op save_minions() func for API compatibility
- a1957c3706 salt.returners.mysql: add no-op save_minions() func for API compatibility
- e06a5e1c salt.returners.multi_returner: add no-op save_minions() func for API compatibility
- 5b4eb58099 salt.returners.mongo_return: add no-op save_minions() func for API compatibility
- da1acbf8f2 salt.returners.mongo_future_return: add no-op save_minions() func for API compatibility
- c13bb6549c salt.returners.memcache_return: add no-op save_minions() func for API compatibility
- 4322a99e63 salt.returners.influxdb_return: add no-op save_minions() func for API compatibility
- 1dd106183c salt.returners.etcd_return: add no-op save_minions() func for API compatibility
- 8e08535616 salt.returners.couchdb_return: add no-op save_minions() func for API compatibility
- 44538dfced salt.returners.cassandra_cql_return: add no-op save_minions() func for API compatibility
- 084a78407a salt.returners.couchbase_return: move minion list updates to new save_minions() func
- f731c5d32 Update a job’s minion list to include minion lists forwarded by syndic
- 504f7d460 Add util function to invoke a returner’s save_minions() func
- 0b4616a3eb Separate writing of serialized minion list into its own function
- 214fecd3f6 Simplify jobs.get_jobs logic, generally improve jobs runner docs
- 3f527be748 Add an exception class for errors encountered while locking files.
- 1e6b43ee8f Add a contextmanager for file locking
- 9786cb32f Add missing RST file for slsutil module
- 2ad8ceff2c Add salt.utils.split_input()

- **ISSUE #31595**: (dverbeek84) dockerng ports specified in Dockerfile must be in sls file otherwise salt gives an error (refs: #31711)
- **PR #31711**: (ticosax) [dockerng] Port and Volume comparison should consider Dockerfile @ 2016-03-07 18:25:19 UTC
  - 24568b1a5d Merge pull request #31711 from ticosax/fix-port-and-volume-discovery
  - c3f8691597 Port and Volume comparison should consider Dockerfile

- **ISSUE #31579**: (bradthurber) salt-cloud delete with a map file fails when multiple providers defined (ref: #31719)

- **PR #31719**: (techhat) Don’t worry about KeyErrors if the node is already removed @ 2016-03-07 18:16:40 UTC
  - b936ce09fb3 Merge pull request #31719 from techhat/issue31579
  - 88905095c9 Don’t worry about KeyErrors if the node is already removed

- **PR #31713**: (ticosax) [dockerng] Fix dockerng.network_present when container is given by name @ 2016-03-07 15:14:41 UTC
  - 604eb87e82 Merge pull request #31713 from ticosax/fix-dockerng-networking-container_id
  - 3837cf944ca Fix network_present by dealing with containers ID’s instead of names.

- **ISSUE #31704**: (peripatetic-sojourner) Foreman external pillar doesn’t load (refs: #31705)

- **PR #31705**: (peripatetic-sojourner) Foreman pillar @ 2016-03-07 14:24:58 UTC
  - 8f28e4510c Merge pull request #31705 from peripatetic-sojourner/foreman_pillar
  - ba3d759499 passing lint test
  - 63e9a8999 refactored parameter population for foreman pillar
  - c3325bc15e add return of virtualname

- **PR #31702**: (rallytime) [2015.5] Merge forward from 2015.5 to 2015.8 @ 2016-03-06 19:24:47 UTC
  - aa5c13f0b8 Merge pull request #31702 from rallytime/merge-2015.8
  - 6559ea15b0 Merge branch '2015.5' into '2015.8'
  - d7914cd6b14 Merge pull request #31687 from cachedout/rm_gpg_test
    - 8b00513ebb Removed useless tests
  - bd4d12a155 Merge pull request #31660 from terminalmage/issue31619
    - da954d7b92 Add integration test for packages with epoch in version
    - 4fa7e4defe Move epoch removal
    - 290192af56 Remove epoch from version string if present when installing with yum
  - e33c1f456a Merge pull request #31683 from rallytime/bp-31578
- 8fe46789b7 allow queueing of state runs through saltmod
  - 27f443895d Merge pull request #31682 from cachedout/cache_meaning
  - a75e141625 Add definition of job cache to glossary
  - bd04c964d1 Merge pull request #31658 from rallytime/add-style-to-contrib
    - 6b52658786 Add mentioned of Salt’s Coding Style docs to the Contributing docs
  - 10658dffe6 Merge pull request #31655 from rallytime/pylint-docs
  - 6e0377d376 Make note of pylint dependencies in docs
  - 607577a01 Merge pull request #31440 from cachedout/master_tops_type
    - f49cc75049 Set correct type for master_tops config value
  • PR #31700: (s0undt3ch) It’s a function! @ 2016-03-06 17:33:58 UTC
    - acc920629e Merge pull request #31700 from s0undt3ch/2015.8
    - 1ca2beea3e It’s a function!
  • PR #31679: (cro) Fix bad link to the sample REST endpoint in salt-contrib. @ 2016-03-04 21:05:50 UTC
    - cf438aa873 Merge pull request #31679 from cro/proxy_contrib_doc_fix
    - d638971b73 Correct url to salt-contrib
  • ISSUE #21932: (clinta) Salt Coding Style docs should list requirements for salt pylintrc (refs: #31655)
  • PR #31668: (rallytime) Some more testing documentation improvements @ 2016-03-04 20:48:57 UTC
    - PR #31658: (rallytime) Add mentioned of Salt’s Coding Style docs to the Contributing docs (refs: #31668)
    - PR #31655: (rallytime) Make note of pylint dependencies in docs (refs: #31668)
    - PR #31641: (rallytime) Improve Salt Testing tutorial to be a more comprehensive intro (refs: #31668)
    - 97127a8883 Merge pull request #31668 from rallytime/testing-docs
    - beb9d0fe84 Ensure all integration test classes and funcs are documented w/examples
    - 7b8eb7e97 Found another spelling error
    - c8c188535f Spelling fix
    - f260c51762 Some more testing documentation improvements
  • ISSUE #29753: (jakehilton) New minion fails to authenticate properly to multi-master setup (refs: #31653)
  • PR #31653: (DmitryKuzmenko) Don’t attempt to verify token if it wasn’t sent to master. @ 2016-03-03 17:39:35 UTC
    - 2ed7286af1 Merge pull request #31653 from DSRCompany/issues/29753_multimaster_auth_fail
    - 2557707cc7 Don’t attempt to verify token if it wasn’t sent to master.
  • ISSUE #31617: (tampakrap) service.running fails on sle11 sp3 and sp4 (refs: #31629, #31793)
  • PR #31629: (darix) Fix services on sles @ 2016-03-03 16:41:27 UTC
    - 118f6de425 Merge pull request #31629 from darix/fix-services-on-sles
    - 9b8d6cb72 make the suse check consistent with rh_service.py
    - c0c8a77242 Fix numerical check of osrelease
  • PR #31641: (rallytime) Improve Salt Testing tutorial to be a more comprehensive intro (refs: #31668) @ 2016-03-03 16:08:47 UTC
- 4d1701de60 Merge pull request #31641 from rallytime/testing-tutorial
- 6ab3967148 Improve Salt Testing tutorial to be a more comprehensive intro

• ISSUE #30651: (sjorge) salt.states.grains.list_present should not show changes if none are made! (refs: #31651, #30689)

• PR #31651: (dr4Ke) test case: test_list_present_nested_already @ 2016-03-03 16:02:55 UTC
  - PR #30689: (sjorge) fix for #30651 grains.list_present and grains.list_absent (refs: #31651, #31271)
  - 584f8401b8 Merge pull request #31651 from dr4Ke/test_case_for_30689
  - fc9dd35e68 test case: test_list_present_nested_already

• PR #31643: (opdude) Make sure we are really updating the mercurial repository @ 2016-03-03 14:30:53 UTC
  - 5566f1f2a7 Merge pull request #31643 from Unity-Technologies/hotfix/hg-fix-repo-updated
  - ca41c4b8c1 Make sure we are really updating the mercurial repository

• ISSUE #30761: (sjmh) Cannot target subsets of minions when using pillar and external_auth (refs: #31598)

• PR #31598: (terminalmage) Remove limitations on validation types for eauth targets @ 2016-03-02 22:14:41 UTC
  - 36c790e6e6 Merge pull request #31598 from terminalmage/issue30761
  - 5dedaa2d9d Remove limitations on validation types for eauth targets

• PR #31627: (jakehilton) Handling error from using gevent 1.1. @ 2016-03-02 22:01:22 UTC
  - cc4ec31f7f Merge pull request #31627 from jakehilton/2015.8
  - 02f5ed616 Handling error from using gevent 1.1.

• PR #31630: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-03-02 20:49:52 UTC
  - 191241e71a Merge pull request #31630 from rallytime/merge-2015.8
  - 75bb62990 Merge branch '2015.5' into '2015.8'
  - 6d31b9918f Merge pull request #31622 from jfindlay/query_doc
    * 4e48e806e6 Merge pull request #31558 from cachedout/ensure_ssh_installed
    * cec6e0a5fd Don’t stacktrace if ssh binary is not installed with salt-ssh

• PR #31594: (rallytime) Back-port #31589 to 2015.8 @ 2016-03-02 16:33:24 UTC
  - PR #31589: (techhat) Ensure that the latest node data is returned (refs: #31594)
  - 38ddd62af Merge pull request #31594 from rallytime/bp-31589
  - 6c89a59c7 Ensure that the latest node data is returned

• ISSUE #31596: (joejulian) gluster –xml does not always produce xml with legacy versions (refs: #31604)

• PR #31604: (joejulian) Workaround for non-xml output from gluster cli when not tty @ 2016-03-02 15:53:44 UTC
  - 86a0fc46b4 Merge pull request #31604 from joejulian/2015.8_31596_workaround_no_xml_when_not_tty
  - c567a823a9 Workaround for non-xml output from gluster cli when not tty

• PR #31583: (vutny) Remove trailing white spaces @ 2016-03-02 15:38:01 UTC
  - 36ce240596 Merge pull request #31583 from vutny/remove-trailing-white-spaces
- bbad93a8d Fix trailing white spaces in Salt PRM spec file
- 86433f2378 Revert changes in files used by roots_test.py integration test
- e7a8dbf498 Remove trailing white spaces in tests files
- 776b2ea9a6 Remove trailing white spaces in files under salt/ dir
- fbf3abccf Remove trailing white spaces in files under pkg/ dir
- aebc48163d Remove trailing white spaces in documentation files
- 7eaf778695 Remove trailing white spaces in conf dir file

- **PR #31592**: (rallytime) Back-port #31546 to 2015.8 @ 2016-03-01 23:51:02 UTC
  - **PR #31546**: (terminalmage) Rework of PR #31529 (refs: #31592)
  - **PR #31529**: (llua) nspawn.py: Fix bad keyword assignment (refs: #31546)
  - c9fe8d87f3 Merge pull request #31592 from rallytime/bp-31546
  - 9a296bd1bf Use clean_kwargs and invalid_kwargs utils funcs to handle invalid kwargs
  - 43099a2b63 nspawn.py: Fix bad keyword assignment

- **ISSUE #30866**: (kevinquinnyno) WheelClient cmd returns None but wheel functions called directly work (refs: #31570)

- **ISSUE #26415**: (CaesarC) salt.wheel.WheelClient doesn’t work follow the python api(AttributeError: 'None-Type' object has no attribute 'get') (refs: #28087)

- **PR #31593**: (rallytime) Back-port #31570 to 2015.8 @ 2016-03-01 23:50:05 UTC
  - **PR #31570**: (cro) Need to return the value (refs: #31593)
  - **PR #28087**: (DmitryKuzmenko) Revert "Update __init__.py" (refs: #31570)
  - c8db93ac6 Merge pull request #31593 from rallytime/bp-31570
  - b2294d0a28 Need to return the value

- **ISSUE #28585**: (rothtralls) FIPS compliance (2015.8.1-1) (refs: #31567)

- **PR #31567**: (cachedout) Restore FIPS compliance when using master_finger @ 2016-03-01 19:50:03 UTC
  - 068807558a Merge pull request #31567 from cachedout/issue_28585
  - 7006a1eeef Fix failed unit test
  - 10c3d8da20 Lint
  - 174337d020 Restore FIPS compliance when using master_finger

- **PR #31568**: (twangboy) Grant permissions using SID instead of name @ 2016-03-01 04:22:53 UTC
  - 77d9aae8bb Merge pull request #31568 from twangboy/fix_perms
  - 16a9569d4 Grant permissions using SID instead of name

- **ISSUE #31516**: (justinta) beacons.enable_beacon does not write to beacons.conf on some OS’s (refs: #31561)

- **PR #31561**: (justinta) Skipped test @ 2016-03-01 04:11:22 UTC
  - ada5ab344d Merge pull request #31561 from jtan/beacons_test_fix
  - 196dd4b99 Skipped test

- **ISSUE #31041**: (fredrikaverpil) Reading about win_service in 2015.8.5 docs, but it’s not available in 2015.8.5 (refs: #31550, #31049)
• **PR #31550**: (rallytime) Correct versionadded tag for win_service.config @ 2016-02-29 21:11:24 UTC
  - **PR #31049**: (twangboy) Fix versionadded in win_service.config (refs: #31550)
  - 658c1865ab Merge pull request #31550 from rallytime/win_service-docs
  - 51aa26334c Correct versionadded tag for win_service.config

• **PR #31549**: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-02-29 18:46:35 UTC
  - 9bb9a54f8d Merge pull request #31549 from rallytime/merge-2015.8
  - b683df9b82 Pylint fix
  - 24505d2dfc Merge branch '2015.5' into '2015.8'
    * 060a60fd90 Merge pull request #31521 from terminalmage/issue24753
      - 0d352bb16 Add fileclient tests
      - d9370a8041 Update cp module salt-ssh wrapper to use new cachedir param
      - 032049b1d Update the SSH state module wrappers to pass an alternate cachedir
      - 65b5b3af3a Accept and pass through the alternate cachedir when prepping the thin tar
      - c3f7a2f2e5 Add ability to specify an alternate base dir for file caching
    * 92f8f89218 Merge pull request #31497 from rallytime/remove-timeout-dup
      - 83e6480d20 Remove duplicate "timeout" definition in Roster docs
    * da001bcb49 Merge pull request #31472 from rallytime/update-contributing-docs
      - 5871e4d1e0 Update contributing docs
    * f35e2dd1d3 Merge pull request #31461 from DSRC/company/issues/30183_fix_multimaster_failover_2015.5
      - 3d09c3b7a3 Set auth retry count to 0 if multimaster mode is failover.

• **ISSUE #29701**: (tonyyang132) Running salt-call on salt master would crash the master node with code level 2015.8.3 (refs: #31544)

• **ISSUE #27063**: (loregordon) 2015.8.0: Error writing to /var/log/salt/minion? (refs: #31544)

• **PR #31544**: (DmitryKuzmenko) Protect getattr from recursion @ 2016-02-29 17:48:15 UTC
  - 5a6aff1791 Merge pull request #31544 from DSRC/company/issues/29701_getattr_recursion_protection
  - b7a45b8fae Protect getattr from recursion

• **ISSUE #30643**: (Ch3LL) multi-master failover stack trace when minion fails over to other master (refs: #31512, #31525)

• **ISSUE #30181**: (jakehilton) Minion failover only works once (refs: #31512)

• **ISSUE #29567**: (freebsdly) multi master failover successful but execute command 'salt * test.ping' on second master return 'Minion did not return. [No response]' (refs: #31512)

• **PR #31525**: (DmitryKuzmenko) Issues/30643 merge forward fixes @ 2016-02-29 16:08:47 UTC
  - **PR #31512**: (DmitryKuzmenko) Don’t fork in try with critical finally logic. (refs: #31525)
  - **PR #30796**: (skizunov) Fix minion failover after disconnect (refs: #31512, #31525)
  - d5a4da17b Merge pull request #31525 from DSRC/company/issues/30643_merge_forward_fixes
  - a50b33d96a Don’t fork in try with critical finally logic.
  - 877bc25381 Fix minion failover after disconnect
• ISSUE #24955: (damonnk) Minion fails to start after bootstrap on Raspberry PI (refs: #31536)
• PR #31536: (virtualguy) Remove debian repo from raspbian installation @ 2016-02-29 15:29:25 UTC
  - 95af21325f Merge pull request #31536 from virtrnd/remove-jessie-backports-from-raspbian-install
  - e48900ac55 Use python-tornado from jessie-backports for pure debian
  - 6e338e2601 Remove debian repo from raspbian installation
• ISSUE #31193: (gwaters) RHEL7 gpg key problem (refs: #31528)
• PR #31528: (vutny) Correct Salt Cloud documentation about updating Salt Bootstrap script @ 2016-02-29 15:30:59 UTC
  - 5965319600 Merge pull request #31528 from vutny/cloud-bootstrap-doc
  - f7bee69f2 Correct Salt Cloud documentation about updating Salt Bootstrap script
• ISSUE #31365: (cwicklein) osrelease_info broken for CentOS 7 (refs: #31539)
• PR #31539: (DmitryKuzmenko) Added temporary workaround for CentOS 7 os-release id bug. @ 2016-02-29 15:30:34 UTC
  - 96c0926298 Merge pull request #31539 from DSRCompany/issues/31365_centos7_osrelease_fix
  - a3b806d126 Added temporary workaround for CentOS 7 os-release id bug.
• PR #31508: (mcalmer) Zypper correct exit code checking @ 2016-02-26 15:21:23 UTC
  - 95db870325 Merge pull request #31508 from mcalmer/zypper-correct-exit-code-checking
  - 66e8f6aa37 restructure the code a bit
  - f5c125de19 remove new lines between zypper command and check result
  - 1425c6496c use specialized assert functions for tests
  - f266cfdaac test _zypper_check_result()
  - aff6467782 adapt tests to new zypper_check_result() output
  - edad780cdf use _zypper_check_result()
  - 7c5d5a2b7a add _zypper_check_result() to raise and error or return stdout
  - a6785f7a9 check zypper exit code everywhere
  - 935b0510c9 add function to check zypper exit codes
• ISSUE saltstack/salt-bootstrap#695: (mtippett) Install Failures With Raspbian Jessie (refs: #31510, #31477, #31458)
• PR #31510: (vutny) Add installation guide for Raspbian (Debian on Raspberry Pi) @ 2016-02-26 15:06:57 UTC
  - e51126179c Merge pull request #31510 from vutny/debian-raspbian-install-guide
  - 50f3e072b1 Add instruction how to install salt-minion on Debian Jessie from Stretch
  - abcd505178 Update Debian installation guide with information about Raspbian
• PR #31498: (Ch3LL) rename methods in pkg states test @ 2016-02-25 23:29:51 UTC
  - 9d458bb420 Merge pull request #31498 from Ch3LL/rename_test
  - 29a53f4353 rename methods in pkg states test
• ISSUE #31427: (githubcdr) salt.states.grains.list_barrier added duplicates names (refs: #31471)
- **PR #31471**: (cachedout) Correct issue where duplicate items in grains list during state run will result in duplicate grains @ 2016-02-25 20:15:20 UTC
  - 625da0d261 Merge pull request #31471 from cachedout/issue_31427
  - 74c3053c91 Remove debugging
  - 30eb5fccc7 Additional tests, but disable the test for distinct lists, because of a problem with context in test suite
  - 3d2ae05e5 Check for duplicate grains during list insertion

- **ISSUE #29727**: (oeuftete) dockerng.running does not pull image as documented (refs: #31352, #31455)

- **PR #31455**: (ticosax) [dockerng] Disable notset check @ 2016-02-25 19:15:09 UTC
  - e85ae2341a Merge pull request #31455 from ticosax/diable-NOTSET-check
  - e072937243 dockered returns sometimes None or [] for ports.
  - 563041889 _api_mismatch was a good idea

- **PR #31488**: (isbm) Unit Test for Zypper’s "remove" and "purge" @ 2016-02-25 17:52:33 UTC
  - e68a0947b7 Merge pull request #31488 from isbm/isbm-zypper-ut-removepurge
  - d30f2e6267 Implement unit test for remove and purge
  - 4caf201052 Refactor code (a bit)
  - df89da4d15 Fix the docstring

- **PR #31485**: (jacobhammons) Fixed transport description in minion / master config @ 2016-02-25 17:04:15 UTC
  - cd87760c87 Merge pull request #31485 from jacobhammons/2015.8
  - 748aaca8b5 Fixed zeromq casing in transport settings
  - 765a226907 Fixed transport description in minion / master config

- **PR #31411**: (justinta) Added some beacons execution module integration tests @ 2016-02-25 16:16:26 UTC
  - fb1ef92e2b Merge pull request #31411 from jtand/beacons_tests
  - 7d32b56015 Added some more checks to verify beacon changes were actually happening
  - 2da5285c03 Added codeauthor
  - df1e2838ea Lint
  - 42b1112914 Added config_dir to test minion config
  - bf6a4c0983 Fixed lint error
  - 3566fbbbca More updates to beacons test
  - 37c4bf22d2 Updated beacons integration test
  - 6db628be1a Basic integration tests for beacons execution module
  - 3b3c38c2e68 Started adding beacons execution module tests

- **ISSUE #31216**: (oliver-dungey) pkg.installed documentation not consistent with implementation (refs: #31475)

- **ISSUE #30464**: (sjmh) pillar_env minion config option needs to be documented (refs: #31475)

- **ISSUE #30261**: (MadsRC) Add ability to define custom beacons (refs: #31475)

- **ISSUE #29636**: (ronnix) Documentation for the refresh_password arg in postgres_user.present is confusing (refs: #31475)
• ISSUE #29528: (apergos) nitpick for "Using Salt at scale" tutorial (refs: #31475)

• ISSUE #29520: (arthurlorigilab) [doc] transport option not in default master configuration nor in the example file of the documentation (refs: #31475)

• ISSUE #10330: (jhenny82) exclude keyword not working (refs: #31475)

• PR #31475: (jacobhammons) Assorted doc issues @ 2016-02-25 16:03:54 UTC
  - 2e9a705e75 Merge pull request #31475 from jacobhammons/2015.8
  - a72dc15720 Assorted doc issues Fixes #10330 Fixes #31216 Fixes #30464 Fixes #29520 Fixes #30261 Fixes #29636 Fixes #29528

• ISSUE saltstack/salt-bootstrap#695: (mtippett) Install Failures With Raspbian Jessie (refs: #31510, #31477, #31458)

• PR #31477: (vutny) Correct installation documentation for Ubuntu @ 2016-02-25 16:01:38 UTC
  - 3905dd81d3 Merge pull request #31477 from vutny/correct-doc-install-ubuntu
  - 172f34a6ca Correct headers in Debian/Ubuntu/SUSE install instructions
  - 4248f9e0a0 Add common packages installation section to Debian install guide
  - 8c6e179870 Add note about amd64 packages to Ubuntu install guide
  - afaa24723a Update Ubuntu install guide:

• PR #31479: (isbm) Zypper unit tests & fixes @ 2016-02-25 15:58:15 UTC
  - f027dc0cf8 Merge pull request #31479 from isbm/isbm-zypper-unittest
  - 9f643333cb Do not use Zypper purge (reason: too dangerous)
  - bc05ac7c3 Fix PyLint
  - c0eab8b549 Add space before "assert" keyword
  - 6bc89a8f6 Implement list packages test
  - 78837d2926 Add mocking data
  - 0b64b8137f Implement test for version compare, where python fall-back algorithm is called
  - 18b30a3274 Implement test for version compare, where RPM algorithm is called
  - 59eca53441 Adjust test case for the third package in the test static data
  - 8034cf0b91 Add third test package static info
  - 90f209569a Implement test for the upgrade_available
  - ad87e719d6 Bugfix: when only one package, no dict is returned. Still upgrade_available should return boolean.
  - 7eb5f19cb4 Implement test for latest_available
  - e372c0b596 Implement test for the info_available
  - 447771c0fc Add Zypper static data for the available packages
  - 6989871d27 Implement test for info_installed
  - 0cc6bce4aa Use strings instead of unicode strings
  - 3342c03987 Implement list upgrades test
  - 8862d7af65 Add list upgrades Zypper static data
- 4d38d318f4 Implement error handling test for listing upgrades
- 080b4ee617 Do not strip the output
- 53338402a5 Use renamed zypper products data file
- c6135975b0 Rename Zypper products static test data file
- ab3ff53d89 Reimplement list_upgrades to use XML output from Zypper instead
- e87864986d Add Zypper unit test: test_list_products and test_refresh_db
- cd6419fc9c Add Zypper Unit Test installed products sample data

• ISSUE #31370: (Ch3LL) pkg.info_installed on ubuntu12 does not output info and stack trace (refs: #31439)
• ISSUE #31366: (Ch3LL) pkg.info_installed on centos5 does not output info (refs: #31445)
• PR #31445: (rallytime) Only use LONGSIZE in rpm.info if available. Otherwise, use SIZE. @ 2016-02-24 18:35:31 UTC
  - PR #31439: (rallytime) Fix lowpkg.info function for Ubuntu 12 - make sure we have a pkg name (refs: #31445)
  - 987dd89979 Merge pull request #31445 from rallytime/fix-31366
  - 42415a4a7b Make rpm_tags query more concise
  - 9965fe188a Added to pkg.info_installed test for RedHat and Suse systems
  - 47cc7c3466 Add error check when retcode is 0, but stderr is present
  - 294371243d Only use LONGSIZE in rpm.info if available. Otherwise, use SIZE.
• PR #31464: (Ch3LL) integartion test: ensure decorator only runs on one method and not class @ 2016-02-24 18:35:00 UTC
  - 979c8b4f6a Merge pull request #31464 from Ch3LL/fix_int_test
  - a387d175d8 integration test- ensure decorator only runs on one method and not entire class
• ISSUE saltstack/salt-bootstrap#695: (mtippet) Install Failures With Raspbian Jessie (refs: #31510, #31477, #31458)
• PR #31458: (vutny) Correct installation documentation for Debian @ 2016-02-24 17:01:09 UTC
  - aa0a9a03dd Merge pull request #31458 from vutny/correct-doc-install-debian
  - 42aa7eeaf6 Add section about installation from the Debian Main Repository
  - 07dece2f8f Remove duplicate post-installation section for Debian install guide
  - 10c05f6943 Add install section for Debian Stretch (Testing) from community repository
  - b2c78e08dc Add note about supported Debian architectures on SaltStack corp repo
• PR #31457: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-02-24 16:42:17 UTC
  - 330c4d8b0f Merge pull request #31457 from rallytime/merge-2015.8
  - 94b3cf08c7 Merge branch '2015.5' into '2015.8'
    - 26733ce988 Merge pull request #31442 from sastorsl/salt-modules-file.py-copy-check-src
      - 0a4132866d removed lint in the exception string
      - f8b5d498c3 Add os.path.exists(src) to file.py, def copy
    - e480727d27 Merge pull request #31441 from cachedout/issue_30739

5054 Chapter 28. Release Notes
· ffcadf1570 Include localhost minions in presence detection for runner
  · 91ff9f093 Merge pull request #31416 from carlwgeorge/selinux_doc_fix
  · 0e6846d72e selinux module documentation fix
  · 7d01979898 Merge pull request #31336 from terminalmage/config-validation-logging
    · 7950008bad1 Improve config validation logging
  · fed096a29d Merge pull request #31374 from sjorge/solarish_hwaddr
    · bdf2576dfb missed a .format and messed up the join
    · bbd2fde96d fix for illumos/solaris hwaddr
  · 6ee17f905b Merge pull request #31339 from jacobhammons/dot7prev
    · 07120a8d48 changed latest release to 2015.8.7

• ISSUE #31370: (Ch3LL) pkg.info_installed on ubuntu12 does not output info and stack trace (refs: #31439)

• PR #31439: (rallytime) Fix lowpkg.info function for Ubuntu 12 - make sure we have a pkg name (refs: #31445) @ 2016-02-24 16:24:46 UTC
  - e53f18dc4 Merge pull request #31439 from rallytime/fix-31370
  - 1931c61563 Only run this pkg.info_installed test on distros that have that func
  - 0488668a00 Fix lowpkg.info function for Ubuntu 12 - make sure we have a pkg name

• PR #31456: (RabidCicada) Clarified the form of requisite targets/requisite-references @ 2016-02-24 16:24:00 UTC
  - fcb12db6e96 Merge pull request #31456 from RabidCicada/clarify-requisites-doc
  - 87f4843490 Clarified the form of requisite targets/requisite-references

• ISSUE #30431: (nbow) cp.get_url with large files results in an Uncaught Exception (refs: #30704)

• ISSUE #27093: (TheBigBear) 2015.8.0 winrepo downloader corrupts some installers (refs: #30704)

• PR #31453: (DmitryKuzmenko) Backport cp_geturl fix for large files into 2015.8 @ 2016-02-24 15:38:24 UTC
  - PR #30704: (DmitryKuzmenko) Issues/30431 get url large file (refs: #31453)
  - 7dac1db55d Merge pull request #31453 from DSRCcompany/issues/30431_get_url_large_file_2015.8_backbort
  - 664bdec2b3 Backport cp_geturl fix for large files into 2015.8

• PR #31444: (jacobhammons) Documentation updates - ddns state, file.line state/exe function, installation dependencies @ 2016-02-23 22:40:05 UTC
  - 8f6c4be618 Merge pull request #31444 from jacobhammons/ddns-docs
  - 0b8ece1de4 Fixes #31402 Added arguments to state file.line to fix issue where exe module uses line and state module uses name. Reformatted parameters in exe module file.line placeholder release notes for 2015.5.8
  - 0b1fd7c21 Added note clarifying when dnspython is not required

• PR #31341: (twangboy) Clarification on Windows Package Manager docs @ 2016-02-23 16:09:18 UTC
  - 42027ed72 Merge pull request #31341 from twangboy/package_manager_docs
  - c16cfc6360 Fix typos
  - 8df0f65ecce Fix some formatting issues
  - d7e2f4f13b Merge branch '2015.8' of https://github.com/saltstack/salt into 2015.8
807257b138 Clarification for Windows Package Manager

- **PR #31380**: (kiorky) Bring up ext_pillar rendering errors as well @ 2016-02-23 16:08:39 UTC
  - 30d968c0a7 Merge pull request #31380 from kiorky/p
  - e3e97a43ce Bring up ext_pillar rendering errors as well

- **ISSUE #31410**: (terminalmage) Debian GNU/Linux grains broken in head of 2015.8 branch (refs: #31418)

- **PR #31418**: (terminalmage) Fix core grains when Debian OS detected as 'Debian GNU/Linux' @ 2016-02-23 15:49:49 UTC
  - 64ed9fcdd01 Merge pull request #31418 from terminalmage/fixed-debian-grains
  - 5c833efc01 Support running grains tests
  - 0e0cd17160 Rename core.py to core_test.py
  - d3cd1b596d Add unit test for core grains
  - e3d549d376 Fix debian grains setup

- **PR #31429**: (mcalmer) fix argument handling for pkg.download @ 2016-02-23 15:48:23 UTC
  - ec01b994bd Merge pull request #31429 from mcalmer/fixed-refresh-arguments
  - 299c07a7d fix argument handling for pkg.download

- **PR #31432**: (ticosax) [dockerng] Hotfix docker 1.10.2 @ 2016-02-23 15:39:04 UTC
  - 05c12b9b1 Merge pull request #31432 from ticosax/hotfix-docker-1.10.2
  - 1e9f6f324 Handle inconsistencies in dockerd API
  - 848415f58 pep8

- **PR #31420**: (twangboy) Handle Unversioned Packages @ 2016-02-22 23:46:24 UTC
  - fb81e9054 Merge pull request #31420 from twangboy/unversioned_pkgs
  - 816e991e87 Fix version check
  - 85d8b938ad Match unversioned packages to winrepo

- **PR #31417**: (jacobhammons) ddns state docs updated with notes regarding the name, zone, and keyfile. @ 2016-02-22 23:16:48 UTC
  - 19d7810478 Merge pull request #31417 from jacobhammons/ddns-docs
  - 5c4ebbb572 Added notes regarding the name, zone, and keyfile.

- **PR #31391**: (redmcg) Added sanity check: is 'pillar' in self.opts @ 2016-02-22 20:05:27 UTC
  - ac6a79abc Merge pull request #31391 from redmcg/master_schedule_fix
  - 91c74feaf3 Added sanity check: is 'pillar' in self.opts

- **PR #31376**: (cro) Some distros don’t have a /lib/systemd @ 2016-02-22 18:11:39 UTC
  - c7bd13c9c9 Merge pull request #31376 from cro/suse_service2
  - f3fec5562e We need one more mocked return from listdir.
  - ab9d9e7008 Can’t add a tuple and a string.
  - 8f12db61a0 Check to see if a path is a link, because it’s likely that if it IS a link, one of the other paths points to it. Ignore so we don’t get duplicates.
  - 8f0e866f1b Some distros do not seem to have a /lib/systemd, but do have a /usr/lib/systemd
• **ISSUE #29727:** (oeuftete) dockerng.running does not pull image as documented (refs: #31352, #31455)

• **ISSUE #27976:** (syphernl) Module dockerng.inspect_image always returns 404 (refs: #31352)

• **PR #31352:** (ticosax) [dockerng] Pull missing images when calling dockerng.running @ 2016-02-22 16:54:10 UTC
  - 105821efc7 Merge pull request #31352 from ticosax/pull-image-on-running
  - 8c86eeb4dc Pull missing images when calling dockerng.running

• **PR #31378:** (mcalmer) Zypper refresh handling @ 2016-02-22 16:50:28 UTC
  - 83294e4f3a Merge pull request #31378 from mcalmer/zypper-refresh-handling
  - 274e6467be do not change kwargs in refresh while checking a value
  - 644b14c273 simplify checking the refresh paramater
  - db0e0de2fd add refresh option to more functions
  - 5836be3f59 unify behavior of refresh

• **ISSUE #31229:** (eykd) git.latest broken behavior in 2015.8.x on older Git (refs: #31373)

• **PR #31373:** (terminalmage) Use --set-upstream instead of --track to set upstream on older git @ 2016-02-22 16:46:00 UTC
  - e2468b89a Merge pull request #31373 from terminalmage/issue31229
  - 28f0a75cc1 Use --set-upstream instead of --track to set upstream on older git

• **ISSUE #31137:** (jeffreytang) logrotate creates .bak files in /etc/logrotate.d which logrotate reads. (refs: #31390)

• **PR #31390:** (abednarik) Fix Logrotate module. @ 2016-02-22 16:09:15 UTC
  - c5790bc4d6 Merge pull request #31390 from abednarik/remove_deprecated_psed_in_lorgotate
  - c1e0ff7785 Fix Logrotate module.

• **PR #31354:** (ticosax) [dockerng] Dont require auth for all registries @ 2016-02-20 05:45:10 UTC
  - 174ee10fc2 Merge pull request #31354 from ticosax/dont-require-auth-for-all-registries
  - 4a9f661d66 It exists public registries where auth is not required.

• **PR #31368:** (whiteinge) Update list of netapi clients for autoclass @ 2016-02-19 20:57:28 UTC
  - 8d0498eff4 Merge pull request #31368 from whiteinge/netapi-client-list
  - 0cf5d89a0 Update list of netapi clients for autoclass

• **PR #31367:** (techhat) Add docs on how to actually use SDB @ 2016-02-19 20:07:17 UTC
  - 9b0e29107b Merge pull request #31367 from techhat/sdbdocs
  - eea192a545 Add docs on how to actually use SDB

• **PR #31357:** (ticosax) [dockerng] Support docker inconsistencies @ 2016-02-19 20:02:08 UTC
  - 7e599f0e27 Merge pull request #31357 from ticosax/support-docker-inconsistencies
  - 3672b8e7b1 docker daemon returns sometimes empty list and sometimes None

• **PR #31353:** (ticosax) [dockerng] Fix when ports are integers @ 2016-02-19 19:55:30 UTC
  - PR #31326: (ticosax) [dockerng] Detect settings removal (refs: #31353)
• PR #31346: (ticosax) Backport #31130 to 2015.8 @ 2016-02-19 19:46:48 UTC
  - PR #31130: (ticosax) Saltndo: provide also get parameters to the context (refs: #31346)
  - dec254a7a2 Merge pull request #31346 from ticosax/backport-31130-to-2015.8
  - a8dc33a5e3 Saltndo provide also get parameters to the context

• PR #31332: (terminalmage) Clarify documentation for gitfs/hgfs/svnfs mountpoint and root options @ 2016-02-19 18:31:29 UTC
  - d639d65381 Merge pull request #31332 from terminalmage/issue31167
  - eebc325040 Clarify documentation for gitfs/hgfs/svnfs mountpoint and root options

• PR #31305: (mcalmer) call zypper with option –non-interactive everywhere @ 2016-02-19 18:14:57 UTC
  - d067e77fee Merge pull request #31305 from mcalmer/zypper-non-interactive-everywhere
  - 75e776761c write a zypper command builder function
  - 3df302fcb7 call zypper with option –non-interactive everywhere

• PR #31337: (jacobhammons) Release notes and versioning for 2015.8.7 @ 2016-02-19 00:20:30 UTC
  - 98a14f8090 Merge pull request #31337 from jacobhammons/dot7
  - d4fb33939e Release notes and versioning for 2015.8.7

• PR #31326: (ticosax) [dockerng ] Detect settings removal (refs: #31353) @ 2016-02-18 22:02:50 UTC
  - f0ba9c1eca Merge pull request #31326 from ticosax/dockerng-detect-settings-removal
  - 7bedd86ebe Add detection of removed settings.

• ISSUE #30932: (johje349) Glusterfs peered fails on secondary host in 2015.8.4 (refs: #31299)

• PR #31287: (joejulian) Rework tests and fix reverse peering with gluster 3.7 @ 2016-02-18 17:57:23 UTC
  - 5d31715391 Merge pull request #31287 from joejulian/2015.8-dockerng-detect-settings-removal
  - 75e776761c write a zypper command builder function
  - 3df302fcb7 call zypper with option –non-interactive everywhere

• ISSUE #29795: (vutny) Unable to override state-output setting in command line (refs: #31299)
• **PR #31299**: (rallytime) Allow state-output and state-verbose default settings to be set from CLI @ 2016-02-18 17:25:23 UTC
  - d20a30b8be Merge pull request #31299 from rallytime/fix-29795
  - 483f31922b Allow state-output and state-verbose default settings to be set from CLI
• **PR #31317**: (terminalmage) Fix versionadded directive @ 2016-02-18 16:56:32 UTC
  - 25d8af21e9 Merge pull request #31317 from terminalmage/git-version-audit
  - acc3b54621 Fix versionadded directive
• **ISSUE #30999**: (orymate) git.latest rev=tag fails with old git(1) (refs: #31245, #31301)
• **PR #31301**: (terminalmage) Corrected fix for #30999 @ 2016-02-18 15:59:40 UTC
  - PR #31245: (jespada) fix git state for git version older than 1.9.2 (refs: #31301)
  - f2b662371c Merge pull request #31301 from terminalmage/issue30999
  - 625af70e08 Fix --unset-upstream handling
  - 7940881797 fix git state github issue #30999
• **PR #31302**: (terminalmage) Audit CLI opts used in git states @ 2016-02-18 15:58:48 UTC
  - 408d89e174 Merge pull request #31302 from terminalmage/git-version-audit
  - ca410c0a94 Audit CLI opts used in git states
• **PR #31312**: (terminalmage) Merge 2015.5 into 2015.8 @ 2016-02-18 15:57:08 UTC
  - 098f05eb3c Merge pull request #31312 from terminalmage/merge-forward-2015.5-2015.8
  - 808d150fe4 Merge remote-tracking branch 'upstream/2015.5' into merge-forward-2015.5-2015.8
  - cd3400e67e Merge pull request #31288 from notpeter/ssh_known_hosts_docs
    * 3f573d89a2 Improve salt.states.ssh_known_hosts documentation.
    * 875d9925fa Merge pull request #31183 from heyfife/fixed-gce-named-static-ip-reservation
      * 26774e2323 Fixed named external_ip reservation/re-use code.
  - e56c402c0c Merge pull request #31032 from terminalmage/issue31001
    * 42daea4509 yumpkg.py: Remove repoquery usage everywhere but check_db
    * 50befbc149 backport salt.utils.pkg.rpm to 2015.5
    * a1ad14994a Move salt.utils.iteersplit() to salt.utils.iteertools.split()
    * 5b8646ce64 Ignore failure to install new enough dnf-plugins-core
    * defe0859fd Ensure that dnf-plugins-core 0.1.15 is installed
    - cec69b74f0 Merge pull request #31264 from sjorge/if_missing-155-fix
      * 545edbf5e1 fix if_missing gets appended to dirs list, take III
• **ISSUE #31223**: (pprince) file_tree pillar: fails when data files at root end in `\n` (refs: #31225)
• **PR #31225**: (pprince) Fix in file_tree pillar (Fixes #31223.) @ 2016-02-18 06:06:12 UTC
  - c58f654bc3 Merge pull request #31225 from pprince/PR/bugfix/file_tree
  - d592d8636b Fix regression in file_tree pillar (Fixes #31223.)
• **PR #31233**: (mcalmer) implement version_cmp for zypper @ 2016-02-17 20:20:19 UTC
- fe9e5d27e6 Merge pull request #31233 from mcalmer/2015.8-zypperpy-add-version_cmp
- 389a4b2548 Check if rpm-python can be imported
- 6ad6a90955 pylint changes
- 7beaf26068 implement version_cmp for zypper

- **PR #31273: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-02-17 20:14:05 UTC**
  - 93c03a400b Merge pull request #31273 from rallytime/merge-2015.5
  - 11cfb636b Pylint fix
  - 023ad4635c Merge branch '2015.5' into '2015.8'
    - fa3f474de9 Merge pull request #31110 from cachedout/fixup_30730
      - 5bf5848e04 Fixup unit test
      - f55868e0a Fixes pylintrc warnings
      - 56a975ec43 Attempt to fix pylintrc warnings
      - 55d71be057 Make documentation and code examples consistent with code
      - 1f04fed6f8 Change parameter name from includes to skips
      - ccf5e13e7d Adding support for skipHidden in SetInclude
      - 4f2d4af2e7 Variable names standardization
      - f5917ac1e8 Fixes typo
      - 26e5236073 Invert RebootRequired logic
      - 8065a7abf6 Add basic documentation and define how the skips parameter works.
      - 389fea7508 Change parameter name from includes to skips
      - 30e1fe906 Adding support for skipHidden in SetInclude
      - 1244ee5ae8 Variable names standardization, consistent if/else logic with states.win_update

- **PR #31253: (gtmanfred) allow for nova servers to be built with premade volumes @ 2016-02-17 17:55:39 UTC**
  - dc2e7c8956 Merge pull request #31253 from gtmanfred/2015.8
  - 36bf06e539 fix doc for boot_volume
  - 9660c91b57 allow for nova servers to be built with premade volumes

  – a743778e98 Use correct deploy directory
• **ISSUE** #27498: (arthurlogilab) [runner] salt-run cache.clear_mine_func broken, can’t take clear_mine_func (refs: #31191)

• **PR** #31191: (rallytime) Make sure doc example matches kwarg @ 2016-02-13 21:34:57 UTC
  - 434e05667a Merge pull request #31191 from rallytime/fix-27498
  - 0dbaa4d9d1 Make sure doc example matches kwarg

• **PR** #31171: (Ch3LL) added logic to check for installed package @ 2016-02-12 22:10:21 UTC
  - c5e5a827e Merge pull request #31171 from Ch3LL/megan-20158
  - a12e2f566b fix lint error
  - a123fda4ef added logic to check for installed package

• **ISSUE** #30934: (marnovdm) contents_pillar no longer works with lists in 2015.8.5 (refs: #31026, #31177)

• **PR** #31177: (Ch3LL) add integration test for issue #30934 @ 2016-02-12 22:09:31 UTC
  - a024d3536f Merge pull request #31177 from Ch3LL/test_content_pillars

• **PR** #31181: (cachedout) Lint 2015.8 branch @ 2016-02-12 21:57:02 UTC
  - 1f22335c28 Merge pull request #31181 from cachedout/lint_20158

• **ISSUE** #29423: (l13t) iptables and match-set with two parameters (refs: #29718)

• **PR** #31169: (rallytime) Back-port #29718 to 2015.8 @ 2016-02-12 18:28:13 UTC
  - PR #29718: (thusoy) Support match-sets in iptables module (refs: #31169)
  - 4d1b49c1e7 Merge pull request #31169 from rallytime/bp-29718
  - cceae216f8 Support match-sets in iptables module

• **PR** #31170: (rallytime) Back-port #31157 to 2015.8 @ 2016-02-12 18:27:49 UTC
  - PR #31157: (captaininspiration) Fix locale generation on Ubuntu (refs: #31170)
  - f2ef36c1 Merge pull request #31170 from rallytime/bp-31157
  - 27776b5f4e Fix locale generation on Ubuntu

• **PR** #31147: (cro) Documentation clarifications. @ 2016-02-12 17:16:27 UTC
  - 7f49fbb70d Merge pull request #31147 from cro/fx2_doc
  - a005e4af55 Documentation clarifications.

• **PR** #31153: (edencrane) Fixed invalid host causing ‘reference to variable before assignment’ @ 2016-02-12 16:30:19 UTC
  - 7986b9e033 Merge pull request #31153 from edencrane/fix-network-connect-invalid-hostname
  - a14c4bb5f2 Fixed invalid host causing ‘reference to variable before assignment’

• **ISSUE** #30994: (onorua) beacon enable from state is failing (refs: #31152)

• **PR** #31152: (garethgreenaway) fixes to beacon module, state module and friends @ 2016-02-12 16:27:40 UTC
  - f5ab76801b Merge pull request #31152 from garethgreenaway/30994_beacon_add_failing_and_other_fixes
- 91b14dc40 fixing the beacon module and state module to handle passing enabled properly. Also reworking how what is returned from the validating functions is handled to ensure when beacon configurations aren’t validate the results indicate exactly why.

- **PR #31149**: (jfindlay) add 2015.8.7 release notes @ 2016-02-12 00:06:15 UTC
  - c8047d979d Merge pull request #31149 from jfindlay/2015.8
  - b58783b895 add 2015.8.7 release notes

- **PR #31134**: (isbm) Fix types in the output data and return just a list of products @ 2016-02-11 20:19:22 UTC
  - 5c394ac49c Merge pull request #31134 from isbm/isbm-zypper-list-products
  - 670a326e3d Fix types in the output data and return just a list of products

- **ISSUE #31115**: (nfillot) 2015.8.5 salt-cloud nova valid ip address was not found (refs: #31120)

- **ISSUE #29758**: (zaide) 2015.8.3 salt-call runners.cloud: local variable 'access_ip' referenced before assignment (refs: #31120)

- **ISSUE #29666**: (tminn) Nova driver broken for 2015.8[1-3] (refs: #31120)

- **PR #31120**: (gtmanfred) Clean up some bugs in the nova driver @ 2016-02-11 20:17:41 UTC
  - 8f2e3a26e5 Merge pull request #31120 from gtmanfred/2015.8
  - 4a411c0817 fix comment
  - 47ecb7a150 include all ips in public_ips or private_ips
  - b2e8202f5d dont exit on a missing server
  - 8ad1ee6db4 clean up references to access_ip extra network

- **ISSUE #31099**: (Ch3LL) Cannot specify size in map file in 2015.8 (refs: #31132)

- **PR #31132**: (rallytime) Make sure required profile configurations passed in a map file work @ 2016-02-11 20:16:46 UTC
  - 2d592a398e Merge pull request #31132 from rallytime/fix-31099
  - 1da03da9df Pylint fix
  - 337592ec56 Make sure required profile configurations passed in a map file work

- **ISSUE #31014**: (gtmanfred) [2015.8] pkg breaks for yum pkgs.latest if the packages has an epoch (refs: #31131, #31015, #31031)

- **PR #31131**: (Ch3LL) integration test for issue #31014 @ 2016-02-11 17:33:23 UTC
  - b831e0a865 Merge pull request #31131 from Ch3LL/megan-20158
  - af82b1233a integration test for issue #31014

- **PR #31133**: (cachedout) Fixup 31121 @ 2016-02-11 17:32:24 UTC
  - e378a68d9f1 Merge pull request #31133 from cachedout/fixup_31121
  - a4040da46d Fix bad unit test
  - 0e68fa8b74 Fix alternative module and state.

- **PR #31125**: (isbm) Force-kill websocket’s child processes faster than default two minutes. @ 2016-02-11 16:50:57 UTC
  - a4a40262f8 Merge pull request #31125 from isbm/isbm-salt-api-service
  - f73f70375c Force-kill websocket’s child processes faster than default two minutes.
• PR #31119: (sakateka) fixes for ipv6-only multi-master failover @ 2016-02-11 16:21:45 UTC
  - 79c85859bc Merge pull request #31119 from sakateka/fix-for-ipv6only-failover
  - 2c45d151d1 fix unintentional breaking changes
  - 043a5ee8fd7 fixes for ipv6-only multi-master failover
• PR #31107: (techhat) Don’t try to add a non-existent IP address @ 2016-02-10 21:52:42 UTC

• PR #30998: (dmacvicar) add_key/reject_key: do not crash w/Permission denied: '/var/cache/salt/master/.dfn' (#27796) @ 2016-02-09 17:57:36 UTC
  – 0dcd0a2a7 Merge pull request #30998 from dmacvicar/dmacvicar-2015.8-27796
  – 9602e2aeb Do not crash on add_key/reject_key if the previous one set the drop file. (#27796)
• ISSUE #31041: (fredrikaverpil) Reading about win_service in 2015.8.5 docs, but it’s not available in 2015.8.5 (refs: #31550, #31049)
• PR #31049: (twangboy) Fix versionadded in win_service.config (refs: #31550) @ 2016-02-09 17:55:07 UTC
  – e773fc822a Merge pull request #31049 from twangboy/win_svc_docs
  – 98005255d1 Fix versionadded in win_service.config
• PR #30987: (youngnick) Changed glusterfs.peer() module so state can handle localhost peering attempts. @ 2016-02-09 17:51:58 UTC
  – c3f115724a Merge pull request #30987 from youngnick/add-back-localhost-peer-handling
  – 730b5e3e2 Update tests to cover new peering return val.
  – b2407305e8 Changed glusterfs.peer() module call return val so state can handle localhost peering attempts.
• PR #31042: (moltob) Allow using Windows path in archive.extracted name attribute @ 2016-02-09 17:47:20 UTC
  – 8518655bfb Merge pull request #31042 from moltob/fix-archive-winpath
  – 9dc6617a53 Allow using Windows path in archive.extracted name attribute, including drive letter colon and backslashes.
• **PR #31012**: (terminalmage) Fix gitfs/git_pillar/winrepo provider to allow lowercase values @ 2016-02-09 17:24:25 UTC
  - 1950359580 Merge pull request #31012 from terminalmage/fix-gitfs-provider-lc
  - 763581798b Add unit tests to ensure a valid provider
  - 49e61d5b58 Fix gitfs/git_pillar/winrepo provider to allow lowercase values

• **ISSUE #30983**: (JensRantil) salt.modules.aptpkg.upgrade does not necessarily do `apt-get dist-upgrade` (refs: #31024)

• **PR #31024**: (jfindlay) modules.aptpkg.upgrade: clarify dist-upgrade usage @ 2016-02-09 17:20:57 UTC
  - 3d8681b63e Merge pull request #31024 from jfindlay/dist_upgrade
  - 3d1be08ad modules.aptpkg.upgrade: clarify dist-upgrade usage

• **ISSUE #30938**: (lorengordon) Windows: Upgrade overwrites minion config file (refs: #31029, #31028)

• **PR #31028**: (twangboy) Fix config overwrite by windows installer @ 2016-02-09 17:20:24 UTC
  - a0454bb00 Merge pull request #31028 from twangboy/fix_installer
  - 887689b5c Fix remove placeholder files
  - 78885cc94 Remove placeholder files
  - c8349d5e5 Set overwrite to off

• **ISSUE #31014**: (gtmanfred) [2015.8] pkg breaks for yum pkgs.latest if the packages has an epoch (refs: #31131, #31015, #31031)

• **PR #31031**: (terminalmage) More complete fix for #31014 @ 2016-02-09 17:04:42 UTC
  - PR #31015: (gtmanfred) include possible epoch in version for rpm (refs: #31031)
  - 071b9d4904 Merge pull request #31031 from terminalmage/issue31014
  - 6d15a17d6b Fix yumpkg _get_branch_option()
  - 4b855a85ee Don’t handle epoch specially for dnf
  - 5244de2fae More efficient way to add the epoch before version number
  - e1211ed89f include possible epoch in version for rpm

• **ISSUE #30934**: (marnovdm) contents_pillar no longer works with lists in 2015.8.5 (refs: #31026, #31177)

• **PR #31026**: (terminalmage) Fix regression when contents_pillar/contents_grains is a list. @ 2016-02-09 00:03:15 UTC
  - 2b8f7a12e7 Merge pull request #31026 from terminalmage/issue30934
  - f43af4dff Fix regression when contents_pillar/contents_grains is a list.

• **ISSUE #30472**: (sjorge) KeyError with schedule (refs: #30978)

• **PR #30978**: (garethgreenaway) fixes to state.py in 2015.8 @ 2016-02-08 18:49:05 UTC
  - de215bd040 Merge pull request #30978 from garethgreenaway/30472_state_functions_no_default_retcode
  - e33b51406 removing extra spaces.
  - f668cc1f7 removing duplicate code, just set the default in the _set_retcode function
  - 5f2f0f60c0 The functions in the state module that return a retcode when something goes wrong, eg. a 1 or a 2, do not return a 0 when things go the way they’re supposed to go. With the recent changes to the scheduler to ensure that the retcode is returned this is problematic and results in exceptions when
a state function is run from the schedule. This simple fix ensures a default retcode of 0 exists, it is then override in the _set_retcode function if there is an issue with the run

- **PR #30893**: (bdrung) Make build reproducible @ 2016-02-08 18:44:35 UTC
  - 65fbf980cf Merge pull request #30893 from bdrung/reproducible
  - 089c69ec3 Make build reproducible

- **PR #30945**: (cachedout) Note that pillar cli args are sent via pub @ 2016-02-08 18:43:59 UTC
  - 5b0c7649c7 Merge pull request #30945 from cachedout/note_pillar_cli
  - 3ff7d49555 Note that pillar cli args are sent via pub

- **ISSUE #31000**: (rmtmckenzie) Salt-cloud profile state fails to create LXC minion (refs: #31002)

- **PR #31002**: (rmtmckenzie) Fix lxc cloud provided minion reporting present @ 2016-02-08 18:14:50 UTC
  - 3b7be62398 Merge pull request #31002 from rmtmckenzie/cloud-lxc-provide-fix
  - 9b17fde56e Fix lxc cloud provided minion reporting present

- **PR #31007**: (justinta) Fixed rabbitmq_vhost test failure. @ 2016-02-08 17:48:00 UTC
  - c48122ae9a Merge pull request #31007 from jtan/rabbitmq_vhost_test_fix
  - 962e0dada5 Fixed rabbitmq_vhost test failure.

- **ISSUE #30993**: (fredrikaverpil) Overstate: "This documentation has been moved here" (dead end) (refs: #31004)

- **PR #31004**: (rallytime) Remove overstate docs and a few references. @ 2016-02-08 17:08:24 UTC
  - 811461eb4 Merge pull request #31004 from rallytime/fix-30993
  - 3eb68125 Remove overstate docs and a few references.

- **PR #30965**: (anlutro) Fix rabbitmq_vhost.present result when test=True @ 2016-02-08 04:34:45 UTC
  - 641256e6c7 Merge pull request #30965 from alprs/fix-rabbitmq_vhost_present_test
  - 2313747958 return changes when test=True
  - 95e874b72 make the code a bit simpler
  - aba29a73c4 fix rabbitmq_vhost.present result when test=True

- **PR #30955**: (Ch3LL) docs: add clarification when source is not defined @ 2016-02-06 18:29:33 UTC
  - ef02779391 Merge pull request #30955 from Ch3LL/clarify_file_doc
  - 97b57ed2b1 docs: add clarification when source is not defined

- **PR #30941**: (rallytime) Back-port #30879 to 2015.8 @ 2016-02-05 21:15:20 UTC
  - **PR #30879**: (rhansen) Don’t delete a Docker volume if the volume’s driver differs (refs: #30941)
    - d9785451c0 Merge pull request #30879 from rallytime/bp-30879
    - eb6289fc1 change default for volume_present()’s force parameter to False
    - 34f3057e04 add ’force’ to replace (or not) volumes with driver mismatch
    - d6d3b1573e typo fixes

- **PR #30940**: (twangboy) Fix Build Process for OSX @ 2016-02-05 18:44:34 UTC
  - 21a83065aa Merge pull request #30940 from twangboy/mac_build_3
  - 3654a0e0c2 Change 2015 to 2016 in license file
- Update instructions in readme.md for shasum
- Added code to add /opt/salt/bin to the path
- Disable master, syndic, and api in postinstall
- Re-added start on load and keep alive
- Removed keepalive option
- Remove autostart for api, master, and syndic
- Added minimum requirements for installation
- Fix error on kickstart command
- Change to new way of starting and stopping services
- Fix preinstall and postinstall scripts
- Upgrade to latest pip
- Updated pip dependencies
- Removed GPL Licensed software from build

**PR #30944** (jacobhammons) 2015.8.5 release notes linking and clean up @ 2016-02-05 17:40:10 UTC
- Merge pull request #30944 from jacobhammons/rel-notes
- 183b500055 2015.8.5 release notes linking and clean up

**ISSUE #30882** (hoonetorg) state lvm.vg_present broken with pv on devicemapper-dev (centos 7.2) (refs: #30905)

**ISSUE #26867** (joejulian) lvm pv’s can show as not belonging to their vg if symlink is used (refs: #30905)

**PR #30905** (joejulian) Add realpath to lvm.pvdisplay and use it in vg_present @ 2016-02-05 17:05:32 UTC
- 91806b03b9 Merge pull request #30905 from joejulian/2015.8_fix_lvm_pv_mapper
- f96650f3c3 Add realpath to lvm.pvdisplay and use it in vg_present

**ISSUE #30923** (yougnick) Starting a glusterfs volume after creation fails with an exception in 2015.8 and after. (refs: #30924)

**PR #30924** (yougnick) Fix small bug with starting volumes after creation. @ 2016-02-05 16:58:22 UTC
- af2832b69d Merge pull request #30924 from yougnick/glusterfs-start-volume-bug
- be5295cf7b Fix small bug with starting volumes after creation.

**PR #30910** (cro) fix iDRAC state @ 2016-02-05 16:49:06 UTC
- 3a6666ad25 Merge pull request #30910 from cro/fx2_idrac
- 68af2ab185 Lint.
- c274c7ef6c Lint.
- 3e38b762bf Add generic command for executing racadm commands on individual blades in a chassis.
- 05979010f5 Finish the idrac state, fix problem with grains not loading sometimes.

**PR #30919** (garethgreenaway) Fixes to ssh_auth state module @ 2016-02-05 16:15:28 UTC
- 101fa12479 Merge pull request #30919 from garethgreenaway/ssh_auth_cp_get_url_needs_saltenv
- c9ba038553 The call to cp.get_url needs the saltenv, if you’re using environments other than base, it will fail.
• ISSUE #30300: (AkhterAli) boto_route53 __salt__ not defined. (refs: #30867, #30920)

• PR #30920: (jacobhammons) Versioned to 2015.8.5, added known issue #30300 to release notes @ 2016-02-05 01:12:17 UTC
  - 6d4fd11dd0 Merge pull request #30920 from jacobhammons/release-notes
  - 93d4f8615 Versioned to 2015.8.5, added known issue #30300 to release notes

• PR #30894: (terminalmage) git module/state: Handle identity files more gracefully @ 2016-02-04 23:55:01 UTC
  - 3d3321ab92 Merge pull request #30894 from terminalmage/issue30858
  - 08741eb969 Update versionadded/versionchanged
  - 8909d430e1 salt.states.git.latest(): Prevent tracebacks when git ssh auth fails
  - c961cf1c7d git: only use passphrase-protected key if invoked using salt-call
  - 0b286f1bc3 Add global ssh_config path to git ssh wrapper
  - f813ce4ad Add salt.modules.ssh.key_is_encrypted()
  - 1ae7c53e17 Add salt.utils.files.process_read_exception()

• ISSUE #30694: (pankajghadge) Tomcat war deployment version issue in new SALT version (refs: #30750)

• PR #30750: (jfindlay) extract whole war version @ 2016-02-04 21:41:01 UTC
  - 2415b3e62e Merge pull request #30750 from jfindlay/war_version
  - 4b01c28f99 modules.states.tomcat: allow specifying war version
  - 6decdca0f states.tomcat: _extract_war_version parses path
  - 8dd3b6dfef9 modules.war._extract_war_version: allow non-semver

• ISSUE #30817: (bogdanr) If the private_key filespecified in the provider is missing then the driver will be disabled (refs: #30884)

• PR #30884: (rallytime) Move checks for private_key file existence and permissions to create function @ 2016-02-04 21:03:23 UTC
  - 6a6456eaa6 Merge pull request #30884 from rallytime/fix-30817
  - 086dada476 We need to check for a key_filename before looking for the path
  - e72f34b418 Move checks for private_key file existence and permissions to create function

• PR #30888: (ticsax) Backport #30797 to 2015.8 @ 2016-02-04 21:02:25 UTC
  - PR #30797: (rhansen) don’t delete existing Docker volume if driver unspecified (refs: #30888)
  - 4ae2d829f0 Merge pull request #30888 from ticosax/backport-30797
  - 413c47a45f don’t delete existing Docker volume if driver unspecified
  - 68b51be869 add additional states.dockerng.volume_present() unit tests
  - 849b94ed73 document the behavior if the driver is unspecified

• PR #30895: (bdrung) Fix various typos @ 2016-02-04 20:55:10 UTC
  - 4372851ad9 Merge pull request #30895 from bdrung/2015.8
  - 708f2ff8ea Fix typo reponse -> response

• ISSUE #30814: (gpenin) [2015.8.4][Ubuntu12.04LTS][dpkg.py] Invalid "${binary:Package}" field in dpkg-query (refs: #30850)

• PR #30850: (jfindlay) modules.dpkg._get_pkg_info: allow for ubuntu 12.04 @ 2016-02-03 16:33:26 UTC
  - 8410842aea Merge pull request #30850 from jfindlay/dpkg_var
  - d53a8876e Lint

• PR #30852: (replicant0wnz) Added more descriptive error message @ 2016-02-03 16:30:15 UTC
  - 9a3ec9d028 Merge pull request #30852 from replicant0wnz/error-message-libgit

• PR #30847: (terminalmage) Backport #30844 to 2015.8 branch @ 2016-02-03 16:26:46 UTC
  - 0338f445d9 Merge pull request #30847 from terminalmage/bp-30844
  - 58c4c1743 Add __role to master opts for gitfs integration tests
  - 17dfec2dd4 Only perform initial fetch when running on a minion
- 53c4b4aa4a4 gitfs: add initial fetch to pygit2 and dulwich
- 78f92e9ab2 Fix for gitfs ext_pillar on standalone minion

**PR #30860:** (vutny) Correct installation documentation for RHEL-based distributions @ 2016-02-03 16:13:09 UTC

- e51182495c Merge pull request #30860 from vutny/correct-doc-install-on-rhel
- 6648fd4c62 Correct links to Fedora COPR repositories
- 083037fccc Remove duplicate post-installation tasks section

**PR #30841:** (jacobhammons) Release notes for 2015.8.5 @ 2016-02-03 00:04:05 UTC

- f1cf077308 Merge pull request #30841 from jacobhammons/release-notes
- 6d0562e8f6 Release notes for 2015.8.5

**ISSUE #30820:** (Supermathie) State runs involving watch_in or extending break on 2015.8.4 (refs: #30837, #30835, #30833)

**PR #30835:** (terminalmage) Integration test for #30820 @ 2016-02-02 23:51:53 UTC

- f8ac6002d3 Merge pull request #30835 from terminalmage/issue30820
- e14956db0 Integration test for #30820

**ISSUE #30820:** (Supermathie) State runs involving watch_in or extending break on 2015.8.4 (refs: #30837, #30835, #30833)

**PR #30833:** (jacobhammons) Added known issue #30820 to release notes @ 2016-02-02 22:33:43 UTC

- e0901584ce Merge pull request #30837 from jacobhammons/release-notes
- 29e12a7fe7 Added known issue #30820 to release notes

**ISSUE #28790:** (jfindlay) add grains (and others?) to salt modindex (refs: #30832)

**PR #30832:** (rallytime) Add grains modules to salt modindex @ 2016-02-02 21:47:46 UTC

- b512c7757a Merge pull request #30832 from rallytime/fix-28790
- ca044dd201 Add grains modules to salt modindex

**ISSUE #28971:** (belt-ascendlearning) if the user exists, but has no permissions, rabbitmq_user.list_user_permissions() blows (refs: #30822)

**PR #30822:** (rallytime) Make sure setting list_user_permissions to ["",""] doesn’t stacktrace @ 2016-02-02 21:42:26 UTC

- 75db37a97d Merge pull request #30822 from rallytime/rabbitmq-user-state-fixes
- 272cc653ca Make sure setting list_user_permissions to ["",""] doesn’t stacktrace
- a7afa7a368 Don’t return a set() when checking for new tags in rabbitmq_user state

**ISSUE #30820:** (Supermathie) State runs involving watch_in or extending break on 2015.8.4 (refs: #30837, #30835, #30833)

**PR #30833:** (terminalmage) Fix regression in scanning for state with ’name’ param @ 2016-02-02 21:25:09 UTC

- 557676f20b Merge pull request #30833 from terminalmage/issue30820
- be3bfe2b6 Fix regression in scanning for state with ’name’ param

**ISSUE #30722:** (yannis666) mine config is not merged from minion config and pillar (refs: #30757, #30823)

**PR #30823:** (yannis666) Fix for mine to merge configuration on update. @ 2016-02-02 20:21:24 UTC
- ec4e2bb9bb Merge pull request #30823 from yannis666/fix-for-mine-update-merge2
- 99c7c12aba Fix for mine to merge configuration on update. This fix was previously applied to 2015.5. It fixes #30722

- **PR #30827:** (jacobhammons) Version to 2015.8.4, added CVE 2016-1866 to release notes @ 2016-02-02 20:03:31 UTC
  - d24b9f1ea1 Merge pull request #30827 from jacobhammons/release-2015.8
  - dfc1f7a57d Version to 2015.8.4, added CVE 2016-1866 to release notes

- **ISSUE #30809:** (anlutro) Master configuration "pillar_merge_lists" has no effect (refs: #30813)

- **ISSUE #29601:** (seanjnkns) pillars not merging properly with 2015.8.3 (refs: #30062)

- **PR #30813:** (anlutro) Properly set the default value for pillar_merge_lists @ 2016-02-02 19:53:52 UTC
  - **PR #30458:** (rallytime) Back-port #30062 to 2015.8 (refs: #30813)
  - **PR #30062:** (seanjnkns) Remove recurse_list from pillar_source_merging_strategy and add pilla... (refs: #30813, #30458)
  - f83845d7c3 Merge pull request #30813 from alprs/fix-pillar_merge_list_default
  - ec34cabe48 Properly set the default value for pillar_merge_lists

- **PR #30826:** (cachedout) Fix 30682 @ 2016-02-02 19:40:05 UTC
  - a3f8b4a26 Merge pull request #30826 from cachedout/fix_30682
  - 3b246db0b0 Fix stupid test
  - 12dc677628 Changed list conversion to use correct method and return whole set
  - 97eb4b8f7f Pop values from new_tags set before loading into dict value

- **PR #30818:** (rallytime) Back-port #30790 to 2015.8 @ 2016-02-02 18:57:55 UTC
  - **PR #30790:** (xmj) salt/modules/sysrc.py: Fix documentation for set_ (refs: #30818)
  - b2c5e85d05 Merge pull request #30818 from rallytime/bp-30790
  - c7c66af0d0 salt/modules/sysrc.py: Fix documentation for set_

- **ISSUE #30604:** (vutny) Reactor overwrites user argument when calling runner or wheel module (refs: #30815)

- **PR #30815:** (vutny) Pick right user argument for updating reactor function’s low data @ 2016-02-02 16:50:23 UTC
  - 3cb7a9ee54 Merge pull request #30815 from vutny/reactor-low-data-fix
  - 4d4d67f9ac Pick right user argument for updating reactor function’s low data

- **ISSUE #30676:** (bwillcox) testsystemd.sh tries to use ‘which’ that does not exist in centos 7 lxc rootfs (refs: #30747)

- **PR #30747:** (jfindlay) modules.lxc.running_systemd: use command -v not which @ 2016-02-02 14:54:17 UTC
  - 36752906c4 Merge pull request #30747 from jfindlay/lxc_which
  - f8f876570f modules.lxc.running_systemd: use command -v not which

Salt 2015.8.8.2 Release Notes

Version 2015.8.8.2 is a bugfix release for 2015.8.0.

Fixes to 2015.8.8

Salt 2015.8.8.2 includes fixes for the following known issues in 2015.8.8:

- Key master with value [...] has an invalid type of list Error (issue #32044)
- Failed to import module win_dacl Error (issue #32004)
- Wrong validation type for file_ignore_glob key (issue #32114)
- Fix file.managed for windows (issue #31969)

Important: issue #32183 prevents Salt Cloud from installing the Salt minion on new systems. To workaround this issue, call `salt-cloud -u` to update the bootstrap script to the latest version.

Changelog for v2015.8.8..v2015.8.8.2

Generated at: 2018-05-28 00:29:12 UTC

- 403563e441 Change type check errors to debug loglevel
- 8323005b3d Support multiple valid option types when performing type checks
- 2f95082a96 Fixed validation type for file_ignore_glob Fixes #32114
- 2685e61d9e Move constant declaration into member variable to avoid issues when modules can’t be loaded.
- bc10d7dede Add apply_template_on_contents for windows

28.2.60 Salt 2015.8.9 Release Notes

Version 2015.8.9 is a bugfix release for 2015.8.0.
Statistics

- Total Merges: 145
- Total Issue References: 110
- Total PR References: 264

Important Post-Upgrade Instructions for Linux Mint

As a result of some upstream changes, the os grain on Mint Linux is now being detected as LinuxMint (issue #33295). Run the following command after you upgrade to 2015.8.9 to reset the os grain to Mint and the os_family grain to Debian:

```
salt -G 'os:LinuxMint' grains.setvals "{'os': 'Mint', 'os_family': 'Debian'}"
```

- PR #33274: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-05-16 16:41:32 UTC
  - 06edba448e Merge pull request #33274 from rallytime/merge-2015.8
- bf641d3a66 Merge branch '2015.5' into '2015.8'
- 8fa72f6588 Clarify file.replace MULTILINE flag interaction with regex anchors (#33137)
- 4b1f660256 update 2015.5.11 release notes (#33236)

- **ISSUE #30258**: (rallytime) Changes dictionary return should be mentioned in test state docs (refs: #33254)
  - **PR #33254**: (rallytime) Add comment for test=true w/o changes ret and add changes dict example

- **ISSUE #30946**: (rallytime) Update SaltStack Git Policy Documentation (refs: #33252)
  - **PR #33252**: (rallytime) Update Git Policy docs to match Contribution guide

- **ISSUE #33238**: (clinta) x509 CSR fails if the csr does not contain any extensions (refs: #33239)
  - **PR #33239**: (clinta) Fix #33238
  - **PR #33245**: (terminalmage) Backport #33244 to 2015.8
  - **PR #33244**: (terminalmage) Properly report on invalid gitfs/git_pillar/winrepo repos (refs: #33245)
  - **PR #33238**: (icosax) [gitfs] only 2 argument are passed to this template when render error message (refs: #33244, #33245)

- **ISSUE #30605**: (eyj) Update development/conventions/release.rst docs - they’re out of date with the current process. (refs: #33253)
  - **PR #33253**: (rallytime) Update the release process docs @ 2016-05-13 21:28:11 UTC
    - 94a53da92e Merge pull request #33253 from rallytime/fix-30605
    - a129d05b6d Update the release process docs
  - **PR #33251**: (jfindlay) update 2015.8.9 release notes

- **ISSUE #33243**: (jbonachera) salt-cloud: wait_for_port() doesn’t work with ipv4-only hosts (refs: #33246, #33300)
  - **PR #33246**: (techhat) Handle ipv6 error as an exception

- **ISSUE #33073**: (robnagler) TypeError: unhashable type: 'dict' (refs: #33213)
  - **PR #33213**: (terminalmage) Check rendered YAML for invalid keys

- **ISSUE #21903**: (basepi) Document _file.conf pattern for master.d/ and minion.d/ (refs: #33224)
  - **PR #33224**: (rallytime) Make note of files that begin with '.' in master.d or minion.d dirs

- **ISSUE #31975**: (rajvidhimar) Docstrings not reflected in the salt document. (refs: #33150)
  - **PR #33150**: (rallytime) Gate jnpr imports in salt.proxy.junos.py

- **ISSUE #21315**: (ryan-lane) No example documentation for http.query state (refs: #33222)
  - **PR #33222**: (rallytime) Add docs for the http state

- **ISSUE #29796**: (vutny) Fail to use 'highstate' outputter explicitly (refs: #33215)
  - **PR #33215**: (rallytime) Don’t stacktrace when using –out=highstate at CLI during state run.
    - **PR #33219**: (lalmeras) propagate opts to salt.util.http call
    - **PR #33154**: (lalmeras) propagate opts to salt.util.http call (refs: #33219)
  - **PR #33237**: (jfindlay) update 2015.8.9 release notes

- **PR #33217**: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-05-12 22:45:39 UTC
  - 6dc5d605b1 Merge pull request #33217 from rallytime/merge-forward-2015.8
- 4655607b58 Merge branch '2015.5' into '2015.8'
- 698f1eb657 Merge pull request #33211 from cachedout/user_kill
  - d4f2e5baa7 Don’t try to kill a parent proc if we can’t
- f86832911e Resolve issue with pkg module on Mint Linux (#33205)
- a09e1b6335 Add pip installed and removed test (#33178)
- 96e3586f12 update 2015.5.11 release notes (#33197)
- 09b072a412 Fix file.managed for Windows (#33181)
- PR #33207: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8

- ISSUE #32917: (bradthurber) standalone minion pygit2 pillar data doesn’t refresh without manual git fetch (refs: #33204)
  - PR #33204: (terminalmage) Add a fetch when compiling git_pillar for masterless minions
- ISSUE #33162: (jfindlay) Key error with salt.utils.cloud.cache_node and EC2 (refs: #33164)
  - PR #33164: (jfindlay) cloud.clouds.ec2: cache each named node
- ISSUE #32385: (aronneagu) git.latest throws expected string or buffer (refs: #33203)
  - PR #33203: (terminalmage) Properly handle failed git commands when redirect_stderr=True
- ISSUE #32685: (gidantribal) git state does not take into account ssh config file (refs: #33152)
  - PR #33152: (terminalmage) Don’t force use of global ssh_config when git identity file is specified
  - PR #33198: (jfindlay) update 2015.8.9 release notes
- PR #33188: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-05-11 22:32:29 UTC
  - 6177a6a36f Merge pull request #33188 from rallytime/merge-2015.8
  - f12ba6eb6c Merge branch '2015.5' into '2015.8'
  - 308e8ab06c [2015.5] Update to latest bootstrap script v2016.05.11 (#33185)
  - 264ad34b3b Pip fix (#33180)
  - 43288b268d add 2015.5.11 release notes (#33160)
  - e0da8fd7d [2015.5] Update to latest bootstrap script v2016.05.10 (#33155)
  - PR #33161: (jfindlay) add 2015.8.9 release notes
  - PR #33156: (rallytime) [2015.8] Update to latest bootstrap script v2016.05.10
- ISSUE #25040: (yi9) grains.get can’t get minion’s /etc/salt/grains value in multi-master set up (refs: #33142)
  - PR #33142: (cachedout) Hash fileclients by opts
- ISSUE #22142: (multani) State acl.present doesn’t allow to set "default" ACLs (refs: #31769)
  - PR #33139: (rallytime) Back-port #31769 to 2015.8
  - PR #31769: (DylanFrese) Fix acl.present and acl.absent when adding default ACLs (refs: #33139)
- PR #33144: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-05-10 19:40:31 UTC
  - 2800762b44 Merge pull request #33144 from rallytime/merge-2015.8
  - 449176f06e Merge branch '2015.5' into '2015.8'
  - 6cd1641840 Merge pull request #33141 from jfindlay/disable_local_pkg_install_test
PR #33140: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-05-10 16:57:55 UTC
- 72d075e14e Merge pull request #33140 from rallytime/merge-2015.8
- c732c8104b Merge branch '2015.5' into '2015.8'
- 878d34a865 Doc mock decorators (#33132)

ISSUE #32834: (beardedeagle) Masterless Minion - Unable to query job cache (refs: #33017, #33100)
- PR #33100: (rallytime) If cache_jobs: True is set, populate the local job cache when running salt-call
- PR #33135: (stk0vrlf0w) Fix broken parsing of usermgmt.conf on OpenBSD
- PR #33129: (rallytime) Back-port #33101 to 2015.8
- PR #33101: (thatch45) Add a check that the cmdline of the found proc matches (refs: #33129)
- PR #33064: (terminalimage) salt.utils.gitfs: fix formatting for warning messages

ISSUE #33058: (aclemetson) Unable to run "win_servermanager.list_available" on minion. (refs: #33099)
- PR #33099: (twangboy) Fix 33058

ISSUE #32999: (basepi) Stacktrace for master_finger mismatch on minion (refs: #33106)

PR #33106: (abednarik) Moved _finger_fail method to parent class. @ 2016-05-09 16:31:09 UTC
- 8acc3147d6 Merge pull request #33106 from abednarik/abednarik_master_Finger_stacktrace
- 91a69ba54a Moved _finger_fail method to parent class.
- PR #33102: (Ch3LL) clarify docs that map is designed to be run once. is not stateful
- PR #33098: (rallytime) Back-port #33061 to 2015.8
- PR #33061: (ahammond) cloud.query needs to define mapper.opts (refs: #33098)

PR #33096: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-05-06 19:27:57 UTC
- c17aed8a5 Merge pull request #33096 from rallytime/merge-2015.8
- 0fd5e9d157 Merge branch '2015.5' into '2015.8'
- 30edeadfd Lower display of msgpack failure msg to debug (#33078)
- d492ceca22 Use saltstack repo in buildpackage.py on CentOS 5 (#33080)
- 61d126cb98 add test for installing package while using salt-call -local (#33025)
- 6d3e4e8935 File and User test fixes for 2015.5 on Fedora23 (#33055)
- d48b2b8b52 test pillar.items output (#33060)
- 398793bfc0 Fix minor document error of test.assertion (#33067)
- f8757631b2 Saltfile with pillar tests (#33045)
- 1d792421e Backport #33021 manually to 2015.5 (#33044)
- f00b5f91b3 Add run_on_start docs to schedule.rst (#32958)
- PR #32865: (idonin) salt-cloud: fix ipv6-only virtual machines
- PR #33084: (jfindlay) modules.npm: do not log npm -version at info level

ISSUE #33068: (pythonwood) salt-ssh do not support centos5 because old-version-python ? (refs: #33081)

PR #33081: (jfindlay) ssh docs: install py-2.6 for RHEL 5 @ 2016-05-06 15:18:39 UTC
- 3808d05838 Merge pull request #33081 from jfindlay/ssh_doc
- a2c927b173 ssh docs: install py-2.6 for RHEL 5

**PR #33088**: (isbm) Bugfix: Restore boolean values from the repo configuration @ 2016-05-06 15:13:27 UTC
- 6d604926d3 Merge pull request #33088 from isbm/isbm-zypper-fix-booleans
- 3ca203eb8e Bugfix (follow-up): setting priority requires non-positive integer
- 79a46e091c Add repo config test
- 222b8369ca Add test data for repos
- b746fa35f0 Bugfix: Restore boolean values from the repo configuration

**ISSUE #12422**: (creaky) Bug: file.blockreplace inserts additional blank line on multi-line content (refs: #33049)
- PR #33082: (Ch3LL) Fix tests for file.blockplace to remove newline
- PR #33049: (thatch45) Don’t append a newline when creating new content with blockreplace (refs: #33082)

**PR #32892**: (isbm) Resolve Zypper locks on asynchronous calls @ 2016-05-05 14:34:59 UTC
- fb89877cf2 Merge pull request #32892 from isbm/isbm-zypper-env-variables
- 1601a7e07a Prevent the use of "refreshable" together with "nolock" option.
- 52e1be2fa9 Remove unused variable in a constructor. Adjust the docstring accordingly.
- 7e00f566ef Move log message down to the point where it actually sleeps. Rephrase the message.
- 4b7dab83ff Fix PID file path for SLE11
- 7f37961d4b Rename tags
- c55b0fab58 Test DOM parsing
- c54e928e4f Add exception handling test
- 3d245bbe84 Parse DOM out of the box, when XML mode is called
- 6a98f523ac Add Zypper caller test suite
- f189f90124 Bugfix: always trigger __getattr__ to reset and increment the configuration before the call.
- 7e1712dd80 Fix tests according to the new calling model
- 3a30b7fbcd Remove an obsolete test case
- 6e5877a2ee Add Zypper Call mock
- bb5540cb4a Bugfix: inverted logic on raising (or not) exceptions
- ce9262fe71 Make Zypper caller module-level reusable
- 77dc8695af Update docstrings according to the bugfix
- 46d86b21d5 Bugfix: accept refresh override param
- cb40618262 Fire an event about released Zypper with its result
- 0728f0bc00 Replace string values with the constants
- 6af3f7141b Check if zypper lock exists and add more debug logging
- 0167b30a75 Add Zypper lock constant
- 370ff21d36 Fire an event to the Master about blocked Zypper.
- 1727ca3de2 Use new Zypper call implementation
- 485164aa5c Remove blocking-prone Zypper call implementation
- f161f0612c Implement block-proof Zypper call implementation
- baf35ed708 Remove one-char variables
- 2c94eb016f Remove an unused variable
- 6869ebc557 Remove an empty line
- 7e06489da9 Remove verbose wrapping
- 2131ff04af Standarize zypper call to "run_all"
- 046ef44ca3 Bugfix: version_cmp crashes in CLI if there are versions, that looks like integer or float.
- b869a92eea Change Zypper calls to a single point

• ISSUE #24237: (Grokzen) Minion schedule return data missing some fields (refs: #33039)
  - PR #33039: (The-Loeki) Add fun_args to scheduled return data (part of #24237)
• ISSUE #12422: (creaky) Bug: file.blockreplace inserts additional blank line on multi-line content (refs: #33049)
  - PR #33049: (thatch45) Don’t append a newline when creating new content with blockreplace (refs: #33082)
• ISSUE #24996: (danlsgiga) –failhard option not working as expected (refs: #33048)
  - PR #33048: (rallytime) Pass all data to batch.run() call when using –failhard
• ISSUE #32452: (nicholascapo) cmd.run_all with –batch and –failhard gives no output on failure (refs: #33050)
  - PR #33050: (rallytime) Display command output when command fails with batch + failhard options
• ISSUE #33041: (anitakrueger) boto_elb.present security_groups kwarg is a list - needs documentation (refs: #33053)
  - PR #33053: (rallytime) Allow security_groups kwarg for boto_elb.present to be string or list
  - PR #33054: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8
  - PR #33056: (justinta) File and User test fixes for 2015.8 on Fedora23
• ISSUE #32472: (esn89) salt-minion is stuck in a restart loop with not much info: (refs: #33030)
  - PR #33040: (rallytime) Back-port #33030 to 2015.8
  - PR #33030: (thatch45) When we restart the minion we should show the error that caused it (refs: #33040)
• ISSUE #32834: (beardeddeagle) Masterless Minion - Unable to query job cache (refs: #33017, #33100)
  - PR #33017: (rallytime) Update the docs for saltutil.find_job to be more clear/accurate
  - PR #33031: (rallytime) Back-port #33002 to 2015.8
  - PR #33002: (whiteinge) Add saltenv to the cmd.script state function (refs: #33031)
  - PR #33021: (UtahDave) Fix syndic regression (refs: #33044)
• ISSUE #11801: (slai) Salt does not match user names properly under Windows (refs: #32674)
  - PR #32674: (twangboy) Compare uid and gid instead of name and group
• ISSUE #32856: (DeanScothern) jjid not shown when running the salt command line with –batch-size using either –verbose or –show-jid with certain salt versions (refs: #32996)
• ISSUE #31738: (igorwidlinski) salt –show-jid does not show job id when run in batch mode (refs: #32450)
- PR #32996: (rallytime) Allow batch mode to use verbose option, as well as show_jid.
- PR #32450: (cachedout) Pass parser options into batch mode (refs: #32996)

- ISSUE #32954: (atengler) glusterfs.peered fails with 'NoneType' object is not iterable (refs: #32955)
  - PR #32955: (atengler) Fixed glusterfs.peered output

- ISSUE #26011: (rodriguezsergio) states.virtualenv != modules.virtualenv (refs: #32994)
  - PR #32994: (rallytime) Clarify some arg docs for virtualenv state
  - PR #32986: (justinta) Fix boto_secgroup_test

- ISSUE #32777: (sjorge) cron.present broken on Solarish systems if user specified (refs: #32970)
  - PR #32970: (sjorge) fix user cron on solarish operating systems
  - PR #32976: (jfindlay) salt.log.setup: process user args before format

- ISSUE #32891: (guettli) docs: Note "This document represents behavior exhibited by Salt requisites as of version 0.9.7 of Salt." (refs: #32934)
  - PR #32934: (jfindlay) doc.ref.states.ordering: clarify requisite change

- ISSUE #32882: (papertigers) carbon_return is missing a default value. (refs: #32883)
  - PR #32928: (rallytime) Back-port #32883 to 2015.8
  - PR #32883: (papertigers) mode should default to 'text' (refs: #32928)

- ISSUE #32646: (deamen) FileClient Class ( client = salt.minion.FileClient(__opts__) ) does not exist (refs: #32925)
  - PR #32925: (rallytime) Remove FileClient class references from docs - it doesn’t exist.

- ISSUE #23683: (gravyboat) contents_grains should have an example (refs: #32922)
  - PR #32922: (rallytime) Update contents_grains option with relevant docs

- ISSUE #32926: (rallytime) Merge forward from 2015.5 to 2015.8 @ 2016-04-28 19:47:52 UTC
  - e60c12640d Merge pull request #32926 from rallytime/merge-2015.8
  - 5a184881be Merge branch '2015.5' into '2015.8'
  - edce22a143 backport PR #32732 to 2015.5 fixes #23714 (#32848)
  - PR #32908: (Ch3LL) Specify EBS volume tags in profile configuration in aws

- ISSUE #23952: (neogenix) iptables state append doesn’t honor position -1 (refs: #32906)
  - PR #32906: (rallytime) Update docs to warn users that -1 isn’t valid for iptables insert state

- ISSUE #32510: (Ch3LL) Cannot specify image in provider file when using map file (refs: #32900)
  - PR #32900: (rallytime) Allow profile options to be specified in provider file when using maps

- ISSUE #30855: (guettli) Docs: does salt.states.service support systemd? (refs: #32880)
  - PR #32880: (rallytime) Clarify service state opening docs - uses 'service' virtualname

- PR #32884: (terminalmage) Fix incorrect deprecation notice @ 2016-04-27 15:47:35 UTC
  - e1b46b3b76 Merge pull request #32884 from terminalmage/fix-incorrect-deprecation-notice
  - b307c5452a Fix incorrect deprecation notice

- a2921b9da0 Merge pull request #32878 from jacobhammons/salt-cloud
- 3887938727 added note about updating the bootstrap script in salt-cloud using the -u flag, removed the saltconf banner.

**ISSUE #32861:** (bradthurber) Is it master_syndic or syndic_master? (refs: #32869)

**PR #32869:** (rallytime) Use correct config setting in cloud syndic docs @ 2016-04-26 19:13:21 UTC
- 71db10fd2c Merge pull request #32869 from rallytime/fix-32861
- 0e73daa126 Use correct config setting in cloud syndic docs

**PR #32844:** (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-04-26 17:38:08 UTC
- 02c681311f Merge pull request #32844 from rallytime/merge-2015.8
- 1fc9de1d04 Add 'file.source_list' mock to archive state unit tests
- 9064d3bbfb Merge branch '2015.5' into '2015.8'
  - 9b5c14c37c salt-cloud -u downloads stable version from bootstrap.saltstack.com by default (#32837)
  - 9725804448 update bootstrap to 2016.04.18 release (#32667)
  - c842e1e437 Merge pull request #32776 from rallytime/merge-2015.5
    - 7ecb9f885 Merge pull request #14 from whiteinge/runner-asyn-low
    - 211f7b4af1 Format low data correct for runner_async
    - ce72851861 Merge branch '2014.7' into '2015.5'
    - 2775edc176 Saltnado /run fix (#32590)
    - b19c5a5ce7 Verify auth in saltnado run (#32552)
- 67d0c81184 Support remote sources in a source list (#32691)
- bd5442d768 Merge pull request #32686 from cachedout/issue_32661
  - f704df90bc Fix stacktrace in batch with dup minion ids
- 3ec9502a86 Update "Low Hanging Fruit" to "Help Wanted" (#32675)
- 77bea56b68 Additional documentation on calling exec modules from templates (#32657)
- c910b8dd51 Fixing critical bug to remove only the specified Host instead of the entire Host cluster (#32639)
- 4568565d45 Add _syspaths.py to .gitignore (#32638)

**ISSUE #32799:** (belt) ssh_auth.present creates ~/.ssh (refs: #32868)
- PR #32868: (rallytime) Back-port #31139 to 2015.8
- PR #31139: (exowaucka) Improve %h and %u handling in SSH module (refs: #32868)

**ISSUE #23714:** (naemono) file.copy force ignored during highstate, but not with 'salt-call state.sls_id' (refs: #32732, #32847, #32848)
- PR #32847: (lomeroe) backport PR #32732 for issue #23714
- PR #32732: (lomeroe) correct use of force flag in file.copy #23714 (refs: #32847, #32848)

**ISSUE #32824:** (bradthurber) salt-cloud vmware: wrong pyvmomi installed for RHEL/CentOS 6 (refs: #32845)
- PR #32845: (rallytime) Add pyvmomi version warning to Getting Started with VMware docs
• **ISSUE #25492**: (hernanc) "docker-py mem_limit has been moved to host_config in API version 1.19" error (refs: #26518, #32818)
  - **PR #32841**: (rallytime) Back-port #32818 to 2015.8
  - **PR #32818**: (mitar) Pass None as memory limit (refs: #32841)
  - **PR #26518**: (krak3n) Fix for #25492 (refs: #32818)

• **ISSUE #32605**: (Talkless) pkgrepo.managed with apt does not add comments value later (refs: #32813)
  - **PR #32839**: (rallytime) Back-port #32813 to 2015.8
  - **PR #32813**: (abednarik) Add comments as an option for apt in pkgrepo.managed. (refs: #32839)
  - **PR #32659**: (jfindlay) Various improvements on cloud deploy script docs
  - **PR #32668**: (jfindlay) [2015.8] update bootstrap to 2016.04.18 release
  - **PR #32785**: (rallytime) Back-port #29322 to 2015.8
  - **PR #29322**: (mrproper) add http proxy support for tornado (refs: #32785)

• **ISSUE #32710**: (bradthurber) conf/master missing many gitfs and git_pillar parameters (refs: #32722)
  - **PR #32787**: (rallytime) Back-port #32722 to 2015.8 @ 2016-04-25 15:19:21 UTC
    - **PR #32722**: (bradthurber) Catch up the conf/master file to include gitfs/git_pillar parms from ... (refs: #32787)
    - 96a3d4e556 Merge pull request #32787 from rallytime/bp-32722
    - 8d7148d41b Catch up the conf/master file to include gitfs/git_pillar parms from recent releases

• **ISSUE #32609**: (anlutro) Tornado ioloop fails when master disconnects? (refs: #32749)
  - **PR #32749**: (DmitryKuzmenko) Properly handle minion failback failure.

• **ISSUE #32144**: (vutny) Pillar targeting starts to work only after calling saltutil.refresh_pillar (refs: #32643)
  - **PR #32643**: (vutny) Document pillar cache options

• **ISSUE #32705**: (joakimkarlsson) win_dacl.present: Specifying propagations for a directory fails (refs: #32720)
  - **PR #32720**: (jfindlay) modules.win_dacl: consistent case of dacl constants

• **ISSUE #30761**: (sjmh) Cannot target subsets of minions when using pillar and external_auth (refs: #31598)

• **ISSUE #21303**: (Lothiraldan) Explicit and document ACL rules format (refs: #32733)
  - **PR #32733**: (Lothiraldan) Update external auth documentation to list supported matcher.
  - **PR #31598**: (terminalmage) Remove limitations on validation types for eauth targets (refs: #32733)
- PR #32693: (techhat) Check dependencies type before applying str operations
- PR #32692: (garethgreenaway) Handle when beacon not configured and we try to enable/disable them

- PR #32718: (garethgreenaway) Fixes to schedule.list in 2015.8 @ 2016-04-20 19:51:24 UTC
  - f52af5a596 Merge pull request #32718 from garethgreenaway/2015_8_schedule_list_fix
  - 7fa5d809d2 backporting a fix from develop where the use of splay would result in seconds=0 in the schedule.list when there was no seconds specified in the original schedule

- PR #32684: (captaininspiration) Fix routes for redhat < 6 @ 2016-04-19 19:18:20 UTC
  - PR #32682: (captaininspiration) Fix routes for redhat < 6 (refs: #32684)
  - f63566e452 Merge pull request #32684 from captaininspiration/2015.8
  - 640c7a90da Fix routes for redhat < 6
  - PR #32683: (techhat) Handle a couple of arguments better (Azure)

- ISSUE #32523: (junster1) network.py/loader.py failing because cfn variable is not defined before use. (refs: #32672)
  - PR #32672: (junster1) Fix for issue 32523

- ISSUE #32517: (Ch3LL) Minion restarting and erroring when cannot reach the masters in multi-master failover (refs: #32555, #32556)
  - PR #32556: (DmitryKuzmenko) Don’t access deprecated Exception.message attribute.
  - PR #32655: (cachedout) Lower log level for pillar cache

- ISSUE #31542: (duk3luk3) jinja stringifies dict before passing it to execution module (maybe salt-ssh specific?) (refs: #32588)

- PR #32588: (anlutro) Fix salt-ssh module function call argument type juggling by JSON encoding them @ 2016-04-18 15:57:14 UTC
  - a6a427463d Merge pull request #32588 from alprs/fix-salt_ssh_module_types
  - d912f1c3c6 json encode arguments passed to an execution module function call

- ISSUE #32229: (seanjnkns) 2015.8.8.2: pkg.installed fails to update packages with epoch (refs: #32563)
  - PR #32563: (terminalmage) yumpkg: Ignore epoch in version comparison for explicit versions without an epoch
  - PR #32640: (nmadhok) [2015.8] - Fixing critical bug to remove only the specified Host instead of the entire Host cluster
  - PR #32649: (mcalmer) align OS grains from older SLES with current one
  - PR #32652: (ismb) Prevent crash if pygit2 package is requesting re-compilation of the e...

- PR #32614: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-04-15 19:27:47 UTC
  - 05a41a13cd Merge pull request #32614 from rallytime/merge-2015.8
  - 046e401dd8 Merge branch '2015.5' into '2015.8'
    * 027b502335 Merge pull request #32561 from gtmanfred/user_passwords
      3db5e78d5d redact passwords and hashes from user.present updates

- PR #32616: (rallytime) Back-port #32547 to 2015.8 @ 2016-04-15 19:27:36 UTC
  - PR #32547: (cro) Expand on the open-source vs open-core FAQ (refs: #32616)
- ef17bde054 Merge pull request #32616 from rallytime/bp-32547
- 4242bc7399 Language clarification.
- 965e3bc1d1 Expand on the open-source vs open-core FAQ
- PR #32604: (Talkless) Fix comments value in salt.states.pkgrepo example
- PR #32558: (terminalmage) Revert PR #32480 and apply #32314 with fixes / documentation
- PR #32480: (terminalmage) Clear VCS fsbackend and git_pillar locks on master start (refs: #32558)
- PR #32314: (onorua) prevent eternal gitfs lock due to process crash (refs: #32480, #32558)

- ISSUE #32519: (Ch3LL) Minion restarting and erroring when cannot reach the master (refs: #32576)
  - PR #32576: (DmitryKuzmenko) Better log message on minion restart if master couldn’t be reached.
- ISSUE #32517: (Ch3LL) Minion restarting and erroring when cannot reach the masters in multi-master failover (refs: #32555, #32556)
  - PR #32555: (DmitryKuzmenko) Don’t return None from eval_master
- PR #32536: (rallytime) Back-port #31898 to 2015.8 @ 2016-04-13 18:49:05 UTC
  - PR #31898: (afletch) Ensure rh_service not used on CloudLinux 7 (refs: #32536)
  - 27e91e40cc Merge pull request #32536 from rallytime/bp-31898
  - 60d80c4dee Ensure rh_service not used on CloudLinux 7
  - PR #32542: (twangboy) Fix binary search and replace
- PR #32539: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-04-13 15:10:08 UTC
  - cce7de76b0 Merge pull request #32539 from rallytime/merge-2015.8
  - fbaeb165c9 Merge branch '2015.5' into merge-2015.8
  - 7307cb88e Merge pull request #32538 from rallytime/bp-32528
    - 46a4e8a310 Remove merge conflict line
    - e0d947c707 Document "grains" setting in the minion configuration reference
- ISSUE #32493: (bberberov) dockerng.volume_present fails when no volumes already exist on the system (refs: #32531)
- PR #32531: (ticosax) [dockerng] Fix support of dockerng.volume_present when no volume is on present. @ 2016-04-13 14:42:13 UTC
  - 1834bdefe3 Merge pull request #32531 from ticosax/support-no-volumes
  - 958b2ec749 Fix support of dockerng.volume_present when no volume is on present.
  - PR #32475: (ticosax) [dockerng] Enhance dockerng.wait() to control success on exit_code and on already stopped containers
  - PR #32436: (isbm) Bugfix: salt-key crashes if tries to generate keys to the directory w/o write access
  - PR #32515: (terminalmage) Turn on exc_info when logging failed minion startup
  - PR #32520: (terminalmage) Add ignore_epoch option to pkg.installed/removed/purged states
  - PR #32505: (isbm) Isbm zypper list products sles11 crash
  - PR #32480: (terminalmage) Clear VCS fsbackend and git_pillar locks on master start (refs: #32558)
  - PR #32314: (onorua) prevent eternal gitfs lock due to process crash (refs: #32480, #32558)
- **ISSUE #32327**: (joakimkarlsson) salt-minion fails to start on Windows (refs: #32491)
  - PR #32491: (twangboy) Use win32api to get Total System Memory
- **ISSUE #31927**: (afletch) pkg.installed compares version including package epoch (pkg.version problem?) (refs: #32487)
- **PR #32487**: (terminalmage) Add explanation of nonzero epoch requirement to pkg.installed state documentation @ 2016-04-11 20:48:57 UTC
  - e335e313fe Merge pull request #32487 from terminalmage/epoch-documentation
  - e04cf879b6 Document new behavior of pkg.installed for yum/dnf packages with non-zero epoch
  - 61e9761224 Add explanation of nonzero epoch requirement to pkg.installed state documentation
- **PR #32482**: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-04-11 20:12:26 UTC
  - 1b04f0ddec Merge branch '2015.5' into '2015.8'
  - 29333e533e Add documentation for some master/minion configs (#32454)
  - 100c6e1b25 Merge pull request #32458 from terminalmage/clarify-providers-docs
    * 500d3ebbaa Add link to provider override docs to all group providers
    * 83ca01f620 Add link to provider override docs to all shadow providers
    * c5fe38789d Add link to provider override docs to all user providers
    * 5c1c1dda59 Add link to provider override docs to all service providers
    * 736f2befc9 Add link to provider override docs to all package providers
    * f9306347cc Clarify the scope of the provider param in states.
    * af24c82ab0 Add documentation on virtual module provider overrides to the module docs
    * 0bc6c97a63 Improve docstrings
    * 1948920674 Add external ref to windows package manager docs
    * e7fa21438c Add new doc pages to toctree
    * f0de1236ec Move the tables of virtual modules to individual documentation pages
- **ISSUE #30183**: (jakehilton) Minion startup extremely delayed when first master in failover multi master setup is down (refs: #31364, #31382, #32143)
- **ISSUE #29643**: (matthayes) Can’t get batch mode and –failhard to work as expected (refs: #31164)
- **ISSUE #28569**: (andrejohansson) Reactor alert on highstate fail (refs: #31164)
  - PR #32474: (DmitryKuzmenko) Backport 31164 and 31364
  - PR #32441: (cachedout) Backport 31164 31364 (refs: #32474)
  - PR #31364: (DmitryKuzmenko) Don’t send REQ while another one is waiting for response. (refs: #32441, #32474)
  - PR #31164: (DmitryKuzmenko) Issues/29643 fix invalid retcode (refs: #32441, #32474)
- **ISSUE #31738**: (igorwidlinski) salt –show-jid does not show job id when run in batch mode (refs: #32450)
- **PR #32450**: (cachedout) Pass parser options into batch mode (refs: #32996) @ 2016-04-08 23:03:49 UTC
  - 7bf44aea72 Merge pull request #32450 from cachedout/issue_31738
- 74d0fa06b4 Pass parser options into batch mode

- **ISSUE #28706**: (kkaig) user.present:groups vs group.present:members (refs: #30824, #32448)
  - **PR #32448**: (rallytime) Back-port #30824 to 2015.8
  - **PR #30824**: (alxt) Issue #28706: Fix state user.present behavior. (refs: #32448)

- **ISSUE #31851**: (rhansen) error using module.run -> saltutil.runner -> state.orchestrate: "The following arguments are missing: _fun" (refs: #32445)
  - **PR #32445**: (rallytime) Argument name in docs should match actual arg name
  - **PR #26676**: (rallytime) Back-port #26648 to 2015.5 (refs: #32445)
  - **PR #26648**: (whiteinge) Free 'fun' from the function signature namespace (refs: #26676)

- **ISSUE #32033**: (timcharper) SaltStack `modules.dockerng _compare` does not handle docker implicit Domain-name properly (issue when using network_mode: host) (refs: #32116, #32432)
  - **PR #32432**: (ticosax) [dockerng] Fix Domainname introspection @ 2016-04-08 16:12:19 UTC
    - a36f9499fc Merge pull request #32432 from ticosax/fixedomainname-introspection
    - 505b5b0168 Fix Domainname introspection

- **PR #32427**: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-04-08 15:39:13 UTC
  - def911974c Merge pull request #32427 from rallytime/merge-2015.8
  - 9531e6aef5 Merge branch '2015.5' into '2015.8'
  - 080912d6e8 Merge #32293 with test fixes (#32418)
  - bbd8260a42 Ignore Raspbian in service.py __virtual__ (#32421)
  - 690addf0b4 FreeBSD supports packages in format java/openjdk7 so the prior commit broke that functionality. Check freebsd/pkg#1409 for more info.
  - a36866d7db Merge pull request #32399 from amontalban/2015.5
    - * e1ffbd615a Fixes saltstack/salt#28262 for 2015.5 branch
    - 3f03c5ffc9 Merge pull request #32374 from cachedout/issue_32066
    - * 62389d1d1a Update proxmox documentation
    - 85780899eb Merge pull request #32339 from Ch3LL/fix_doc_multi-master
    - * 2774da288d remove reference to master_alive_check

- **ISSUE #32311**: (rkgrunt) glusterfs module incorrectly indexes into name of bricks (refs: #32312)

- **PR #32423**: (justinta) Update glusterfs_test to be inline with #32312 @ 2016-04-07 21:53:03 UTC
  - **PR #32312**: (rkgrunt) Fixed glusterfs module (refs: #32423)
  - 5bce8326ce Merge pull request #32423 from jand/glusterfs_test_fix
  - 6f9bd50ec Update glusterfs_test to be inline with #32312

- **ISSUE #31632**: (zieba88) salt-cloud map parallel provisioning -P option failed on 2015.8.5 (refs: #32425)

- **PR #32425**: (cachedout) Fix salt-cloud paralell provisioning @ 2016-04-07 21:52:06 UTC
  - c07e02bach Merge pull request #32425 from cachedout/issue_31632
  - 127c0829ee Fix salt-cloud paralell provisioning

- **PR #32323**: (mcalmer) fix sorting by latest version when called with an attribute @ 2016-04-07 06:24:35 UTC
– 2cc054bbc0 Merge pull request #32323 from mcalmer/fix-ensure-installed-latest-with-attributes
– cb1f30ee10 fix sorting by latest version when called with an attribute

- 9065201761 Merge pull request #32316 from vtuny/update-bootstrap-tutorial
- b96980f15d Update Salt Bootstrap tutorial

PR #32325: (bdrung) Re-add shebang to ssh-id-wrapper shell script @ 2016-04-04 17:08:41 UTC

- 352fsc01dl Merge pull request #32325 from bdrung/fix-shebang
- ffe585f078 Re-add shebang to ssh-id-wrapper shell script

PR #32326: (bdrung) Fix typos @ 2016-04-04 16:41:41 UTC

- f16e332b3a Merge pull request #32326 from bdrung/fix-typos
- a7db15333 Fix typo dont -> don't
- d4c037301b Fix typo missmatch -> mismatch
- 70db70ff0 Fix typo additonal -> addition
- 68c60903aa Fix typo mutliple -> multiple
- 0f2c779b90 Fix typo funcition -> function
- 0c9e4c8c80 Fix typo avilable -> available
- 920abe2ec7 Fix typo formated -> formatted
- e56dd4bb23 Fix typo ommitted -> omitted
- f99e6f1f13 Fix typo ouptut -> output
- d3804094f2 Fix typo wether -> whether
- 538fb6fae2 Fix typo perfomed -> performed
- db7af998ee Fix typo santized -> sanitized
- d7af01da2b Fix typo coresponding -> corresponding
- 301e78b5be Fix typo vaules -> values
- 8cada9573f Fix typos of retrieve
- b484d69c9 Fix typo directorys -> directories

**PR #32300**: (twangboy) Add documentation to disable winrepo/winrepo_ng @ 2016-04-01 21:23:09 UTC
  - 664043d7e7 Merge pull request #32300 from twangboy/fix_28767
  - c971a3b054 Add documentation for disabled the winrepos

**ISSUE #18429**: (somenick) Pillars passed from command-line override pillar subtrees instead of merging (refs: #32288)

**PR #32288**: (terminalmage) use dictupdate.merge instead of dict.update to merge CLI pillar overrides @ 2016-04-01 16:30:30 UTC
  - 42a25f6b9d Merge pull request #32288 from terminalmage/issue18429
  - db31732137 use dictupdate.merge instead of dict.update to merge CLI pillar overrides

**PR #32243**: (isbm) Ensure latest pkg.info_installed ensure latest @ 2016-03-31 16:09:59 UTC
  - 3e374e7ec6 Merge pull request #32243 from isbm/isbm-zypper-list-installed-ensure-latest
  - fba3d509ac Fix the documentation
  - 73ad8a2bfc Fix lint
  - f07c7ea792 Add lowpkg tests for version comparison
  - afdf451d87 Remove tests from the zypper_test that belongs to rpm_test
  - 3706a21c29 Fix condition from returning None on 0
  - 0a68ebff16 Remove suse/redhat checks, refactor code.
  - 30c8f7216b Add "string to EVR" function to the utilities
  - fb014a40b0 Sort installed pkgs data by version_cmp
  - b57e439d57 Merge yumpkg's and zypper's version_cmp for a common use
  - ebd13a283c Remove version_cmp from Zyper module and use just lowpkg alias
  - b46d5b526a Remove version_cmp from the yumpkg and use just a lowpkg alias
  - f4d9881e61 Force-sort the RPM output to ensure latest version of the multi-package on top of the list.

28.2. Previous Releases
• ISSUE #32261: (arthurlogilab) dockerng : AttributeError: 'module' object has no attribute 'version_info' (refs: #32262, #32268)
• PR #32268: (ticosax) [dockerng] Improve detection for older versions of docker-py @ 2016-03-31 14:51:46 UTC
  – PR #32262: (arthurlogilab) Catch Attribute Error when docker.version_info doesn’t exist (refs: #32268)
  – 88fa3c57f1 Merge pull request #32268 from ticosax/handle-dockerpy-old
  – 05116aaa40 Improve detection for older versions of docker-py
• PR #32258: (jacobhammons) Replaces incorrect reference to master_alive_check @ 2016-03-31 14:41:09 UTC
  – a491897a3b Merge pull request #32258 from jacobhammons/alive-interval-docs
  – ff8ca5ac2e Replaces incorrect reference to master_alive_check with master_alive_interval in docs
• PR #32254: (twangboy) Fix Display Name with spaces in win_servermanager @ 2016-03-31 14:38:22 UTC
  – 8c68d8ace41 Merge pull request #32254 from twangboy/fix_31334
  – e5f02c52be Fix a pylint error
  – 5ca4ad6675 Fix unit tests for state
  – 12d530f8f0 Fix win_servermanager state
  – b26cb76abb Fix unit tests
  – 1d5bcee390 Fix 31344
• PR #32248: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-03-30 21:10:01 UTC
  – 0f5e67de5d Merge pull request #32248 from rallytime/merge-2015.8
  – d7438c8c4e Merge branch '2015.5' into '2015.8'
  – 5d08db7c92 Merge pull request #32162 from terminalmage/issue31963
    – 5c1b8b812c Fix pkgrepo integration test
    – e7fb3095ce Properly handle yum/zypper repositories in pkgrepo.managed
    – add2111fec Use six.iteritems instead of dict.items
    – 6c21881c38 Docstring tweaks
    – ecbb78b649 Remove useless function
    – 06f3309552 Normalize variable naming to match other functions
    – 690537ca8b Look for apt-add-repository in PATH instead of assuming it’s there
    – 709d80bb1b aptpkg: Accept **kwargs instead of a dict for pkg.expand_repo_def
  – 4fcdab428 Merge pull request #32223 from twangboy/fix_31976
    – b7fca97ce Create minion.d directory, fixes #31976
  – 3309ff6a29 Merge pull request #32218 from cachedout/issue_31501
    – 6795d6ae00 Only display error when tty is True in salt-ssh
  – 6e0cb22c96 Merge pull request #32196 from jand/cherrypy_pam_test_lint_fix
    – bd3942e0fd Fixed pylint error in app_pam_test.py
• ISSUE #32169: (sknutsonsf) CommandNotFoundError: update-rc.d during service.enabled on Centos 7 (refs: #32230)
• PR #32230: (terminalmage) systemd.py: Support both update-rc.d and chkconfig as managers of sysv services @ 2016-03-30 21:09:43 UTC
  - 6216c37885 Merge pull request #32320 from terminalmage/issue32169
  - 45a83e90a systemd.py: Support both update-rc.d and chkconfig as managers of sysv services
• PR #32249: (jacobhammons) Fixes windows download paths to account for patch @ 2016-03-30 20:26:53 UTC
  - bde2a1fc98 Merge pull request #32249 from jacobhammons/dot8
  - 50d1df2482 Fixes windows download paths to account for patch
• PR #32221: (dmurphy18) Fix version check, fix extracting Major and Minor versions from __ver__ @ 2016-03-30 14:50:31 UTC
  - 1d321d043 Merge pull request #32221 from dmurphy18/fix_version_check
  - 96cf02463 Fix version check, fix extracting Major and Minor versions from __version__
• ISSUE #32031: (travispaul) Unable to manage Windows services that contain a space in the service name (refs: #32227)
• PR #32227: (twangboy) Remove list2cmdline usage from win_service.py @ 2016-03-30 14:43:17 UTC
  - 22bd1e6b29 Merge pull request #32227 from twangboy/fix_32031
  - 58772b036d Remove list2cmdline usage
• PR #32239: (anlutro) Add state file name to warning log line @ 2016-03-30 14:37:54 UTC
  - 7fc6438b67 Merge pull request #32239 from alprs/fix-file_log_warning
  - 72ad3e3702 add state file name to log line
• ISSUE #31365: (cwicklein) osrelease_info broken for CentOS 7 (refs: #32215)
• PR #32215: (DmitryKuzmenko) rhel oscodename @ 2016-03-29 19:14:50 UTC
  - 3c3028f347 Merge pull request #32215 from DSRCompany/issues/rhel_oscodename
  - dc2a3b81ac Ignore lsb codename from os-release for newest RHEL
• PR #32217: (jacobhammons) 2015.8.8.2 release notes @ 2016-03-29 17:53:22 UTC
  - bf59f06733 Merge pull request #32217 from jacobhammons/dot8
  - 596444e2b4 2015.8.8.2 release notes Adds banner notifying user when they are viewing release notes for an old release
• ISSUE #31844: (Talkless) slspath is not documented (refs: #32197)
• PR #32212: (rallytime) Back-port #32197 to 2015.8 @ 2016-03-29 15:50:58 UTC
  - PR #32197: (twellspring) documentation fix issue 31844 (refs: #32212)
  - ab8f070d985 Merge pull request #32212 from rallytime/bp-32197
  - 5fdd81ace9 documentation fix issue 31844
• ISSUE #31931: (gravyboat) Ordering States documentation should note top.sls adheres to this rule (refs: #32193)
• PR #32211: (rallytime) Back-port #32210 to 2015.8 @ 2016-03-29 15:50:42 UTC
  - PR #32210: (rallytime) Merge #32193 with pylint fix (refs: #32211)
  - PR #32193: (twellspring) Documentation fix 31931 (refs: #32210, #32211)
  - 200d82cc3e Merge pull request #32211 from rallytime/bp-32210
- 7b9c05487c Whitespace fix.
- abd432746c documentation-fix-31931
- 79086f8f04 service.py documentation update for 32084

- **ISSUE #32084**: (guettli) Docs: Please provide a link from "service.running" to "watch" (refs: #32192)

- **PR #32209**: (rallytime) Back-port #32208 to 2015.8 @ 2016-03-29 15:50:27 UTC
  - PR #32208: (rallytime) Merge #32192 with pylint fix (refs: #32209)
  - PR #32192: (twellspring) service.py documentation update for 32084 (refs: #32208, #32209)
  - 32da8d4c57 Merge pull request #32209 from rallytime/bp-32208
  - 777a2c4e83 Whitespace fix.
  - e3db0640ec service.py documentation update for 32084

- **ISSUE #31595**: (dverbeek84) dockerng ports specified in Dockerfile must be in sls file otherwise salt gives an error (refs: #32204)

- **PR #32204**: (ticosax) [dockerng] Consider labels carried by the image when comparing user defined labels. @ 2016-03-29 14:39:22 UTC
  - 7154104591 Merge pull request #32204 from ticosax/label-from-image
  - c989ae5a7e Merge user defined labels with one carried by the image

- **PR #32186**: (rallytime) Add some "best practices" information to test documentation @ 2016-03-29 00:22:48 UTC
  - 5877a19f59 Merge pull request #32186 from rallytime/testing-docs
  - 40d09c822e Add some "best practices" information to test documentation

- **PR #32176**: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-03-28 23:16:09 UTC
  - b44adff12 Merge pull request #32176 from rallytime/merge-2015.8
  - e8658697a6 Pylint fix for integration import
  - 527bc3e491 Pylint fix
  - e9abd2d420 Merge branch '2015.5' into '2015.8'
  - 6b8b8b51c0 Merge pull request #32154 from Ch3LL/ch3ll_pam_2015.5
    * ba605b0128 fix more pylint and add ability to close cherrypy engine
    * 2d4dc4da05 add teardown call
    * d115878714 fix pylint error
    * 4c1ab082b6 add pam salt-api tests
  - 230443be6c Merge pull request #32170 from gtmanfred/lxc_cloud_name
    * eb7d82e7be add name for lxc for use with cloud cache
  - 32b0421a34 Merge pull request #32164 from terminalmage/issue31731-2015.5
    * 18439c4f89 Make __virtual__ for rservice.py more robust (2015.5 branch)
  - 6212e9aa56 Merge pull request #32141 from paclat/issue_32108
    * 72c5d12d43 fixes 32108

- **ISSUE #27605**: (jmcook1) nacl module documentation/possible bug (refs: #32163)
• PR #32163: (rallytime) Update nacl.config docs to use key value instead of 'None' @ 2016-03-28 14:46:40 UTC
  - 1afb048801 Merge pull request #32163 from rallytime/fix-27605
  - e2d0f957dc Update nacl.config docs to use key value instead of 'None'
• PR #32166: (vutny) salt.states.file: correct examples with multiline YAML string @ 2016-03-28 14:45:32 UTC
  - c08ba3f8a9 Merge pull request #32166 from vutny/fix-multiline-yaml-string-example
  - 34aae93b4 Another indentation fix in salt.states.alternatives
  - 85d0576583 salt.states.file: correct examples with multiline YAML string
• PR #32168: (rallytime) Lint 2015.8 @ 2016-03-27 18:26:50 UTC
  - f2e986cf65 Merge pull request #32168 from rallytime/lint-2015.8
• ISSUE #31731: (sjorge) rh_service references osrelease before it is available, also does not return bool (refs: #32165)
• PR #32165: (terminalmage) Make __virtual__ for rhservice.py more robust (refs: #32164) @ 2016-03-27 18:21:16 UTC
  - PR #32164: (terminalmage) Make __virtual__ for rhservice.py more robust (2015.5 branch) (refs: #32165)
  - ae472617af Merge pull request #32165 from terminalmage/issue31731
  - 559eb7da52 Make __virtual__ for rhservice.py more robust
• ISSUE #31944: (Inveracity) traceback in _determine_beacon_config(...) in beacon/__init__.py line 105 (refs: #32160)
• PR #32145: (paclat) fixes 29817 (refs: #32332) @ 2016-03-25 16:55:47 UTC
  - 245249d347 Merge pull request #32145 from paclat/issue_29817
  - 5d970ca031 fixes 29817
• PR #32133: (basepi) Pass eauth user/groups through salt-api to destination functions @ 2016-03-25 16:49:46 UTC
  - 41ba309839 Change the kwarg names to be more specific
  - 40f7e596d8 Pass eauth user/groups through salt-api to destination functions
• PR #32127: (rallytime) Add runners to __salt__ docs @ 2016-03-25 15:54:02 UTC
  - a09a18036 Merge pull request #32127 from rallytime/dunder-docs
  - 482690ef33 Add note to docs about __salt__ referencing runner modules
• ISSUE #30183: (jakehilton) Minion startup extremely delayed when first master in failover multi master setup is down (refs: #31364, #31382, #32143)
• PR #32143: (DmitryKuzmenko) Set auth retry count to 0 if multimaster mode is failover. @ 2016-03-25 15:23:09 UTC
• **PR #31382**: (DmitryKuzmenko) Set auth retry count to 0 if multimaster mode is failover (refs: #32143)
  
  cc224b877a Merge pull request #32143 from DSRSCompany/issues/30183_failover_fix
  
  93d34a2573 Set auth retry count to 0 if multimaster mode is failover.

• **PR #32134**: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-03-25 15:22:08 UTC
  
  0679a61871 Merge pull request #32134 from rallytime/merge-2015.8
  
  688681410 Fix test failures
  
  7554d0f42d Merge branch ’2015.5′ into ’2015.8’
  
  • bdd7ea89d5 Merge pull request #32129 from terminalmage/issue32044
    
    • 34ca1ea12e Change type check errors to debug loglevel
    
    • 5462081488 Support multiple valid option types when performing type checks
  
  • c42014eb54 Merge pull request #32056 from bstevenson/fix-list_absent
    
    • 1500aae027 set deleted value to list
    
    • 1dc8f5f289 unit test update
    
    • 39ad866ec Fixed negation logic
    
    • be9388173b Removed has_key in lieu of in
    
    • e48593ed81 Comments and Changes output fixes
    
    • b98f5517de Updated to conform to proper ret values
    
    • d18b4be80b remove whitespace end of line 186:q
    
    • d2b89c85ad fix formatting
    
    • 103ce9e29 cleaned up formatting
    
    • 7a4d7f0bff added whitespace
    
    • 8ea5b545b0 Loop through list values in list_absent
  
  • 848ce5647f Merge pull request #32096 from rallytime/bp-32065
    
    • 36a9d6a374 Fix an issue with the minion targeting example
  
  • 9b332d4889 Merge pull request #32104 from jacobhammons/dot10
    
    • b9fc882a1e One additional known issue for 2015.5.10 release notes
  
  • ff51d548e1 Merge pull request #32100 from jacobhammons/dot10
    
    • 544a1661ce 2015.5.10 release docs
  
  • 72a20f9799 Merge pull request #32038 from terminalmage/issue32037
    
    • 8b2d983324 Add reference to state tutorial to state.apply docstring
    
    • 9b4fe844e3e Move highstate usage details to top of state.apply docstring
    
    • 74ee8c54bc Clarify prior role of state.highstate in states tutorial
    
    • 1b97e4a3df Improve state module docs, replace references to state.highstate/state.sls with state.apply

• **ISSUE #26129**: (GreatSnoopy) salt yumpkg implementation painfully slow in some circumstances (refs: #32091)

• **PR #32091**: (clarkperkins) Fixed the regression in 410da78 @ 2016-03-25 14:53:08 UTC
- ad924226ca Merge pull request #32091 from clarkperkins/bugfix/yumpkg-repoquery
- d2119ea608 Added comment so this issue doesn’t regress again
- 1455fab9e3 Fixed the regression in 410da78

• ISSUE #32044: (ScoreUnder) Multiple masters throwing warnings? "Key master with value [...] has an invalid type of list, a str is required for this value" (refs: #32129)

• PR #32135: (rallytime) [2015.8] Support multiple valid option types when performing type checks @ 2016-03-24 22:42:28 UTC
  - PR #32129: (terminalmage) Support multiple valid option types when performing type checks (refs: #32135, #32284)
  - b84908d51f Merge pull request #32135 from rallytime/32129-to-2915.8
  - 7d43bd721 Change type check errors to debug loglevel
  - ed5abf4381 Support multiple valid option types when performing type checks

• PR #31760: (sakateka) SMinion need wait future from eval_master @ 2016-03-24 22:08:56 UTC
  - b23a08f3f4 Merge pull request #31760 from sakateka/fix_master_switch
  - 3d7874029a Run self.eval_master in self.io_loop.run_sync
  - 3b4425652b SMinion need wait future from eval_master

• PR #32106: (jfindlay) update suse master service patch @ 2016-03-24 22:08:56 UTC
  - 5efe37ddc8 Merge pull request #32106 from jfindlay/suse_patch
  - 8de84b4251 update suse master service patch

• PR #32130: (jacobhammons) Added known issues 32004 and 32044 to 2015.8.8 release notes @ 2016-03-24 19:59:41 UTC
  - 939c1b17d5 Merge pull request #32130 from jacobhammons/dot8
  - 21eee08842 Added known issues 32004 and 32044 to 2015.8.8 release notes

• PR #32116: (clarkperkins) Fixed invalid deploy_scripts_search_path @ 2016-03-24 17:36:27 UTC
  - 2d8af4717 Merge pull request #32105 from clarkperkins/bugfix/invalid-deploy-script-path
  - 5a9f4e947e Fixed invalid deploy_scripts_search_path

• ISSUE #32114: (tomlaredo) Wrong validation type for file_ignore_glb key (refs: #32117)

• PR #32117: (tomlaredo) Fixed validation type for file_ignore_glb @ 2016-03-24 17:28:22 UTC
  - fe4112d7f9 Merge pull request #32117 from rodacom/fix_32114
  - c6f3ba00b Fixed validation type for file_ignore_glob Fixes #32114

• PR #32113: (sakateka) Fix log message for AsyncAuth initialization @ 2016-03-24 17:27:04 UTC
  - 93d86d249c Merge pull request #32113 from sakateka/correct_log_message
  - 71148d77ab Fix log message for AsyncAuth initialization

• ISSUE #32033: (timcharper) SaltStack modules.dockerng _compare does not handle docker implicit Domain-name properly (issue when using network_mode: host) (refs: #32116, #32432)

• PR #32116: (ticosax) Obtain default value of memory_swap from the container. @ 2016-03-24 15:56:54 UTC
  - 294177f428 Merge pull request #32116 from ticosax/memory_swap-default-from-container
  - fe439db4d3 Obtain default value of memory_swap from the container.
• PR #32098: (rallytime) Back-port #32083 to 2015.8 @ 2016-03-23 21:49:01 UTC
  – PR #32083: (guettli) "Fire Event Notifications” moved down (refs: #32098)
  – d5bb8f6372 Merge pull request #32083 from rallytime/bp-32083
  – 4a3a6e29ce "Fire Event Notifications” moved down

• PR #32099: (jacobhammons) 2015.8.8 release docs @ 2016-03-23 20:02:40 UTC
  – e45107ce96 Merge pull request #32099 from jacobhammons/dot8
  – 8ec5d989ad 2015.8.8 release docs

• PR #32088: (rallytime) [2015.8] Merge forward from 2015.5 to 2015.8 @ 2016-03-23 17:52:37 UTC
  – 9e41f3a6c5 Merge pull request #32088 from rallytime/merge-2015.8
  – 59c3b7e82e Merge branch '2015.5' into '2015.8'
  – 908a7bf5cd Merge pull request #32051 from terminalmage/fix-state-apply-output
    * 7d7cb45665 Fix outputter for state.apply
  – 0e66f678d4 Merge pull request #32002 from abednarik/pkg_manjaro_issue31788
    * 1b052d0a66 Added Manajro Linux to virtual. List extended with ManajaroLinux in order su load pacman module.
  – ba2b6f62c1a Merge pull request #31957 from rallytime/merge-2015.5
    * 1b6ec5d445 Merge branch '2014.7' into '2015.5'
      * ba73dee46 Merge pull request #31929 from twangboy/fix_build_script
      * 2c5599d2bc Backport build script from 2015.8

28.2.61 Salt 2015.5.0 Release Notes - Codename Lithium

The 2015.5.0 feature release of Salt is focused on hardening Salt and mostly on improving existing systems. A few major additions are present, primarily the new Beacon system. Most enhancements have been focused around improving existing features and interfaces.

As usual the release notes are not exhaustive and primarily include the most notable additions and improvements. Hundreds of bugs have been fixed and many modules have been substantially updated and added.

---

**Warning:** In order to fix potential shell injection vulnerabilities in salt modules, a change has been made to the various `cmd` module functions. These functions now default to `python_shell=False`, which means that the commands will not be sent to an actual shell.

The largest side effect of this change is that "shellisms", such as pipes, will not work by default. The modules shipped with salt have been audited to fix any issues that might have arisen from this change. Additionally, the `cmd` state module has been unaffected, and use of `cmd.run` in jinja is also unaffected. `cmd.run` calls on the CLI will also allow shellisms.

However, custom execution modules which use shellisms in `cmd` calls will break, unless you pass `python_shell=True` to these calls.

As a temporary workaround, you can set `cmd_safe: False` in your minion and master configs. This will revert the default, but is also less secure, as it will allow shell injection vulnerabilities to be written in custom code. We recommend you only set this setting for as long as it takes to resolve these issues in your custom code, then remove the override.

---

**Note:** Starting in this version of salt, `pillar_opts` defaults to False instead of True. This means that master opts will not be present in minion pillar, and as a result, `config.get` calls will not include master opts.

We recommend pillar is used for configuration options which need to make it to the minion.

---

**Beacons**

The beacon system allows the minion to hook into system processes and continually translate external events into the salt event bus. The primary example of this is the `inotify` beacon. This beacon uses inotify to watch configured files or directories on the minion for changes, creation, deletion etc.

This allows for the changes to be sent up to the master where the reactor can respond to changes.

---

**Sudo Minion Settings**

It is now possible to run the minion as a non-root user and for the minion to execute commands via sudo. Simply add `sudo_user: root` to the minion config, run the minion as a non-root user and grant that user sudo rights to execute salt-call.
Lazy Loader

The Lazy Loader is a significant overhaul of Salt’s module loader system. The Lazy Loader will lazily load modules on access instead of all on start. In addition to a major performance improvement, this "sandboxes" modules so a bad/broken import of a single module will only affect jobs that require accessing the broken module. (issue: 20274)

Enhanced Active Directory Support

The eauth system for LDAP has been extended to support Microsoft Active Directory out of the box. This includes Active Directory and LDAP group support for eauth.

Salt LXC Enhancements

The LXC systems have been overhauled to be more consistent and to fix many bugs.
This overhaul makes using LXC with Salt much easier and substantially improves the underlying capabilities of Salt’s LXC integration.

Salt SSH

- Additional configuration options and command line flags have been added to configure the scan roster on the fly
- Added support for state.single in salt-ssh
- Added support for publish.publish, publish.full_data, and publish.runner in salt-ssh
- Added support for mine.get in salt-ssh

New Windows Installer

The new Windows installer changes how Salt is installed on Windows. The old installer used bbfreeze to create an isolated python environment to execute in. This made adding modules and python libraries difficult. The new installer sets up a more flexible python environment making it easy to manage the python install and add python modules.

Instead of frozen packages, a full python implementation resides in the bin directory (C:\salt\bin). By executing pip or easy_install from within the Scripts directory (C:\salt\bin\Scripts) you can install any additional python modules you may need for your custom environment.

The .exe's that once resided at the root of the salt directory (C:\salt) have been replaced by .bat files and should function the same way as the .exe's in previous versions.

The new Windows Installer will not replace the minion config file and key if they already exist on the target system. Only the salt program files will be replaced. C:\salt\conf and C:\salt\var will remain unchanged.

Removed Requests Dependency

The hard dependency on the requests library has been removed. Requests is still required by a number of cloud modules but is no longer required for normal Salt operations.

This removal fixes issues that were introduced with requests and salt-ssh, as well as issues users experienced from the many different packaging methods used by requests package maintainers.
Python 3 Updates

While Salt does not YET run on Python 3 it has been updated to INSTALL on Python 3, taking us one step closer. What remains is getting the test suite to the point where it can run on Python 3 so that we can verify compatibility.

RAET Additions

The RAET support continues to improve. RAET now supports multi-master and many bugs and performance issues have been fixed. RAET is much closer to being a first class citizen.

Modified File Detection

A number of functions have been added to the RPM-based package managers to detect and diff files that are modified from the original package installs. This can be found in the new pkg.modified functions.

Reactor Update

Fix an infinite recursion problem for runner/wheel reactor jobs by passing a "user" (Reactor) to all jobs that the reactor starts. The reactor skips all events created by that username – thereby only reacting to events not caused by itself. Because of this, runner and wheel executions from the runner will have user "Reactor" in the job cache.

Misc Fixes/Additions

• SDB driver for etcd. (:issue: 22043)
• Add only_upgrade argument to apt-based pkg.install to only install a package version if the package is already installed. (Great for security updates!)
• Joyent now requires a keyname to be specified in the provider configuration. This change was necessitated upstream by the 7.0+ API.
• Add args argument to cmd.script_retcode to match cmd.script in the cmd module. (:issue: 21122)
• Fixed bug where TCP keepalive was not being sent on the defined interval on the return port (4506) from minion to master. (issue: 21465)
• LocalClient may now optionally raise SaltClientError exceptions. If using this class directly, checking for and handling this exception is recommended. (:issue: 21501)
• The SAuth object is now a singleton, meaning authentication state is global (per master) on each minion. This reduces sign-ins of minions from 3->1 per startup.
• Nested outputter has been optimized, it is now much faster.
• Extensive fileserver backend updates.

Deprecations

• Removed parameter keyword argument from eselect.exec_action execution module.
• Removed runas parameter from the following pip` execution module functions: install, uninstall, freeze, list_, list_upgrades, upgrade_available, upgrade. Please migrate to user.
• Removed runas parameter from the following pip state module functions: installed, removed, uptodate. Please migrate to user.

• Removed quiet option from all functions in cmdmod execution module. Please use output_loglevel=quiet instead.

• Removed parameter argument from eselect.set_state. Please migrate to module_parameter or action_parameter.

• The salt_events table schema has changed to include an additional field called master_id to distinguish between events flowing into a database from multiple masters. If event_return is enabled in the master config, the database schema must first be updated to add the master_id field. This alteration can be accomplished as follows:

  ALTER TABLE salt_events ADD master_id VARCHAR(255) NOT NULL;

Known Issues

• In multi-master mode, a minion may become temporarily unresponsive if modules or pillars are refreshed at the same time that one or more masters are down. This can be worked around by setting 'auth_timeout' and 'auth_tries' down to shorter periods.

28.2.62 Salt 2015.5.1 Release Notes

  release 2015-05-20

Version 2015.5.1 is a bugfix release for 2015.5.0.

Statistics

• Total Merges: 203
• Total Issue References: 30
• Total PR References: 177
• Contributors: 49 (Arabus, Lothiraldan, Snergster, TaiSHiNet, The-Loeki, UtahDave, aboe76, ahus1, basepi, bastiaanb, bradthurber, cachedout, cellscape, corywright, cro, dennisjac, dmyerscough, galet, garethgreenaway, gladiatr72, gtmanfred, iggy, ionutbalutoiu, jacobhammons, jayeshka, jfindlay, joejulian, jpic, justinta, kaidokert, kaihar, kiorky, lisa2lisa, msciciel, nleib, notpeter, optix2000, rahulhan, rallytime, rubic, ryan-lane, s0undt3ch, slinu3d, steverweber, techhat, terminalmage, ticosax, twangboy, whiteinge)

Cloud Runner Changes

The fun argument to the cloud.action runner has changed to func. Please update any calls to this runner.

• PR #23922: (garethgreenaway) Fixes to debian_ip.py @ 2015-05-19 18:50:53 UTC
  - b818f72dce Merge pull request #23922 from garethgreenaway/23900_2015_5_bonding_interface_fixes
  - 0ba536d6d Fixing issue reported when using bonded interfaces on Ubuntu. Attributes should be bond-,
  but the code was attempting to split just on bond_. Fix accounts for both, but the debian_ip.py module
  will write out bond attributes with bond-

• PR #23925: (jpic) Fixed wrong path in LXC cloud documentation @ 2015-05-19 18:23:56 UTC
  - PR #23924: (jpic) Fixed wrong path in LXC cloud documentation (refs: #23925)
  - b1c98a38ed Merge pull request #23925 from jpic/fix/wrong_lxc_path
  - a4bcd75171 Fixed wrong path in LXC cloud documentation

• PR #23894: (whiteinge) Add __all__ attribute to Mock class for docs @ 2015-05-19 17:17:35 UTC
  - 7f6a716a8a Merge pull request #23894 from whiteinge/doc-mock__all__
  - 6eeca46158 Add __all__ attribute to Mock class for docs

• ISSUE #23767: (chrimi) Salt system.locale fails on non existent default locale (refs: #23884)

• PR #23884: (jfindlay) Fix locale.set_locale on debian @ 2015-05-19 15:51:22 UTC
  - 8108a9bd19 Merge pull request #23884 from jfindlay/fix_locale
  - 91c2d51400 use append_if_not_found in locale.set_locale
  - e63260391c (re)generate /etc/default/locale

• PR #23866: (jfindlay) backport #23834, change portage.dep.strip_empty to list comprehension @ 2015-05-19 15:50:43 UTC
  - PR #23834: (Arabus) Avoid deprecation warning from portage.dep.strip_empty() (refs: #23866)
  - 6bae12fa8b Merge pull request #23866 from jfindlay/flag_strip
  - aa032ccf6f replace portage.dep.strip_empty() with list comprehension
  - 7576872280 Proper replacement for portage.dep.strip_empty() with list comprehension, pep8fix
  - 2851a5cf13 Switch portage.dep.strip_empty(...) to filter(None,...) to avoid deprecation warning and do
  essentially the same

• ISSUE #23904: (mbrgm) Network config bonding section cannot be parsed when attribute names use dashes
  (refs: #23917)

• PR #23917: (corywright) Split debian bonding options on dash instead of underscore @ 2015-05-19 15:44:35 UTC
  - a67a008913 Merge pull request #23917 from corywright/issue23904
  - c068cf831 Split debian bonding options on dash instead of underscore

• PR #23909: (jayeshka) 'str' object has no attribute 'capitalized' @ 2015-05-19 15:41:53 UTC
- e8fcd0994d Merge pull request #23909 from jayeshka/file-exe-module
- e422d9d200 ’str’ object has no attribute ’capitalized’

**PR #23903: (garethgreenaway) Adding docs for missing schedule state module parameters. @ 2015-05-19 06:29:34 UTC**

- c73bf38927 Merge pull request #23903 from garethgreenaway/missing_docs_schedule_state
- acd8ab9e1d Adding docs for missing schedule state module parameters.
- a56697bd6e Merge branch ’2015.5’ of https://github.com/saltstack/salt into 2015.5
- 1c2af5c685 Merge branch ’2015.5’ of https://github.com/saltstack/salt into 2015.5
- ef581283fa Merge branch ’2015.5’ of https://github.com/saltstack/salt into 2015.5
- 8664e8bc8d Merge branch ’2015.5’ of https://github.com/saltstack/salt into 2015.5-2
- 46eb2655ee saltstack2 sphinx theme updates
- e7442d3b1e Merge branch ’2015.5’ of https://github.com/saltstack/salt into 2015.5
- ee3c1bd4a7 missed one
- 3872921dd0 More updates to sphinx2 theme
- fcd48657ef Merge branch ’2015.5’ of https://github.com/saltstack/salt into 2015.5
- 8c32152be0 removed TOC numbering, additional tweaks to layout.html
- 73d6ae2f28 Merge branch ’2015.5’ of https://github.com/saltstack/salt into 2015.5
- 16d8a753ad saltstack2 sphinx theme and build settings

**ISSUE #23847: (kiorky) lxc: systemd containers cant be seeded (refs: #23806, #23898, #23897, #23808)**

**ISSUE #23772: (cheuschober) lxc.init fails to bootstrap container (refs: #23806, #23808, #23807, #23898, #23897)**

**PR #23806: (kiorky) Lxc seeding (refs: #23807) @ 2015-05-18 23:18:33 UTC**

- ff3cc7d331 Merge pull request #23806 from makinacorpus/lxc_seeding
- 61b7aad308 runners/lxc: optim

**PR #23892: (basepi) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2015-05-18 23:07:57 UTC**

- 5f1a93d966 Merge pull request #23892 from basepi/merge-forward-2015.5
- c2eed77691 Merge remote-tracking branch ’upstream/2014.7’ into merge-forward-2015.5
- 17c5810c04 Merge pull request #23891 from basepi/releasesnotes
  - dec153bcea Update the release notes index page
  - a93e58f80f Merge pull request #23888 from basepi/v2014.7.6release
    - 499216c6b2 Update the 2014.7.6 release notes with CVE details
  - 50730287bb Merge pull request #23871 from rallytime/bp-23848
    - 379e09c3a5 Updated for SLES 12.

**PR #23875: (rallytime) Backport #23838 to 2015.5 @ 2015-05-18 22:28:55 UTC**

- **PR #23838: (gtmanfred) add refresh_beacons and sync_beacons (refs: #23875)**
- 66d13356b3 Merge pull request #23875 from rallytime/bp-23838
- 3174227e8e Add versionadded directives to new beacon saltutil functions
- 4a94b2c17b add refresh_beacons and sync_beacons

**PR #23876**: (rallytime) Switch digital ocean tests to v2 driver @ 2015-05-18 22:17:13 UTC
- d294cf260b Merge pull request #23876 from rallytime/switch_digital_ocean_tests_v2
- dce9b540a6 Remove extra line
- 4acf58e758 Switch digital ocean tests to v2 driver

**ISSUE #23792**: (neogenix) Salt Scheduler Incorrect Response (True, should be False) (refs: #23882)

**PR #23882**: (garethgreenaway) Fixes to scheduler in 2015.5 @ 2015-05-18 22:09:24 UTC
- b97a48c7f5 Merge pull request #23882 from garethgreenaway/23792_2015_5_wrong_return_code
- 37dbd6d57 Job already exists in schedule, should return False.

**PR #23868**: (basepi) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2015-05-18 18:35:54 UTC
- 61c922ea1a Merge pull request #23868 from basepi/merge-forward-2015.5
- c9ed23394c Merge remote-tracking branch 'upstream/2014.7' into merge-forward-2015.5
- aee00c83d5 Merge pull request #23810 from rallytime/bp-23757
  - fb32c32065 use abspath, do not eliminating symlinks
- 6b3352bb1a Merge pull request #23809 from rallytime/virt_get_nics_fix
  - 0616fb7884 Fix virtualport section of virt.get_nics loop
- 188f03f567 Merge pull request #23823 from gtmanfred/2014.7
  - 5ef006d59d add link local for ipv6
- f3ca682f92 Merge pull request #23802 from gtmanfred/2014.7
  - 2da98b58c8 if it is ipv6 ip_to_int will fail

**PR #23863**: (rahulhan) Adding states/timezone.py unit test @ 2015-05-18 17:02:19 UTC
- 433f87372c Merge pull request #23863 from rahulhan/states_timezone_unit_test
- 72fcabc690 Adding states/timezone.py unit test

**PR #23862**: (rahulhan) Adding states/tomcat.py unit tests @ 2015-05-18 17:02:10 UTC
- 37b3ee5421 Merge pull request #23862 from rahulhan/states_tomcat_unit_test
- 65d7752d2a Adding states/tomcat.py unit tests

**PR #23860**: (rahulhan) Adding states/test.py unit tests @ 2015-05-18 17:01:49 UTC
- dde7207acb Merge pull request #23860 from rahulhan/states_test_unit_test
- 1f4cf86500 Adding states/test.py unit tests

**PR #23859**: (rahulhan) Adding states/sysrc.py unit tests @ 2015-05-18 17:01:46 UTC
- 3c9b8139eb Merge pull request #23859 from rahulhan/states_sysrc_unit_test
- 6a903b054d Adding states/sysrc.py unit tests

**PR #23812**: (rallytime) Backport #23790 to 2015.5 @ 2015-05-18 15:30:34 UTC
- **PR #23790**: (aboe76) updated suse spec file to version 2015.5.0 (refs: #23812)
- 4cf30a7ffa Merge pull request #23812 from rallytime/bp-23790
- 3f65631cb6 updated suse spec file to version 2015.5.0
• PR #23811: (rallytime) Backport #23786 to 2015.5 @ 2015-05-18 15:30:27 UTC
  - PR #23786: (kaithar) Log the error generated that causes returns.mysql.returner to except. (refs: #23811)
  - c6f939ad6b Merge pull request #23811 from rallytime/bp-23786
  - 346f30bdda Log the error generated that causes returns.mysql.returner to except.

• PR #23850: (jayeshka) adding sysbench unit test case @ 2015-05-18 15:28:04 UTC
  - ce60582de4 Merge pull request #23850 from jayeshka/sysbench-unit-test
  - 280abdec7c adding sysbench unit test case

• PR #23843: (The-Loeki) Fix erroneous virtual:physical core grain detection @ 2015-05-18 15:24:22 UTC
  - 060902fefa Merge pull request #23843 from The-Loeki/patch-1
  - 9e2cf606eb Fix erroneous virtual:physical core grain detection

• ISSUE #23815: (Snergster) [beacons] inotify errors on subdir creation (refs: #23816)

• ISSUE #23685: (Snergster) inotify beacon on file, 'change' event to reactor to reset file to known state will cause loop (refs: #23816)

• PR #23816: (Snergster) Doc for #23685 Added prereq, caution, and additional mask information @ 2015-05-18 15:18:03 UTC
  - 3257a9bead Merge pull request #23816 from Snergster/23685-doc-fix
  - 0fca49d52a Added prereq, caution, and additional mask information

• PR #23832: (ahus1) make saltify provider use standard bootstrap procedure @ 2015-05-18 02:18:29 UTC
  - PR #23829: (ahus1) make saltify provider use standard bootstrap procedure (refs: #23832)
  - 3df3b85090 Merge pull request #23832 from ahus1/ahus1_saltify_bootstrap_2015.5
  - f5b1734782 fixing problem in unit test
  - cba47f6856 make saltify to use standard bootstrap procedure, therefore providing all options like master_sign_pub_file

• PR #23791: (optix2000) Psutil compat @ 2015-05-16 04:05:54 UTC
  - 8ec4fb2a73 Merge pull request #23791 from optix2000/psutil_compat
  - 5470cf58db Fix pylint errors and sloppy inline comments
  - 64634b6349 Update psutil.pid_list to use psutil.pids
  - 5dd6d9192 Fix imports that aren’t in __all__
  - 8a1da33ada Fix test cases by mocking psutil_compat
  - 558798d1f Fix net_io_counters deprecation issue
  - 8140f92ba8 Override unnecessary pylint errors
  - 7d02ad4f06 Fix some of the mock names for the new API
  - 9b3023e851 Fix overloaded getters/setters. Fix line lengths
  - 180ebe87a46 Fix whitespace
  - f8ed7f2f98 Use new psutil API in ps module
  - e48982ff9c Fix version checking in psutil_compat
  - 93ee411fd5 Create compatibility psutil. psutil 3.0 drops 1.0 API, but we still support old psutil versions.
PR #23782: (terminalmage) Replace "command -v" with "which" and get rid of spurious log messages @ 2015-05-16 04:03:10 UTC
- 405517be8b Merge pull request #23782 from terminalmage/issue23772
- 0f6f239052 More ignore_retcode to suppress spurious log msgs
- b4c48e62ea Ignore return code in lxc.attachable
- 08658c0177 Replace "command -v" with "which"

PR #23783: (basepi) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2015-05-15 21:38:51 UTC
- cb2eb401f3 Merge pull request #23783 from basepi/merge-forward-2015.5
- 9df51caf28 __opts__.get
- 64250a67e5 Remove profile from opts after creating LXC container
- c4047d2a71 Set destroy=True in opts when destroying cloud instance
- 9e1311a7cd Store instance names in opts when performing cloud action
- 934bc57c73 Correctly pass custom env to lxc-attach
- 7fb85f7be1 Preserve test=True option in cloud states
- 9771b5a313 Fix detection of absent LXC container in cloud state
- fb24f0cf02 Report failure when failed to create/clone LXC container
- 2d9aa2bb97 Avoid shadowing variables in lxc module
- 792e1021f2 Allow to override profile options in lxc.cloud_init_interface
- 42bd64b9b3 Return changes on successful lxc.create from salt-cloud
- 4409eab8b3 Return correct result when creating cloud LXC container
- 377015c88d Issue #16424: List all providers when creating salt-cloud instance without profile
- 808bbe1cb2 Merge pull request #23748 from basepi/salt-ssh.roster.host.check
- bc53e049e0 Log entire exception for render errors in roster
- 753de6a621 Log render errors in roster to error level
- e01a7a90b3 Always let the real YAML error through
- 72cf360255 Merge pull request #23731 from twangboy/fix_22959
- 88e5495b2d Fixes #22959: Trying to add a directory to an unmapped drive in windows
- 2610195262 Merge pull request #23730 from rallytime/bp-23729
- 1877caeca adding support for nested grains to grains.item
- 3e9df883d6 Merge pull request #23688 from twangboy/fix_23415
- 6a91169bae Fixed unused-import pylint error
- 5e25b3f355 fixed pylint errors
- 1a9676626f Added inet_pton to utils/validate/net.py for ip.set_static_ip in windows

PR #23781: (jfindlay) fix unit test mock errors on arch @ 2015-05-15 19:40:07 UTC
- 982f87316d Merge pull request #23781 from jfindlay/fix_locale_tests
- 14c711eeb3 fix unit test mock errors on arch

**ISSUE #23566**: (rks2286) Salt-cp corrupting the file after transfer to minion (refs: #23740)

**PR #23740**: (jfindlay) Binary write @ 2015-05-15 18:10:44 UTC
- 91b1c4f7c Merge pull request #23740 from jfindlay/binary_write
- 626930a465 update incorrect comment wording
- a978f5c091 always use binary file write mode on windows

**ISSUE #23682**: (chrish42) Pip module requires system pip, even when not used (with env_bin) (refs: #23736)

**PR #23736**: (jfindlay) always load pip execution module @ 2015-05-15 18:10:16 UTC
- 348645ecd5 Merge pull request #23736 from jfindlay/fix_pip
- b8867a8c23 update pip tests
- 040bc42d2 only check pip version in one place
- 6c453a5a2a check for executable status of bin_env
- 3337257833 always load the pip module as pip could be anywhere

**PR #23770**: (cellscape) Fix cloud LXC container destruction @ 2015-05-15 17:38:59 UTC
- 10cedfb174 Merge pull request #23770 from cellscape/fix-cloud-lxc-destruction
- 4f6021c884 Fix cloud LXC container destruction

**PR #23759**: (lisa2lisa) fixed the problem for not beable to revoke ., for more detail https... @ 2015-05-15 17:38:38 UTC
- dde822b02 Merge pull request #23759 from lisa2lisa/iss23664
- a29f161a58 fixed the problem for not beable to revoke ., for more detail https://github.com/saltstack/salt/issues/23201, fixed mysql cannot create user with pure digit password, for more info https://github.com/saltstack/salt/issues/23664

**PR #23769**: (cellscape) Fix file_roots CA lookup in salt.utils.http.get_ca_bundle @ 2015-05-15 16:21:49 UTC
- 10615ff5a7 Merge pull request #23769 from cellscape/utils-http-ca-file-roots
- 8e90f32911 Fix file_roots CA lookup in salt.utils.http.get_ca_bundle

**PR #23765**: (jayeshka) adding states/makeconf unit test case @ 2015-05-15 14:29:43 UTC
- fd8a1b797f Merge pull request #23765 from jayeshka/makeconf_states-unit-test
- 26e31afa31 adding states/LXC container destruction unit test case

**PR #23760**: (ticsax) [doc] document refresh argument @ 2015-05-15 14:23:47 UTC
- ee13b08027 Merge pull request #23760 from ticosax/2015.5
- e3ca859ba6 document refresh argument

**PR #23766**: (jayeshka) adding svn unit test case @ 2015-05-15 14:23:18 UTC
- a017f725a4 Merge pull request #23766 from jayeshka/svn-unit-test
- 19993cfa98 adding svn unit test case

**ISSUE #23734**: (bradthurber) 2015.5.0 modules/archive.py ZipFile instance has no attribute '__exit__' - only python 2.6? (refs: #23737)
- PR #23751: (rallytime) Backport #23737 to 2015.5 @ 2015-05-15 03:58:37 UTC
  - PR #23737: (bradthurber) fix for 2015.5.0 modules/archive.py ZipFile instance has no attribute... (refs: #23751)
    - 0ed9d45114 Merge pull request #23751 from rallytime/bp-23737
    - 8d1eb326d0 fix for 2015.5.0 modules/archive.py ZipFile instance has no attribute `_exit_` - only python 2.6? #23734
- ISSUE #23709: (kiorky) cmdmod: enhancement is really needed for stateful commands (refs: #23710)
- PR #23710: (kiorky) Get more useful output from stateful commands @ 2015-05-14 21:58:10 UTC
  - d73984ec9c Merge pull request #23710 from makinacorpus/i23709
  - c70690969e Get more useful output from stateful commands
- ISSUE #23608: (kaidokert) salt-cloud file_map with non-root user (refs: #23609)
- PR #23724: (rallytime) Backport #23609 to 2015.5 @ 2015-05-14 19:34:22 UTC
  - PR #23609: (kaidokert) file_map: chown created directories if not root #23608 (refs: #23724)
    - cdf421b9ed Merge pull request #23724 from rallytime/bp-23609
    - fe3a762673 file_map: chmod created directories if not root
- PR #23723: (rallytime) Backport #23568 to 2015.5 @ 2015-05-14 19:34:11 UTC
  - PR #23568: (techhat) Allow Salt Cloud to use either SCP or SFTP, as configured (refs: #23723)
    - 94f9099307 Merge pull request #23723 from rallytime/bp-23568
    - bbe34abad3 Allow Salt Cloud to use either SCP or SFTP, as configured
- PR #23725: (rallytime) Backport #23691 to 2015.5 @ 2015-05-14 19:32:30 UTC
  - PR #23691: (dennisjac) add initial configuration documentation for varstack pillar (refs: #23725)
    - 137e5e6fd0 Merge pull request #23725 from rallytime/bp-23691
    - 28a846ebe8 add initial configuration documentation for varstack pillar
- PR #23722: (rallytime) Backport #23472 to 2015.5 @ 2015-05-14 19:31:52 UTC
  - PR #23472: (techhat) Allow neutron network list to be used as pillar data (refs: #23722)
    - 0c0099507db Merge pull request #23722 from rallytime/bp-23472
    - c3d0f39515 Change versionadded tag for backport
    - 023e6f2644 Allow neutron network list to be used as pillar data
- ISSUE #23657: (arthurlogilab) [salt-cloud lxc] NameError: global name '__salt__' is not defined (refs: #23898, #23727, #23897)
- PR #23727: (jfindlay) fix npm execution module stacktrace @ 2015-05-14 18:14:12 UTC
  - cbf4ca8d91 Merge pull request #23727 from jfindlay/npm_salt
  - 05392f2644 fix npm execution module stacktrace
- PR #23718: (rahulhan) Adding states/user.py unit tests @ 2015-05-14 17:15:38 UTC
  - ef536d58de Merge pull request #23718 from rahulhan/states_user_unit_tests
  - aad27db513 Adding states/user.py unit tests
- PR #23720: (basepi) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2015-05-14 17:13:02 UTC

28.2. Previous Releases 5119
- a529d74079 Merge pull request #23720 from basepi/merge-forward-2015.5
- 06a3ebd9d1 Merge remote-tracking branch 'upstream/2014.7' into merge-forward-2015.5
- 1b86460d73 Merge pull request #23680 from cachedout/issue_23403
  * d5986c21b4 Rename kwarg in cloud runner
- cd64af0ce4 Merge pull request #23674 from cachedout/issue_23548
  * da8a2f5cb3 Handle lists correctly in grains.list_present
- d322a19213 Merge pull request #23672 from twangboy/fix_user_present
  * 731e7af3dd Merge branch '2014.7' of https://github.com/saltstack/salt into fix_user_present
  * d6f70a4545 Fixed user.present to create password in windows
- 43f7025000 Merge pull request #23670 from rallytime/bp-23607
  * ed30dc4642 Fix for #23604. No error reporting. Exitcode !=0 are ok
  - PR #23704: (jayeshka) adding states/lvs_server unit test case @ 2015-05-14 14:22:10 UTC

  - a9777761d8 Merge pull request #23380 from gladiatr72/fixed_for_double_output_with_static_salt_CLI/v2015.2
  - c47f8d79c7 Actually removed the static bits from below the else: fold this time.
28.2.63 Salt 2015.5.10 Release Notes

release 2015-03-22

Version 2015.5.10 is a bugfix release for 2015.5.0.

Security Fix

CVE-2016-3176 Insecure configuration of PAM external authentication service

This issue affects all Salt versions prior to 2015.8.8/2015.5.10 when PAM external authentication is enabled. This issue involves passing an alternative PAM authentication service with a command that is sent to LocalClient, enabling the attacker to bypass the configured authentication service. Thank you to Dylan Frese <dmfrese@gmail.com> for bringing this issue to our attention.

This update defines the PAM eAuth service that users authenticate against in the Salt Master configuration.

No additional fixes are included in this release.

Read Before Upgrading Debian 8 (Jessie) from Salt Versions Earlier than 2015.5.9

Salt systemctl service files are missing the following statement in these versions:

```
[Service]
KillMode=process
```

This statement must be added to successfully upgrade on these earlier versions of Salt.
Changelog for v2015.5.9..v2015.5.10

- 69ba1de71d Remove ability of authenticating user to specify pam service

28.2.64 Salt 2015.5.11 Release Notes

release 2015-07-22

Version 2015.5.11 is a bugfix release for 2015.5.0.

Changelog for v2015.5.10..v2015.5.11

- PR #33412: (jfindlay) update 2015.5.11 release notes
- PR #33405: (rallytime) Back-port #33386 to 2015.5
- PR #33386: (terminalmage) Fix traceback in logging for config validation (refs: #33405)
- ISSUE #33376: (tmehlinger) pip state broken in 2015.8.9 with pip <6.0 (refs: #33383)
- PR #33383: (thatch45) maintain the fallabck because I am totally sick of this crap @ 2016-05-20 00:03:59 UTC
  - d15f5e2c2f Merge pull request #33383 from thatch45/2015.5
  - f5ebcba21c restore whitespace
  - 1db8b289db1 blast, put the try/except int he right place
  - 081e65b83 maintain the fallabck because I am totally sick of this crap
  - PR #33379: (cachedout) Improve doc clarity for disable_modules documentation
- ISSUE #26574: (jfindlay) minion stacktrace on top file yaml syntax error (refs: #33375)
  - PR #33375: (cachedout) Better YAML syntax error handling
- PR #33372: (jacobhammons) revved 2015.8 branch to .9 in version selector @ 2016-05-19 20:05:35 UTC
  - bb3e98cad2 Merge pull request #33372 from jacobhammons/release-update
  - 5ce502160b revved 2015.8 branch to .9 in version selector
  - PR #33341: (phistrom) Expanded documentation for boto_elb state and module
• ISSUE #32400: (rallytime) Document Default Config Values (refs: #33286, #33292, #32538, #33287, #32454, #33282)
  - PR #33292: (rallytime) Added some more docs for master and minion config settings
• ISSUE #23643: (falzm) Error in iptables module: argument –match-set: expected 2 argument(s) (refs: #33301)
  - PR #33301: (gerhardqux) Fix iptables –match-set (#23643)
  - PR #3290: (UtahDave) fix "loose" typo
• ISSUE #32400: (rallytime) Document Default Config Values (refs: #33286, #33292, #32538, #33287, #32454, #33282)
  - PR #33287: (rallytime) Add auth_tries config option to minion.rst docs
  - PR #33286: (rallytime) Document new master and minion config opts for 2016.3.0 (refs: #33287)
• ISSUE #33276: (sjmh) minion_id_caching has no documentation (refs: #33282)
• ISSUE #32400: (rallytime) Document Default Config Values (refs: #33286, #33292, #32538, #33287, #32454, #33282)
  - PR #33282: (rallytime) Document minion_id_caching config value
• ISSUE #33118: (saltuser) file.replace not working correctly on newer minions (refs: #33137)
  - PR #33137: (lorenegordon) Clarify file.replace MULTILINE flag interaction with regex anchors
  - PR #33236: (jfindlay) update 2015.5.11 release notes
• ISSUE #32250: (ikryten) Cannot run salt-minion as unprivileged user using 'user' directive (refs: #33211)
  - PR #33211: (cachedout) Don’t try to kill a parent proc if we can’t @ 2016-05-12 21:29:50 UTC
    - 698f1eb657 Merge pull request #33211 from cachedout/user_kill
    - d4f2e5baa7 Don’t try to kill a parent proc if we can’t
• ISSUE #32198: (goatjam) State 'pkg.installed' was not found in SLS (refs: #33205)
  - PR #33205: (cachedout) Resolve issue with pkg module on Mint Linux
  - PR #33178: (justinta) Add pip installed and removed test
  - PR #33197: (jfindlay) update 2015.5.11 release notes
  - PR #33181: (twangboy) Fix file.managed for Windows
  - PR #33185: (rallytime) [2015.5] Update to latest bootstrap script v2016.05.11
• ISSUE #33163: (jaybocc2) Salt 2015.8.5 incompatible with Pip v8.1.2 (refs: #33180)
  - PR #33180: (thatch45) Pip fix
  - PR #33160: (jfindlay) add 2015.5.11 release notes
  - PR #33155: (rallytime) [2015.5] Update to latest bootstrap script v2016.05.10
• PR #33141: (justinta) Skipping salt-call –local test @ 2016-05-10 17:05:17 UTC
  - 6cd1641840 Merge pull request #33141 from jfindlay/disable_local_pkg_install_test
  - 8b1e34fb17 Skipping salt-call –local test
• ISSUE #33085: (fmmisme) salt doc err (refs: #33132)
  - PR #33132: (whiteinge) Doc mock decorators
• ISSUE #33074: (robnagler) Critical error in msgpack exposes pillar data (refs: #33078)

28.2. Previous Releases
- PR #33078: (cachedout) Lower display of msgpack failure msg to debug
- PR #33080: (justinta) Use saltstack repo in buildpackage.py on CentOS 5
- PR #33025: (Ch3LL) add test for installing package while using salt-call --local
- PR #33055: (justinta) File and User test fixes for 2015.5 on Fedora23
- PR #33060: (Ch3LL) Test pillar.items output
- PR #33067: (sacren) Fix minor document error of test.assertion
- PR #33045: (Ch3LL) Saltfile with pillar tests
- PR #33044: (thatch45) Backport #33021 manually to 2015.5
- PR #33021: (UtahDave) Fix syndic regression (refs: #33044)

- ISSUE #22580: (ryanwalder) minion runs highstate on start if schedule set in pillar (refs: #32958)
- PR #32958: (rallytime) Add run_on_start docs to schedule.rst

- ISSUE #23714: (naemono) file.copy force ignored during highstate, but not with 'salt-call state.sls_id' (refs: #32732, #32848)
  - PR #32848: (lomeroe) backport PR #32732 to 2015.5 fixes #23714
  - PR #32732: (lomeroe) correct use of force flag in file.copy #23714 (refs: #32848)
  - PR #32837: (jfindlay) salt-cloud -u downloads stable version from bootstrap.saltstack.com by default
  - PR #32667: (jfindlay) [2015.5] update bootstrap to 2016.04.18 release

- PR #32776: (rallytime) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2016-04-25 15:18:12 UTC
  - c842e1e437 Merge pull request #32776 from rallytime/merge-2015.5
  - 7ecbf9f885 Merge pull request #14 from whiteinge/runner-async-low
    - 211f7b4af1 Format low data correct for runner_async

• ISSUE #1409: (twinshadow) module/network.py: Interfaces do not list multiple addresses

• ISSUE saltstack/salt#28262: (palica) FreeBSD pkgng provider raising error for minion (refs: #32376)
• ISSUE #28262: (palica) FreeBSD pkgng provider raising error for minion (refs: #32399, #32376)
• PR #32399: (amontalban) Backport to fix #28262 for 2015.5 as requested in PR #32376 @ 2016-04-06 22:48:23 UTC
  – PR #32376: (amontalban) Fixes saltstack/salt#28262 (refs: #32399)
  – a36866d7db Merge pull request #32399 from amontalban/2015.5
  – e1ffbd615a Fixes saltstack/salt#28262 for 2015.5 branch
• ISSUE #32066: (guettli) Proxmox docs outdated (refs: #32374)
• PR #32374: (cachedout) Update proxmox documentation @ 2016-04-05 22:25:16 UTC
  – 3f03c5fcf9 Merge pull request #32374 from cachedout/issue_32066
  – 62389d1d1a Update proxmox documentation
• PR #32339: (Ch3LL) remove reference to master_alive_check in 2015.5 @ 2016-04-04 20:39:24 UTC
  – 8578089beb Merge pull request #32339 from Ch3LL/fix_doc_multi-master
  – 2774da288d remove reference to master_alive_check
• ISSUE #32044: (ScoreUnder) Multiple masters throwing warnings? "Key master with value [...] has an invalid type of list, a str is required for this value" (refs: #32129)
• PR #32284: (rallytime) Audit config.py default types and values @ 2016-04-02 02:00:38 UTC
  – PR #32129: (terminalmage) Support multiple valid option types when performing type checks (refs: #32284)
  – fbdc47cc55 Merge pull request #32284 from rallytime/config-audit
  – 0491513204 Don’t be so explicit. Just use string_types.
  – 083c477fd3 Use six.string_types in config default tuples
  – 7e642b8381 Audit config.py default types and values - first sweep
• ISSUE #32301: (terminalmage) pkg.latest_version returns inaccurate version when blank "Release" param set in package metadata (refs: #32302)
• PR #32302: (terminalmage) Properly support packages with blank "Release" param in pkg.latest_version @ 2016-04-01 22:13:27 UTC
  – 0a6d44e57b Merge pull request #32302 from terminalmage/fix-missing-release
  – 413c371ccd Properly support packages with blank "Release" param in pkg.latest_version
• ISSUE #31963: (UtahDave) pkgrepo.managed state test=True doesn’t actually test if changes need to be made. (refs: #32162)
• PR #32162: (terminalmage) Properly handle yum/zypper repositories in pkgrepo.managed @ 2016-03-30 17:51:05 UTC
  – 5d08db7c92 Merge pull request #32162 from terminalmage/issue31963
  – 5c1bdb812c Fix pkgrepo integration test
  – e7fb3095ce Properly handle yum/zypper repositories in pkgrepo.managed
  – add2111f6c Use six.iteritems instead of dict.items
  – 6c21881c38 Docstring tweaks
  – ecb78b649 Remove useless function
  – 06f3309552 Normalize variable naming to match other functions
- 690537ca8b Look for apt-add-repository in PATH instead of assuming it’s there
- 709d80bb1b aptpkg: Accept **kwargs instead of a dict for pkg.expand_repo_def

**ISSUE** #31976: (moltob) Schedules not persisted on Windows minion (Installer issue) (refs: #32223)

**PR** #32223: (twangboy) Create minion.d directory on install for Windows @ 2016-03-30 14:43:27 UTC
- 4fcdaa428 Merge pull request #32223 from twangboy/fix_31976
- b7fcae97ce Create minion.d directory, fixes #31976

**ISSUE** #31501: (grep4linux) Salt states fail with error 'Failed to return clean data' when using salt-ssh in Amazon EC2 (refs: #32218)

**PR** #32218: (cachedout) Only display error when tty is True in salt-ssh @ 2016-03-29 19:13:44 UTC
- 3309ff6a29 Merge pull request #32218 from cachedout/issue_31501
- 6795d6ae00 Only display error when tty is True in salt-ssh

**PR** #32196: (justinta) Fixed pylint error in app_pam_test.py @ 2016-03-28 23:59:42 UTC
- 6e0cb22c96 Merge pull request #32196 from justinta/cherrypy_pam_test_lint_fix
- bd3942ef6d Fixed pylint error in app_pam_test.py

**ISSUE** #31731: (sjorge) rh_service references osrelease before it is available, also does not return bool (refs: #32165)

**PR** #32164: (terminalmage) Make __virtual__ for rhservice.py more robust (2015.5 branch) (refs: #32165) @ 2016-03-27 18:21:52 UTC
- 32b0421a34 Merge pull request #32164 from terminalmage/issue31731-2015.5
- 18439c6f89 Make __virtual__ for rhservice.py more robust (2015.5 branch)

**PR** #32170: (gtmanfred) add name for lxc for use with cloud cache @ 2016-03-28 14:34:16 UTC
- 230443be6c Merge pull request #32170 from gtmanfred/lxc_cloud_name
- eb7d827bea add name for lxc for use with cloud cache

**ISSUE** #31731: (sjorge) rh_service references osrelease before it is available, also does not return bool (refs: #32165)

**ISSUE** #32044: (ScoreUnder) Multiple masters throwing warnings? "Key master with value [...] has an invalid type of list, a str is required for this value" (refs: #32129)

**PR** #32129: (terminalmage) Support multiple valid option types when performing type checks (refs: #32284) @ 2016-03-24 21:16:29 UTC
- bdd7ea89d5 Merge pull request #32129 from terminalmage/issue32044
- 34ca1ea12e Change type check errors to debug loglevel
- 5462081488 Support multiple valid option types when performing type checks

**ISSUE #32052: (bstevenson) list_absent function doesn’t loop through list of values (refs: #32056)**

**PR #32056: (bstevenson) Fix list absent @ 2016-03-24 17:35:00 UTC**
- c42014eb54 Merge pull request #32056 from bstevenson/fix-list_absent
- 1500ae027 set deleted value to list
- 1dc8f5f289 unit test update
- 39adf86fec Fixed negation logic
- be9388173b Removed has_key in lieu of in
- e48593ed81 Comments and Changes output fixes
- b985517de Updated to conform to proper ret values
- d18b4be80b remove whitespace end of line 186:q
- d2b89c85ad fix formatting
- 103cee9e29 cleaned up formatting
- 7a4d7f0b6b added whitespace
- 8ea5b545b0 Loop through list values in list_absent

**PR #32096: (rallytime) Back-port #32065 to 2015.5 @ 2016-03-23 22:01:36 UTC**
- PR #32065: (TheNullByte) Fix an issue with the minion targeting example in docs (refs: #32096)
- 848ce5647f Merge pull request #32096 from rallytime/bp-32065
- 36a9d6a374 Fix an issue with the minion targeting example

**PR #32104: (jacobhammons) One additional known issue for 2015.5.10 release notes @ 2016-03-23 21:20:50 UTC**
- 9b332d48b9 Merge pull request #32104 from jacobhammons/dot10
- b9fc882a1e One additional known issue for 2015.5.10 release notes

**PR #32100: (jacobhammons) 2015.5.10 release docs @ 2016-03-23 20:05:21 UTC**
- ff51d548e1 Merge pull request #32100 from jacobhammons/dot10
- 544a1661ce 2015.5.10 release docs

**ISSUE #32037: (terminalmage) Increase the visibility of state.apply in Salt’s documentation (refs: #32038)**

**PR #32038: (terminalmage) Improve state module docs, replace references to state.highstate/state.sls with state.apply @ 2016-03-23 17:08:02 UTC**
- 72a20f9799 Merge pull request #32038 from terminalmage/issue32037
- 8b2d983324 Add reference to state tutorial to state.apply docstring
- 9b4fe8443e Move highstate usage details to top of state.apply docstring
- 74ee8c54bc Clarify prior role of state.highstate in states tutorial
- 1b97e4a3df Improve state module docs, replace references to state.highstate/state.sls with state.apply

**PR #32051: (terminalmage) Fix outputter for state.apply @ 2016-03-23 16:42:43 UTC**
- 908a7bf5cd Merge pull request #32051 from terminalmage/fix-state-apply-output
- 7d7cb45565 Fix outputter for state.apply

**ISSUE #31788:** (crocket) pkg.installed doesn’t work on Manjaro. (refs: #32002)

**PR #32002:** (abednarik) Added Manajro Linux to virtual. @ 2016-03-21 17:55:16 UTC
- 0e66f678d4 Merge pull request #32002 from abednarik/pkg_manjaron_issue31788
- 1b052d0a66 Added Manajro Linux to virtual. List extended with ManajaroLinux in order to load pacman module.

**PR #31957:** (rallytime) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2016-03-18 15:12:22 UTC
- ba5bf62c1a Merge pull request #31957 from rallytime/merge-2015.5
- 1b6ec5d445 Merge branch ’2014.7’ into ’2015.5’
  * ba73dee4e6 Merge pull request #31929 from twangboy/fix_build_script
    - 2c5599d2bc Backport build script from 2015.8
    - ce74991dd0 Fix nsi script to work with new build process

**PR #31972:** (terminalmage) Make lack of python-ldap module more explicit when LDAP eauth is enabled @ 2016-03-18 15:11:59 UTC
- a52e3ad7a1 Merge pull request #31972 from terminalmage/zh-584
- 1e5639e495 Make lack of python-ldap module more explicit when LDAP eauth is enabled

**PR #31935:** (twangboy) Back port nullsoft build script from 2015.8 @ 2016-03-17 14:54:50 UTC
- 2df2a0c2e Merge pull request #31935 from twangboy/fix_build_script2
- 4af8c9dbfc Back port nullsoft build script from 2015.8

**PR #31912:** (jfindlay) log.mixins: remove extermporaneous .record @ 2016-03-16 01:56:46 UTC
- 43240dc566 Merge pull request #31912 from jfindlay/log_mixin
- 9f9c694654 log.mixins: remove extermporaneous .record

**PR #31825:** (justinta) Updated .testing.pylintrc to match newer versions of pylint @ 2016-03-15 18:12:44 UTC
- 4400ddcb0 Merge pull request #31825 from jtand/udpate_pylintrc
- 9a14e02766 Updated beacons/sh.py to work with enumerate()
- 0ecec691a0 Adjusted beacons to work with enumerate better
- 509b4113e Fixed final lint error
- 5945b3f1f Fix and disable pylint errors
- 06a6e6af55 Fixed pylint errors on jboss state and module
- de96db97c8 Fixed more pylint errors, and disabled some more
- c07b0a20b5 Merge branch ’lint_fixes’ into udpate_pylintrc
  * 2e6a152308 Fixed lint error in lxc.py
  * 908ca1a439 Fixed lint error in ssh_py_shim
  * 404c1b50f7 Changed range(len()) to enumerate()
  * 1c13586546 Changed range(len()) to enumerate()
- 9ccce7a9a5 Added more disables

  • 5c592b6768 Merge pull request #31852 from rallytime/merge-2015.5
  • 1470de17fa Merge branch '2014.7' into '2015.5'
  • 218c902091 Merge pull request #31834 from jfindlay/2014.7

    • 358fdad0c8 add 2014.7.8 release notes
    • a423c6cd04 Merge pull request #31833 from jfindlay/2014.7

    • 6910fcc584 add 2014.7.9 release notes
    • c5e7c03953 Merge pull request #31826 from gtmanfred/2014.7
    • d73f70e6b2 Remove ability of authenticating user to specify pam service

• PR #31827: (gtmanfred) Remove ability of authenticating user to specify pam service @ 2016-03-11 20:40:19 UTC

  • 00c1d5db03 Merge pull request #31827 from gtmanfred/2015.5
  • 979173b78a Remove ability of authenticating user to specify pam service

• PR #31810: (whiteinge) Fix outdated Jinja 'env' variable reference @ 2016-03-11 03:52:21 UTC

  • 8cf0b9eb3d Merge pull request #31810 from whiteinge/saltenv-jinja-var
  • cb72b19240 Fix outdated Jinja 'env' variable reference

• ISSUE #31729: (brejoc) Creating VM with salt-cloud fails for provider Exoscale (Cloudstack) (refs: #31744)

• PR #31744: (brejoc) Fix for AttributeError with libcloud <0.15 @ 2016-03-10 00:15:26 UTC

  • 970ef0e445 Merge pull request #31744 from brejoc/fixed-attribute-error-with-older-libcloud/2015.5
  • bb29d2283 Added version to libcloud depends statement
  • 87f9534f0e Added log message with update suggestion for libcloud
  • 72f6a406cd Fix for AttributeError with libcloud <0.15

• ISSUE #31666: (sjorge) salt-call --local pillar.items is overly eager to give data (refs: #31740)

• PR #31740: (terminalmage) Assume pillar_opts is False when not specified in masterless mode @ 2016-03-09 22:57:57 UTC
- df2d23ba5d Merge pull request #31740 from terminalmage/issue31666
- aea5864cd Fall back to False when pillar_opts not set
- fe19d77eb4 Add default value for pillar_opts on minion

- **ISSUE #31749**: (milan-milo) salt-cloud spitting out error `AttributeError: 'NoneType' object has no attribute 'pop'` (refs: #31750)

- **ISSUE #26162**: (amadhok) VMware cloud driver create function failing with traceback on latest develop (refs: #26170)

- **PR #31750**: (rallytime) Back-port #26170 to 2015.5 @ 2016-03-09 17:44:14 UTC
  - **PR #26170**: (amadhok) [Backport] Make sure variable is a dictionary before popping something from it. (refs: #31750)
  - e22f5c0a26 Merge pull request #31750 from rallytime/bp-26170
  - 3c11234a05 Make sure variable is a dictionary before popping something from it.

- **ISSUE #30559**: (kaidokert) module.wait does not fail when called state fails (refs: #31689)

- **PR #31689**: (rallytime) Back-port #29467 to 2015.5 @ 2016-03-06 19:26:11 UTC
  - **PR #29467**: (serge-p) Update module.py (refs: #31689)
  - 9162925dd0 Merge pull request #31687 from cachedout/rm_gpg_test
  - d7914cdb14 Merge pull request #31687 from cachedout/rm_gpg_test
  - 8b00513ebb Removed useless tests

- **PR #31687**: (cachedout) Removed useless GPG tests @ 2016-03-05 00:08:27 UTC
  - d7914cdb14 Merge pull request #31687 from cachedout/rm_gpg_test
  - 8b00513ebb Removed useless tests

- **ISSUE #31619**: (alexan nar) 2015.8.7 pkg.installed problem with version parameter (refs: #31660)

- **PR #31660**: (terminalmage) Remove epoch from version string if present when installing with yum @ 2016-03-04 20:49:23 UTC
  - bd4d12a155 Merge pull request #31660 from terminalmage/issue31619
  - da954d7b92 Add integration test for packages with epoch in version
  - 4fa7e4defe Move epoch removal
  - 290192af56 Remove epoch from version string if present when installing with yum

- **PR #31683**: (rallytime) Back-port #31578 to 2015.5 @ 2016-03-04 20:47:41 UTC
  - **PR #31578**: (anlutro) Allow queueing of state runs through saltmod (refs: #31683)
  - c33c1f456a Merge pull request #31683 from rallytime/bp-31578
  - 8fe46789b7 allow queueing of state runs through saltmod

- **ISSUE #31671**: (guettli) Word "Job Cache" does not match (refs: #31682)

- **PR #31682**: (cachedout) Add definition of job cache to glossary @ 2016-03-04 20:07:19 UTC
  - 27ff43895d Merge pull request #31682 from cachedout/cache meaning
  - a75e146125 Add definition of job cache to glossary

- **PR #31658**: (rallytime) Add mentioned of Salt’s Coding Style docs to the Contributing docs @ 2016-03-03 22:14:57 UTC
  - bd04c964d1 Merge pull request #31658 from rallytime/add-style-to-contrib

---

**28.2. Previous Releases**
• **ISSUE #21932**: (clinta) Salt Coding Style docs should list requirements for salt pylintrc (refs: #31655)

• **PR #31655**: (rallytime) Make note of pylint dependencies in docs @ 2016-03-03 18:37:06 UTC
  
  - 10658df6e6 Merge pull request #31655 from rallytime/pylint-docs
  
  - 6e0377d376 Make note of pylint dependencies in docs

• **PR #31440**: (cachedout) Set correct type for master_tops config value @ 2016-03-02 21:17:14 UTC
  
  - 6075774a01 Merge pull request #31440 from cachedout/master_tops_type
  
  - f49cc75049 Set correct type for master_tops config value

• **ISSUE #31614**: (frizzy) salt.utils.http.query() implementation contradicts it’s documentation. decode arg (refs: #31622)

• **PR #31622**: (jffindlay) doc/topics/tutorials/http: update query decoding docs @ 2016-03-02 18:23:44 UTC
  
  - 6d31b8918f Merge pull request #31622 from jffindlay/query_doc
  
  - 4e48bec806 doc/topics/tutorials/http: update query decoding docs

• **PR #31558**: (cachedout) Don’t stacktrace if ssh binary is not installed with salt-ssh @ 2016-02-29 22:15:44 UTC
  
  - dbf6e0786c Merge pull request #31558 from cachedout/ensure_ssh_installed
  
  - cec6e0a5f Don’t stacktrace if ssh binary is not installed with salt-ssh

• **PR #31521**: (terminalmage) salt-ssh: Fix race condition when caching files to build the thin tarball @ 2016-02-29 15:32:22 UTC
  
  - 060a60f9d9 Merge pull request #31521 from terminalmage/issue24753
  
  - 0d352bb16 Add fileclient tests
  
  - d9370a8041 Update cp module salt-ssh wrapper to use new cachedir param
  
  - 0320494b1d Update the SSH state module wrappers to pass an alternate cachedir
  
  - 65bdcb3afa Accept and pass through the alternate cachedir when prepping the thin tar
  
  - c3f7a2f2e5 Add ability to specify an alternate base dir for file caching

• **PR #31497**: (rallytime) Remove duplicate "timeout" definition in Roster docs @ 2016-02-26 15:01:30 UTC
  
  - 92f8f89218 Merge pull request #31497 from rallytime/remove-timeout-dup
  
  - 83e4840d20 Remove duplicate "timeout" definition in Roster docs

• **PR #31472**: (rallytime) Update contributing docs @ 2016-02-25 16:05:59 UTC
  
  - da001bcb49 Merge pull request #31472 from rallytime/update-contributing-docs
  
  - 5871e4d1e0 Update contributing docs

• **ISSUE #30183**: (jakehilton) Minion startup extremely delayed when first master in failover multi master setup is down (refs: #31382)

• **PR #31461**: (DmitryKuzmenko) Set auth retry count to 0 if multimaster mode is failover. @ 2016-02-24 17:15:30 UTC
  
  - PR #31382: (DmitryKuzmenko) Set auth retry count to 0 if multimaster mode is failover (refs: #31461)
  
  - f35e2dd1d3 Merge pull request #31461 from DSROpany/issues/30183_fix_multimaster_failover_2015.5
  
  - 3d9c3b7a3 Set auth retry count to 0 if multimaster mode is failover.
• ISSUE #31356: (sastorsl) file.copy module with recurse=true and non-existing src dir does not fail and resets dst dir permissions (refs: #31442)

• PR #31442: (sastorsl) Add os.path.exists(src) to file.py, def copy @ 2016-02-23 23:40:03 UTC
  - 26733ce988 Merge pull request #31442 from sastorsl/salt-modules-file.py-copy-check-src
  - 0a4132866d removed lint in the exception string
  - f8b5d498c3 Add os.path.exists(src) to file.py, def copy

• ISSUE #30739: (paclat) manage.present does not work when minion is using localhost (refs: #31441)

• PR #31441: (cachedout) Include localhost minions in presence detection for runner @ 2016-02-23 23:36:59 UTC
  - e480727d27 Merge pull request #31441 from cachedout/issue_30739
  - ffcaf1d070 Include localhost minions in presence detection for runner

• PR #31416: (carlwgeorge) selinux module documentation fix @ 2016-02-22 21:49:28 UTC
  - 91ff95f093 Merge pull request #31416 from carlwgeorge/selinux_doc_fix
  - 0e6846d72e selinux module documentation fix

• PR #31336: (terminalmage) Improve config validation logging @ 2016-02-22 19:34:24 UTC
  - 7d01979a89 Merge pull request #31336 from terminalmage/config-validation-logging
  - 79500bad1 Improve config validation logging

• ISSUE #31369: (sjorge) illumos/solaris/smartos display compacted hwaddrs (refs: #31374)

• PR #31374: (sjorge) fix for #31369 @ 2016-02-22 16:22:21 UTC
  - fed096a29d Merge pull request #31374 from sjorge/solarish_hwaddr
  - bdf2576db missed a .format and messed up the join
  - bbd2f6c96d fix for illumos/solaris hwaddr

• PR #31339: (jacobhammons) changed latest release to 2015.8.7 @ 2016-02-19 00:30:24 UTC
  - 6ee17f905b Merge pull request #31339 from jacobhammons/dot7prev
  - 0712042d07 changed latest release to 2015.8.7

• PR #31288: (notpeter) Improve salt.states.ssh_known_hosts documentation. @ 2016-02-17 22:09:18 UTC
  - cd3400e67e Merge pull request #31288 from notpeter/ssh_known_hosts_docs
  - 3f57389a2 Improve salt.states.ssh_known_hosts documentation.

• PR #31183: (heyfife) Fixed named external_ip reservation/re-use code in gce driver. @ 2016-02-17 19:02:27 UTC
  - 875d9925f9 Merge pull request #31183 from heyfife/fixed-gce-named-static-ip-reservation
  - 26774e2323 Fixed named external_ip reservation/re-use code.

• ISSUE #31001: (toanju) Fedora 23 check installed packages fails (refs: #31032)

• PR #31032: (terminalmage) (2015.5 branch) yumpkg: ensure that dnf-plugins-core >= 0.1.15 is installed @ 2016-02-17 19:02:03 UTC
  - e56c402c0c Merge pull request #31032 from terminalmage/issue31001
  - 42daa4509 yumpkg.py: Remove repoquery usage everywhere but check_db
  - 50befbc149 backport salt.utils.pkg.rpm to 2015.5
  - a1ad1499a Move salt.utils.itersplit() to salt.utils.ityertools.split()
Salt Documentation, Release 3000.1

- 5b8646ce64 Ignore failure to install new enough dnf-plugins-core
- defe0859fd Ensure that dnf-plugins-core 0.1.15 is installed

• ISSUE #31174: (sjorge) salt.states.archive.extracted displays incorrect message: (refs: #31176)

• PR #31264: (sjorge) fix if_missing gets appended to dirs list, take III @ 2016-02-17 17:12:25 UTC
  - PR #31250: (sjorge) if_missing append to array as far back as 2014.1 (refs: #31264)
  - PR #31176: (sjorge) if_missing incorrected appended to directories_created (refs: #31250, #31264)
  - cce69b74f0 Merge pull request #31264 from sjorge/if_missing-155-fix
  - 545edbf5e1 fix if_missing gets appended to dirs list, take III

• PR #31110: (cachedout) Fixup 30730 @ 2016-02-10 21:37:55 UTC
  - f3f474de9 Merge pull request #31110 from cachedout/fixup_30730
  - 5bf5848e04 Fixup unit test
  - f558f6e09a Fixes pylint warnings
  - 6a975ec43 Attempt to fix pylint warnings
  - 55d71be057 Make documentation and code examples consistent with code
  - 1f04fed6f8 Change parameter name from includes to skips
  - cc5e13e7d Adding support for skipHidden in SetInclude
  - 4f2da42e7 Variable names standardization
  - f5917ac1e8 Fixes typo
  - 26e5236073 Invert RebootRequired logic
  - 8065a7abf6 Add basic documentation and define how the skips parameter works.
  - 389f6a7508 Change parameter name from includes to skips
  - 30e1f6f906 Adding support for skipHidden in SetInclude
  - 1244e9e5be Variable names standardization, consistent if/else logic with states.win_update

• ISSUE #30900: (mchugh19) modules/qemu_nbd.py assumes versions of utilities that don’t exist on ubuntu (refs: #30949)

  - f037fd9c27 Merge pull request #30184 from rallytime/bp-30166
  - fa6b1b3022 adding split_env call to cp.hash_file to pick up saltenv in file query parameter
- **PR #30291**: (thegoodduke) ipset: fix test=true & add comment for every entry @ 2016-01-12 19:40:23 UTC
  - PR #30170: (thegoodduke) ipset: fix comment and test (refs: #30291)
Salt Documentation, Release 3000.1

- 1d8413fd2f Merge pull request #30291 from thegoodduke/for_fix_ipset
- 62d6ccf561 ipset: fix test=true & add comment for every entry

### 28.2.65 Salt 2015.5.2 Release Notes

**release** 2015-06-10

Version 2015.5.2 is a bugfix release for 2015.5.0.

**Statistics**

- Total Merges: 112
- Total Issue References: 36
- Total PR References: 145
- Contributors: 49 (Sacro, The-Loeki, YanChii, aboe76, anlutro, awdrius, basepi, cedwards, clan, corywright, cro, djcrabhat, dmyerscough, dr4Ke, fayetted, galet, garethgreenaway, ghost, hazelesque, hvnsweeting, jacksonjt, jacobhammons, jayeshka, jbj, jfindlay, joejulian, justinta, kartiksubbarao, kiorky, merll, msteed, neogenix, nicholascapo, nieib, pengyao, pruz, rallytime, randybias, ryan-lane, steverweber, swdream, techhat, terminalmage, thcipriani, thusoy, trevor-h, twangboy, whiteinge)

**Changelog for v2015.5.1..v2015.5.2**

- **PR #24372**: (rallytime) Add 2015.5.2 release notes @ 2015-06-03 19:30:46 UTC
  - d71d75e2ec Merge pull request #24372 from rallytime/release_notes
  - f5ec1a1693 Add 2015.5.2 release notes
- **PR #24346**: (rallytime) Backport #24271 to 2015.5 @ 2015-06-03 18:44:31 UTC
  - **PR #24271**: (randybias) Fixed the setup instructions (refs: #24346)
  - 76927c9ea1 Merge pull request #24346 from rallytime/bp-24271
  - 04067b6833 Fixed the setup instructions
- **ISSUE #24012**: (jbq) Enabling a service does not create the appropriate rc.d symlinks on Ubuntu (refs: #24013)
- **PR #24345**: (rallytime) Backport #24013 to 2015.5 @ 2015-06-03 18:39:41 UTC
  - **PR #24013**: (jbq) Fix enabling a service on Ubuntu #24012 (refs: #24345)
  - 4afa03d8e3 Merge pull request #24345 from rallytime/bp-24013
  - 16e0732b50 Fix enabling a service on Ubuntu #24012
- **PR #24365**: (jacobhammons) Fixes for PDF build errors @ 2015-06-03 17:50:02 UTC
  - c3392c246a Merge pull request #24365 from jacobhammons/DocFixes
  - 0fc190267f Fixes for PDF build errors
- **ISSUE #22991**: (nicholascapo) npm.installed ignores test=True (refs: #24313)
- **PR #24313**: (nicholascapo) Fix #22991 Correctly set result when test=True @ 2015-06-03 14:49:18 UTC
  - ae68144db1 Merge pull request #24313 from nicholascapo/fix-22991-npm.installed-test-true
- ac9644cb19 Fix #22991 npm.installed correctly set result on test=True
- ISSUE #18966: (bechtoldt) file.serialize ignores test=True (refs: #24312)
  - PR #24312: (nicholascapo) Fix #18966: file.serialize supports test=True @ 2015-06-03 14:49:06 UTC
    - d57a9a267c Merge pull request #24312 from nicholascapo/fix-18966-file.serialize-test-true
    - e7328e7043 Fix #18966 file.serialize correctly set result on test=True
- PR #24302: (jfindlay) fix pkg hold/unhold integration test @ 2015-06-03 03:27:43 UTC
  - 6b694e3495 Merge pull request #24302 from jfindlay/pkg_tests
  - c2db0b1758 fix pkg hold/unhold integration test
- ISSUE #14021: (emostar) EC2 doc mentions mount_point, but unable to use properly (refs: #24349)
- PR #24349: (rallytime) Remove references to mount_points in ec2 docs @ 2015-06-03 01:54:09 UTC
  - aca8447ced Merge pull request #24349 from rallytime/fixed-14021
  - a235b114d7 Remove references to mount_points in ec2 docs
- PR #24328: (dr4Ke) Fix state grains silently fails 2015.5 @ 2015-06-02 15:18:46 UTC
  - 88a9976ee6 Merge pull request #24328 from dr4Ke/fixed_state_grains_silently_fails_2015.5
  - 8a63d1ebbe fix state grains silently fails #24319
  - ca1af20203 grains state: add some tests
- ISSUE #9772: (s0undt3ch) Delete VM's in a map does not delete them all (refs: #24310)
- ISSUE #24036: (arthurlogilab) [salt-cloud] Protect against passing command line arguments as names for the
  ~destroy command in map files (refs: #24310)
- PR #24310: (techhat) Add warning about destroying maps @ 2015-06-02 03:01:28 UTC
  - 7dc9dbb5d5 Merge pull request #24310 from techhat/mapwarning
  - ca535a6ff4 Add warning about destroying maps
- PR #24281: (steverweber) Ipmi docfix @ 2015-06-01 17:45:36 UTC
  - 02bf254d6 Merge pull request #24281 from steverweber/ipmi_docfix
  - dd36f2c555 yaml formating
  - f6dee3047 include api_kg kwarg in ipmi state
  - a7d4e97bb9 doc cleanup
  - 0ded2fdef save more cleanup to doc
  - 08872fa2a3 fix name api_key to api_kg
  - 165a387681 doc fix add api_kg kwargs
  - 1ec78887e4 cleanup docs
- PR #24287: (jfindlay) fix pkg test on ubuntu 12.04 for realz @ 2015-06-01 14:16:37 UTC
  - 73cd2be1f Merge pull request #24287 from jfindlay/pkg_test
  - 98944d8c7f fix pkg test on ubuntu 12.04 for realz
- PR #24279: (rallytime) Backport #24263 to 2015.5 @ 2015-06-01 04:29:34 UTC
  - PR #24263: (cdarwin) Correct usage of import_yaml in formula documentation (refs: #24279)
- 02017a074c Merge pull request #24279 from rallytime/bp-24263
- beff7c7785 Correct usage of import_yaml in formula documentation

**ISSUE #24226:** (c4ursel) iptables state needs to keep ordering of flags (refs: #24277)

**PR #24277:** (rallytime) Put a space between after_jump commands @ 2015-06-01 04:28:26 UTC
- 2ba696d54a Merge pull request #24277 from rallytime/fix_iptables_jump
- e2d1606b19 Move after_jump split out of loop
- d14f130b6 Remove extra loop
- 42e5f320b6 Put a space between after_jump commands

**PR #24262:** (basepi) More dictupdate after #24142 @ 2015-05-31 04:09:37 UTC
- PR #24142: (basepi) Optimize dictupdate.update and add #24097 functionality (refs: #24262)
- PR #24097: (kiorky) Optimize dictupdate (refs: #24142)
- 113eba34ec Merge pull request #24262 from basepi/dictupdatefix
- 0c4832c0d4 Raise a typeerror if non-dict types
- be21aaa122 Pylint
- bb8a6c6cc9 More optimization
- c933249d1a py3 compat
- ff662a781f Further optimize dictupdate.update()
- c73f5ba37c Remove unused valtype

**PR #24269:** (kiorky) zfs: Fix spurious retcode hijacking in virtual @ 2015-05-30 17:47:49 UTC
- 785d5a1bfc Merge pull request #24269 from makinacorpus/zfs
- 0bf23ce701 zfs: Fix spurious retcode hijacking in virtual

**PR #24257:** (jfindlay) fix pkg mod integration test on ubuntu 12.04 @ 2015-05-29 23:09:00 UTC
- 3d885c04f0 Merge pull request #24257 from jfindlay/pkg_tests
- 9508924c02 fix pkg mod integration test on ubuntu 12.04

**ISSUE #23883:** (kaithar) max_event_size seems broken (refs: #24001, #24065)

**ISSUE #23657:** (arthurlogilab) [salt-cloud lxc] NameError: global name '__salt__' is not defined (refs: #23982, #24080)

**PR #24260:** (basepi) Fix some typos from #24080 @ 2015-05-29 22:54:58 UTC
- PR #24080: (kiorky) Lxc consistency2 (refs: #24066, #24260, #23982)
- PR #24066: (kiorky) Merge forward 2015.5 -> develop (refs: #23982)
- PR #24065: (kiorky) continue to fix #23883 (refs: #24066, #24080)
- PR #23982: (kiorky) lxc: path support (refs: #24080)
- 08a1075b3 Merge pull request #24260 from basepi/lxctypos24080
- 0fa1ad3977 Fix another lxc typo
- 669938f28d s/you'll/you'll/

**ISSUE #23883:** (kaithar) max_event_size seems broken (refs: #24001, #24065)

  - 0b1041d22 adding key_filename param to vsphere provider

• PR #24254: (rallytime) Add deprecation warning to Digital Ocean v1 Driver @ 2015-05-29 21:39:25 UTC
  - PR #22731: (dmyerscough) Decommission DigitalOcean APIv1 and have users use the new DigitalOcean APIv2 (refs: #24254)
  - 21d6126c34 Merge pull request #24254 from rallytime/add_deprecation_warning_digitalocean
  - cde37f78 Add note to docs about deprecation
  - ea6f1e0921 Add deprecation warning to digital ocean driver to move to digital_ocean_v2

• PR #24252: (aboe76) Updated suse spec to 2015.5.1 @ 2015-05-29 21:38:45 UTC
  - dac055d88 Merge pull request #24252 from aboe76/opensuse_package
  - 0ad617df21 Updated suse spec to 2015.5.1

• PR #24251: (garethgreenaway) Returners broken in 2015.5 @ 2015-05-29 21:37:52 UTC
5152 Chapter 28. Release Notes

- 49e7fe8a5e Merge pull request #24251 from garethgreenaway/2015_5_returner_brokenness
- 5df0b52568 The code calling cfg as a function vs treating it as a dictionary and using get is currently backwards causing returners to fail when used from the CLI and in scheduled jobs.

**ISSUE #21498**: (rallytime) Clarify Digital Ocean Documentation (refs: #24255)

**PR #24255**: (rallytime) Clarify digital ocean documentation and mention v1 driver deprecation @ 2015-05-29 21:37:07 UTC

  - bfb946123e Merge pull request #24255 from rallytime/clarify_digital_ocean_driver_docs
  - 8d51f75aa5 Clarify digital ocean documentation and mention v1 driver deprecation

**PR #24232**: (rallytime) Backport #23308 to 2015.5 @ 2015-05-29 21:36:46 UTC

  - PR #23308: (thuso) Don’t merge: Add missing jump arguments to iptables module (refs: #24232)
  - 41f5756f36 Merge pull request #24232 from rallytime/bp-23308
  - 2733f66449 Import string
  - 9097cca099 Add missing jump arguments to iptables module

**PR #24245**: (Sacro) Unset PYTHONHOME when starting the service @ 2015-05-29 20:00:31 UTC

  - a95982c722 Merge pull request #24245 from Sacro/patch-2
  - 6632d06e94 Unset PYTHONHOME when starting the service

**PR #24121**: (hvnsweeting) deprecate setting user permission in rabbitmq_vhost.present @ 2015-05-29 15:55:40 UTC

  - 1504c76d3a Merge pull request #24121 from hvnsweeting/rabbitmq-host-deprecate-set-permission
  - 2223158e76 deprecate setting user permission in rabbitmq_host.present

**PR #24179**: (merll) Changing user and group only possible for existing ids. @ 2015-05-29 15:52:43 UTC

  - PR #24169: (merll) Changing user and group only possible for existing ids. (refs: #24179)
  - ba02f6509e Merge pull request #24179 from Precis/fix-file-uid-gid-2015.0
  - ee4c9d59ab Use ids if user or group is not present.

**ISSUE #24147**: (paclat) Syndication issues when using authentication on master of masters. (refs: #24229)

**PR #24229**: (msteed) Fix auth failure on syndic with external_auth @ 2015-05-29 15:04:06 UTC

  - 9bfb066c2c Merge pull request #24229 from msteed/issue-24147
  - 482d1cf644 Fix auth failure on syndic with external_auth

**PR #24234**: (jayeshka) adding states/quota unit test case. @ 2015-05-29 14:14:27 UTC

  - 19fa43c290 Merge pull request #24234 from jayeshka/quota-states-unit-test
  - c23356500b adding states/quota unit test case.

**PR #24217**: (jfindlay) disable intermittently failing tests @ 2015-05-29 03:08:39 UTC

  - PR #24223: (jfindlay) Fix /jobs endpoint’s return (refs: #24217)
  - PR #22857: (jacksontj) Fix /jobs endpoint’s return (refs: #23623)
  - e15142c629 Merge pull request #24217 from jfindlay/disable_bad_tests
  - 6b6280442c disable intermittently failing tests

**PR #24199**: (ryan-lane) Various fixes for boto_route53 and boto_elb @ 2015-05-29 03:02:41 UTC
– ce8e43b774 Merge pull request #24199 from lyft/route53-fix-elb
– d8de9a7b5b Better unit tests for boto_elb state
– 62f214b535 Remove cnames_present test
– 7b9ae82951 Lint fix
– b74b0d1413 Various fixes for boto_route53 and boto_elb

• PR #24142: (basepi) Optimize dictupdate.update and add #24097 functionality (refs: #24262) @ 2015-05-29 03:00:56 UTC
  – PR #24097: (kiorky) Optimize dictupdate (refs: #24142)
  – a43465d235 Merge pull request #24142 from basepi/dictupdate24097
  – 5c6e210c8b Deepcopy on merge_recurse
  – a13c84ade8 Fix None check from #21968
  – 9ef2c64098 Add docstring
  – 8579429314 Add in recursive_update from #24097
  – 8599143200 if key not in dest, don’t recurse
  – d8a4b3017 Rename klass to valtype

• PR #24208: (jayeshka) adding states/ports unit test case. @ 2015-05-28 23:06:33 UTC

  - 722a66244 Merge pull request #24184 from rallytime/bp-24129
  - 722a662479 fixed a typo
  - 565eb46f5 Add cmd doc for WheelClient
• PR #24183: (rallytime) Backport #19320 to 2015.5 @ 2015-05-28 05:14:36 UTC
  - PR #19320: (clan) add 'state_output_profile' option for profile output (refs: #24183)
  - eb0af70e5b Merge pull request #24183 from rallytime/bp-19320
  - 55db1f8b5 sate_output_profile default to True
  - 99192703b fix type: statei -> state
  - 0549ca6266 add 'state_output_profile' option for profile output
• PR #24201: (whiteinge) Add list of client libraries for the rest_cherrypy module to the top-level documentation @ 2015-05-28 02:12:09 UTC
  - 1b5bf23187 Merge pull request #24201 from whiteinge/rest_cherrypy-client-libs
  - 5f781827ca Add list of client libraries for the rest_cherrypy module
  - 28fc77f6f6 Fix rest_cherrypy config example indentation
• PR #24195: (rallytime) Merge #24185 with a couple of fixes @ 2015-05-27 22:18:37 UTC
  – PR #24185: (jacobhammons) Fixes for doc build errors (refs: #24195)
  – 3307ec20d9 Merge pull request #24195 from rallytime/merge-24185
  – d8daa9dcd7 Merge #24185 with a couple of fixes
  – 634d56ca0 Fixed pylon error
  – 068981d0e Fixes for doc build errors

• PR #24166: (jayeshka) adding states/pkgng unit test case. @ 2015-05-27 20:27:49 UTC
  – 7e400b3d7 Merge pull request #24166 from jayeshka/pkgng-states-unit-test
  – 2234bb0b70 adding states/pkgng unit test case.

• PR #24189: (basepi) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2015-05-27 20:26:31 UTC
  – 9fcd79cd4 Merge pull request #24189 from basepi/merge-forward-2015.5
  – 8839e9c22e Merge remote-tracking branch 'upstream/2014.7' into merge-forward-2015.5
  – 9d7331c87d Merge pull request #24178 from rallytime/bp-24118
    * e2217a09e8 removed deprecated pymongo usage as no longer functional with pymongo > 3.x
  – 4e8c5031b0 Merge pull request #24159 from rallytime/keystone_doc_examples
    * dadac80d76 Fill out modules/keystone.py CLI Examples
  – fc10ee8ed5 Merge pull request #24158 from rallytime/fix_doc_error
    * 49a517e2ca Fix test_valid_docs test for tls module

• PR #24181: (justinta) Fixed error where file was evaluated as a symlink in test_absent @ 2015-05-27 18:26:28 UTC
  – 2303dec0e9 Merge pull request #24181 from justinta/file_test
  – 5f0e601589 Fixed error where file was evaluated as a symlink in test_absent

• PR #24180: (terminalmage) Skip libvirt tests if not running as root @ 2015-05-27 18:18:47 UTC
  – a16276852b Merge pull request #24180 from terminalmage/fix-libvirt-test
  – 72e7416ad2 Skip libvirt tests if not running as root

• PR #24165: (jayeshka) adding states/portage_config unit test case. @ 2015-05-27 17:15:08 UTC
  – 1bc5b256e Merge pull request #24165 from jayeshka/portage_config-states-unit-test
  – 8cf1505392 adding states/portage_config unit test case.

• PR #24164: (jayeshka) adding states/pecl unit test case. @ 2015-05-27 17:14:26 UTC
  – 4747856411 Merge pull request #24164 from jayeshka/pecl-states-unit-test
  – 563a5b3c30 adding states/pecl unit test case.

• PR #24160: (The-Loeki) small enhancement to data module; pop() @ 2015-05-27 17:03:10 UTC
  – cd4aa19324 Merge pull request #24160 from The-Loeki/patch-1
  – 2175ff3c75 doc & merge fix
  – eba382cdda small enhancement to data module; pop()

• PR #24153: (techhat) Batch mode sometimes improperly builds lists of minions to process @ 2015-05-27 16:21:53 UTC
Chapter 28. Release Notes

- 4a8dbc7f13 Merge pull request #24153 from techhat/batchlist
- 467ba64612 Make sure that minion IDs are strings

- **PR #24167:** (jayeshka) adding states/pagerduty unit test case. @ 2015-05-27 16:14:01 UTC
  - ed8ccf57a2 Merge pull request #24167 from jayeshka/pagerduty-states-unit-test
  - 1af8c8334d adding states/pagerduty unit test case.

- **PR #24156:** (basepi) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2015-05-27 15:05:01 UTC
  - b9507d1567 Merge pull request #24156 from basepi/merge-forward-2015.5
  - e52b5ab2e2 Remove stray >>>>
  - 7dfbd929ff Merge remote-tracking branch 'upstream/2014.7' into merge-forward-2015.5
    - c0d32e0b5e Merge pull request #24125 from hvnsweeting/fix-rabbitmq-test-mode
      - 71862c69b9 enhance log
      - 28e2594162 change according to new output of rabbitmq module functions
      - cd021e8ed processes and returns better output for rabbitmq module
    - 39a8f30f06 Merge pull request #24093 from msteen/issue-23464
      - fd35903d75 Fix failing test
      - 41b344c7d3 Make LocalClient.cmd_iter_no_block() not block
    - 5bfd3045e Merge pull request #24008 from davidjhb/2014.7
      - 8b8d0293d4 Correct reST formatting for documentation
    - 1aa0420040 Merge pull request #23933 from jacobhammons/2014.7
      - a3613e68e4 removed numbering from doc TOC
    - 78b737c5e6 removed 2015* release from release notes, updated index page to remove PDF/epub links
    - e867f7df77 Changed build settings to use saltstack2 theme and update release versions.
    - 81ed9c9f59 sphinx saltstack2 doc theme

- **ISSUE #24102:** (bormotov) win_update encondig problems (refs: #24145)
- **PR #24145:** (jfindlay) attempt to decode win update package @ 2015-05-26 23:20:20 UTC
  - 05745fa931 Merge pull request #24145 from jfindlay/win_update_encoding
  - cc5e17e61f attempt to decode win update package

- **ISSUE #24122:** (kiorky) service.dead is no more stateful: services does not handle correctly enable/disable change state (refs: #24123)
- **PR #24123:** (kiorky) fix service enable/disable change @ 2015-05-26 21:24:19 UTC
  - 70247890de Merge pull request #24123 from makinacorpus/ss
  - 2e2e1d262d fix service enable/disable change

- **PR #24146:** (rallytime) Fixes the boto_vpc_test failure on CentOS 5 tests @ 2015-05-26 20:15:19 UTC
  - 51c3e5c5d7 Merge pull request #24146 from rallytime/fix_centos_boto_failure
  - ac0f97de51 Fixes the boto_vpc_test failure on CentOS 5 tests
• **ISSUE #24052**: (twangboy) v2015.5.1 Changes the way it interprets the minion_master.pub file (refs: #24144, #24089)

• **ISSUE #23566**: (rks2286) Salt-cp corrupting the file after transfer to minion (refs: #24144, #23740)

• **PR #24144**: (twangboy) Compare Keys ignores all newlines and carriage returns @ 2015-05-26 19:25:48 UTC
  - PR #23740: (jfindlay) Binary write (refs: #24144)
  - 1c91a2176f Merge pull request #24144 from twangboy/fix_24052
  - c197b41494 Compare Keys removing all newlines and carriage returns

• **PR #24139**: (rallytime) Backport #24118 to 2015.5 @ 2015-05-26 18:23:51 UTC
  - PR #24118: (trevor-h) removed deprecated pymongo usage (refs: #24178, #24139)
  - 084166747c Merge pull request #24139 from rallytime/bp-24118
  - 7f08641800 Fixed typo in chown username (ending dot) that fails the command.

• **PR #24138**: (rallytime) Backport #24116 to 2015.5 @ 2015-05-26 15:58:10 UTC
  - PR #24116: (awdrius) Fixed typo in chown username (ending dot) that fails the command. (refs: #24138)
  - 742eca29f7 Merge pull request #24138 from rallytime/bp-24116
  - 89cdf976e1 Merge pull request #24137 from rallytime/bp-24104

• **PR #24135**: (jayeshka) adding states/mysql_user unit test case @ 2015-05-26 15:58:10 UTC
  - PR #24083: (swdream) fix code block syntax (refs: #24135)
  - 67c4373577 Merge pull request #24135 from rallytime/bp-24083
  - e1d06f9764 fix code block syntax

• **PR #24131**: (jayeshka) adding states/mysql_user unit test case @ 2015-05-26 15:58:10 UTC
  - a83371e0ed Merge pull request #24131 from jayeshka/mysql_user-states-unit-test
  - ed1ef69856 adding states/mysql_user unit test case

• **PR #24130**: (jayeshka) adding states/ntp unit test case @ 2015-05-26 15:57:29 UTC
  - 1dc1d2a6e5 Merge pull request #24130 from jayeshka/ntp-states-unit-test
  - ede4a9f2f1 adding states/ntp unit test case

• **PR #24128**: (jayeshka) adding states/openstack_config unit test case @ 2015-05-26 15:56:08 UTC
  - 39434179a8 Merge pull request #24128 from jayeshka/openstack_config-states-unit-test
Salt Documentation, Release 3000.1

- ca09e0f7c1 adding states/openstack_config unit test case

- **PR #24127**: (jayeshka) adding states/npm unit test case @ 2015-05-26 15:55:18 UTC
  - 23f25c4298 Merge pull request #24127 from jayeshka/npm-states-unit-test
  - c3ecabae0 adding states/npm unit test case

- **ISSUE #24099**: (hvnsweeting) stateVerbose False summary is wrong (refs: #24077)

- **PR #24077**: (anlutro) Change how state_verbose output is filtered @ 2015-05-26 15:41:11 UTC
  - 07488a4415 Merge pull request #24077 from alprs/fix-outputter_highstate_nonverbose_count
  - 7790408c3c Change how state_verbose output is filtered

- **PR #24119**: (jfindlay) Update contrib docs @ 2015-05-26 15:37:01 UTC
  - 224820febf Merge pull request #24119 from jfindlay/update_contrib_docs
  - fa2d411f53 update example release branch in contrib docs
  - a0b76b57b3 clarify git rebase instructions
  - 3517e0095f fix contribution docs link typos
  - 651629c6a4 backport dev contrib doc updates to 2015.5

- **PR #23928**: (joejulian) Add the ability to replace existing certificates @ 2015-05-25 19:47:26 UTC
  - 5488c4aa2 Merge pull request #23928 from joejulian/2015.5_tls_module_replace_existing
  - 4a4cbdd266 Add the ability to replace existing certificates

- **ISSUE #23221**: (Reiner030) Debian Jessie: locale.present not working again (refs: #24078)

- **PR #24078**: (jfindlay) if a charmap is not supplied, set it to the codeset @ 2015-05-25 19:39:19 UTC
  - dd90ef09b9 Merge pull request #24078 from jfindlay/locale_charmap
  - 5eb97f0973 if a charmap is not supplied, set it to the codeset

- **PR #24088**: (jfindlay) pkg module integration tests @ 2015-05-25 19:39:02 UTC
  - 9cec5d3dc9 Merge pull request #24088 from jfindlay/pkg_tests
  - f1bd5ec404 adding pkg module integration tests
  - 739b2e3bd3 rework yumpkg refresh_db so args are not mandatory

- **ISSUE #24052**: (twangboy) v2015.5.1 Changes the way it interprets the minion_master.pub file (refs: #24144, #24089)

- **PR #24089**: (jfindlay) allow override of binary file mode on windows @ 2015-05-25 19:38:44 UTC
  - 517552caaa6 Merge pull request #24089 from jfindlay/binary_write
  - b2259a6370 allow override of binary file mode on windows

- **ISSUE #23973**: (mschiff) state file.managed: setting contents_pillar to a pillar which is a list throws exception instead giving descriptive error message (refs: #24092)

- **PR #24092**: (jfindlay) collect scattered contents edits, ensure it's a str @ 2015-05-25 19:38:10 UTC
  - 121ab9f857 Merge pull request #24092 from jfindlay/file_state
  - cfa0f1358e collect scattered contents edits, ensure it’s a str

- **PR #24112**: (The-Loeki) thin_gen breaks when thinver doesn’t exist @ 2015-05-25 19:37:47 UTC
  - 84e65dece7 Merge pull request #24112 from The-Loeki/patch-1
- 34646eae16 thin_gen breaks when thinver doesn’t exist

- **PR #24108**: (jayeshka) adding states/mysql_query unit test case @ 2015-05-25 12:30:48 UTC
  - ec509ed272 Merge pull request #24108 from jayeshka/mysql_query-states-unit-test
  - ec50450460 adding states/mysql_query unit test case

- **PR #24110**: (jayeshka) adding varnish unit test case @ 2015-05-25 12:30:21 UTC
  - f2e5d6c2fd Merge pull request #24110 from jayeshka/varnish-unit-test
  - e11988969f adding varnish unit test case

- **PR #24109**: (jayeshka) adding states/mysql_grants unit test case @ 2015-05-25 12:29:53 UTC
  - 4fca2b49e3 Merge pull request #24109 from jayeshka/mysql_grants-states-unit-test
  - 11a93cb80c adding states/mysql_grants unit test case

- **PR #24028**: (nleib) send a disable message to disable puppet @ 2015-05-25 04:02:11 UTC
  - 6b43c9a8cb Merge pull request #24028 from nleib/2015.5
  - 15f24b42b2 update format of string in disabled msg
  - 7690e5b008 remove trailing whitespaces
  - 56a972034f Update puppet.py
  - 9686391d81 Update puppet.py
  - 33f3d68489 send a disable message to disable puppet

- **PR #24100**: (jfindlay) adding states/file unit test case @ 2015-05-24 05:17:54 UTC
  - PR #23963: (jayeshka) adding states/file unit test case (refs: #24100)
  - 52e9aca6c2 Merge pull request #24100 from jfindlay/merge_23963
  - 7d59debb3d6 adding states/file unit test case

- **ISSUE #21446**: (dpheasant) check for systemd on Oracle Linux (refs: #24098)

- **PR #24098**: (galet) Systemd not recognized properly on Oracle Linux 7 @ 2015-05-24 04:07:31 UTC
  - 0eb9f15d20 Merge pull request #24098 from galet/2015.5
  - 4d6ab21c74 Systemd not recognized properly on Oracle Linux 7

- **PR #24090**: (jfindlay) adding states/mount unit test case @ 2015-05-22 23:02:57 UTC
  - PR #24062: (jayeshka) adding states/mount unit test case (refs: #24090)
  - 8e04db76de Merge pull request #24090 from jfindlay/merge_24062
  - a819225bb8 adding states/mount unit test case

- **ISSUE #22574**: (unicolet) error when which is not available (refs: #22806)

- **PR #24086**: (rallytime) Backport #22806 to 2015.5 @ 2015-05-22 21:18:20 UTC
  - PR #22806: (jfindlay) use cmd.run_all instead of cmd.run_stdout (refs: #24086)
  - c0079f55e7 Merge pull request #24086 from rallytime/bp-22806
  - f728f55160 use cmd.run_all instead of cmd.run_stdout

- **PR #24024**: (jayeshka) adding states/mongodb_user unit test case @ 2015-05-22 20:53:19 UTC
  - 09de253373 Merge pull request #24024 from jayeshka/mongodb_user-states-unit-test

---

### 28.2. Previous Releases

5159
- f31dc921f5 resolved errors
- d038b1fddb adding states/mongodb_user unit test case

**ISSUE #23883**: (kaithar) max_event_size seems broken (refs: #24001, #24065)

**PR #24065**: (kiorky) continue to fix #23883 (refs: #24066, #24080) @ 2015-05-22 18:59:21 UTC
- bfd812c56b Merge pull request #24065 from makinacorpus/real23883
- 02828e201d continue to fix #23883

**ISSUE #24017**: (arthurlogilab) [salt-cloud openstack] TypeError: unhashable type: 'dict' on map creation (refs: #24029)

**PR #24029**: (kiorky) Fix providers handling @ 2015-05-22 16:56:06 UTC
- 429ade00a Merge pull request #24029 from makinacorpus/fixproviders
- 412b39b802 Fix providers handling

**PR #23936**: (jfindlay) remove unreachable returns in file state @ 2015-05-22 16:26:49 UTC
- a42cccc98 Merge pull request #23936 from jfindlay/file_state
- ac29c0cdd0 also validate file.recurse source parameter
- 57f73887fe remove unreachable returns in file state

**PR #24063**: (jayeshka) removed tuple index error @ 2015-05-22 14:58:20 UTC
- 8b69b41a42 Merge pull request #24063 from jayeshka/fix/recurse
- b9745d5c4f removed tuple index error

**PR #24057**: (rallytime) Backport #22572 to 2015.5 @ 2015-05-22 05:36:25 UTC
- PR #22572: (The-Loeki) Small docfix for GitPillar (refs: #24057)
- 02ac4aa288 Merge pull request #24057 from rallytime/bp-22572
- 49aad84b17 Small docfix for GitPillar

**ISSUE #23088**: (ghost) Segfault when adding a Zypper repo on SLES 11.3 (refs: #24027)

**PR #24040**: (rallytime) Backport #24027 to 2015.5 @ 2015-05-21 23:43:54 UTC
- PR #24027: (ghost) Add baseurl to salt.modules.zypper.mod_repo (refs: #24040)
- 82de059891 Merge pull request #24040 from rallytime/bp-24027
- 37d25d8bc6 Added baseurl as alias for url and mirrorlist in salt.modules.zypper.mod_repo.

**PR #24039**: (rallytime) Backport #24015 to 2015.5 @ 2015-05-21 23:43:25 UTC
- PR #24015: (YanChii) minor improvement of solarisips docs & fix typos (refs: #24039)
- d90f781d97 Merge pull request #24039 from rallytime/bp-24015
- 6bfaa94a8c minor improvement of solarisips docs & fix typos

**ISSUE #19598**: (fayetted) ssh_auth.present test=true incorrectly reports changes will be made (refs: #19599)

**PR #24038**: (rallytime) Backport #19599 to 2015.5 @ 2015-05-21 23:43:10 UTC
- PR #19599: (fayetted) Fix ssh_auth test mode, compare lines not just key (refs: #24038)
- 4a0f254d22 Merge pull request #24038 from rallytime/bp-19599
- ea00d3e786 Fix ssh_auth test mode, compare lines not just key
• PR #24046: (rallytime) Remove key management test from digital ocean cloud tests @ 2015-05-21 22:32:04 UTC
  - 42b87f1049 Merge pull request #24046 from rallytime/remove_key_test
  - 1d031ca78 Remove key management test from digital ocean cloud tests
• PR #24044: (cro) Remove spurious log message, fix typo in doc @ 2015-05-21 22:32:04 UTC
  - eff54b1c5a Merge pull request #24044 from cro/pgjsonb
  - de066314a Remove spurious log message, fix typo in doc
• ISSUE #23883: (kaithar) max_event_size seems broken (refs: #24001, #24065)
• PR #24001: (msteed) issue #23883 @ 2015-05-21 20:32:30 UTC
  - ac32000b5d Merge pull request #24001 from msteed/issue-23883
  - bea97a8b98 issue #23883
• PR #23995: (kiorky) Lxc path pre @ 2015-05-21 17:26:03 UTC
  - f7fae26059 Merge pull request #23995 from makinacorpus/lxc_path_pre
  - 319282a5f5 lint
  - 1dc67e5678 lxc: versionadded
  - fcad7cb804 lxc: states improvements
  - 644bd729f7 lxc: more consistence for profiles
  - 139372c055 lxc: remove merge cruft
  - 725b0462ca lxc: Repair merge
• ISSUE #16383: (interjection) salt.states.augeas.change example from docs fails with exception (refs: #24032)
• PR #24032: (kartiksubbarao) Update augeas_cfg.py @ 2015-05-21 17:03:42 UTC
  - 26d6851666 Merge pull request #24032 from kartiksubbarao/augeas_insert_16383
  - 3686dc4d7 lxc: version added to augeas
• PR #24025: (jayeshka) adding timezone unit test case @ 2015-05-21 16:50:53 UTC
  - 55c9245075 Merge pull request #24025 from jayeshka/timezone-unit-test
  - 1ec33e22a7 removed assertion error
  - 16ecb2950 adding timezone unit test case
• PR #24023: (jayeshka) adding states/mongodb_database unit test case @ 2015-05-21 16:49:17 UTC
  - e243617659 Merge pull request #24023 from jayeshka/mongodb_database-states-unit-test
  - 5a9ac7effb adding states/mongodb_database unit test case
• PR #24022: (jayeshka) adding states/modjk_worker unit test case @ 2015-05-21 16:48:29 UTC
  - b377bd93e6 Merge pull request #24022 from jayeshka/modjk_worker-states-unit-test
  - 05c0a985db adding states/modjk_worker unit test case
• ISSUE #23776: (enblde) Presence change events constantly reporting all minions as new in 2015.5 (refs: #24005)
• PR #24005: (msteed) issue #23776 @ 2015-05-21 01:55:34 UTC
  - 70c51ba7a Merge pull request #24005 from msteed/issue-23776
  - 62e66d8ca0 issue #23776

28.2. Previous Releases
• **ISSUE #23950**: (neogenix) iptables state generates a 0 position which is invalid in iptables cli (refs: #23996)

• **PR #23996**: (neogenix) iptables state generates a 0 position which is invalid in iptables cli #23950 @ 2015-05-20 22:44:27 UTC
  - 17b7c0b741 Merge pull request #23996 from neogenix/2015.5-23950
  - ad417a57c2 fix for #23950

• **PR #23994**: (rallytime) Skip the gpodder pkgrepo test for Ubuntu 15 - they don’t have vivid ppa up yet @ 2015-05-20 21:18:21 UTC
  - 4cb877307c Merge pull request #23994 from rallytime/skip_test_ubuntu_15
  - 8b77307c Skip the gpodder pkgrepo test - they don’t have vivid ppa up yet

**28.2.66 Salt 2015.5.3 Release Notes**

*release* 2015-07-07

Version 2015.5.3 is a bugfix release for 2015.5.0.

**Statistics**

- Total Merges: 178
- Total Issue References: 69
- Total PR References: 207
- Contributors: 62 (CameronNemo, Lanzaa, Starblade42, The-Loeki, TheScriptSage, aboe76, ahus1, aneeshusa, anluro, arthurlogilab, basepi, borutmrak, cachedout, cgtx, codertux, cro, dkiser, driskell, eliap, garethgreenaway, grisha, gthb, heewa, infestdead, jackson, jacobhammons, jayeshka, jeanpralof, jfindlay, jodv, joelium, justinta, kartiksubbarao, kev009, kiorky, lorengordon, msciciel, msted, mmadhouk, ntpeter, obestwalter, pengyao, pille, porterjamesj, pruz, quixoten, rallytime, rhertzog, ruzarowski, ryan-lane, steverweber, tankywoo, tbaker57, techhat, terminalmage, thatch45, thenewwazoo, trevor-h, twangboy, varia, zefrog, zhujinhe)

**Changelog for v2015.5.2..v2015.5.3**

*Generated at: 2018-05-27 21:20:01 UTC*

• **PR #25109**: (jfindlay) add 2015.5.3 release notes @ 2015-07-01 19:45:56 UTC
  - f0f512a4da Merge pull request #25109 from jfindlay/2015.5
  - 3187d5d5aa add 2015.5.3 release notes

• **PR #25096**: (jfindlay) Postgres group test @ 2015-07-01 18:48:26 UTC
  - PR #24330: (jayeshka) adding states/postgres_group unit test case. (refs: #25096)
  - 21709aa483 Merge pull request #25096 from jfindlay/postgres_group_test
  - 3c379dc115 declobber postgres state unit test mocking
  - a162f8a3d8 adding states/postgres_group unit test case.

• **ISSUE #25041**: (wt) REGRESSION: pillar.get of integer fails to render in sls (refs: #25085)

• **PR #25085**: (jfindlay) accept all sources in the file state @ 2015-07-01 18:23:45 UTC
  - 0a846400c6 Merge pull request #25085 from jfindlay/fix_file
- 937a252e16 remove unnecessary file state tests
- 6f238e924c integration test file.managed sources
- a5978d30c2 iterate an iterable source otherwise list+str it

• PR #25095: (jfindlay) Win groupadd unit tests @ 2015-07-01 18:18:53 UTC
  - PR #24207: (jayeshka) adding win_groupadd unit test case. (refs: #25095)
  - a983921e0e Merge pull request #25095 from jfindlay/win_groupadd_test
  - 564df1da14a depend on win libs rather than mocking them
  - 9b9ab8628 resolved all errors.
  - aaf89354c0 adding win_groupadd unit test case.

• ISSUE #21520: (jfindlay) sudo.salt_call is broken (refs: #25089)

• PR #25089: (jfindlay) fix minion sudo @ 2015-07-01 15:53:16 UTC
  - PR #20226: (thatch45) Allow sudo priv escalation (refs: #25089)
  - 7c8da28656 Merge pull request #25089 from jfindlay/fix_sudo
  - d8f914da19 add some apprehension to the sudo exec module
  - a9269c072a adding sudo exec module docs
  - 4430b7bd8 comment whitespace in minion config
  - 44cb167744 adding sudo_user minion config docs
  - d46106e9e adding sudo_user minion config to default

• ISSUE #24875: (ahammond) ValueError: list.remove(x): x not in list in File "/usr/lib/python2.6/site-packages/salt/cli/batch.py", line 179, in run active.remove(minion) (refs: #25099)

• PR #25099: (driskell) Fix broken batch results @ 2015-07-01 15:51:29 UTC
  - 4d60778e5dd Merge pull request #25099 from driskell/patch-1
  - 59b25e66e Fix broken batch results

• PR #25083: (steverweber) ipmi: get_sensor_data would always fail @ 2015-06-30 20:57:21 UTC
  - 4635079b6b Merge pull request #25083 from steverweber/fix_ipmi_stat
  - 8365f4c378 include _ in IpmiCommand
  - 817e434591 get_sensor_data would always fail

• PR #25067: (The-Loeki) Fix for maxdepth=0 in find @ 2015-06-30 20:54:06 UTC
  - 15f2a4077c Merge pull request #25067 from The-Loeki/patch-1
  - 61ed4a5a80 Fix for maxdepth=0 in find

• PR #25078: (terminalmage) Use smaller number for upper limit of mac_user’s _first_avail_uid helper function @ 2015-06-30 20:53:24 UTC
  - 58d933ca8 Merge pull request #25078 from terminalmage/fix-mac-uid
  - d2a26eace2b Use smaller number for upper limit of mac_user’s _first_avail_uid helper function

• ISSUE #24521: (multani) State network.managed fails on Debian (Jessie) (refs: #25045)

• PR #25045: (garethgreenaway) Fixes to debian_ip.py in 2015.5 @ 2015-06-30 17:36:43 UTC
  - ebd6cdc412 Merge pull request #25045 from garethgreenaway/24521_debian_networking
• PR #25065: (loregordon) Add download links for 2015.5.1-3 and 2015.5.2 Windows installers @ 2015-06-30 15:29:31 UTC
  - ae31b279cc Merge pull request #25065 from loregordon/update-windows-installer-links
  - 40a0c132d4 Add download links for 2015.5.1-3 and 2015.5.2, Fixes #25057
• PR #25052: (basepi) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2015-06-30 01:05:00 UTC
  - ddaeb0fb8e Merge pull request #25052 from basepi/merge-forward-2015.5
  - 2c5e664a58 Merge remote-tracking branch 'upstream/2014.7' into merge-forward-2015.5
  - a7154e7471 Merge pull request #25011 from notpeter/s3_2014.7_backport
    • 8b8af640f6 Add s3 to protocols for remote source_hash
• PR #25038: (jfindlay) versionadded @ 2015-06-29 19:49:27 UTC
  - PR #24747: (msciciel) add get_route function to network module (refs: #25038)
  - c7003d4951 Merge pull request #25038 from jfindlay/versionadded
  - d6dc697b5 versionadded
• PR #24747: (msciciel) add get_route function to network module (refs: #25038) @ 2015-06-29 16:51:43 UTC
  - 28c87cab17 Merge pull request #24747 from msciciel/2015.5
  - 79b4ec2da8 network module lint fix
  - 0b6ef784b2 network module: fix for ipv6
  - f3d184c478 add get_route function to network module
• PR #24975: (ryan-lane) Fix update of undefined env var in npm module @ 2015-06-29 16:45:05 UTC
  - 46a96773aa Merge pull request #24975 from lyft/npm-module-fix
  - 6fde58182f Try byte literals rather than unicode strings in the env
  - c8514de334 Fix update of undefined env var in npm module
• PR #24986: (heewa) Don’t modify empty change @ 2015-06-29 16:44:17 UTC
  - 9cf8550cd8 Merge pull request #24986 from heewa/fix-pkg-hold-when-errored
  - d47a448a80 Don’t modify empty change
• ISSUE #24969: (bradthurber) salt-cloud 2015.5.0: missing azure dependency results in misleading error (refs: #24999)
• PR #24999: (rallytime) Provide a less confusing error when cloud provider is misconfigured @ 2015-06-29 16:43:31 UTC
  - ece897d8d6 Merge pull request #24999 from rallytime/cloud_error_help
  - 1e81a88625 Clean up
  - be19a6730e Provide a less confusing error when cloud provider is misconfigured
• PR #24987: (heewa) Don’t try to cache a template when it’s not a file @ 2015-06-29 14:02:59 UTC
  - 4af15cfb90 Merge pull request #24987 from heewa/fix-trying-to-cache-no-file
  - 9ae0e78ff6 Don’t try to cache a template when it’s not a file
• PR #25022: (jfindlay) revise label and milestone documentation @ 2015-06-29 13:51:24 UTC
- 8eeaddbf4 Merge pull request #25022 from jfindlay/label_docs
- 8575192cc4 revise label and milestone documentation

- **PR #25029:** (jayeshka) adding redismod unit test case. @ 2015-06-29 13:50:33 UTC
  - 89c2e01ac1 Merge pull request #25029 from jayeshka/redismod-unit-test
  - e3045be5a9 adding redismod unit test case.

- **PR #24995:** (rallytime) Fix deprecated pymongo usage causing errors in latest pymongo @ 2015-06-27 22:28:56 UTC
  - **PR #24175:** (trevor-h) fix deprecated pymongo usage causing errors in latest pymongo (refs: #24995)
  - 642525298c Merge pull request #24995 from rallytime/tops_mongo
  - a3c1063a37 fix deprecated pymongo usage causing errors in latest pymongo

- **ISSUE #24862:** (dkatsanikakis) gpg.import_key returns error after succesfully completed (refs: #24994, #24966)

- **PR #24994:** (garethgreenaway) Another Fix to gpg.py in 2015.5 @ 2015-06-27 22:28:15 UTC
  - e9aaa11b68 Merge pull request #24994 from garethgreenaway/2015.5_24862_gpg_import_key
  - d2f8d8fa96 variable was referenced before assignment. Just removing the variable and checking the return from distutils.version.LooseVersion directly.

- **PR #24988:** (jayeshka) adding states/supervisord unit test case. @ 2015-06-27 22:24:42 UTC
  - ebd666e5ee Merge pull request #24988 from jayeshka/supervisord-states-unit-test
  - bb0a6d5625 adding states/supervisord unit test case.

- **PR #25007:** (basepi) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2015-06-26 21:28:57 UTC
  - 4087c3c59b Merge pull request #25007 from basepi/merge-forward-2015.5
  - 4980fd547b Merge remote-tracking branch 'upstream/2014.7' into merge-forward-2015.5
  - a11e6e6a Merge pull request #24944 from techhat/issue24915
    - 59c3081e49 Double-check main_cloud_config
  - d26a5447ba Merge pull request #24936 from jand/psutil
    - bdb7a19c36 Fixed ps module to not use depreciated psutil commands

- **PR #25003:** (jacobhammons) Updated man pages @ 2015-06-26 19:13:41 UTC
  - 91a60e198e Merge pull request #25003 from jacobhammons/man-pages
  - c97a4ab17 Updated man pages

- **PR #25002:** (jacobhammons) sphinx html theme updates @ 2015-06-26 18:39:14 UTC
  - a60a2c4222 Merge pull request #25002 from jacobhammons/doc-announcements
  - f88f244a28 sphinx html theme updates

- **PR #24977:** (rallytime) Only warn about digital ocean deprecation if digital ocean is configured @ 2015-06-25 23:54:46 UTC
  - a791b23ff9 Merge pull request #24977 from rallytime/do_move_warning
  - 6b544227ab Only warn about digital ocean deprecation if digital ocean is configured

- **ISSUE #24862:** (dkatsanikakis) gpg.import_key returns error after succesfully completed (refs: #24994, #24966)

- **PR #24966:** (garethgreenaway) Fixes to gpg.py in 2015.5 @ 2015-06-25 19:58:49 UTC
• ISSUE #24946: (mavenAtHouzz) Memory leak issue in rest_tornado EventListener (refs: #24965)

• PR #24965: (jacksontj) Fix memory leak in saltnado @ 2015-06-25 18:48:03 UTC
  - 86221846ac Merge pull request #24965 from jacksontj/2015.5
  - 48b5e1653e pylint
  - 87adca46e0 Fix memory leak in saltnado

• PR #24948: (jfindlay) fix some malformed doc links and anchors @ 2015-06-25 15:51:38 UTC
  - 773c4cf8e4 Merge pull request #24948 from jfindlay/doc_links
  - 152a9b2a12 fix some malformed doc links and anchors

• ISSUE #24885: (anlutro) Master config - Directories starting with a dot have the dot stripped when root_dir is . (refs: #24886)

• PR #24886: (anlutro) Be more careful about stripping away root_dir from directory options @ 2015-06-25 15:50:11 UTC
  - 4ebc01e662 Merge pull request #24886 from alprs/fix-root_dir_bug
  - 52ccafded3 os.sep is the correct directory separator constant
  - 0ecbf261ad Be more careful about stripping away root_dir from directory options

• PR #24930: (jacksontj) Don’t refetch file templates 100% of the time– Performance optimization for templated files @ 2015-06-24 21:22:47 UTC
  - f52fe1d20 Merge pull request #24930 from jacksontj/2015.5
  - 5fb75346ef Only parse the source if we have one
  - c03a6fa9d1 Add support for sources of managed files to be local
  - 4cf78a0a95 pylint
  - d70914e473 Don’t refetch the template 100% of the time– Performance optimization for templated files

• PR #24935: (basepi) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2015-06-24 18:17:54 UTC
  - 925add91ba Merge pull request #24935 from basepi/merge-forward-2015.5
  - 8d8bf3476f Merge remote-tracking branch ’upstream/2014.7’ into merge-forward-2015.5
  - eeb05a1b10 Merge pull request #24918 from BretFisher/minion-start-smartos-smf-fix
    - d7bf0c7fd Smartos smf minion fix

• ISSUE #24826: (rakai93) rh_service.py: ‘int’ object has no attribute ’startswith’ (refs: #24873)

• PR #24873: (jfindlay) convert osrelease grain to str before str op @ 2015-06-24 16:43:08 UTC
  - 4e8ed0d8ed Merge pull request #24873 from jfindlay/rh_service
  - ffe6efab7 convert osrelease grain to str before str op

• PR #24923: (jayeshka) adding states/status unit test case. @ 2015-06-24 15:50:07 UTC
  - 90819f9c37 Merge pull request #24923 from jayeshka/status-states-unit-test
- baec650674 adding states/status unit test case.

- **PR #24902**: (cro) Fix minion failover, document same @ 2015-06-24 15:20:43 UTC
  - 2dd24ece71 Merge pull request #24902 from cro/fxfo2
  - 90c73ff446 References to documentation.
  - f0c9204d8b Add references to failover parameters in conf
  - 9da96a8b95 Docs
  - e2314f0e49 Move comment.
  - b9a756ff5f Fix master failover and add documentation for same. Factor in syndics. Syndics will not failover (yet).

- **PR #24926**: (rallytime) Back-port #22263 to 2015.5 @ 2015-06-24 15:09:40 UTC
  - PR #22263: (cachedout) Prevent a load from being written if one already exists (refs: #24926)

  - 39f088a74c Merge pull request #24778 from nmadhok/backport-2015.2-24777
  - ae3701f639 Backporting PR #24777 to 2015.2 branch

- **PR #24774**: (zefrog) Fix lxc lvname parameter command @ 2015-06-18 14:49:06 UTC
  - 2a4f65f3f7 Merge pull request #24774 from zefrog/fix-lxc-lvname-param
  - 21e0cd4a5e Fixed typo in lxc module: lvname parameter typo
  - 283d86ec12 Fixed bug in lxc module: lvname using wrong parameter in cmd

- **PR #24782**: (jayeshka) adding states/slack unit test case. @ 2015-06-18 14:33:55 UTC
  - fd7339014b Merge pull request #24782 from jayeshka/slack-states-unit-test
  - e2825e4e84 adding states/slack unit test case.

- **ISSUE #24770**: (jacksontj) Requisite and Requisite_in don’t play nice together (refs: #24771)

- **PR #24771**: (jacksontj) Always extend requisites, instead of replacing them @ 2015-06-18 14:29:09 UTC
  - c9e90af512 Merge pull request #24771 from jacksontj/2015.5
  - b1211c5422 Re-enable tests for complex prereq and prereq_in
  - 378f6bfe36 Only merge when the merge is of requisites

- **PR #24766**: (msteed) Remove doc references to obsolete minion opt @ 2015-06-17 21:36:55 UTC
  - 5fe4de8f62 Merge pull request #24766 from msteed/undoc-dns_check
- f92a769d35 Remove doc references to obsolete minion opt
- **PR #24329**: (jayeshka) adding states/postgres_database unit test case. @ 2015-06-17 19:11:02 UTC
  - a407ab7c51 Merge pull request #24329 from jayeshka/postgres_database-states-unit-test
  - ee061ad57 adding states/postgres_database unit test case.
- **ISSUE #24560**: (hydrosine) Documentation missing on parameter (refs: #24632)
- **ISSUE #24547**: (dragonpaw) Artifactory docs say module is 'jboss7'. (refs: #24632)
- **ISSUE #24375**: (companykitchen-dev) Custom grain won’t sync under any circumstances (refs: #24632)
- **ISSUE #24275**: (kartiksubbarao) augeas issue with apache and recognizing changes that have been already made (refs: #24632)
- **ISSUE #24163**: (tbaker57) enable_gpu_grains default value confusion (refs: #24632)
- **PR #24632**: (jacobhammons) Doc bug fixes @ 2015-06-17 18:40:02 UTC
  - 3ff6e0f546 Merge pull request #24632 from jacobhammons/bug-fixes
  - 7c52012e31 Fixed typos
  - c7edd416a2 Doc bug fixes
- **ISSUE #24198**: (ahammond) salt-call event.send doesn’t send events from minion (refs: #24607)
- **PR #24607**: (garethgreenaway) fixes to minion.py @ 2015-06-17 18:16:42 UTC
  - 999f5f442b Merge pull request #24607 from garethgreenaway/2015_5_sending_events_multi_master
  - 8abd3f9ee1 A fix if you have multiple masters configured and try to fire events to the minion. Currently they fail silently. Might be the cause of #24198.
- **PR #24755**: (rallytime) Remove SALT_CLOUD_REQS from setup.py @ 2015-06-17 17:42:25 UTC
  - bf2dd94389 Merge pull request #24755 from rallytime/fix_setup_15
  - 4876a544d Remove SALT_CLOUD_REQS from setup.py
- **PR #24740**: (rallytime) Backport #24720 to 2015.5 @ 2015-06-17 16:43:37 UTC
  - **PR #24720**: (TheScriptSage) Issue 24621 - AD/LDAP Group Auth Issue (refs: #24740)
  - 3d35d7947b Merge pull request #24740 from rallytime/bp-24720
  - a9bcdb5b77 Updating master.py to properly check against groups when user is only authed against group. Tested against unit.auth_test.
- **PR #24723**: (rallytime) Back-port #20124 to 2015.5 @ 2015-06-17 16:43:20 UTC
  - **PR #20124**: (cgtx) add init system to default grains (refs: #24723)
  - ac2851be55 Merge pull request #24723 from rallytime/bp-20124
  - 4d0061b832 fix infinite loop introduced by #20124 when the init system is not in the supported_inits list
  - 0ca0f3aca2 Optimizations for #20124
  - f353454327 add init system to default grains (resolve #20124)
- **PR #24754**: (anlutro) salt-cloud documentation - Add information about linode location @ 2015-06-17 16:04:48 UTC
  - 78cd09b6e9 Merge pull request #24754 from alprs/docs-add_linode_location_option
  - d88e071e98 add information about linode location
• PR #24748: (jayeshka) adding states/serverdensity_device unit test case. @ 2015-06-17 15:39:07 UTC
  – d5554f76ec Merge pull request #24748 from jayeshka/serverdensity_device-states-unit-test
  – 1a4c241050 adding states/serverdensity_device unit test case.
• PR #24739: (rallytime) Back-port #24735 to 2015.5 @ 2015-06-17 15:16:47 UTC
  – PR #24735: (notpeter) Add 2015.5 codename to version numbers docs (refs: #24739)
  – 0b7e7ef879 Merge pull request #24739 from rallytime/bp-24735
  – 64c565d9be Add .0 to version number
• ISSUE #24111: (yermulnik) cli option '--summary' got broken after upgrade to 2015.5.1 (refs: #24732)
• PR #24732: (msteed) Fix stacktrace when --summary is used @ 2015-06-17 03:27:57 UTC
  – c8713f2d00 Merge pull request #24732 from msteed/issue-24111
  – 54b3dd359 Fix stacktrace when --summary is used
• PR #24721: (rallytime) Back-port #24668 to 2015.5 @ 2015-06-17 03:23:47 UTC
  – PR #24668: (grischa) enable virtual package names in pyobjects renderer (refs: #24721, #24757)
  – 70d37816bf Merge pull request #24721 from rallytime/bp-24668
  – 68fb5af970 fixing other test
  – ba4f262b9c fixing text for virtual support in pyobjects
  – b349d91a5f enable virtual package names in pyobjects renderer
• ISSUE #21923: (Fluro) Salt cloud not running provisioning script as root (refs: #24718)
• ISSUE #17241: (hasues) Salt-Cloud for vSphere needs additional documentation (refs: #24718)
• PR #24718: (rallytime) Added some missing config documentation to the vsphere driver @ 2015-06-17 03:19:35 UTC
  – 1b9d6895c7 Merge pull request #24718 from rallytime/update_vsphere_docs
  – bfdebb6e18 Added some missing config documentation to the vsphere driver
• PR #24714: (rallytime) Remove cloud-requirements.txt @ 2015-06-17 03:17:04 UTC
  – 64857c70ed Merge pull request #24714 from rallytime/remove_cloud_reqs_15
  – 67b796d01e Remove cloud-requirements.txt
• ISSUE #24439: (bechtoldt) Add tornado version to versions report (refs: #24733)
• PR #24733: (msteed) Include Tornado in versions report @ 2015-06-17 03:13:53 UTC
  – f96b1d68cd Merge pull request #24733 from msteed/issue-24439
  – 76cfe05sec Include Tornado in versions report
• PR #24737: (jacksontj) Move AES command logging to trace @ 2015-06-17 01:48:11 UTC
  – a861fe0f4f Merge pull request #24737 from jacksontj/2015.5
  – a4ed41ae82 Move AES command logging to trace
• PR #24724: (basepi) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2015-06-16 22:46:27 UTC
  – 0d2de46648 Merge pull request #24724 from basepi/merge-forward-2015.5
• PR #24701: (jayeshka) adding states/selinux unit test case. @ 2015-06-16 15:27:29 UTC
  - 3d33fe7676 Merge pull request #24701 from jayeshka/selinux-states-unit-test
  - 0c136fd9c2 adding states/selinux unit test case.

• PR #24687: (cachedout) Note about minimum worker_threads @ 2015-06-15 20:46:23 UTC
  - 2e287a9e33 Merge pull request #24687 from cachedout/min_worker_threads
  - b7bb7eaeb2 Note about minimum worker_threads

• PR #24688: (cachedout) Update AUTHORS @ 2015-06-15 20:46:03 UTC
  - 3f6880e291 Better email
  - 6c7b773ae Update AUTHORS

• ISSUE #2385: (cachedout) States which require unavailable modules should display the reason (refs: #24649)

• PR #24649: (cachedout) Improved error reporting for failed states @ 2015-06-15 16:04:20 UTC
  - 9a2b50d59f Merge pull request #24649 from cachedout/issue_22385
  - b9fe792534 States will now return the reason behind failure if a module could not be loaded

• PR #24673: (jayeshka) adding states/schedule unit test case. @ 2015-06-15 15:24:52 UTC
  - 66e9e16753 Merge pull request #24673 from jayeshka/schedule-states-unit-test
  - 54aaaa5f12 adding states/schedule unit test case.

• ISSUE #24661: (kartiksubbarao) augeas.change doesn’t support setting empty values (refs: #24663)

• PR #24666: (kartiksubbarao) Update augeas.cfg.py @ 2015-06-15 15:18:48 UTC
  - 5eb19c4e4d Merge pull request #24666 from kartiksubbarao/patch-2
  - e18db50e0c Update augeas_cfg.py

• ISSUE #24583: (dkiser) salt-cloud keyring password referenced before assignment (refs: #24667)

• PR #24667: (dkiser) fix for #24583 clouds/openstack.py kerying first time succeeds @ 2015-06-14 21:58:38 UTC
  - 4450432161 Merge pull request #24667 from dkiser/fix-cloud-keyring
  - c92c05fac0 fix for #24583 clouds/openstack.py kerying first time succeeds

• ISSUE #24537: (kartiksubbarao) alias.present doesn’t update alias values that are substrings of the existing value (refs: #24659)

• PR #24659: (kartiksubbarao) Update aliases.py @ 2015-06-13 17:31:42 UTC
  - 4c64ee9d94 Merge pull request #24659 from kartiksubbarao/patch-1
  - d683479e2 Update aliases.py

• PR #24644: (cro) Merge forward 2014.7->2015.5 @ 2015-06-12 21:31:41 UTC
  - 89eb616c29 Merge pull request #24644 from cro/2014.7-2015.5-20150612
  - 4136dc3160 Merge forward from 2014.7 to 2015.5
- b9948fde2 Merge pull request #24643 from cro/saltannounce
  * ecb0623d7f Add salt-announce mailing list.
- 635121e85d Merge pull request #24620 from twangboy/fix_24215
  * d7a9999be1 Fixed comment and uncomment functions in file.py
- PR saltstack/salt#24595: (tankywoo) fix target rule, remove unneeded quotation mark (refs: #24642)
- PR #24642: (basepi) Revert "fix target rule, remove unneeded quotation mark" @ 2015-06-12 20:14:26 UTC
  - b896a0d0e9 Merge pull request #24642 from saltstack/revert-24595-fix-iptables-target
  - 5ff3224ae1 Revert "fix target rule, remove unneeded quotation mark"
- PR #24628: (jayeshka) adding states/reg unit test case. @ 2015-06-12 17:29:11 UTC
  - 01092c2337 Merge pull request #24628 from jayeshka/reg_states-unit-test
  - af1bd8f9ff adding states/reg unit test case.
- ISSUE #24494: (arount) Computed comments in jinja states (refs: #24591)
- ISSUE #23359: (BalintSzigeti) init.sls parsing issue (refs: #24591)
- ISSUE #21217: (Colstuwjx) Maybe a bug for jinja render? (refs: #24591)
- PR #24631: (rallytime) Back-port #24591 to 2015.5 @ 2015-06-12 16:54:32 UTC
  - PR #24591: (ibaker57) Add some documentation surrounding Jinja vs yaml comments - (refs: #24631)
  - 5f491f911d Merge pull request #24631 from rallytime/bp-24591
  - f13cd418bc Add extra clarification why jinja comments are needed.
  - 23749718bb Fix typo
  - 6a917471d4 Add some documentation surrounding Jinja comments - refs #24492, #21217, #23359
- PR #24616: (garethgreenaway) additional logging in state.py module @ 2015-06-12 16:25:39 UTC
  - f23f99ec35 Merge pull request #24616 from garethgreenaway/2015_5_logging_disabled_states
  - 4dbf0ef160 Adding some logging statement to give feedback when states, including highstate, are disabled. Useful when running from scheduler.
- PR #24595: (tankywoo) fix target rule, remove unneeded quotation mark @ 2015-06-12 16:23:22 UTC
  - 6dccb04a1 Merge pull request #24595 from tankywoo/fix-iptables-target
  - 10a5160d7c fix target rule, remove unneeded quotation mark
- PR #24604: (jfindlay) fix pkg module integration tests @ 2015-06-12 16:04:26 UTC
  - 8ac3d94785 Merge pull request #24604 from jfindlay/pkg_tests
  - d88b22fdac fix pkg module integration tests on CentOS 5
  - fb91b40ba0 fix pkg module integration tests on ubuntu 12
- PR #24600: (basepi) [2015.5] Remove __kwarg__ from salt-ssh keyword args @ 2015-06-12 04:21:29 UTC
  - 0f5545c5a9 Merge pull request #24600 from basepi/salt-ssh.orchestrate.20615
  - 9b55685f6a Remove __kwarg__ from salt-ssh keyword args
- ISSUE #22843: (Xiol) salt-ssh roster doesn’t support integers as host keys (refs: #24608)
- PR #24608: (basepi) [2015.5] Normalize salt-ssh flat roster minion IDs to strings @ 2015-06-11 21:35:07 UTC
- 832916f49f Merge pull request #24608 from basepi/salt-ssh.flat.roster.integers.22843
- 381820f051 Normalize salt-ssh flat roster minion IDs to strings

- **PR #24605**: (basepi) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2015-06-11 19:15:21 UTC
  - 4eb5bb235b Merge pull request #24605 from basepi/merge-forward-2015.5
  - f96c5029bb Merge remote-tracking branch 'upstream/2014.7' into merge-forward-2015.5
  - d83928af7f Merge pull request #24589 from BretFisher/patch-1
    - 6511336dc Fixed Mine example for jinja code block

- **ISSUE #24457**: (ryan-lane) When selecting the version of docs on the docs site, it brings you to the homepage (refs: #24598)
- **ISSUE #24250**: (jfindlay) have version links on docs page link to that version of the current page (refs: #24598)
- **PR #24598**: (jacobhammons) 2015.5.2 release changes @ 2015-06-11 17:24:11 UTC
  - e0bb17823 Merge pull request #24598 from jacobhammons/doc-fixes
  - f3f34df6f6 2015.5.2 release changes Refs #24250 Refs #24457

- **ISSUE #20615**: (aurynn) 2014.7.1: salt/states/saltmod using incorrect return dict for orchestrate (refs: #24588)
- **PR #24588**: (basepi) Fixes for saltmod.function for salt-ssh @ 2015-06-11 16:15:21 UTC
  - 26930b45bd Merge pull request #24588 from basepi/salt-ssh.orchestrate.20615
  - 82693ce57 Move documentation into docstring instead of comments
  - de05287135 Assign 'return' to 'ret' if necessary in saltmod.function
  - 34ff989d66 Convert keyword args to key=value strings in salt-ssh

- **PR #24593**: (jayeshka) adding states/redismod unit test case. @ 2015-06-11 15:55:27 UTC
  - 5a21ad152e Merge pull request #24593 from jayeshka/redismod_states-unit-test
  - 3b95744840 adding states/redismod unit test case.

- **ISSUE #40**: (thatch45) Clean up timeouts (refs: #22857)
- **PR #24581**: (rallytime) Disabled some flaky tests until we can figure out how to make them more reliable @ 2015-06-11 15:51:41 UTC
  - **PR #24217**: (jfindlay) disable intermittently failing tests (refs: #24581)
  - **PR #23623**: (jfindlay) Fix /jobs endpoint’s return (refs: #24217)
  - **PR #22857**: (jacksontj) Fix /jobs endpoint’s return (refs: #23623)
  - 88fb86edd0 Merge pull request #24581 from rallytime/disable_some_flaky_tests
  - c82f135d2e Disabled some flaky tests until we can figure out how to make them more reliable

- **PR #24566**: (jayeshka) adding states/rdp unit test case. @ 2015-06-11 02:14:39 UTC
  - a570d76f967 Merge pull request #24566 from jayeshka/rdp_states-unit-test
  - 273b999491 adding states/rdp unit test case.

- **ISSUE #24480**: (kiorky) [CRITICAL] [2015.5] tls breaks tzinfo (refs: #24551)
- **PR #24551**: (joejulian) 2015.5 dont pollute environment @ 2015-06-11 02:13:06 UTC
  - 20ada1f8a1 Merge pull request #24551 from joejulian/2015.5_dont_pollute_environment
  - cfc3b43ba2 Don’t pollute the TZ environment variable
- cba8d3f923 pep8
- 9cb7015568 Mark keyword version adds
- 76ec583265 Merge tls changes from develop

**ISSUE #19901**: (clinta) State cache is not documented (refs: #24574, #24468)

**PR #24574**: (jacobhammons) Refs #19901 @ 2015-06-10 20:09:23 UTC
- bb2fd6a970 Merge pull request #24574 from jacobhammons/19901
- e2a946dc7 Refs #19901

**PR #24577**: (basepi) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2015-06-10 19:46:22 UTC
- b03166cde3 Merge pull request #24577 from basepi/merge-forward-2015.5
- e1d45ccf3b Merge remote-tracking branch `upstream/2014.7` into merge-forward-2015.5
- d376390f76 Merge pull request #24530 from twangboy/fix_24427
  - 673e1d809e Added missing panel.bmp for installer
  - cc50218b01 Start Minion Service on Silent Install

**ISSUE #24235**: (tomasfejfar) Difference between running from minion and from master (refs: #24571, #24468)

**PR #24571**: (jacobhammons) Refs #24235 @ 2015-06-10 17:02:18 UTC
- 3ec457beef Merge pull request #24571 from jacobhammons/24235
- 8df5d5bb8 Refs #24235

**PR #24565**: (pille) Fix backtrace, when listing plugins @ 2015-06-10 16:33:11 UTC
- ce07eb56d3 Merge pull request #24565 from pille/munin-ignore-broken-symlinks
- 8511a60a69 Fix backtrace, when listing plugins

**PR #24554**: (ryan-lane) Fix yes usage for pecl defaults @ 2015-06-09 23:59:49 UTC
- 251c8f9f5f Merge pull request #24554 from lyft/pecl-module-fix
- 56a9cfcf24 Fix yes usage for pecl defaults

**PR #24535**: (rallytime) Back-port #24518 to 2015.5 @ 2015-06-09 20:06:18 UTC
- PR #24518: (rallytime) Merge #24448 with Pylint Fixes (refs: #24535)
- PR #24448: (codertux) Update modules path for operating systems using systemd (refs: #24518)
- fdb49b4acb Merge pull request #24535 from rallytime/bp-24518
- fc75197616 Pylint fix
- 3e08840988 Update modules path for operating systems using systemd

**PR #24538**: (basepi) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2015-06-09 17:27:20 UTC
- 485ed3c9f9 Merge pull request #24538 from basepi/merge-forward-2015.5
- 6a8039d468 Merge remote-tracking branch `upstream/2014.7` into merge-forward-2015.5
- 6ebc476bb3 Merge pull request #24513 from jquast/2014.7-bugfix-iteritem
  - 2be0180e5e bugfix use of `iteritem` in 2014.7 branch

**PR #24495**: (jayeshka) adding states/rabbitmq_vhost unit test case. @ 2015-06-09 15:33:23 UTC
- 73e6388acd Merge pull request #24495 from jayeshka/rabbitmq_vhost_states-unit-test
- 31889e38eb cosmetic change.
- cf501cf60d resolved error.
- 4bb6087722 Merge branch '2015.5' of https://github.com/saltstack/salt into rabbitmq_vhost_states-unit-test
- 3ad77143a8 adding states/rabbitmq_vhost unit test case.

- **PR #24445**: (jayeshka) adding states/pyrax_queues unit test case. @ 2015-06-09 15:28:45 UTC
  - bf1abccebe Merge pull request #24445 from jayeshka/pyrax_queues_states-unit-test
  - ea27ceb10 adding states/pyrax_queues unit test case.

- **PR #24490**: (aneeshusa) Fix pacman.list_upgrades for new python_shell default. @ 2015-06-09 15:13:16 UTC
  - 0247e8d10d Merge pull request #24490 from aneeshusa/fix-pacman-list-upgrades
  - 980e1cb4dc Lint fix.
  - dca33f1112 Fix pacman.list_upgrades for new python_shell default.

- **PR #24517**: (steverweber) small fixes to the ipmi docs @ 2015-06-09 15:10:14 UTC
  - 6268dbd43a Merge pull request #24517 from steverweber/ipmi_doc
  - 6413712844 lint
  - e78aae9b01 more small fixes to the ipmi docs

- **PR #24524**: (jayeshka) any() takes list oy tuple. @ 2015-06-09 13:49:42 UTC
  - 3728b3f327 Merge pull request #24524 from jayeshka/rabbitmq_vhost_states-module
  - 01c99ad767 any() takes list oy tuple.

- **PR #24482**: (eliasp) 'docker.running' needs now the 'image' param. @ 2015-06-09 04:43:04 UTC
  - dd23de885b Merge pull request #24482 from eliasp/2015.5-states.dockerio-docker.running-doc
  - 5de741d626 'docker.running' needs now the 'image' param.

- **ISSUE #23503**: (jfindlay) salt-ssh fails on CentOS 7 when python-zmq is not installed (refs: #24515)

- **PR #24515**: (basepi) [2015.5] Add xml library to the salt-thin @ 2015-06-09 04:10:06 UTC
  - 2a727c3f55 Merge pull request #24515 from basepi/susexml23503
  - 078b33eaaf Add xml library to the thin

- **PR #24497**: (jayeshka) adding states/rbenv unit test case. @ 2015-06-09 03:56:10 UTC
  - fce998a58b Merge pull request #24497 from jayeshka/rbenv_states-unit-test
  - 79d343a62b adding states/rbenv unit test case.

- **PR #24496**: (jayeshka) adding states/rabbitmq_user unit test case. @ 2015-06-09 03:55:23 UTC
  - 2bc4b1eed Merge pull request #24496 from jayeshka/rabbitmq_user_states-unit-test
  - 7d96f27f91 adding states/rabbitmq_user unit test case.

- **PR #24481**: (eliasp) Fix typo (licnese → license). @ 2015-06-09 03:30:25 UTC
  - 02a597bf49 Merge pull request #24481 from eliasp/2015.5-salt.states.powerpath-license_typo
  - 1280054bce Fix typo (licnese → license).

- **PR #24467**: (thenewwazoo) Fix dockerio bound volumes @ 2015-06-09 01:40:23 UTC
5ad3db5ffbf Merge pull request #24467 from thenewwazoo/fix-dockerio-bound-volumes
- db4e3dc69b Let’s raise an exception if create fails
- d1d85dd685 Add logging
- ddc63f0f30 Fix volume handling when creating containers

**PR #24504:** (rallytime) Move vsphere deprecation to 2015.5 @ 2015-06-08 22:43:05 UTC
- PR #24487: (nmadhok) Deprecating vsphere cloud driver in favor of vmware cloud driver (refs: #24504)
- d236fbd38f Merge pull request #24504 from rallytime/move_vsphere_deprecation_2015.5
- d876535d71 Add Getting Started with VSphere doc to 2015.5
- b685ebc104 Add vSphere deprecation warnings to 2015.5

**PR #24506:** (rallytime) Backport #24450 to 2015.5 @ 2015-06-08 22:42:14 UTC
- PR #24450: (ruzarowski) Fix salt cli runs with batch-size set (refs: #24506)
- cb5546085c Merge pull request #24506 from rallytime/hp-24450
- 1c0fca2b9d Backport #24450 to 2015.5

**PR #24498:** (rallytime) Added "CLI Example" to make failing test happy on 2015.5 @ 2015-06-08 15:48:40 UTC
- 3173fd17ad Merge pull request #24498 from rallytime/fixtures_path
- d92eef4777 Added "CLI Example" to make failing test happy on 2015.5

**PR #24471:** (anlutro) Set up salt-ssh file logging @ 2015-06-08 15:26:49 UTC
- 3639e411bd Merge pull request #24471 from alprs/fixed_salt_ssh_logging
- 6a11e8878b Set up salt-ssh file logging

**ISSUE #24231:** (tarwich) npm.bootstrap (refs: #24469)

**PR #24469:** (jfindlay) correctly handle user environment info for npm @ 2015-06-08 15:26:02 UTC
- 551e70f3fb Merge pull request #24469 from jfindlay/npm_env
- 8140c96949 update npm’s user info envs
- cb5728c41 add env parameter to npm.uninstall

**ISSUE #24268:** (tkent-xetus) Ability to specify revision for win_gitrepos undocumented (refs: #24468)

**ISSUE #24235:** (tomaszefar) Difference between running from minion and from master (refs: #24571, #24468)

**ISSUE #24193:** (abng88) Update ext_pillar docs to mention that this feature is supported masterless as well (refs: #24468)

**ISSUE #24172:** (zhujinhe) Can lists be passed in the pillar on the command line on version 2015.5.0? (refs: #24468)

**ISSUE #23211:** (lloesche) Document that salt://

**ISSUE #19901:** (clinta) State cache is not documented (refs: #24574, #24468)

**ISSUE #19801:** (ksalman) How are grains static? (refs: #24468)

**PR #24468:** (jacobhammons) Bug fixes and build errors @ 2015-06-08 15:25:40 UTC
- 0d9e0c2b8c Merge pull request #24468 from jacobhammons/doc-fixes
- 1035959459 Appended .0 to version added
ISSUE #24318: (favadi) uncaught exception for pkgrepo.absent for invalid PPA (refs: #24465)

PR #24465: (jfindlay) catch exception from softwarerepositories @ 2015-06-08 15:25:19 UTC

- be6905a545 Merge pull request #24465 from jfindlay/unknown_ppa
- 19e912866d catch exception from softwarerepositories

ISSUE #24296: (objectx) mount.mount calls file.mkdir with incorrect named argument (refs: #24464)

PR #24464: (jfindlay) fix typo in modules/mount.py @ 2015-06-08 15:25:07 UTC

- 58d1ea8fe8 Merge pull request #24464 from jfindlay/file_mkdir
- 6e8cd44500 fix typo in modules/mount.py

ISSUE #24434: (dkiser) multimaster failover fails due to logic from issue #23611 (refs: #24461)

PR #24461: (dkiser) fix for #24434 @ 2015-06-08 15:24:53 UTC

- 4f332a71c6 Merge pull request #24461 from dkiser/multimaster_minion_fix
- 1944a743d7 fix for #24434

PR #24479: (ahus1) change "path" to "name" for "file" operations @ 2015-06-07 17:56:11 UTC

- 8917416d39 Merge pull request #24479 from ahus1/patch-1
- 7d6b6c79d change "path" to "name" for "file" operations

PR #24475: (rallytime) Back-port #24454 to 2015.5 @ 2015-06-07 01:29:32 UTC

- PR #24454: (rhertzog) Strip extraneous newline character added in last environment variable (refs: #24475)

- 8618d5b6ea Merge pull request #24475 from rallytime/bp-24454
- a793c192a6 Avoid extraneous newline character added in last environment variable

ISSUE #24407: (aboe76) Please expand salt module random (refs: #24420)

PR #24474: (rallytime) Back-port #24420 to 2015.5 @ 2015-06-07 01:29:11 UTC

- PR #24420: (aboe76) added random integer module to mod_random.py (refs: #24474)

- 61658ffef7 Merge pull request #24420 from rallytime/bp-24420
- 4219b404ad Fix lint error and update versionadded to 2015.5.3

- 3613cc9659 added random integer module to mod_random.py

ISSUE #24233: (variia) yumpkg.group_install keeps returning state change

PR #24472: (variia) ensure {} output is not treated as change in module.py state, fixes #... @ 2015-06-06 14:45:44 UTC

- 508d7ddb91 Merge pull request #24472 from variia/Fix-yumpkg_group_install-return-change-#24233

- 37e8827ce8 ensure {} output is not treated as change in module.py state, fixes #24233

ISSUE #8585: (UtahDave) '#' in single quoted option on cli not making it into the execution module (refs: #24466)

ISSUE #18045: (dstokes) Pillar kwargs parse error with # (refs: #24466)

PR #24466: (basepi) [2015.5] Fix for # in inner strings in yaml arguments @ 2015-06-06 14:35:56 UTC
- 0292e67c8a Merge pull request #24466 from basepi/fixhashinargs18045
- 2e0609f09e Fix for # in inner strings in yaml arguments

- **PR #24456:** (rallytime) Back-port #24441 to 2015.5 @ 2015-06-05 22:32:25 UTC
  - **PR #24441:** (arthurlologilab) [doc] Alignment fix on external_auth documentation (refs: #24456)
  - ced558a6e6 Merge pull request #24456 from rallytime/bp-24441
  - 7002855c31 yaml indentations should be 2 spaces
  - 21b51af25 [doc] Alignment fix on external_auth documentation

- **ISSUE #24397:** (kiorky) on debian: states.apt should use virtualname as it shadows system apt module (refs: #24398, #24400, #24399)
  - **PR #24399:** (kiorky) Versionvirtual (refs: #24398)

- **PR #24398:** (kiorky) VirtualName for states.apt (refs: #24399) @ 2015-06-05 17:40:04 UTC
  - c0ff4110ab Merge pull request #24398 from makinacorpus/aptv
  - 785d2770f VirtualName for states.apt

- **PR #24447:** (jayeshka) adding states/rabbitmq_policy unit test case. @ 2015-06-05 15:26:11 UTC
  - 36263405be Merge pull request #24447 from jayeshka/rabbitmq_policy_states-unit-test
  - 9b038abd63 adding states/rabbitmq_policy unit test case.

- **PR #24446:** (jacekshka) adding states/rabbitmq_plugin unit test case. @ 2015-06-05 15:25:33 UTC
  - 8445a3f28d Merge pull request #24446 from jacekshka/rabbitmq_plugin_states-unit-test
  - cb0c99a012 adding states/rabbitmq_plugin unit test case.

- **PR #24426:** (basepi) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2015-06-05 03:59:11 UTC
  - 9cc380758 Merge pull request #24426 from basepi/merge-forward-2015.5
  - eafa20cd2f Merge remote-tracking branch 'upstream/2014.7' into merge-forward-2015.5
    - 83f853b6ea Merge pull request #24405 from jacksontj/2014.7
      - 2c7a9ae6bf Fix for #24276
    - cef91e60f Merge pull request #24395 from hvnsweeting/handle-exception-get-file
      - bb798a0224 handle exceptions when received data is not in good shape
    - efba1a9b4 Merge pull request #24305 from twangboy/win_path_docs
    - 36f42536e Fixed pylint error caused by P... added r
    - bc42a4bb11 triple double quotes to triple single quotes
    - 77cd930bba Added documentation, fixed formatting

- **ISSUE #24309:** (steverweber) missing docs (refs: #24420)

- **PR #24429:** (jacobhammons) Salt cloud doc updates, build errors and bug fixes @ 2015-06-05 00:27:38 UTC
  - 5d738b8dab Merge pull request #24429 from jacobhammons/cloud-doc-updates
  - 1f7a13d6f9 Salt cloud doc updates, build errors and bug fixes Refs #24309

- **PR #24408:** (rallytime) Backport #24392 to 2015.5 @ 2015-06-04 20:22:09 UTC
  - **PR #24392:** (quixten) Fix "No such file or directory" in grains/core.py (refs: #24408)
- cdff02efe Merge pull request #24408 from rallytime/bp-24392
- ff7461b3cd Use path found by salt.utils.which
• PR #24380: (rallytime) Backport #24357 to 2015.5 @ 2015-06-04 20:13:51 UTC
  - PR #24357: (zhujinhe) fix invoke issues of Jinja Macros example (refs: #24380)
  - a6a1f87cd9 Merge pull request #24380 from rallytime/bp-24357
  - f08c875015 fix invoke issues of Jinja Macros example
• ISSUE #24358: (pengyao) Netapi SSH client don’t support ssh_user and ssh_passwd arguments (refs: #24388)
• PR #24388: (pengyao) fixes #24358 @ 2015-06-04 20:07:40 UTC
  - 86ce9dbbdf Merge pull request #24388 from pengyao/sshclient-kwargs
  - 5c08ca48b4 fixes #24358
• ISSUE #22958: (highlyunavailable) Weird error when typoing a command (refs: #24367)

  – b3fa8efecb Merge pull request #24382 from basepi/grainscommandnotfound23342
  – 85b91d64cc Handle CommandExecutionError in grains commands

• PR #24379: (Starblade42) Fixes an issue where Pagerduty states/modules couldn’t find their profile in the Pillar @ 2015-06-04 12:41:13 UTC
  – 52587a4fc1 Merge pull request #24379 from Starblade42/2015.5
  – b93dc5ef6cLinting!
  – 2dd5904119 Fixes an issue where Pagerduty states/modules couldn’t find it’s profile in the Pillar

• PR #24366: (terminalmage) Use yes "$'n'” instead of printf ’n’ for pecl commands @ 2015-06-03 21:28:58 UTC
  – 3ca35d1ec3 Merge pull request #24366 from terminalmage/pecl-yes
  – dcd9ad8b6e Use yes "$'n'” instead of printf ’n’ for pecl commands

• ISSUE #24284: (kiorky) systemd lxc containers need use_vt=True at lxc-start stage (refs: #24348)
  – PR #548: (Lanzaa) Salt is now platform dependent. Use get_python_lib(1) (refs: #24348)

• PR #24348: (kiorky) Try to close input pipes before calling lxc-start @ 2015-06-03 19:38:07 UTC
  – 86a3b317c6 Merge pull request #24348 from makinacorpus/lxcpre
  – 0cb11a2767 lxc: typo
  – d71efa6d66 Try to close input pipes before calling lxc-start

28.2.67 Salt 2015.5.4 Release Notes

release 2015-08-13

Version 2015.5.4 is a bugfix release for 2015.5.0.

Statistics

• Total Merges: 247
• Total Issue References: 138
• Total PR References: 312
• Contributors: 92 (0xf10e, AkhterAli, BretFisher, DmitryKuzmenko, EvaSDK, GideonRed-zz, JohannesEbke, Oro, TheBigBear, TronPaul, UtahDave, ahus1, alekti, alexandrushko, amontalban, andre-luiz-dos-santos, aneeshusa, anlutro, asyncio, attiasr, babilen, basepi, bbinet, bcclermont, bechtoldt, blackduckx, bobrik, cachew, colekowski, cro, d-j, davidjb, denmat, derBroBro, dkiser, driskell, egarbi, fleaflicker, garethgreenaway,
Bug Fixes

- The `cron.present` state now correctly defaults to state ID as identifier.

Salt-Cloud Changes

- When querying for VMs in the `digital_ocean_v2` cloud driver, the number of VMs to include in a page was changed from 20 (default) to 200 to reduce the number of API calls to Digital Ocean.
- The `vmware` salt-cloud driver was back-ported from the develop branch in order for installations of Salt that are older than 2015.8.0 to be able to use the `vmware` driver without stack-tracing on various deprecation paths that were implemented in the 2015.8.0 release.

Changelog for v2015.5.3..v2015.5.4

- **PR #26292**: (jquast) Rabbitmq 3.2.4 on Ubuntu has "...done.", not "...done" @ 2015-08-13 19:53:29 UTC
  - 0a5d1307c4 Merge pull request #26292 from jquast/backport-ubuntu-rabbitmq-fix
- **PR #26296**: (jquast) bugfix missing 'runas=None' for rabbitmqctl cmds (backport to 2015.5) @ 2015-08-13 19:52:40 UTC
  - 21cc3c3bf6 Merge pull request #26296 from jquast/bugfix-runas-rabbitmqctl-2015.5
  - eb77320786 bugfix missing 'runas=None' for rabbitmqctl cmds
- **ISSUE #25618**: (twangboy) Fix reg.py to work with the registry properly (refs: #26268)
- **PR #26293**: (jfindlay) Fix #26268 @ 2015-08-13 19:48:06 UTC
  - **PR #26268**: (twangboy) Multiple improvements to reg executionmod and state mod (refs: #26293)
  - ee59d154d7 Merge pull request #26293 from jfindlay/reggie
  - 91ea6455fe add versionadded to reg exec and state mods
  - 3348b726c9 fix state/reg unit tests
  - 3f74a389cfe return test results when test=True
  - a1274c438d I might have fixed some tests... I might have made them worse
  - 7393adfa5a8 Fixed some lint
  - 787c88a283 Multiple improvements to reg executionmod and state mod
- **ISSUE #25192**: (deuscapturus) 2015.5.2 boto_cloudwatch_alarm.present not working. (refs: #26290)
- **PR #26290**: (rallytime) Only call convert_to_arn when action name is provided @ 2015-08-13 18:48:58 UTC
  - 5dd5ac1198 Merge pull request #26290 from rallytime/fix-25192
- a1f90fa070 Only call convert_to_arn when action name is provided

- PR #26288: (bbinet) allow to delete grains which value is False @ 2015-08-13 18:24:36 UTC
  - c81dc0b62f Merge pull request #26288 from bbinet/grains-absent-fix
  - f46722a8e6 allow to delete grains which value is False

- ISSUE #24882: (nmadhok) salt.states.openstack_config.present and salt.states.openstack_config.absent make changes when test=True (refs: #26263)

- PR #26263: (rallytime) Don’t make changes when test=True for openstack present/absent funcs @ 2015-08-13 16:30:31 UTC
  - 65ab5aa495 Merge pull request #26263 from rallytime/fixed-24882
  - 86b86161d22 Mock test key in __opts__ dict
  - 298685bb2 Don’t make changes when test=True for openstack present/absent funcs

- ISSUE #24484: (bailsman) clouds/ec2.py: create_snapshot throws exception (refs: #26265)

- PR #26265: (rallytime) Don’t stacktrace on query return in ec2.create_snapshot @ 2015-08-13 16:28:48 UTC
  - 3d1a9cfed9 Merge pull request #26265 from rallytime/fixed-24484
  - 4f97a00591 Don’t stacktrace on query return in ec2.create_snapshot

- PR #26285: (stanislavb) Remove explicit version from instance identity URL @ 2015-08-13 16:25:32 UTC
  - 5778c63f01 Merge pull request #26285 from stanislavb/2015.5
  - 1f18f4f91e Remove explicit version from instance identity URL

- PR #26275: (cachedout) Re-init modules on multi-master reconnect @ 2015-08-13 15:52:50 UTC
  - 679de809c0 Merge pull request #26275 from cachedout/mm_reinit
  - 1e0473c0a4 Re-init modules on multi-master reconnect

- PR #26273: (garethgreenaway) Fixes to schedule module in 2015.5 @ 2015-08-13 15:34:43 UTC
  - 75ff28779 Merge pull request #26273 from garethgreenaway/2015_5_schedule_list_show_jobs_enabled
  - 1aad4b1b4f Jobs are enabled by default but schedule.list does not show an enabled jobs as being enabled by default. This change fixes that.

- ISSUE #24483: (bailsman) clouds/ec2.py: del_root_vol_on_destroy and del_all_vols_on_destroy not working (refs: #26271)

- PR #26271: (rallytime) Fix del_root_vol_on_destroy and del_all_vols_on_destroy functionality on ec2 @ 2015-08-12 23:22:47 UTC
  - 10af22775a Merge pull request #26271 from rallytime/fixed-24483
  - 139fbb93bc Fix del_root_vol_on_destroy and del_all_vols_on_destroy functionality on ec2

- ISSUE #25958: (anlutro) Cron identifier does not default to state ID as documented (refs: #26219)

- PR #26219: (anlutro) cron: make identifier default to state ID @ 2015-08-12 18:42:33 UTC
  - 8e1b5da2e0 Merge pull request #26219 from alprs/cron_identifier.default
  - 1f02e1671b cron: fix a typo in the tests
  - a86b1b7f94 add release note about cron state changes
  - 9511e392ce cron: read full length of multi-line comments
  - 9b18cd905c cron: more descriptive tests, updated to reflect new behavior
- f22ad837c3 cron: change identifier default value to False
- ad444b6e7b cron identifier: default to state id

**ISSUE #26207:** (fullermd) group members setting fails with obscure error message on FreeBSD (refs: #26237)

**PR #26257:** (rallytime) Back-port #26237 to 2015.5 @ 2015-08-12 18:40:35 UTC
  
  - PR #26237: (silenius) fix issue #26207 (refs: #26257)
  - eebcadc533 Merge pull request #26257 from rallytime/bp-26237
  - d57f6c6a0 Add versionadded to new members function
  - dad192626 fix issue #26207

**PR #26258:** (nmadhok) Fix permission on tests/runtests.py on 2015.5 branch @ 2015-08-12 18:40:04 UTC
  
  - d7c8169dfb Merge pull request #26258 from nmadhok/fix-permission
  - d94485d336 Fix permission on tests/runtests.py on 2015.5 branch

**PR #26261:** (nmadhok) Correct spelling of integration in docs @ 2015-08-12 18:14:48 UTC
  
  - 74b70c37b7 Merge pull request #26261 from nmadhok/doc-fix-2015.5
  - 87f9766f7 Correct spelling of integration in docs

**PR #26247:** (nmadhok) Initial commit of unit tests for vmware cloud driver @ 2015-08-12 16:58:24 UTC
  
  - de00c181f8 Merge pull request #26247 from nmadhok/vmware-cloud-test-2015.5
  - 6ccf97e92 Lint Fix
  - a8be5ec1f Initial commit of unit tests for vmware cloud driver

**PR #26246:** (nmadhok) Backport additions to VMware cloud driver from develop to 2015.5 branch @ 2015-08-12 15:11:26 UTC
  
  - d14d7b2e0e Merge pull request #26246 from nmadhok/vmware-cloud-driver-additions-2015.5
  - 5227aa94bc Backport additions to VMware cloud driver from develop to 2015.5 branch

**PR #26239:** (opdude) Fixed documentation to match function name @ 2015-08-12 14:48:52 UTC
  
  - 87b30047b3 Merge pull request #26239 from Unity-Technologies/2015.5
  - fc1875170 Fixed documentation to match function name

**PR #26232:** (garethgreenaway) Fix trust_key in gpg module for 2015.5. @ 2015-08-12 04:48:27 UTC
  
  - a93b96c9a Merge pull request #26232 from garethgreenaway/2015_5_gpg_trust_key_fix
  - e174c1887 Fix to trust_key in gpg module for 2015.5.

**ISSUE #25802:** (jefftucker) Running module "npm.list" fails on Windows for masterless minion (refs: #26084)

**PR #26084:** (twangboy) Added python_shell=True, quoted user input @ 2015-08-10 21:29:35 UTC
  
  - b57da552ff Merge pull request #26084 from twangboy/fix_25802
  - 4503ed5b34 Fixed but with multiple packages, was causing tests to fail
  - f5e8e72a5 Merge branch '2015.5' of https://github.com/saltstack/salt into fix_25802

**PR #26183:** (cro) Fix LDAP configuration issue. @ 2015-08-10 19:09:41 UTC
  
  - c3814137a3 Merge pull request #26183 from cro/anonldap2
  - aa5e9c80b5 Lint roller
- 79833e3f8a Cherry pick index.rst change.
- 99f2c27399 Documentation update for anonymous bind issue.
- 793eed7b96 Cherry pick master.py groups check

**PR #26186**: (jacobhammons) regenerated man pages @ 2015-08-10 19:07:44 UTC
- 3233ed4675 Merge pull request #26186 from jacobhammons/man-page-updates
- bf2dad913f regenerated man pages

**PR #26182**: (basepi) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2015-08-10 19:00:10 UTC
- d48bcf7598 Merge pull request #26182 from basepi/merge-forward-2015.5
- 32f5345d7d Merge remote-tracking branch 'upstream/2014.7' into merge-forward-2015.5
  * abdf2935c4 Merge pull request #26116 from corux/fix-escape-content
    - fd913ddc36 Append/prepend: search for full line with escaped content
  * 106356d98d Merge pull request #26088 from jacobhammons/master-finger
    - 133df7885 some small changes
    - d220c83f77 master_finger configuration docs switch a script to use https:// instead of http://Refs #25751
  * 4bd4bc41f2 Merge pull request #26047 from jacobhammons/win-downloads
    - 7c162d181c Updated windows download links in the docs to https://repo.saltstack.comRefs #25961

**ISSUE #25998**: (driskell) Event subsystem discarding required events during –batch breaking it for slow running commands (refs: #26000)

**PR #26000**: (driskell) Implement full event caching for subscribed tags @ 2015-08-10 18:57:17 UTC
- f39780f8ce Merge pull request #26000 from driskell/fix_discarded_events
- 65ac975dd Implement full event caching for subscribed tags Require all multitasking contexts to subscribe to their events so one call to get_event for one tag does not discard events that should be saved for a subsequent call to get_event with another tag. Use blocking get_event in batching with very small timeout. Fixes #25998

**PR #26175**: (rallytime) Back-port #26153 to 2015.5 @ 2015-08-10 18:22:32 UTC
- PR #26153: (loa) Fix dockerio state documentation typo (refs: #26175)
- c01b4cf150 Merge pull request #26175 from rallytime/bp-26153
- 9a263067e9 Fix dockerio state documentation typo

**ISSUE #26024**: (jpic) lxc_conf_unset in cloud.profile is ignored (refs: #26147)

**PR #26177**: (rallytime) Back-port #26147 to 2015.5 @ 2015-08-10 18:22:01 UTC
- PR #26147: (martinhoefling) Fixes #26024 (refs: #26177)
- ca80f33bf6 Merge pull request #26177 from rallytime/bp-26147
- 32c3ab53c Fixes #26024

**ISSUE #21082**: (clinta) master_type failover does not failover on DNS errors (refs: #25404)

**PR #26179**: (rallytime) Back-port #25404 to 2015.5 @ 2015-08-10 18:21:50 UTC
- PR #25404: (DmitryKuzmenko) Fixed minion failover to next master on DNS errors. (refs: #26179)
- 1213b8d706 Merge pull request #26179 from rallytime/bp-25404
- 52ab9fc1f Fixed minion failover to next master on DNS errors.

• ISSUE #26112: (wt) state.template fails with unclear error with template with only an include (refs: #26180)
• PR #26180: (jfindlay) fix processing of state.template @ 2015-08-10 18:21:38 UTC
  - b319c5ec04 Merge pull request #26180 from jfindlay/templ_env
  - 5e46ea4441 check type of matches in render_state before iterating
  - c80299b918 insert saltenv to render_state args in state.template

• ISSUE #26162: (nmadhok) VMware cloud driver create function failing with traceback on latest develop (refs: #26172)
• PR #26172: (nmadhok) [Backport] Make sure variable is a dictionary before popping something from it. @ 2015-08-10 16:42:50 UTC
  - ef5a4a47f6 Merge pull request #26172 from nmadhok/backport-cloud-fix-26163-2015.5
  - 0f2b58ac8 Make sure variable is a dictionary before popping something from it.

• ISSUE #26098: (rdinoff) SALT.STATES.SLACK Doc update (refs: #26168)
• PR #26168: (cachedout) Fix slack docs @ 2015-08-10 14:57:18 UTC
  - 2545df052a Merge pull request #26168 from cachedout/fix_slack_docs
  - f421a936dc Fix slack docs

• ISSUE #24106: (nvx) fileclient.py#get_url ignores HTTP Auth again (2015.5 regression) (refs: #26127)
• PR #26127: (garethgreenaway) Fixes to salt.utils.http related to cp.get_file_str bug. @ 2015-08-10 14:38:25 UTC
  - 9e6b0d6165 Merge pull request #26127 from garethgreenaway/2015_5_24106
  - 66f640086a one more lint error
  - 317a8ec75c Disabling pylint for W0633, auth should only ever be a sequence at this location.
  - 08eaaca4fe4 lint fixes.
  - 7046b84ac8 Fixing a bug where cp.get_file_str would not work if using http(s) URLs with authentication. The salt.utils.http library in 2015.5 defaults to using urllib instead of requests and there was no authentication support added. This PR adds authentication support. #24106

• ISSUE #26141: (nmadhok) salt-cloud VMware driver fails with error in parsing configuration file (refs: #26140)
• ISSUE #25809: (o-sleep) vmware cloud module error message (refs: #26140)
• ISSUE #25625: (steverweber) cloud vmware driver does not provide mac_address unless vmware tools is running (refs: #26137, #26140)
• PR #26140: (nmadhok) VMware cloud driver fixes @ 2015-08-10 13:15:58 UTC
  - 3b6e0d1d91 Merge pull request #26140 from nmadhok/vmware-cloud-fixes
  - a1899b436c Correct provider name in profile example
  - 1f21876d21 Lint fixes
  - 0bd4f69c9c1 Additional fixes to format_instance functions to display more information available
  - 4ee1b777e9 Change double quotes to single quotes in add_host config example
  - e132f06a5c Change double quotes to single quotes in provider configuration example
- ad9895de07 Display error in else condition if connection is unsuccessful and does not have msg attribute. Fixes #25809

- **ISSUE #25625**: (steverweber) cloud vmware driver does not provide mac_address unless vmware tools is running (refs: #26137, #26140)

- **PR #26137**: (steverweber) use device mac address if vmtools not active @ 2015-08-09 03:05:36 UTC
  - 474a250414 Merge pull request #26137 from steverweber/vmware_macaddress_fix
  - 258e389f0 use device mac address if vmtools not active

- **PR #26119**: (jodv) Backport eauth bugfix to 2015.5 @ 2015-08-09 02:19:52 UTC
  - 8a33797737 Merge pull request #26119 from jodv/backport_eauth_bugfix
  - e1a7b5e7b fix pylint error (unnecessary ’finally’ clause may swallow exceptions unintentionally)
  - 5b5b4d8fe9 Fix issue with mixed user and group eauth perms
  - 0d26ca67a5 Return all relevant perms on login

- **PR #26135**: (cro) Fix proxy minions in 2015.5 and significantly update documentation. @ 2015-08-09 02:19:21 UTC
  - 2b8dcce0ca Merge pull request #26135 from cro/pm20155_2
  - 28329ff55 These tests make no sense now that the proxy interface is module based and not object based.
  - b17b65d4de Fix lint.
  - f4263c8f17 Fix lint.
  - 6927251c09 Fix lint.
  - 08f1a43ff0 Fix lint.
  - 8261158b5a Fix lint.
  - b5e643b9cd Whoops…Don’t log the entire proxy dictionary—might have sensitive stuff in it.
  - 2acf3c5a3 Remove some debugging statements, change some others to ’info’ level.
  - 37de6af686 More proxy minion updates
  - e79a182108 More proxy minion updates
  - 3b746ac2f6 Update to reflect refactor to LazyLoader
  - 5d390d3a5f Updates post meeting with Rick
  - d1213ce4a0 Updates post meeting with Rick
  - dd07c6937 Fix proxyobject confusion, now called proxymodule
  - 9b1599d436 Update to reflect refactor to LazyLoader

- **PR #26132**: (TheBigBear) minor edit @ 2015-08-08 21:05:34 UTC
  - 2705b4a36a Merge pull request #26132 from TheBigBear/patch-5
  - 1d624d7bc minor edit

- **ISSUE #25915**: (ari) FreeBSD pkg install fails (refs: #26133)

- **PR #26133**: (amontalban) Fixed #25915 in salt/modules/pkgng.py and salt/states/pkg.py @ 2015-08-08 21:05:05 UTC
  - 3eac28f0f9 Merge pull request #26133 from amontalban/fix-bug-25915

---

28.2. Previous Releases 5189
- 6b04fca05 Fixed #25915 in salt/modules/pkgng.py and salt/states/pkg.py

- **PR #26111**: (anlutro) Better error messages when virtualenv creation fails @ 2015-08-07 21:42:09 UTC
  - 19c42b8b3a Merge pull request #26111 from alprs/fix-virtualenv_fail_message
  - b2913ac48 virtualenv: better error messages when creation fails

- **ISSUE #26093**: (freedba) archive.tar bug (refs: #26110)

- **PR #26110**: (jfindlay) check for sources before adding them to cmd str @ 2015-08-07 21:33:23 UTC
  - 6d2835b464 Merge pull request #26110 from jfindlay/tar_sources
  - 1b2f8905eb check for sources before adding them to cmd str

- **PR #26106**: (vr-jack) Update __init__.py @ 2015-08-07 21:15:55 UTC
  - 2d271b3612 Merge pull request #26106 from vr-jack/2015.5
  - 5664de6610 Update __init__.py

- **ISSUE #25983**: (jmdcal) Trying to get md5 of local zip (refs: #25984)

- **PR #26101**: (rallytime) Back-port #25984 to 2015.5 @ 2015-08-07 18:56:26 UTC
  - PR #25984: (jmdcal) Support local files without md5sum (refs: #26101)
  - 40d41741c1 Merge pull request #26101 from rallytime/bp-25984
  - 3d279c0713 Pylint Fix
  - cced16a9f4 Support local files without md5sum

- **PR #26080**: (techhat) Fix string checking in s3fs @ 2015-08-06 23:36:09 UTC
  - dc9c9b5a34 Merge pull request #26080 from techhat/fixlower
  - 8717a36963 Fix string checking in s3fs

- **ISSUE #26039**: (basepi) Update scheduler docs to use orchestrate instead of overstate (refs: #26079)

- **PR #26079**: (cachedout) Update docs to remove state.over @ 2015-08-06 23:35:26 UTC
  - dc9c9b5a34 Merge pull request #26079 from cachedout/issue_26039
  - f03f460af2 Update docs to remove state.over
    - 89d8faeb1 Added python_shell=True, quoted user input

- **PR #26058**: (opdude) Fix choco version on chocolatey versions below 0.9.9 @ 2015-08-06 18:50:10 UTC
  - bbedb6b28 Fix choco version on chocolatey versions below 0.9.9

- **PR #26068**: (jfindlay) fix autoruns.list looking in wrong directory @ 2015-08-06 18:49:48 UTC
  - 199a20e23a Merge pull request #26068 from jfindlay/auto_fix
  - 1e9a50e23 fix autoruns.list looking in wrong directory

- **ISSUE saltstack/salt-bootstrap#640**: (Deshke) salt-minion install bug on ubuntu 14.04 tornado>>=4.0 (refs: #26065)

- **ISSUE saltstack/salt-bootstrap#633**: (neilmb) Bootstrap install fails on python-requests dependency (refs: #26065)

- **ISSUE saltstack/salt-bootstrap#632**: (julianGindi) python-requests : Depends: python-urllib3 (>= 1.7.1) but it is not installable (refs: #26065)
• ISSUE saltstack/salt-bootstrap#631: (DavidJFelix) Stable broken in 15.04 even with -P (refs: #26065)

• ISSUE #636: (pille) restrict access to salt:// filesystem (refs: '#saltstack/salt-bootstrap#638')

• ISSUE #613: (thatch45) Add timeout option to publish.publish (refs: '#saltstack/salt-bootstrap#634')
  
  - PR saltstack/salt-bootstrap#638: (stanislavb) Use prefix /usr for centos git install (refs: #26065)
  - PR saltstack/salt-bootstrap#634: (BretFisher) bugfix: exit git root before removing it (refs: #26065)

• PR #26065: (s0undt3ch) [2015.5] Update to latest bootstrap stable release v2015.06.08 @ 2015-08-06 17:09:35 UTC
  
  - 5570408597 Merge pull request #26065 from s0undt3ch/hotfix/bootstrap-script-2015.5
  - 6a430a62b01 Update to latest bootstrap stable release v2015.06.08

• ISSUE #25994: (gmcwhistler) module.ilo tempfile creation in __execute_cmd results in TypeError: cannot concatenate 'str' and 'int' objects (refs: #26061)

• PR #26061: (gmcwhistler) Patch for issue #25994 @ 2015-08-06 17:07:34 UTC
  
  - 83a1922196 Merge pull request #26061 from gmcwhistler/2015.5
  - b9e89d0f2d Patch for issue #25994

• ISSUE #26063: (saltstack-bot) not working with salt-cloud shows unknown locale error (refs: #26064)

• PR #26064: (s0undt3ch) Don’t stacktrace when trying to get the default locale. @ 2015-08-06 16:11:05 UTC
  
  - 6c0a62b01 Update to latest bootstrap stable release v2015.06.08

• ISSUE #26063: (saltstack-bot) not working with salt-cloud shows unknown locale error (refs: #26064)

• PR #26062: (jfindlay) fix test mode logic in state docs @ 2015-08-05 19:23:07 UTC
  
  - f005bdfe6 Merge pull request #26062 from jfindlay/result
  - a83059ca01 fix test mode logic in state docs

• ISSUE #24460: (nicholascapo) Survey runner does not follow --out flag (refs: #26036)

• PR #26036: (nicholascapo) survey.hash: Remove manually printed text @ 2015-08-05 19:21:59 UTC
  
  - 5a1b6864b7 Merge pull request #26036 from nicholascapo/survey.hash_follow_out_flag
  - 439ee9831c survey.hash: Remove manually printed text

• PR #26030: (opdude) Fix a bug in choco version that returned odd data @ 2015-08-05 16:30:25 UTC
  
  - 5a4d18ebe6 Merge pull request #26030 from Unity-Technologies/hotfix/fix-choco-pkg-version-2015-5
  - 3dd96c0638 Fix a bug in choco version that returned odd data

• PR #26032: (jfindlay) add test logic to state result doc @ 2015-08-05 16:28:32 UTC

28.2. Previous Releases 5191
- c96d3bb55e Merge pull request #26032 from jfindlay/result
- 0fd180e106 add test logic to state result doc

• ISSUE #23764: (es1o) source_hash from local file is not supported. (refs: #26031, #25750)

• PR #26031: (alekti) Revert "Add file as supported protocol for file source_hash. Fixes #23764" @ 2015-08-05 15:32:01 UTC
  - bd14d85636 Merge pull request #26031 from alekti/merge-pull-25750-to-2015.5
  - 5a7cab4dce Revert "Add file as supported protocol for file source_hash. Fixes #23764."

• PR #26021: (anlutro) Documentation: Specify versionadded for git.present shared argument @ 2015-08-05 14:17:38 UTC
  - d55e6e5fe9 Merge pull request #26021 from alprs/docs-git_present_shared_versionadded
  - 8a678aa7 specify versionadded for git.present shared argument

• ISSUE #25701: (alekti) Issue #23764 regression (refs: #25750)

• ISSUE #23764: (es1o) source_hash from local file is not supported. (refs: #26031, #25750)

• PR #26020: (alekti) Correctly resolve conflict merging pull 25750 to 2015.5 @ 2015-08-05 14:16:58 UTC
  - PR #25750: (alekti) Add file as supported protocol for file source_hash. Fixes #25701. (refs: #26020)
  - 5e17c5d230 Merge pull request #26020 from alekti/merge-pull-25750-to-2015.5
  - 4b9d7426cc Add file as supported protocol for file source_hash. Fixes #23764.

• ISSUE #22241: (masterkorp) Salt master not properly generating the map (refs: #25358)

• PR #26016: (basepi) Revert "Deep merge of pillar lists" @ 2015-08-05 04:59:52 UTC
  - PR #25358: (dkiser) Deep merge of pillar lists (refs: #26016)
  - 53f7aadcd7 Merge pull request #26016 from basepi/revert.25358
  - 8a0e8e0460 Revert "Deep merge of pillar lists"

• ISSUE #12255: (eliasp) 'system.set_computer_desc' fails with non-ASCII chars (refs: #25992)

• PR #25992: (twangboy) Refactor win_system.py @ 2015-08-05 04:54:18 UTC
  - 200bf7538 Merge pull request #25992 from twangboy/fix_12255
  - 0502897635 Fixed the lint... again
  - 6f85d6b9af Fixed some lint
  - 4195803e56 Merge pull request #3 from jfindlay/win_sys
  - 9156bbd33e update win_system exec mod unit tests
  - c92add95b5 Gated ctypes import, fixed some lint
  - d760fd3a0a Refactor win_service.py

• ISSUE #25948: (twangboy) Fix uncomment function to handle spaces (refs: #26002)

• PR #26002: (twangboy) Fixed regex to account for comment character followed by whitespace @ 2015-08-04 22:28:11 UTC
  - c168159750 Merge pull request #26002 from twangboy/fix_25948
  - ba1a57e582 Fixed regex to account for comment character followed by whitespace

• ISSUE #25949: (godlike64) layman.add does not work with unofficial overlays (refs: #25970)
- **PR #25970**: (jfindlay) accept addition of layman overlay @ 2015-08-04 15:42:28 UTC
  - 4ad2422da1 Merge pull request #25970 from jfindlay/layman
  - 237a9e18b3 accept addition of layman overlay
- **PR #25971**: (basepi) [2015.5] salt.modules.reg Add spaces for strings split across multiple lines @ 2015-08-04 15:39:48 UTC
  - f1366c1c0 Merge pull request #25971 from basepi/typos
  - bb001a6c0e Add spaces for strings split across multiple lines
- **PR #25990**: (rallytime) Back-port #25976 to 2015.5 @ 2015-08-04 14:36:53 UTC
  - PR #25976: (fleaflicker) Typo in help output (refs: #25990)
  - 6383dd8a7d Merge pull request #25990 from rallytime/bp-25976
  - 5f6dc0c85f Typo in help output
- **PR #25996**: (attiasr) fix msiexec package remove @ 2015-08-04 14:36:31 UTC
  - 9f8bf75dc0 Merge pull request #25996 from attiasr/patch-1
  - 5fbc5fd94c fix msiexec package remove
- **ISSUE #25863**: (peterdemin) pkg.installed fails on already installed package if it is in versionlock.list (refs: #25864)
- **PR #25966**: (rallytime) Back-port #25864 to 2015.5 @ 2015-08-03 18:48:26 UTC
  - PR #25864: (peterdemin) #25863 state.pkg.installed fix (refs: #25966)
  - 2dca8d959b Merge pull request #25966 from rallytime/bp-25864
  - 0f7f9637b4 #25863 fix - state.pkg: do preflight check only for non-installed packages
- **PR #25967**: (rallytime) Back-port #25917 to 2015.5 @ 2015-08-03 18:48:02 UTC
  - PR #25917: (jmdcal) adding missing format string (refs: #25967)
  - a6d8e541ed Merge pull request #25967 from rallytime/bp-25917
  - 82b7e14a1f adding missing format string
- **PR #25895**: (basepi) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2015-08-03 17:12:37 UTC
  - 87d028b302 Merge pull request #25895 from basepi/merge-forward-2015.5
  - 56e43c8f88 Fix lint
  - 93a182d9e9 Merge remote-tracking branch `upstream/2014.7` into merge-forward-2015.5
    - d93eb87c16 Merge pull request #25750 from alekti/2014.7
      - 9ec3ae96d4 Add file as supported protocol for file source_hash. Fixes #23764.
    - 3a15df22ac Merge pull request #25704 from cachedout/master_type_2014_7
      - c95886c9a7 Ensure prior alignment with master_type in 2014.7
    - d1b9362a73 Merge pull request #25657 from MrCitron/pattern-carbon-returner-2014.7
      - f8b2f8079f Add the ability to specify a base pattern for metrics path used by the carbon returner
    - 9634351fc2 Merge pull request #25633 from AkhterAli/2014.7
      - 29be4bbe11 Update loader.py
• ISSUE #25850: (ssgward) Need to add packages to –versions-report (refs: #25941)

- **PR #25711**: (twangboy) Fixed problem with win_servermanager.list_installed @ 2015-07-27 15:05:48 UTC
  - 186af9b54d Merge pull request #25711 from twangboy/fixed_25351
  - 82fa911931 Fixed problem with win_servermanager.list_installed

- **ISSUE #25435**: (yee379) progressbar dependency missing (refs: #25714)

- **PR #25714**: (cachedout) Display warning when progressbar can’t be loaded @ 2015-07-25 00:10:13 UTC
  - ad8456eed Merge pull request #25714 from cachedout/issue_25435
  - 44f34684ef Included note in help docs
  - 4e2f5ee17cc Display warning when progressbar can’t be loaded

- **PR #25699**: (rallytime) Back-port #25660 to 2015.5 (refs: #25709) @ 2015-07-24 22:11:40 UTC
  - **PR #25660**: (colekowalski) add glusterfs’ direct-io-mode to mount_invisible_keys (refs: #25699, #25709)
    - a0969f774a Merge pull request #25699 from rallytime/bp-25660
    - 85c636d7a1 add glusterfs’ direct-io-mode to mount_invisible_keys

- **ISSUE #25689**: (anlutro) Minion log in salt-ssh (refs: #25694)

- **PR #25694**: (s0undt3ch) Salt-SSH fix for #25689 @ 2015-07-24 21:41:57 UTC
  - fe829564f4 Merge pull request #25694 from s0undt3ch/2015.5
  - afba3bde90 Use a relative un-nested path to the salt-call logfile.
- 6309f22a65 Fix wrong variable assignment
- c312592c81 Have cookie JAR’s respect the configured cachedir

- **ISSUE #25250** (wipfs) 'force' option in copy state deletes target file (refs: #25461, #25710)
- **PR #25710** (jahamm) Integration Testcase for Issue 25250 @ 2015-07-24 20:57:33 UTC
  - fb4744b2f8 Merge pull request #25710 from jahamm/integration-test-for-issue-25250
  - 24f653e963 Integration Test for Issue 25250

- **PR #25680** (basepi) [2015.5] Move cmd.run jinja aliasing to a wrapper class to prevent side effects @ 2015-07-24 19:52:10 UTC
  - **PR #25049** (terminalmage) Fix cmd.run when cross-called in a state/execution module (refs: #25680)
  - 18c9d5454d Merge pull request #25680 from basepi/jinja.alias.25049
  - e83a0f9b2b Use new-style classes
  - 4a50bac1c2 Fix typo
  - 36410389dc Name the Nitrogen release
  - 77679596f9 Make ALIASES global
  - 01c209efd9 Fix some aliases references
  - 1644641c57 Move cmd.run aliasing to a wrapper class to prevent side effects

- **PR #25682** (basepi) [2015.5] Fix parsing args with just a hash (#) @ 2015-07-24 19:52:01 UTC
  - 6a5ccdc9d04 Merge pull request #25682 from basepi/fix.hash.parsing
  - 8d75c1b882 Fix parsing args with just a hash (#)

- **PR #25695** (stanislavb) Configurable AWS region & region from IAM metadata @ 2015-07-24 19:36:40 UTC
  - d330ef0d81 Merge pull request #25695 from stanislavb/expose-aws-region-config-and-fetch-region-from-metadata
  - 595da6252e Configurable AWS region & region from IAM metadata

- **PR #25645** (kev009) Fix pkgng provider to work with a sources list and the underlying pkg... @ 2015-07-24 16:33:18 UTC
  - ea0d295d49 Merge pull request #25645 from kev009/freebsd-pkgng-add
  - ee2cb574a Fix pkgng provider to work with a sources list and the underlying pkg-add(8)

- **PR #25677** (aneeshusa) Fix pacman.list_upgrades when refresh=True. @ 2015-07-24 16:30:06 UTC
  - 2cad79c2f0 Merge pull request #25677 from aneeshusa/fx-pacman-list-upgrades-when-refreshing
  - 7062ae4eae Fix pacman.list_upgrades when refresh=True.

- **ISSUE #25674** (UtahDave) file.managed with contents parameter uses wrong line endings on Windows (refs: #25675)

- **PR #25675** (UtahDave) Use OS line endings with contents on file.managed @ 2015-07-24 16:29:50 UTC
  - 18e739b812 Merge pull request #25675 from UtahDave/2015.5local
  - d0f9d001db Use OS line endings with contents on file.managed

- **PR #25676** (basepi) Update release candidate docs to 2015.8.0rc2 @ 2015-07-23 20:29:37 UTC
  - 7914f51636 Merge pull request #25676 from basepi/2015.8.0rc2releasedocs
- 882d11836b Update release candidate docs to 2015.8.0rc2

- **ISSUE #25665**: (nmadhok) salt-cloud VMware driver fails with KeyErrors if there’s any existing machine in the VMware infrastructure in (invalid state) (refs: #25666)

- **PR #25666**: (nmadhok) Check if the properties exist before looping over them causing KeyErrors @ 2015-07-23 17:55:40 UTC
  - c36b714401 Merge pull request #25666 from nmadhok/vmware-cloud-fix_2015.5
  - 8e812296ef Check if the properties exist before looping over them causing KeyErrors Fixes #25665

- **PR #25656**: (anlutro) Fix locale detection in debian/gentoo @ 2015-07-23 16:46:40 UTC
  - 36d04b2954 Merge pull request #25656 from alprs/fix-locale_detection
  - a260236942 change variable name
  - dd2a188c05 fix tests
  - aefd0f374 code formatting
  - e58d222f0 fix locale detection in debian/gentoo

- **PR #25661**: (rallytime) Back-port #25624 to 2015.5 @ 2015-07-23 16:26:48 UTC
  - **PR #25624**: (bobrik) Fix typo in get_routes example for debian_ip (refs: #25661)
    - b1c1735aae Merge pull request #25661 from rallytime/bp-25624
    - 4e1fca15e Fix typo in get_routes example for debian_ip

- **ISSUE #15209**: (hubez) file.manage: source_hash not working with s3:// (2014.7.0rc1) (refs: #25638)

- **PR #25662**: (rallytime) Back-port #25638 to 2015.5 @ 2015-07-23 16:26:40 UTC
  - **PR #25638**: (TronPaul) fix bad merge in 99fc7ec (refs: #25662)
    - 6a2843dee2 Merge pull request #25662 from rallytime/bp-25638
    - 90d833d5dc fix bad merge 99fc7ec

- **ISSUE #25413**: (zizkebab) pillar_opts default behavior is not reflected in the docs (refs: #25644)

- **PR #25644**: (cachedout) pillar doc fix @ 2015-07-22 22:57:23 UTC
  - 00f4689fe3 Merge pull request #25644 from cachedout/issue_25413
  - 8cefb1e6cc pillar doc fix

- **ISSUE #25540**: (dennisjac) salt highstate schedule cannot be removed (refs: #25642)

- **PR #25642**: (cachedout) Warn on pillar schedule delete @ 2015-07-22 22:04:12 UTC
  - aeaeb536d6 Merge pull request #25642 from cachedout/issue_25540
  - 74f6b6930c Warn on pillar schedule delete

- **ISSUE #25437**: (lorenzgordon) Stacktrace on Windows when running pkg.list_pkgs (refs: #25598, #25763)

- **PR #25598**: (twangboy) Fixed problem trying to load file with name of boolean type @ 2015-07-22 17:07:49 UTC
  - 7b79e433f1 Merge pull request #25598 from twangboy/fix_25437
  - c53e11d42c Fixed problem trying to load file with name of boolean type

- **ISSUE #25323**: (terminalmage) unit.modules.tls_test fails with older mock (refs: #25604)

- **PR #25604**: (terminalmage) Move patching of mock_open to within test @ 2015-07-22 16:53:55 UTC
  - f4a38a8ae Merge pull request #25604 from terminalmage/fix-mock_open
- 123b8ee1cb Fix mock_open patch
- af82835f42 Move patching of mock_open to within test

- **ISSUE** saltstack/salt-bootstrap#630: (jf) Ubuntu 12.04 (and maybe 12.x?): apt-get installing python-requests causes digital_ocean_v2 to fail with "[ERROR ] Failed to get the output of 'digital_ocean.avail_sizes()': 'Response' object has no attribute 'text'" (refs: #25609)
  - **PR** saltstack/salt-bootstrap#627: (nyushi) Fix tornado installation on ubuntu (refs: #25609)
- **PR** #25609: (s0undt3ch) [2015.5] Update the bootstrap script to latest release v2015.07.22 @ 2015-07-22 16:28:52 UTC
  - 224484df7e Merge pull request #25609 from s0undt3ch/hotfix/bootstrap-script-2015.5
  - 96a8568336 Update the bootstrap script to latest release v2015.07.22
- **ISSUE** #21912: (rvora) pkg.latest not updating the package on CentOS though yum reports an update available (refs: #25603)
- **PR** #25603: (terminalmage) Add version_cmp function to yumpkg.py @ 2015-07-22 15:42:29 UTC
  - 07eb78c79f Merge pull request #25603 from terminalmage/issue21912
  - 99e532ba74 Add versionadded directive
  - 8a1765fc6f Add version_cmp function to yumpkg.py
  - 457e27e273 Fix references to __salt__['version_cmp']
  - a19fa2996a Avoid using single-letter variable
- **ISSUE** #25560: (dennisjac) scheduled highstate runs don’t return results to the job cache (refs: #25590)
- **PR** #25590: (garethgreenaway) 2015.5 scheduled jobs return data @ 2015-07-21 21:57:42 UTC
  - 69ef81caba Merge pull request #25590 from garethgreenaway/25560_2015_5_schedule_return_data
  - 19ca0e0b40 Switching default in 2015.5 for whether job data in returned to the mater job_cache.
- **PR** #25584: (rallytime) Back-port #24054 and #25576 to 2015.5 @ 2015-07-21 21:16:38 UTC
  - **PR** #25576: (pcn) s3fs breaks when fetching files from s3 (refs: #25584)
  - **PR** #24054: (mgwilliams) s3.head: return useful data (refs: #25584)
  - 9ffefc867e Merge pull request #25584 from rallytime/bp-24054-and-25576
  - aa9598e3a5 s3fs breaks when fetching files from s3
  - 1667d67c3e s3.head: return useful data
- **ISSUE** #23626: (mirko) salt state 'ssh_known_hosts' doesn’t take 'port' into account (refs: #25589)
- **PR** #25589: (jahamn) Fixes ssh_known_host not taking port into account @ 2015-07-21 21:15:06 UTC
  - a966e439d1 Merge pull request #25589 from jahamn/Fix-ssh_known_host-not-taking-port-into-account
  - 8db7ada82d Fixed pylint e8303 errors
  - 6abad29f66 Fixed pylint errors
  - 8ae6ba1290 Merge branch '2015.5' of https://github.com/saltstack/salt into Fix-ssh_known_host-not-taking-port-into-account
- **PR** #25573: (EvaSDK) Do not execute bootstrap script twice @ 2015-07-21 18:20:04 UTC
  - **PR** #25465: (EvaSDK) 2015.5.3 LXC module fixes (refs: #25573)
  - df74f2c3ad Merge pull request #25573 from EvaSDK/2015.5.3-lxc-fixes

28.2. Previous Releases 5203
- 49cec9f9a1 Use a more persistent tmp directory
- 96a672f8e0 Do not execute bootstrap script twice

• ISSUE #25532: (attiasr) salt/modules/win_pkg.py list_pkgs is broken (encoding issues) (refs: #25580, #25556)
• PR #25580: (attiasr) use explicit utf-8 decoding (#25532) @ 2015-07-21 15:40:49 UTC
  - 79a809dd79 Merge pull request #25580 from attiasr/patch-1
  - 4b7dc96919 use explicit utf-8 decoding (#25532)

• ISSUE #25206: (jfindlay) fullname issues with user.add state on windows (refs: #25568)
• PR #25568: (twangboy) Fixed win_useradd module to add fullname @ 2015-07-21 14:30:25 UTC
  - 6ed196533 Merge pull request #25568 from twangboy/fix_25206
  - fbe445ce6d Commented out a pylint error
  - 4b56dc3893 Fixed win_useradd module to add fullname

• ISSUE #21041: (deuscapturus) state module gem.installed not working on Windows. (refs: #25430, #25561, #25428)
• PR #25561: (twangboy) Fixed the gem module to work on windows... without injection @ 2015-07-20 21:12:15 UTC
  - PR #25428: (twangboy) Fixed the gem module to work on windows (refs: #25561)
  - 3c32b0b669 Merge pull request #25561 from twangboy/fix_21041_again
  - aaf3f3cd0 Fixed some line and style issues
  - 6ed065cda7 Merge branch '2015.5' of https://github.com/saltstack/salt into fix_21041_again

• PR #25521: (cachedout) Fix outputter for state.orch @ 2015-07-20 19:30:14 UTC
  - 9e19142c35 Merge pull request #25521 from cachedout/orch_outputter
  - ea40816621 Try/except
  - dd609eb440 Fix outputter for state.orch

• PR #25563: (basepi) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2015-07-20 19:27:36 UTC
  - 2117ac8022 Merge pull request #25563 from basepi/merge-forward-2015.5
  - 3bf2f1a722 Merge remote-tracking branch 'upstream/2014.7' into merge-forward-2015.5
  - 09ebaceca8 Merge pull request #25416 from cachedout/str_2014_7
    * cc514938a8 Fix broken keyword
      - d67491bb80 Removed the logger as it’s not used anymore
      - 5008bfee96 Merge branch '2015.5' of https://github.com/saltstack/salt into fix_21041_again

• PR #25559: (cachedout) Lint win_pkg @ 2015-07-20 17:46:29 UTC
  - 50c257b1d5 Merge pull request #25559 from cachedout/lint_win_pkg
  - 53a00aad9f9 Lint win_pkg

• ISSUE #25532: (attiasr) salt/modules/win_pkg.py list_pkgs is broken (encoding issues) (refs: #25580, #25556)
• PR #25556: (attiasr) fix for #25532 @ 2015-07-20 17:45:11 UTC
  - 7c7015ccda Merge pull request #25556 from attiasr/patch-1
  - 9b224e8d4e fix for #25532
• ISSUE #2538: (stanislavb) S3 ext_pillar configuration requires verify_ssl (refs: #2554)

• PR #25554: (jfindlay) verify_ssl=True for s3 ext_pillar @ 2015-07-20 17:43:38 UTC
  - 3c73dab2ce Merge pull request #25554 from jfindlay/verify_ssl
  - ca3ab4e737 verify_ssl=True for s3 ext_pillar

• PR #25551: (rallytime) Backport #25530 to 2015.5 @ 2015-07-20 17:43:00 UTC
  - PR #25530: (andre-luiz-dos-santos) The variable name must be last (refs: #25551)
  - e3e2e6718e Merge pull request #25551 from rallytime/bp-25530
  - df5003d7f9 The variable name must be last

• PR #25533: (attiasr) port 445 for windows bootstrapping @ 2015-07-20 15:13:06 UTC
  - 3e3441937f Merge pull request #25533 from attiasr/patch-2
  - c7fb68597 fix windows bootstrapping

• ISSUE #25432: (gtmanfred) [2015.5.3][raet] raet error with SaltRaetRoadStackJoiner (refs: #25525)

• PR #25525: (gtmanfred) add make _prepare an alias for postinitio @ 2015-07-20 15:12:38 UTC
  - 7fc051f56d Merge pull request #25525 from gtmanfred/2015.5
  - 43950a5bc5 add make _prepare an alias for postinitio

• ISSUE #25511: (rallytime) Make provider -> driver change backward compatible (refs: #25519)

• ISSUE #23574: (CedNantes) Failed to Deploy Salt-Minion on a Win 2012 R2 using vmware Cloud Driver from Develop branch (refs: #25519)

• PR #25519: (rallytime) Backport vmware driver to 2015.5 branch @ 2015-07-20 15:11:26 UTC
  - 725d1a40d0 Merge pull request #25519 from rallytime/backport_vmware
  - 3e3441937f fix windows bootstrapping
  - f011890217 Add vmware back-port change to release notes
  - 0f4f56b38 Backport vmware driver to 2015.5 branch

• PR #25542: (Oro) Fix hipchat.send_message when using API v2 @ 2015-07-20 15:09:13 UTC
  - 2f0d695bc0 Merge pull request #25542 from Oro/fix-hipchat-v2-sendmessage
  - 3a9f5b037f Fix hipchat.send_message when using API v2

• PR #25531: (rallytime) Back-port #25529 to 2015.5 @ 2015-07-18 19:16:10 UTC
  - PR #25529: (davidjb) Fix minor typo in best practice example (refs: #25531)
  - 390aa7d28f Merge pull request #25531 from rallytime/bp-25529
  - 3e24381439 Fix minor typo in best practice example

• PR #25528: (davidjb) Fix typo in extend declaration doco @ 2015-07-18 14:22:06 UTC
  - 6e811bfdd2 Merge pull request #25528 from davidjb/patch-7
  - bfc4f9fd85 Fix typo in extend declaration doco

• ISSUE #25486: (whiteinge) Highstate outputter not used for state.apply (refs: #25517)

• PR #25517: (rallytime) Back-port #25486 to 2015.5 @ 2015-07-17 21:49:26 UTC
  - PR #25485: (attiasr) fix file downloads on windows
- b9abd723a7 Merge pull request #25517 from rallytime/bp-25485
- 6c2f3180c2 fix file downloads on windows

• ISSUE #25479: (alexandrsushko) multiple mount.mounted of one device (refs: #25483)
• PR #25516: (rallytime) Back-port #25483 to 2015.5 @ 2015-07-17 21:49:05 UTC
  - PR #25483: (alexandrsushko) Added 'none' to the set of specialFSes (refs: #25516)
  - 9cb436fbae Merge pull request #25516 from rallytime/bp-25483
  - e0af6e3478 Added 'none' to the set of specialFSes

• ISSUE #25493: (blackduckx) Issue with job_args on schedule.add command (refs: #25513)
• PR #25513: (garethgreenaway) fixes to schedule.add documentation in 2015.5 @ 2015-07-17 17:03:24 UTC
  - daf03ef7c Merge pull request #25513 from garethgreenaway/25493_2015_5_schedule_add_documentation
  - bc2414bc4d Fixing documentation for schedule.add when using the job_args parameter, value needs to be be in quotes for the value to be passed in as an array.

• PR #25465: (EvaSDK) 2015.5.3 LXC module fixes (refs: #25573) @ 2015-07-17 15:57:54 UTC
  - 48050cd287 Merge pull request #25465 from EvaSDK/2015.5.3-lxc-fixes
  - 170eb52cc4 Fix use of undefined cmd when install of bootstrap script fails
  - 86118f4a7b Install bootstrap script like dns and systemd check scripts in container
  - 978ed5662 Error out if configdir could not be created when preparing LXC container
  - 41b63c2c5c Fix typo in redirecting shell output to /dev/null
  - 456393d4db Fix DNS script cleanup

  - f85f2b49fd Merge pull request #25506 from s0undt3ch/hotfix/bootstrap-script
  - ab6aa6e60 Update bootstrap script to latest stable release, v2015.07.17
• **ISSUE #25454**: (mschiff) Regression: salt 2015.5 not working in secure chroot anymore. (refs: #25498)
• **PR #25498**: (jfindlay) only read /proc/1/cmdline if it exists @ 2015-07-17 15:35:33 UTC
  - c8caf406b2 Merge pull request #25498 from jfindlay/jail_init
  - c636c206f only read /proc/1/cmdline if it exists
• **PR #25487**: (rallytime) Back-port #25464 to 2015.5 @ 2015-07-16 16:58:36 UTC
  - PR #25464: (jquast) docfix: "cache_jobs: False" => grains_cache: False" (refs: #25487)
  - 3f695a17cf Merge pull request #25487 from rallytime/bp-25464
  - e947d8ec5a docfix: "cache_jobs: False" => grains_cache: False"
• **PR #25482**: (oeuftete) Fix docker.running detection of running container @ 2015-07-16 16:58:29 UTC
  - 331808eb7d Merge pull request #25482 from oeuftete/docker-running-is-running-fix-2015-5
  - b69379ba50 Fix docker.running detection of running container
• **ISSUE #25384**: (rickh563) pyopenssl 0.14 requirement in 2015.5.3 does not work in RHEL6 : ZD-364 (refs: #25468)
• **PR #25468**: (joejulian) Add support for pyOpenSSL > 0.10 @ 2015-07-16 15:10:30 UTC
  - 7a20e6bf4 Merge pull request #25468 from joejulian/use_pyopenssl_0_10
  - 1b7a56aa38 Add support for pyOpenSSL > 0.10
• **PR #25467**: (rallytime) Add lxml dependency to opennebula docs @ 2015-07-16 15:09:57 UTC
  - d169905170 Merge pull request #25467 from rallytime/lxml_dep
  - d326f4f686 Add lxml dependency to opennebula docs
• **ISSUE #25250**: (wipfs) 'force' option in copy state deletes target file (refs: #25461, #25710)
• **ISSUE #24647**: (nmadhok) salt.states.file.copy does not copy the file if it already exists with force=True (refs: #25461)
• **PR #25461**: (jahamn) Update file, if force option and content not same @ 2015-07-15 20:15:07 UTC
  - 89649456e0 Merge pull request #25461 from jahamn/fixed-file.copy-force-option-deleting-files-without-updating-them
  - 32cf1ebbb5 Update file, if force option and content not same
• **ISSUE #25431**: (namcois) Digital Ocean v2 reducing API calls by adding per_page (refs: #25438)
• **PR #25438**: (rallytime) Reduce digital_ocean_v2 API call frequency @ 2015-07-15 19:40:18 UTC
  - 146a81b7c3 Merge pull request #25438 from rallytime/do_v2
  - faf49ea2a3 Add page number change release notes
  - da6ab82837 Reduce digital_ocean_v2 API call frequency
• **PR #25457**: (jacksontj) Saltnado @ 2015-07-15 17:50:12 UTC
  - PR #25427: (tony-cocco) Saltnado runner client results in blocking call despite being set-up as Runner.async (refs: #25457)
- cb98d79cdd Merge pull request #25457 from jacksontj/saltnado
- bc32f66b98 Add runner_async endpoint to salnado
- b043f9b05 Better name of method process manager is starting

- **PR #25459**: (jahamn) Fixed 'defulats' typo in verify.py @ 2015-07-15 16:53:06 UTC
  - 3f72eb5486 Merge pull request #25459 from jahamn/fix-defulats-typo-in-verify.py
  - 9ba6f19f67 Fixed 'defulats' typo in verify.py

- **PR #25426**: (jquast) bugfix: trailing "...done" in rabbitmq output (backport from 'develop' to 2015.5) @ 2015-07-15 14:48:05 UTC
  - 73566188cf Merge pull request #25426 from jquast/2015.5
  - 005a7ca2a3 bugfix: trailing "...done" in rabbitmq output

- **PR #25433**: (jleroy) Support for IPv6 addresses scopes in network.interfaces (ifconfig) @ 2015-07-15 14:44:09 UTC
  - **PR #25151**: (jleroy) Support for IPv6 addresses scopes in network.interfaces (refs: #25274, #25433)
  - cfece99062 Merge pull request #25433 from jleroy/ipv6-scope-support-ifconfig
  - bc36d05e0c Support for IPv6 addresses scopes in network.interfaces (ifconfig)

- **ISSUE #21041**: (deuscapturus) state module gem.installed not working on Windows. (refs: #25430, #25561, #25428)

- **PR #25430**: (twangboy) Disabled rbenv execution module for Windows @ 2015-07-15 14:41:18 UTC
  - a425230c19 Merge pull request #25430 from twangboy/fix_21041_2
  - 242fc21765 Disabled rbenv execution module for Windows
    - 8b2dc681f9 Fixed the gem module to work on windows... without injection
    - c7466e7894 Fixes ssh_known_host to take port into account

- **ISSUE #1846**: (seanchannel) development dependencies

- **PR #25420**: (techhat) Move S3 to use AWS Signature Version 4 @ 2015-07-14 22:03:09 UTC
  - 9313804e27 Merge pull request #25420 from techhat/s3sig4
  - 3ed5a14e2 Linting
  - c63c2356be Move S3 to use AWS Signature Version 4

- **ISSUE #20441**: (deuscapturus) State module file.managed returns an error on Windows and test=Test (refs: #25418)

- **PR #25418**: (twangboy) Fixed problem with file.managed test=True @ 2015-07-14 21:26:59 UTC
  - 30a41d3f51 Merge pull request #25418 from twangboy/fix_20441
  - d8957856cd Fixed problem with file.managed test=True

- **PR #25417**: (ahuus1) extended documentation about dependencies for dig module @ 2015-07-14 20:49:51 UTC
  - 3805677e93 Merge pull request #25417 from ahuus1/patch-1
  - 3cd194ebaf Update dig.py
  - 287f8f76e3 extended documentation about dependencies

- **PR #25411**: (basepi) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2015-07-14 17:55:26 UTC
- 4d929071e1 Merge pull request #25411 from basepi/merge-forward-2015.5
- 33d2451fef Merge remote-tracking branch 'upstream/2014.7' into merge-forward-2015.5
- 2a1dd1113f Merge pull request #25375 from cachedout/config_fix_2014_7
  - c041f2905f Fix error in config.py for master_type
- 2590e23d48 Merge pull request #25324 from jacobhammons/doc-theme-updates
  - 88f5cf58d Latest help theme updates
- • PR #25406: (anlutro) Force arguments to aptpkg.version_cmp into strings @ 2015-07-14 16:15:41 UTC
  - 81bed62d16 Merge pull request #25406 from alprs/fix-apt_version_cmp_types
  - d56ef1d13f force arguments to apt_pkg.version_compare into strings
- • PR #25408: (rallytime) Back-port #25399 to 2015.5 @ 2015-07-14 16:09:06 UTC
  - PR #25399: (jarpy) Demonstrate per-minion client_acl. (refs: #25408)
  - cd9ea63ff2 Merge pull request #25408 from rallytime/bp-25399
  - da9c0eb673 Typo in client_acl ref doc.
  - 50e0ba270 Demonstrate per-minion client_acl.
- • PR #25240: (tankywoo) file make os.walk only be called one @ 2015-07-14 16:04:49 UTC
  - e9f06900c0 Merge pull request #25240 from tankywoo/fix-files-os-walk-multiple-times
  - 8044def1c0 file make os.walk only be called one
- • PR #25395: (rallytime) Back-port #25389 to 2015.5 @ 2015-07-14 03:26:34 UTC
  - PR #25389: (l2ol33rt) Adding entropy note for gpg renderer (refs: #25395)

  - a086c5ad35 Adding entropy note
- • PR #25392: (rallytime) Back-port #25256 to 2015.5 @ 2015-07-14 03:25:13 UTC
  - PR #25256: (yanatan16) Dont assume source_hash exists (refs: #25392)
  - 008e3295c6 Merge pull request #25392 from rallytime/bp-25256
  - 6bd04d4582 Dont assume source_hash exists
- • PR #25398: (twangboy) Fix date @ 2015-07-14 03:21:17 UTC
  - 3f278963ae Merge pull request #25398 from twangboy/fix_date
  - 52824f9602 Added /V1 /Z to remove scheduled task after run
  - a055c79f Changed date of scheduled task to work in other locales
- • PR #25397: (GideonRed-2z) Introduce standard error output when cli exits with non-zero status @ 2015-07-14 03:20:24 UTC
  - 978d9f7117 Merge pull request #25397 from GideonRed/2015.5
  - ea7ab27f31 Introduce standard error output when cli exits with non-zero status
- • ISSUE #24444: (michaelkrupp) file.managed does not handle dead symlinks (refs: #25383)
- • PR #25386: (cachedout) Lint #25383 @ 2015-07-13 21:01:10 UTC
  - PR #25383: (jahamn) Fix manage_file function in salt/modules/file.py to handle broken sym... (refs: #25386)
ISSUE #24444: (michaelkrupp) file.managed does not handle dead symlinks (refs: #25383)

PR #25383: (jahamn) Fix manage_file function in salt/modules/file.py to handle broken sym... (refs: #25386) @ 2015-07-13 20:58:23 UTC

- 47bc61f55 Merge pull request #25383 from jahamn/managed_not_handling_dead_symlinks
- ab17aa160e Fix manage_file function in salt/modules/file.py to handle broken symlinks

PR #25369: (anlutro) Fix aptpkg.version_cmp @ 2015-07-13 20:18:45 UTC

- c9fe10e7aa Merge pull request #25369 from alprs/fix-apt_version_cmp
- 6391b15b3e fix aptpkg.version_cmp

ISSUE #25337: (eliasp) salt-call from non-existend cwd backtraces (refs: #25379)

PR #25379: (jfindlay) check for cwd before getting it @ 2015-07-13 19:50:27 UTC

- beb0238392 Merge pull request #25379 from jfindlay/check_wd
- 6e4547ff38 check for cwd before getting it

ISSUE #25334: (jahamn) zypper module list_upgrades broken (2015.5.2) (refs: #25334)

PR #25334: (jfindlay) return all cmd info back to zypper fcn @ 2015-07-13 17:03:29 UTC

- 274622ad9b Merge pull request #25334 from jfindlay/fix_zyp
- c1e63903e return all cmd info back to zypper fcn

PR #25339: (jfindlay) update orchestration docs @ 2015-07-13 16:04:26 UTC

- 71859c6593 Merge pull request #25339 from jfindlay/orch_doc
- 0447808d95 clarify, motivate orchestration docs

ISSUE #22241: (masterkorp) Salt master not properly generating the map (refs: #25358)

PR #25358: (dkiser) Deep merge of pillar lists (refs: #26016) @ 2015-07-13 15:51:01 UTC

- 90a1ca02a3 Merge pull request #25358 from dkiser/22241_pillar_merge_lists
- d030e289b3 Deep merge of pillar lists

ISSUE #25281: (shinshenjs) Unless usage in Official Doc syntax error? (refs: #25346)

PR #25346: (bechtoldt) set correct indention in states/requisites.rst (docs), fixes #25281 @ 2015-07-13 15:34:45 UTC

- 66c619fd71 Merge pull request #25346 from bechtoldt/issue25281
- 8eb2ac1dbe set correct indention in states/requisites.rst (docs), fixes #25281

PR #25336: (terminalmage) Don’t try to read init binary if it wasn’t found @ 2015-07-13 09:45:30 UTC

- b122ed931d Merge pull request #25336 from terminalmage/fix-init-grain
- f473918a53 Don’t try to read init binary if it wasn’t found

PR #25350: (davidjb) Fix documentation for file.blockreplace @ 2015-07-13 03:41:20 UTC

- 1805bae89 Merge pull request #25350 from davidjb/patch-4
- e13a9fd74e Fix documentation for file.blockreplace

ISSUE #19288: (oba11) AssociatePublicIpAddress doesnt work with salt-cloud 2014.7.0 (refs: #25326, #20972)
- **PR #25326**: (rallytime) Back-port #20972 to 2015.5 @ 2015-07-10 18:49:44 UTC
  - **PR #20972**: (JohannesEbke) Fix interface cleanup when using AssociatePublicIpAddress in #19288 (refs: #25326)
    - b0196f7cb7 Merge pull request #25326 from rallytime/bp-20972
    - 51c941f59d Also fix cleanup of interfaces when using AssociatePublicIpAddress in #19288
- **ISSUE #24433**: (chrimi) Salt locale state fails, if locale has not been generated (refs: #25290)
- **PR #25327**: (rallytime) Back-port #25290 to 2015.5 @ 2015-07-10 18:49:37 UTC
  - **PR #25290**: (pcdummy) Simple fix for locale.present on Ubuntu. (refs: #25327)
    - 28450d124e Merge pull request #25290 from rallytime/bp-25290
    - 20032c55f3 Simple fix for locale.present on Ubuntu.
- **ISSUE #24827**: (yermulnik) locale.present doesn’t generate locales (refs: #25309)
- **PR #25328**: (rallytime) Back-port #25309 to 2015.5 @ 2015-07-10 17:22:59 UTC
  - **PR #25309**: (davidjb) Format /etc/locale.gen correctly in salt.modules.localemod.gen_locale (refs: #25328)
    - 8f666a24f3 Merge pull request #25328 from rallytime/bp-25309
    - 44d44ec574 Format /etc/locale.gen correctly on gen_locale
- **PR #25322**: (jacobhammons) version change to 2015.5.3 @ 2015-07-10 16:11:24 UTC
  - 0a33a1d8bb Merge pull request #25322 from jacobhammons/release-2015.5.3
  - 19f88920fa version change to 2015.5.3
- **PR #25308**: (jacksontj) Make clear commands trace level logging @ 2015-07-10 14:20:06 UTC
  - **PR #24737**: (jacksontj) Move AES command logging to trace (refs: #25308)
    - 2f0f59b6cb Merge pull request #25308 from jacksontj/2015.5
    - 60fc770ba2 Make clear commands trace level logging
- **ISSUE #24520**: (nvx) Tomcat module fails to extract version number from snapshot builds (2015.5 regression) (refs: #24927)
- **PR #25269**: (jfindlay) Extract tomcat war version @ 2015-07-10 01:28:21 UTC
  - **PR #24927**: (egarbi) Tomcat module fails to extract version number from snapshot builds #2... (refs: #25269)
    - 9b666d578 Merge pull request #25269 from jfindlay/tomcat
    - fd4fca172d consolidate tomcat exec and state version extract
    - 59dc838567 update tomcat war_deployed state tests
    - edca458b6c Fixed 2 blank lines around import re
    - 7e5c1050 Tomcat module fails to extract version number from snapshot builds #24520
- **ISSUE #18808**: (amendlik) Add command line argument to select pillar environment (refs: #25238)
- **PR #25238**: (DmitryKuzmenko) Pillarenv backport 2015.5 @ 2015-07-10 01:25:07 UTC
  - 0f82ac3e30 Merge pull request #25238 from DSRCOMPANY/pillarenv_backport_2015.5
  - 98792eb179 Pillarenv support in minion config, cp and cmdmod modules.
ISSUE #13943: (Supermathie) Powershell commands that expect input hang forever (refs: #25299)

PR #25299: (twangboy) Added -NonInteractive so powershell doesn't hang waiting for input @ 2015-07-09 21:00:16 UTC

- 219d4cad9c Merge pull request #25299 from twangboy/fix_13943
- e05889031f Added -NonInteractive so powershell doesn't hang waiting for input

PR #25301: (jacobhammons) bug fix for module function display in help @ 2015-07-09 20:46:34 UTC

- 1c43892a80 Merge pull request #25301 from jacobhammons/doc-bugs
- f6561289af bug fix for module function display in help

ISSUE #25277: (jacobhammons) CherryPy recommended versions (refs: #25279)

PR #25279: (jacobhammons) Additional docs on external and master job cache, assorted doc fixes @ 2015-07-09 16:46:26 UTC

- 68149bc686 Merge pull request #25279 from jacobhammons/job-cache-docs
- 57dfa92d5a Fixed typos
- 29e5b9125 Additional docs on external and master job cache, assorted doc fixes Refs #25277

ISSUE #25268: (lichtamberg) Salt not working anymore in 2015.8/develop: ValueError: 'scope' is not in list (refs: #25274)

PR #25274: (jleroy) Fix for issue #25268 @ 2015-07-09 13:36:26 UTC

- PR #25151: (jleroy) Support for IPv6 addresses scopes in network.interfaces (refs: #25274, #25433)
- 972fa2f5a4 Merge pull request #25274 from jleroy/25268-fix
- 2c698d204b Fix for issue #25268

PR #25272: (twangboy) Fixed problem with service not starting @ 2015-07-08 23:29:48 UTC

- 8e8f73df2d Merge pull request #25272 from twangboy/service
- e61e6ba48b Fixed problem with service not starting

ISSUE #25223: (nmadhok) Runner occasionally fails with a RuntimeException when fired by a reactor (refs: #25225)

PR #25225: (nmadhok) Backporting fix for issue #25223 on 2015.5 branch @ 2015-07-08 15:16:18 UTC

- c6ef235ecb Merge pull request #25225 from nmadhok/client-runtime-fix-backport-2015-2
- 391b767409 Backporting fix for issue #25223 on 2015.2 branch

PR #25214: (rallytime) A couple of doc fixes for the http tutorial @ 2015-07-07 22:23:07 UTC

- 2071baceac4 Merge pull request #25214 from rallytime/http_doc
- d0b61f3fc1 A couple of doc fixes for the http tutorial

ISSUE #24272: (rallytime) Fix boto_vpc_test moto version check (refs: #25194)

PR #25194: (rallytime) Update moto version check in boto_vpc_test and update min version @ 2015-07-07 18:27:32 UTC

- 9dd5cd8a8e Merge pull request #25194 from rallytime/fix-24272
- f959e165a1 Clean up imports
- fbe9c0db6b Fix Pylint
- fe2561f415 Update moto version check in boto_vpc_test and update min version
- **PR #25205:** (basepi) Update releasecandidate docs @ 2015-07-07 15:25:24 UTC
  - a3e9486c28 Merge pull request #25205 from basepi/releasecandidatedocs
  - 452880d4aa Update releasecandidate docs
- **PR #25187:** (UtahDave) Doc fixes: Fix misspelling and remove extraneous double spaces @ 2015-07-07 01:07:04 UTC
  - fbafdf39a46 Merge pull request #25187 from UtahDave/fix_misspelling
  - 65abb63003 remove some extraneous double spaces
  - c423b62aa5 fix misspelling
- **PR #25182:** (cachedout) Try to re-pack long floats as strs @ 2015-07-07 01:06:43 UTC
  - ddee90ce23 Merge pull request #25182 from cachedout/pack_long_floats
  - a192ecfd74 Try to re-pack long ints as strs
- **ISSUE #23822:** (sidcarter) Zip file extracted permissions are incorrect (refs: #25128)
- **PR #25181:** (rallytime) Back-port #25102 to 2015.5 @ 2015-07-06 20:33:45 UTC
  - PR #25102: (derBroBro) Update win_network.py (refs: #25181)
  - df9982b836 Merge pull request #25102 from rallytime/bp-25102
  - 1726057ca8 Use cmd_unzip to preserve permissions
- **PR #25180:** (rallytime) Back-port #25088 to 2015.5 @ 2015-07-06 19:35:24 UTC
  - PR #25088: (supertom) Update (refs: #25180)
  - 4a406aca45 Merge pull request #25088 from rallytime/bp-25088
  - 4078c8db25 added message recommending JSON file be used if the libcloud version is >= 0.17.0
- **PR #25191:** (basepi) Add extrndest back to fileclient.is_cached in 2015.5 @ 2015-07-06 19:35:24 UTC
- PR #25117: (basepi) Fix fileclient.is_cached (refs: #25191)
  01ed062ca7 Merge pull request #25191 from basepi/fix.fileclient.is_cached
  5f744f408 Add back in the extrndest stuff (which is now in develop)

- ISSUE #25016: (martinhoefling) salt-run doc.execution fails with AttributeError (refs: #25020)
  01ed062ca7 Merge pull request #25191 from basepi/fix.fileclient.is_cached

- ISSUE #21879: (bechtoldt) Reference pages in documentation are outdated again (refs: #25019, #21880)

- ISSUE #19262: (bechtoldt) salt.pillar.file_tree doesn’t appear in the documentation (refs: #25019)
  PR #25173: (rallytime) Partial back-port of #25019 @ 2015-07-06 18:52:59 UTC
  - PR #25019: (bechtoldt) add missing module documentation to references (refs: #25173)
  - PR #24421: (bechtoldt) add missing module documentation (refs: #25019)
  - PR #21880: (bechtoldt) update references, fixes #21879 (refs: #25019)
  - PR #20039: (bechtoldt) completing some doc references (refs: #25019)
  - c70f6c6588 Merge pull request #25173 from rallytime/partial-bp-25019
  - c0c24636b4 Partial backport of #25019

- PR #25170: (rallytime) Partial back-port of #25019 @ 2015-07-06 18:51:53 UTC
  - PR #25001: (jasonkeene) Add docs for key arg in ssh_known_hosts.present (refs: #25171)
  - c5ba9a90ba Merge pull request #25171 from rallytime/bp-25001
  - a891108798 Add docs for key arg in ssh_known_hosts.present

- PR #25170: (rallytime) Partial back-port of #25019 @ 2015-07-06 18:51:53 UTC
  - PR #24982: (asyncsrc) ec2 network_interfaces fix (refs: #25170)
  - 3e06602545 Merge pull request #25170 from rallytime/bp-24982
  - 3e8eaab3ae9 ec2 network_interfaces fix

- PR #25161: (aneeshusa) Allow checking for non-normalized systemd units. @ 2015-07-06 15:15:31 UTC
  - 09602808a0 Merge pull request #25161 from aneeshusa/allow-checking-non-normalized-systemd-service-availability
  - b4d544fe70 Allow checking for non-normalized systemd units.

- PR #25151: (jleroy) Support for IPv6 addresses scopes in network.interfaces (refs: #25274, #25433) @ 2015-07-06 14:43:03 UTC
  - 3599b8abad Merge pull request #25151 from jleroy/ipv6-scope-support
  - edce09c66e Support for IPv6 addresses scopes in network.interfaces

- ISSUE #24979: (mavenAtHouzz) [Discussion] Support for more than 1 netapi.rest_tornado server process (refs: #25149)

- PR #25166: (cachedout) Lint #25149 @ 2015-07-06 14:40:29 UTC
  - PR #25149: (jacksont) SaltNado multiprocess support (refs: #25166)
- 66d365a9f Merge pull request #25166 from cachedout/lint_saltnado
- 2fe167edf8 Lint #25149

**ISSUE #24979:** (mavenAtHouzz) [Discussion] Support for more than 1 netapi.rest_tornado server process (refs: #25149)

**PR #25149:** (jacksontj) Saltnado multiprocess support (refs: #25166) @ 2015-07-06 14:38:43 UTC
  - 2f1bad1c01 Merge pull request #25149 from jacksontj/saltnado
  - 6aa5548e2d Enable multiprocess support in saltnado
  - 9a1351ead Change print to logger, so we can set a level and log exc_info

**PR #25120:** (d–j) add missing continue for exception case @ 2015-07-02 19:38:45 UTC
  - a723a0f10 Merge pull request #25120 from d–j/patch-2
  - 81d5d15dce add missing continue for error case

**PR #25117:** (basepi) Fix fileclient.is_cached (refs: #25191) @ 2015-07-02 19:38:26 UTC
  - 6e2222241a Merge pull request #25117 from basepi/fix.fileclient.is_cached
  - 38e243f6db Add fix from merge forward
  - 52f35f761a Add import
  - 23c32a7518 Backport develop version of salt.fileclient.is_cached

**PR #25087:** (0xf10e) Fix execution module for glance - now based on 2015.5! @ 2015-07-02 19:36:27 UTC
  - c80990ba4f Merge pull request #25087 from 0xf10e/fix_glance_2015.5
  - 7749cc081c PEP8 W601...
  - bbda0f9a5 fix pylint E302, E502, E713, E1305
  - 3baacc72b4 use Glance API v1 for image_create
  - c3d134d4a1 making pylint marginally happier
  - 19a20bf228 get valid properties for image_show() from the schema for "image"
  - 0c6a61173a add some debugging, fix a few AttributeErrors
  - aceca0e20d fix return of glance.image_show()
  - a47509e7dd fix return of image_list
  - 9f93ed5f9 Change confusing "nt_ks" to "g_client"
  - fa2bd1a79c bit of docs/comments in image_create()
  - 5c34d0c494 merge 439b1e42053239b into 2015.5
  - 7a3cf27948 update attributes for image_show output
  - b1bec0f1a1 fix retry w/ user/pass if token fails
  - 2f4ef6683c update attributes for image_list output
  - eef38c7048 use _auth() from neutron plus keystoneclient,

**PR #25129:** (basepi) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2015-07-02 17:37:40 UTC
  - 549ee47420 Merge pull request #25129 from basepi/merge-forward-2015.5
  - 187268d879 Merge remote-tracking branch 'upstream/2014.7' into merge-forward-2015.5

### 28.2. Previous Releases
- 36d53ef59e Merge pull request #25093 from jaybocc2/2014.7
  - 3c6a501ebda quick fix for issue #18447
- 38903a94a1 Merge pull request #25069 from puneet/patch-1

  - 3d465a574a adding states/postgres_extension unit test case.

28.2.68 Salt 2015.5.5 Release Notes

release 2015-08-20

Version 2015.5.5 is a bugfix release for 2015.5.0.

Statistics

- Total Merges: 33
- Total Issue References: 28
- Total PR References: 39
- Contributors: 20 (TheBigBear, arthurlogilab, basepi, bastiaanb, cachedout, driskell, garethgreenaway, jacobhammons, jahamm, jfindlay, rallytime, s0undt3ch, scottjack, silenius, sixninetynine, stanislavb, terminalmage, thusoy, twangboy, vr-jack)
Changelog for v2015.5.4..v2015.5.5

- ISSUE #26484: (thusoy) Git state leaks HTTPS user/pw to log (refs: #26486)
- ISSUE #26482: (thusoy) Git states doesn’t allow user-only auth (refs: #26483)
- PR #26486: (thusoy) Git: Don’t leak https user/pw to log @ 2015-08-20 16:04:52 UTC
  - PR #26483: (thusoy) Handle user-only http auth in git module (refs: #26486)
  - 28aa9b1058 Merge pull request #26486 from thusoy/git-confidential-auth
  - 5289165487 Git: Don’t leak https user/pw to log
- ISSUE #26432: (centromere) Documentation incorrectly references salt-key on the minion (refs: #26476)
- ISSUE #26403: (adelcast) Grains documentation incorrectly states they are static (refs: #26476)
- ISSUE #26329: (cro) Add note to eauth docs indicating default PAM service. (refs: #26476)
- ISSUE #26264: (grep4linux) state trees cannot have 'dots' in the name (refs: #26476)
- ISSUE #26233: (dove-young) pip install salt, then start master failed on Fedora 22 (refs: #26476)
- PR #26476: (jacobhammons) Minor doc bug fixes @ 2015-08-19 22:52:35 UTC
  - 679ba5e0a Merge pull request #26476 from jacobhammons/doc-bugs
- ISSUE #26482: (thusoy) Git states doesn’t allow user-only auth (refs: #26483)
- PR #26483: (thusoy) Handle user-only http auth in git module (refs: #26486) @ 2015-08-19 22:47:41 UTC
  - a9b28e9577 Merge pull request #26486 from thusoy/git-user-only-auth
  - 09fc934acc Handle user-only http auth in git module
- PR #26496: (jfindlay) add dateutil dependency reporting @ 2015-08-19 22:46:31 UTC
  - edc04930ae Merge pull request #26496 from jfindlay/dateutil
  - cbe330e78b add dateutil dependency reporting
- PR #26494: (cachedout) Remove unnecessary debug statements @ 2015-08-19 20:46:00 UTC
  - 4ff53b842 Merge pull request #26494 from cachedout/Remove_debug_statements
  - d717a43dce Remove unnecessary debug statements
- PR #26465: (rallytime) Back-port #26457 to 2015.5 @ 2015-08-19 16:08:16 UTC
  - PR #26457: (arthurlogilab) docstring improvement for network.ping module execution (refs: #26465)
  - f46a0dab5d Merge pull request #26465 from rallytime/bp-26457
  - b3f638ff0f docstring improvement for network.ping module execution
- PR #26434: (s0undt3ch) Fix missed typo @ 2015-08-18 18:14:29 UTC
  - c1458980f3 Merge pull request #26434 from s0undt3ch/2015.5
  - 06dcaee6ca Fix missed typo
- ISSUE #26426: (alxbse) Private/public IPs are interchanged when listing nova driver cloud nodes (refs: #26430)
- PR #26430: (rallytime) List public and private ips under the correct label @ 2015-08-18 16:20:32 UTC
  - 0f64be710f Merge pull request #26430 from rallytime/fx-26426
  - 2ba97316c9 List public and private ips under the correct label
- PR #26431: (rallytime) Back-port #26417 to 2015.5 @ 2015-08-18 15:41:58 UTC
  - PR #26417: (scottjpack) Changed t1 -> t2 micro (refs: #26431)
  - 913451a414 Merge pull request #26431 from rallytime/bp-26417
  - 0254a2e90e Changed t1 --> t2 micro
- PR #26378: (stanislavb) Fix EC2 credentials from IAM roles for s3fs and s3 ext_pillar in 2015.5 @ 2015-08-18 14:01:53 UTC
  - 952da7abaf Merge pull request #26378 from stanislavb/2015.5
  - 39ce3127cd Let utils.aws query instance metadata
- ISSUE #26245: (bradthurber) salt v2015.5.3 gitfs.py using newer pygit2 feature than required minimum (refs: #26420)
- PR #26420: (terminalmage) Only use pygit2.errors if it exists (2015.5 branch) @ 2015-08-18 14:00:01 UTC
  - 09e96dce39 Merge pull request #26420 from terminalmage/issue26245-2015.5
  - 19a1149067 Only use pygit2.errors if it exists (2015.5 branch)
- PR #26409: (basepi) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2015-08-17 23:19:56 UTC
  - c5eb66bd3e Merge pull request #26409 from basepi/merge-forward-2015.5
  - dafed10a9e Merge remote-tracking branch 'upstream/2014.7' into merge-forward-2015.5
  - da8bca9a9 Merge pull request #2642 from cro/anonldap4
    - a0d2ab1eed Remove dead code
  - 1ecf23773e Merge pull request #26216 from cro/anonldap3
  - af132d7b89 Documentation update for anonymous bind issue.
  - 2ef54b6b13 Documentation update for anonymous bind issue.
  - 5b1836bb00 Fix issue with LDAP anonymous binds.
- ISSUE #26404: (ssgward) Syntax error in lvm.vg_absent state causing failure (refs: #26406)
• PR #26406: (jfindlay) fix syntax error in lvm exec module @ 2015-08-17 21:18:25 UTC
  – 741ca6b4db Merge pull request #26406 from jfindlay/lvm
  – 81d35ff8f fix syntax error in lvm exec module

• PR #26405: (TheBigBear) dependency zip files moved to new site @ 2015-08-17 21:17:24 UTC
  – a7e2d30e2a Merge pull request #26405 from TheBigBear/patch-8
  – 8898d64918 dependency zip files moved to new site

• PR #26298: (vr-jack) Keep $HOME from being interpreted by Master shell @ 2015-08-17 21:15:11 UTC
  – cf0523a12e Merge pull request #26298 from vr-jack/2015.5
  – 1fd6f66ce3 Keep $HOME from being interpreted by Master shell

• PR #26324: (s0undt3ch) Salt is now pip installable in windows @ 2015-08-17 20:41:34 UTC
  – e0911d3302 Merge pull request #26324 from s0undt3ch/2015.5
  – e7cb3be2a0 Document the added options
  – 92a1c9572 Fix argument name
  – 72d2fd512 Add pypipwin32 >= 219 as a windows install requires.
  – b1105fc706 Allow mimicking the install setup command for develop/editable installations.
  – 26246a72ee Allow writing Salt’s _version.py when installing in develop mode.
  – 71928f2194 Prefer HTTPS, fix url argument
  – 7b2543cc7 Download the necessary DLLs for windows
  – 86692a92cd Install PyCrypto from a wheel in repo.saltstack.com under Windows
  – 915da594c2 Skip M2Crypto in Windows.
  – 1ea426e299 Move code to properly handle default requirements.
  – 8fd8ace0db3 M2CryptoWin[32,64] should only be installed on Salt < 2015.8.0
  – 0f2f193e5 Overide the develop command in cmdclass
  – a5aa752a85 Override the develop command when WITH_SETUPTOOLS is set
  – 4d68141c761 Install M2CryptoWin[32,64] while installing Salt

• ISSUE #26161: (bastiaanb) salt initscripts do not set lock file in /var/lock/subsys as required on RedHat family OSes (refs: #26371)

• PR #26371: (bastiaanb) fix issue #26161: on RedHat family systems touch /var/lock/subsys/$SERVICE to ensure the daemon will be stopped on shutdown.
  – 87151736c5 Merge pull request #26371 from bastiaanb/fix-issue-26161-salt-initscripts-dont-set-lockfile
  – ec8d4b0470 test wether RETVAL is 0 with -eq rather than =.
  – 83a5d8e41e fix issue #26161: on RedHat family systems touch /var/lock/subsys/$SERVICE to ensure the daemon will be stopped on shutdown.

• ISSUE #25801: (themalkolm) Update docs that salt.states.winrepo requires roles:salt-master in grains. (refs: #26328)

• ISSUE #25562: (jefftucker) winrepo state does not run on masterless minion (refs: #26328)

• PR #26402: (twangboy) Removed documentation no longer required @ 2015-08-17 20:35:37 UTC
- PR #26328: (twangboy) Removed salt-master role requirement (refs: #26402)
  - 89602f56ad Merge pull request #26402 from twangboy/fix_26328
  - ad5fa03b76 Removed documentation no longer required
- PR #26392: (rallytime) Back-port #26376 to 2015.5 @ 2015-08-17 19:39:51 UTC
  - PR #26376: (TheBigBear) minor edit spelling (refs: #26392)
  - eb373e5904 Merge pull request #26392 from rallytime/bp-26376
  - a013bb5b3d minor edit
- ISSUE #16049: (ryan-lane) boto_elb.present state requires attributes argument (refs: #26342)
- PR #26342: (rallytime) Don’t call boto_elb._attributes_present if no attributes were provided @ 2015-08-17 19:19:08 UTC
  - 8bb57d1631 Merge pull request #26342 from rallytime/fix-16049
  - 211f6feaf5 Fix test failures - get_attributes shouldn’t be called if none are provided
  - d8ad023e88 Don’t call boto_elb._attributes_present if no attributes were provided
- ISSUE #26155: (silentius) pip availability in states/pip_state (refs: #26160)
- PR #26389: (rallytime) Back-port #26160 to 2015.5 @ 2015-08-17 19:09:16 UTC
  - PR #26160: (silentius) proposed fix for #26155 (refs: #26389)
  - 2fd1e06343 Merge pull request #26389 from rallytime/bp-26160
  - f0bc3765d9 No logging should happen on __virtual__
  - ca406eaf3c proposed fix for #26155
- ISSUE #26266: (o-sleep) limit pw_user.getent() from returning entire corporate list (refs: #26300)
- PR #26300: (jfindlay) mock pwd function calls in pw_user exec module @ 2015-08-17 18:56:41 UTC
  - 0046c6cfed Merge pull request #26300 from jfindlay/pw_test
  - 7e94989403 mock pwd calls in pw_user exec mod test
  - 26f5b466f5 check for pwd on linux and BSD user exec mods
- ISSUE #24334: (afletch) autosign_timeout not honoured (refs: #26386)
- PR #26386: (jahamm) Fixes autosign_timeout usage in check_autosign_dir @ 2015-08-17 18:34:40 UTC
  - 709499438b Merge pull request #26386 from jahamm/fix-autosign_timeout
  - b2fa2ac9d3 Fixes autosign_timeout usage in check_autosign_dir
- ISSUE #25801: (themalkolm) Update docs that salt.states.winrepo requires roles:salt-master in grains. (refs: #26328)
- ISSUE #25562: (jefftucker) winrepo state does not run on masterless minion (refs: #26328)
- PR #26328: (twangboy) Removed salt-master role requirement (refs: #26402) @ 2015-08-17 18:30:17 UTC
  - 8d901d7b15 Merge pull request #26328 from twangboy/fix_25562
  - d4ca1dcbf Removed salt-master role requirement
- ISSUE #26327: (bradthurber) mount.mounted opts incorrect "forced unmount and mount because options (tcp) changed" (refs: #26362)
- PR #26362: (garethgreenaway) Fixes to mount state. @ 2015-08-17 17:44:55 UTC
Some mount options are translated to different options once a share has been mounted, e.g. when specifying a protocol for NFS as either tcp or udp this option is translated into either proto=tcp or proto=udp. Change adds a lookup dictionary for these options so that a re-mount isn’t forced each time.

- **PR #26379**: (s0undt3ch) [2015.5] Backport #26353 @ 2015-08-17 17:19:29 UTC
  - PR #26353: (sixninetynine) fixed a typo in setup.py (refs: #26379)
  - 7d3bd90c98 Merge pull request #26379 from s0undt3ch/issues/backport-26353
  - 33ed315c85 fixed Packaing -> Packaging typo and added a couple comments on the setuptools/distutils abstract methods

- **ISSUE #26240**: (0xf10e) keystone.user_get raises exception when user is not found (refs: #26277)

- **PR #26277**: (rallytime) Handle exception when user is not found in keystone.user_get @ 2015-08-14 19:41:59 UTC
  - bcca1b4c5a Merge pull request #26277 from rallytime/fixed-26240
  - 0b6977335e Clean it up
  - 5edabfd271 It’s a dict - git problems...
  - 39d3eb66f0 Log error and return error - make returns consistent.
  - 49647d862 Handle exception when user is not found in keystone.get_user

- **ISSUE #24484**: (bailsman) clouds/ec2.py: create_snapshot throws exception (refs: #26326)

- **PR #26326**: (rallytime) Make ec2.create_snapshot return less unwieldy and more relevant @ 2015-08-14 19:40:47 UTC
  - 78be3a826f Merge pull request #26326 from rallytime/create_snapshot_return
  - c5395db851 Make ec2.create_snapshot return less unwieldy and more relevant

- **ISSUE #16179**: (UtahDave) Salt Cloud -l debug includes the entire bootstrap script twice in its output (refs: #26306)

- **PR #26306**: (rallytime) Move VM creation details dict to log.trace @ 2015-08-14 17:39:52 UTC
  - 44c9d3063b Merge pull request #26306 from rallytime/fixed-16179
  - 670464258f Move VM creation details dict to log.trace

### 28.2.69 Salt 2015.5.6 Release Notes

release 2015-10-13

Version 2015.5.6 is a bugfix release for **2015.5.0**.

#### Statistics

- Total Merges: 145
- Total Issue References: 71
- Total PR References: 178
Security Fixes

CVE-2015-6941 The Windows user module and salt-cloud display passwords in log when log level is set to debug or more verbose.

For the Windows user module, the password is now replaced with the string XXX-REDACTED-XXX.

For salt-cloud, debug logging no longer displays win_password and sudo_password authentication credentials.

CVE-2015-6918 Git state/execution modules log HTTPS auth credentials when log level is set to debug or more verbose.

These credentials are now replaced with REDACTED in the debug output. Thanks to Andreas Stieger <asteiger@suse.com> for bringing this to our attention.

Changelog for v2015.5.5..v2015.5.6

Generated at: 2018-05-27 22:13:00 UTC

* PR #27582: (jfindlay) add 2015.5.6 release notes @ 2015-09-30 22:33:48 UTC
  - 304dc68f7f Merge pull request #27582 from jfindlay/2015.5
  - 4f0d55cdad add 2015.5.6 release notes

* ISSUE #27518: (srkunze) [Docs] Relationship between Mine and Grains (refs: #27557)

* PR #27557: (jfindlay) add doc motivating mine vs grains @ 2015-09-30 17:49:46 UTC
  - 7201ce71e4 Merge pull request #27557 from jfindlay/mine_doc
  - 3727d79bad edit mine doc for style and markup
  - 7e037a4666 add doc motivating mine vs grains

* ISSUE #27478: (rominf) iptables state fails to save rules (refs: #27515)

* PR #27515: (jfindlay) save iptables rules on SuSE @ 2015-09-30 16:09:42 UTC
  - 59c3d5f93e Merge pull request #27515 from jfindlay/suse_fire
  - 4460ad2785 save iptables rules on SuSE

* ISSUE #27460: (llevar) Orchestrate runner not resolving reference to a built in state (refs: #27509)

* PR #27509: (jfindlay) tell the user why the gluster module does not work @ 2015-09-30 15:49:16 UTC
  - 9b26357b19 Merge pull request #27509 from jfindlay/gluster_reason
  - 1ceda538d2 tell the user why the gluster module does not work

* ISSUE #27372: (GregMeno) pip.installed state fails when env_vars is not a dict (refs: #27379)

* PR #27379: (jfindlay) document and check dict type for pip env_vars @ 2015-09-30 02:56:52 UTC
  - 989733ea86 Merge pull request #27379 from jfindlay/pip_vars
- aee5ffdef document and check dict type for pip env_vars

- **PR #27516**: (basepi) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2015-09-29 17:53:33 UTC
  - 6d773f66c3 Merge pull request #27516 from basepi/merge-forward-2015.5
  - a08951f0fa Merge remote-tracking branch 'upstream/2014.7' into merge-forward-2015.5
  - 5262f01325 Merge pull request #27335 from rallytime/cloud-logging-7
    - adeb1dca4 Pylint Fix
    - 588c13783c Salt-cloud logging clean up for windows functions
    - 9b6000135c [2014.7] Fixup salt-cloud logging

- **ISSUE #27447**: (junster1) Fix mysql table size for salt_events (refs: #27472)

- **PR #27472**: (cachedout) Change recommended schema for data field in mysql event table @ 2015-09-29 15:49:37 UTC
  - 68d7843dd Merge pull request #27472 from cachedout/fix_27447
  - 5e745ad6da Change recommended schema for data field in mysql event table

- **PR #27468**: (cachedout) Fix 27351 @ 2015-09-29 15:35:29 UTC

- **ISSUE #27438**: (aboe76) can’t set system locale on OpenSuse SUse (refs: #27479)

- **PR #27479**: (aboe76) fix locale on opensuse and suso #27438 @ 2015-09-29 15:34:48 UTC
  - a214cf84e Merge pull request #27479 from aboe76/fix_locale_suse
  - 0bc37c0d41 Fix test
  - f9a19720de fix sysctl truncating newline on os x

- **ISSUE #17103**: (arthurlogilab) salt is looking for outputters in /var/cache/salt/minion/extmods/output not /var/cache/salt/minion/extmods/outputputters (refs: #27483)

- **PR #27483**: (rallytime) Outputters should sync to output, not outputters, on the minion. @ 2015-09-29 15:33:08 UTC
  - 931f59b51 Merge pull request #27483 from rallytime/fix-17103
  - 441241eb90 Change sync_outputters to sync_output for consistency, but alias sync_outputters
  - 105528720b Outputters should sync to output, not outputters, on the minion.

- **PR #27484**: (rallytime) Back-port #27434 and #27470 to 2015.5 @ 2015-09-29 15:32:03 UTC
  - PR #27470: (cachedout) Minor doc fixup. (refs: #27484)
  - PR #27434: (netroby) Doc: copy key to server via ssh-copy-id (refs: #27484, #27470)
  - 9c2c028953 Merge pull request #27484 from rallytime/bp-27434-and-27470
  - 5de2ee35ab Minor doc fixup.
  - af656c7e87 Doc: copy key to server via ssh-copy-id

- **ISSUE #27433**: (TheBigBear) winrepo - drops "trailing zeroes" from version numbers on un-install? (refs: #27469)
• PR #27469: (twangboy) Added quotes to version numbers example @ 2015-09-28 21:54:43 UTC
  - 927874d316 Merge pull request #27469 from twangboy/fix_27433
  - a996ea46e2 Added quotes to version numbers example
• ISSUE #27342: (ariscn) File.managed silent fail for contents_pillar (refs: #27375, #27467)
• PR #27467: (cachedout) file.managed: check contents_{{pillar|grain}} result @ 2015-09-28 20:22:16 UTC
  - PR #27375: (jfindlay) file.managed: check contents_{{pillar|grain}} result (refs: #27467)
  - 382a53403f Merge pull request #27467 from cachedout/lint_27375
  - 4e54a98f5e Lint #27375

• ISSUE #27316: (efficks) Extracted state with zip format failed on Windows (refs: #27317)

• PR #27317: (efficks) State unzip should use unzip command instead of unzip_cmd. @ 2015-09-23 14:41:36 UTC
  - a372466922 Merge pull request #27317 from efficks/fix27316
  - bfc16c101e State unzip should use unzip command instead of unzip_cmd. Issue #27316

• ISSUE #15514: (flyaruu) Calling a boto_route53.present state fails if the record is already there (refs: #27309)

• PR #27309: (rallytime) Change a value list to a comma-separated string in boto_route53.present @ 2015-09-23 14:30:50 UTC
  - bd3771e80f Merge pull request #27309 from rallytime/fix-15514
  - 9383d91ff8 Change a value list to a comma-separated string in boto_route53.present

• ISSUE #27297: (JensRantil) file.replace documentation improvement (refs: #27311)

• PR #27311: (jfindlay) discuss replacement occurrences in file doc @ 2015-09-22 22:23:10 UTC
  - b5fe944875 Merge pull request #27311 from jfindlay/maxoc
  - 8ec2e921bd discuss replacement occurrences in file doc

• PR #27310: (basepi) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2015-09-22 21:08:41 UTC
  - ca4597b93a Merge pull request #27310 from basepi/merge-forward-2015.5
  - 7b75e4aed1 Merge remote-tracking branch 'upstream/2014.7' into merge-forward-2015.5
  - e90412d3b8 Merge pull request #27252 from jfindlay/version.2014.7
    * 3d28307a00 2014.7 => 2014.7.0

• ISSUE #27307: (terminalmage) Regression in yumpkg’s refresh_db function (refs: #27308)
- **PR #27308**: (terminalmage) Fix refresh_db regression in yumpkg.py @ 2015-09-22 21:07:28 UTC
  - 982c21c79f Merge pull request #27308 from terminalmage/fix-refresh_db-regression
  - 77686f7b7ce Fix refresh_db regression in yumpkg.py
- **PR #27286**: (terminalmage) Add a configurable timer for minion return retries @ 2015-09-22 16:35:07 UTC
  - 775a4f9ad0 Merge pull request #27286 from terminalmage/return_retry_timer
  - 540a7dfcf1 Add default values for new minion config options
  - 453b883820 Add a configurable timer for minion return retries
- **PR #27278**: (rallytime) Back-port #27256 to 2015.5 @ 2015-09-21 19:27:51 UTC
  - **PR #27256**: (julianbrost) Fix error handling in salt.modules.file.statvfs (refs: #27278)
  - 02482c0572 Merge pull request #27256 from rallytime/bp-27256
  - 1beddf6311 Fix error handling in salt.modules.file.statvfs
- **PR #27277**: (rallytime) Back-port #27230 to 2015.5 @ 2015-09-21 19:06:14 UTC
  - **PR #27230**: (benhosmer) Fix typo in AWS doc config (refs: #27277)
  - e36c019c37 Merge pull request #27230 from rallytime/bp-27230
  - 3ce77db1bc Fix typo in AWS doc config
- **PR #27253**: (jfindlay) 2015.5 -> 2015.5.0 @ 2015-09-18 23:44:43 UTC
  - b22286476e Merge pull request #27253 from jfindlay/version.2015.5
  - 967e3bb72a 2015.5 -> 2015.5.0
- **PR #27244**: (garethgreenaway) Exception in cloud.ec2.create_snapshot @ 2015-09-18 21:41:11 UTC
  - 51a0193b54 Merge pull request #27244 from garethgreenaway/ec2_create_snapshot_no_return_data_exception
  - 820f6576b9 Fixing the cause when the r_data from aws.query is empty and an exception happens when looking for the snapshotID
- **ISSUE #27215**: (wfhu) cron.file override the crontab file even if there’s no change (refs: #27231)
- **PR #27231**: (jfindlay) only write cron file if it is changed @ 2015-09-18 18:23:10 UTC
  - 26540f15bc Merge pull request #27231 from jfindlay/cronchange
  - 1e335297e2 only write cron file if it is changed
- **PR #27233**: (basepi) [2015.5] Add stub release notes for 2015.5.6 @ 2015-09-18 16:55:40 UTC
  - 579f375f74 Merge pull request #27233 from basepi/release.notes.stubs
  - f4563ea9b7 Add stub release notes for 2015.5.6
- **ISSUE #25423**: (tweenk) Impossible to define a file.managed for use only as a template in "use" requisites (refs: #27208)
- **PR #27208**: (basepi) [2015.5] Add test.nop state @ 2015-09-18 16:50:17 UTC
  - f5a322e3f2 Merge pull request #27208 from basepi/nop.state.25423
  - 9414b05b2c Add test.nop example
  - a84ce67b8f Add test.nop state
- **ISSUE #27187**: (SeverinLeonhardt) ssh_known_hosts.present hashes other entries even with hash_hostname: false (refs: #27201)
88.2. Previous Releases

- PR #27201: (jfindlay) rename hash_hostname to hash_known_hosts @ 2015-09-18 15:45:03 UTC
  - 59a07cae68 Merge pull request #27201 from jfindlay/sshhash
  - 1b620b77cd rename hash_host arg to hash_known_hosts
  - 12f14ae37c update hash_known_hosts docs in ssh module
- PR #27214: (jacksontj) Correctly support https, port 443 is not a requirement @ 2015-09-18 15:43:05 UTC
  - 560545c4c5 Merge pull request #27214 from jacksontj/2015.5
  - e7526db44 Correctly support https, port 443 is not a requirement
- ISSUE #18582: (mainframe) Allow merging file_roots and pillar_roots from different config files included from master.d (refs: #27150)
- PR #27172: (rallytime) Back-port #27150 to 2015.5 @ 2015-09-17 17:25:51 UTC
  - PR #27150: (cachedout) Merge config values from master.d/minion.d conf files (refs: #27172)
  - 7a34c7742d Merge pull request #27172 from rallytime/bp-27150
  - 0d7ee4b209 Merge config values from master.d/minion.d conf files
- PR #27194: (rallytime) Back-port #27180 to 2015.5 @ 2015-09-17 16:17:24 UTC
  - PR #27180: (tankywoo) file copy ret result True if no change in test mode (refs: #27194)
  - e956d88f5f Merge pull request #27194 from rallytime/bp-27180
  - 327d343efc file copy ret result True if no change in test mode

  - a02d043309 Merge pull request #27176 from basepi/merge-forward-2015.5
  - 66f4641be3 Merge remote-tracking branch 'upstream/2014.7' into merge-forward-2015.5
  - c186e51764 Merge pull request #27117 from jacobhammons/release-docs-2014.7
    - b69e11e044 made 2014.7 an archived release minor doc site updates
    - 69d758ee2b Merge pull request #27114 from cachedout/warn_on_insecure_log
    - 507fb04683 Issue warning that some log levels may contain sensitive data
    - aa71bae8aa Merge pull request #27075 from twangboy/fix_password_2014.7
    - c0689e3215 Replaced password with redacted when displayed
- PR #27170: (rallytime) Update Getting Started with GCE docs to use cloud.profiles or cloud.profiles.d examples @ 2015-09-16 22:23:51 UTC
  - de207426e Merge pull request #27170 from rallytime/gce-docs
  - a07db909bd Update Getting Started with GCE docs to use cloud.profiles or cloud.profiles.d examples
- PR #27167: (rallytime) Back-port #27148 to 2015.5 @ 2015-09-16 19:56:01 UTC
  - PR #27148: (hexedpackets) Pass file pointers to the serialize load functions. (refs: #27167)
  - 28cfdf0d67 Merge pull request #27167 from rallytime/bp-27148
  - d12be52355 Pass filepointers to the serialize load functions.
- ISSUE #27157: (alxbse) salt.util.smb loads even when impacket library is missing (refs: #27168)
- PR #27168: (techhat) Add further gating of impacket library @ 2015-09-16 18:55:56 UTC
  - 4495f4f4d0 Merge pull request #27168 from techhat/gateimpacket
- cc448bfdc1 Add further gating of impactool library

- **ISSUE #27100**: (hexedpackets) salt-cloud --full-query does nothing when no VM profiles are configured (refs: #27166)

- **PR #27166**: (rallytime) Allow a full-query for EC2, even if there are no profiles defined @ 2015-09-16 17:41:40 UTC
  - 3e5ef0dc30 Merge pull request #27166 from rallytime/fix-27100
  - 50fb3a489a Allow a full-query for EC2, even if there are no profiles defined

- **PR #27162**: (rallytime) Be explicit in using "SoftLayer" for service queries in SoftLayer drivers @ 2015-09-16 16:43:26 UTC
  - f1ec9de7ed9 Merge pull request #27162 from rallytime/softlayer-service
  - d281068c70 Be explicit in using "SoftLayer" for service queries in SoftLayer drivers

- **ISSUE #27133**: (deniswal) win_path.add causes the value data to be set as the value and vice versa (refs: #27149)

- **PR #27149**: (twangboy) Fixed problem with add/remove path @ 2015-09-16 15:01:48 UTC
  - 59e988f88e Merge pull request #27149 from twangboy/fix_27133
  - 7992b7e20a Fixed some tests... hopefully...
  - d4c8e305d Fixed problem with add/remove path

- **ISSUE #11669**: (jcockhren) salt.cloud is out of date for new google compute engine dashboard and API (refs: #27147)

- **PR #27147**: (rallytime) Enforce bounds in the GCE Regex @ 2015-09-15 21:51:55 UTC
  - 097fcd1017 Merge pull request #27147 from rallytime/fix-11669
  - 55312ea03f Provide a more friendly error message.
  - 36555856c7 Enforce bounds in the GCE Regex

- **PR #27128**: (eguven) don’t show diff for test run if show_diff=False @ 2015-09-15 14:11:55 UTC
  - f3c3f157dd Merge pull request #27128 from eguven/2015.5-fix-test-diff
  - ec26a88a4a don’t show diff for test run if show_diff=False

- **PR #27116**: (jacobhammons) Update latest to 2015.8, 2015.5 is now previous @ 2015-09-15 07:34:28 UTC
  - 088b1dbb3e Merge pull request #27116 from jacobhammons/release-docs-2015.5
  - 6e323b6d3 Update latest to 2015.8, 2015.5 is now previous Assorted style and minor updates

- **ISSUE #25352**: (m03) reg.absent reporting incorrect results (refs: #27019)

- **PR #27033**: (jfindlay) Merge #27019 @ 2015-09-15 07:32:17 UTC
  - **PR #27019**: (twangboy) Fixed reg state module for None, 0, and " values (refs: #27033)
  - 440855b182 Merge pull request #27033 from jfindlay/n0ne
  - 3334b9d548 fix comment and unit test for reg state
  - 391a79d5ac update reg state unit tests
  - ebbf2b05ca Fixed reg state module for None, 0, and " values

- **ISSUE #17088**: (umireon) state.dockerio.run: docked_onlyif and docked_unless do not work (refs: #26942)

- **PR #26942**: (Arabus) Fix docker.run @ 2015-09-14 18:10:54 UTC
- 35fc74132a Merge pull request #26942 from Arabus/fix-docker.run
- e61e1de1f5 Fixes value typo for dockerio.loaded state
- 39fa11b696 further linting
- 4aec37397c Further Linting to quiet the linter
- 7eff8ad070 Code Linting and cmd call fix
- a51676e0eb Fixes #17088 dyil and unless should run on the host
- d0c6128b8f Fixes #17088 retcode now returns True or False based on return status
- 8b2e7cc4f5 Syntax clarification

- PR #26977: (abh) Add support for PEERNTP network interface configuration @ 2015-09-14 17:59:00 UTC
  - 59f2a0c7ae Merge pull request #26977 from abh/2015.5-ntppeer
  - df3d6e817f Add support for PEERNTP network interface configuration on RH derived systems

- ISSUE #27021: (SEJeff) webutil.user_exists state does not respect test=true (refs: #27023)

- ISSUE #21533: (aspyatkin) Add option specifying user to run htpasswd module functions (refs: #21649)

- PR #27023: (jffindlay) add test support for htpasswd state mod @ 2015-09-14 17:48:00 UTC
  - PR #21649: (aspyatkin) Make enhancements to htpasswd modules (refs: #27023)
  - e05bf13951 Merge pull request #27023 from jffindlay/htwebutilpass
  - 9f3d7890a6 add test support for htpasswd state mod

- PR #27074: (twangboy) Replaced password with redacted when displayed @ 2015-09-14 16:27:26 UTC
  - 9f999c0027 Merge pull request #27074 from twangboy/fix_password_2015.5
  - fdd3537456 Replaced password with redacted when displayed

- PR #27073: (rallytime) Remove "use develop branch" warning from LXC tutorial @ 2015-09-11 23:51:06 UTC
  - 46b44f85ed Merge pull request #27073 from rallytime/remove-lxc-warning
  - 76e056d02b Remove "use develop branch" warning from LXC tutorial now that 2015.5.0 has been released

- PR #27054: (rallytime) Back-port #27029 to 2015.5 @ 2015-09-11 22:29:45 UTC
  - PR #27029: (spudfkc) Removed check for no package name (refs: #27054)
  - caab21d99c Merge pull request #27054 from rallytime/bp-27029
  - 0be393be22 Removed check for no package name

- PR #27053: (rallytime) Back-port #26992 to 2015.5 @ 2015-09-11 22:29:30 UTC
  - PR #26992: (plastikos) Summary requires full return information. (refs: #27053)
  - 0227e1cb57 Merge pull request #27053 from rallytime/bp-26992
  - 8379aff3c Do not use full return for documentation.
  - d9d5bba68 Summary requires full return information.

- PR #27052: (rallytime) Back-port #26930 to 2015.5 @ 2015-09-11 22:28:11 UTC
  - PR #26930: (madprog) aptpkg.mod_repo: Raise when key_url doesn’t exist (refs: #27052)
  - b72a0ef86d Merge pull request #27052 from rallytime/bp-26930
  - d9787aa318 aptpkg.mod_repo: Raise when key_url doesn’t exist

28.2. Previous Releases
• PR #27049: (johanek) Run repoquery less @ 2015-09-11 22:26:12 UTC
  - 8b554dd16f Merge pull request #27049 from johanek/repoquery-dedupe
  - c113916a23 When running repoquery to check for available versions of packages, run once for all packages rather than once per package
• PR #27070: (stanislavb) Deprecate salt.utils.iam in Carbon @ 2015-09-11 22:01:57 UTC
  - PR #26561: (stanislavb) Leave salt.utils.s3 location fallback to salt.utils.aws (refs: #27070)
  - PR #26446: (stanislavb) Fetch AWS region from EC2 instance metadata (refs: #26561)
  - PR #26378: (stanislavb) Fix EC2 credentials from IAM roles for s3fs and s3 ext_pillar in 2015.5 (refs: #26446)
  - cc2cbf9869 Merge pull request #27070 from stanislavb/2015.5
  - 1e65d7e9c9 Deprecate salt.utils.iam in Carbon
• PR #27030: (jfindlay) Backport #26938 @ 2015-09-11 15:10:46 UTC
  - PR #27004: (vtek21) Fix 'dict' object has no attribute split (refs: #27024, #27030)
  - PR #26938: (derphilipp) Fixes win_path module, migrates from reg.(set|get)_key to reg.(set|get)_value (refs: #27030)
  - e23caaa8cf Merge pull request #27030 from jfindlay/winreg
  - 120f1e7ba0 remove trailing line in win_path exec module
  - b36a7107b2 update win_path exec module unit tests
  - a2dc6f2dd7 Fixes win_path module, migrates from reg.(set|get)_key to reg.(set|get)_value
• ISSUE #25581: (b18) Salt 2015.5.2 - Could not deserialize msgpack message error. (refs: #27025)
• PR #27025: (cachedout) Better try and error handling for prep_jid @ 2015-09-11 07:40:10 UTC
  - 843c28b435 Merge pull request #27025 from cachedout/issue_25581
  - ecc09d9b93 Lint
  - bfcab9ef4 Better try and error handling for prep_jid
• PR #27035: (terminalmage) useradd.py: Use contextmanager to prevent leaked filehandles @ 2015-09-11 07:39:41 UTC
  - b9baa0b39a Merge pull request #27035 from terminalmage/useradd-contextmanager
  - e430e976fc Update user states to reflect changes to login class handling
  - f24ab979c7c useradd.py: Use contextmanager to prevent leaked filehandles
• PR #27034: (rallytime) Update softlayer docs for where to find apikey @ 2015-09-10 22:29:56 UTC
  - 1cd8df7a92 Merge pull request #27034 from rallytime/softlayer-doc-fix
  - cb641f8145 Update softlayer docs for where to find apikey
• PR #27024: (rallytime) Back-port #27004 to 2015.5 @ 2015-09-10 21:14:21 UTC
  - PR #27004: (vtek21) Fix 'dict' object has no attribute split (refs: #27024, #27030)
  - 9e063f01a Merge pull request #27024 from rallytime/bp-27004
  - 54d6fcf4c7 Fix 'dict' object has no attribute split
  - bb29d73c71 Fix 'dict' object has no attribute split
- 5f1a9c46aa Fix `dict` object has no attribute split
- 2bfdd9724e Fix `dict` object has no attribute split

- **PR #27027**: (rallytime) Back-port #27013 to 2015.5 @ 2015-09-10 21:13:52 UTC
  - PR #27013: (nmadhok) Remove unwanted debug statement (refs: #27027)
  - 9ab2cae1e4 Merge pull request #27027 from rallytime/bp-27013
  - 19a6e9cb1c Remove unwanted debug statement.

- **PR #27026**: (rallytime) Back-port #27011 to 2015.5 @ 2015-09-10 21:13:45 UTC
  - PR #27011: (whiteinge) Move giant eventlisten.sh example out of the state.event docstring (refs: #27026)
  - 2c8beb238f Merge pull request #27026 from rallytime/bp-27011
  - 8518d545f Move giant eventlisten.sh example out of the state.event docstring

- **ISSUE #20522**: (eliasp) modules.win_pkg.install() blindly trusts fileclient.get_url()/unhandled exceptions (refs: #26972)

- **PR #26972**: (twangboy) Catch the 404 error from fileclient @ 2015-09-10 20:53:12 UTC
  - e8dc6f2f7 Merge pull request #26972 from twangboy/fx_20522
  - 011076fa9 Catch the 404 error from fileclient

- **PR #26951**: (terminalmage) Fix timezone module for CentOS @ 2015-09-10 20:46:07 UTC
  - fbe95f4b85 Merge pull request #26951 from terminalmage/fix-timezone
  - 30a4915762 Update tests to reflect changes to timezone module
  - 8f926919f Fix timezone module for CentOS

- **PR #26875**: (marccardinal) LXC gateway provisioned only when IP is provided @ 2015-09-10 19:31:32 UTC
  - 92ad3c333c Merge pull request #26875 from marccardinal/patch-2
  - 36d5a62262 LXC gateway provisioned only when IP is provided

- **ISSUE #26730**: (styro) __opts__['user'] on Windows minion incorrect (eg for file.symlink) (refs: #26997, #salt-stack/salt#26899

- **PR #26997**: (twangboy) Fixed symlinks for windows (don’t use user root) @ 2015-09-10 18:54:50 UTC
  - PR #26899: (twangboy) file.symlink gets windows account instead of root (refs: #26997)
  - 7b2e7b1b37 Merge pull request #26997 from twangboy/fx_symlink_windows
  - 89cc02d4e0 Added versionadded
  - 835177b0c8 Fixed symlinks for windows (don’t use user root)

- **PR #27001**: (twangboy) Added CLI Example for reg.delete_key_recursive @ 2015-09-10 17:19:43 UTC
  - 5389a85894 Merge pull request #27001 from twangboy/fx_reg_docs
  - 2980bbda17 Minor clarification
  - 468bf2dd1 Added CLI example for reg.delete_key_recursive

- **PR #26996**: (jacobhammons) Beacon doc updates @ 2015-09-10 16:47:49 UTC
  - 37814f5dff Merge pull request #26996 from jacobhammons/beacon-doc
  - e475ea688e Fixed typo
  - 2401533d9e New content added to beacon docs.
- **ISSUE #26867**: (joejulian) lvm pv’s can show as not belonging to their vg if symlink is used (refs: #26868)
- **PR #26868**: (joejulian) Use the actual device name when checking vgdisplay @ 2015-09-10 16:08:16 UTC
  - 4ba7eed711 Merge pull request #26868 from joejulian/2015.5_lvm_vg_symlink_fix
  - 3dfb53849a Use the actual device name when checking vgdisplay
- **PR #26955**: (dsumsky) S3 ext_pillar module has broken caching mechanism (backport to 2015.5) @ 2015-09-10 14:54:01 UTC
  - 1537e945be Merge pull request #26955 from dsumsky/s3-pillar-module-cache-fix-2015.5
  - 8219acfe7 - fixed pylint warnings
  - a3b10e8ab1 - fixed broken caching in S3 ext_pillar module (file_md5 was a list) - added debugging messages - static parameters are available as module parameters now
- **PR #26987**: (rallytime) Back-port #26966 to 2015.5 @ 2015-09-09 18:42:51 UTC
  - PR #26966: (TheBigBear) URL has changed (refs: #26987)
  - 3e902e86b1 Merge pull request #26987 from rallytime/bp-26966
  - 6a29eac003 URL has changed
- **PR #26915**: (rallytime) Update Joyent Cloud Tests @ 2015-09-09 15:04:50 UTC
  - eddb532713 Merge pull request #26915 from rallytime/joyent-tests
  - d4ad42d697 Update Joyent Cloud Tests
- **PR #26971**: (rallytime) Fix a couple of typos in reactor docs @ 2015-09-09 15:03:54 UTC
  - f68614b2ad Merge pull request #26971 from rallytime/reactor-doc-fix
  - 0214daad19 Fix a couple of typos in reactor docs
- **ISSUE #26730**: (styro) __opts__['user'] on Windows minion incorrect (eg for file.symlink) (refs: #26997, saltstack/salt#26899)
  - PR saltstack/salt#26899: (twangboy) file.symlink gets windows account instead of root (refs: #26976)
- **PR #26976**: (thatch45) Revert "file.symlink gets windows account instead of root" @ 2015-09-08 22:44:19 UTC
  - 57b1080f94 Merge pull request #26976 from saltstack/revert-26899-fix_26730
  - 6dd54e6bce Revert "file.symlink gets windows account instead of root"
- **PR #26975**: (whiteinge) Remove mocks from rest_cherrypy integration tests; fix groups check bug @ 2015-09-08 22:34:08 UTC
  - 67be01f5fe Merge pull request #26975 from whiteinge/rest_cherrypy-integration
  - 9a0989585b Add additional 'groups' check to rest_cherrypy if groups are not used
  - d68ae4c6fe Remove mocks from rest_cherrypy integration tests
  - 2aa3da8911 Rename the rest_cherrypy tests to conform to our convention
- **ISSUE #26730**: (styro) __opts__['user'] on Windows minion incorrect (eg for file.symlink) (refs: #26997, saltstack/salt#26899)
- **PR #26899**: (twangboy) file.symlink gets windows account instead of root (refs: #26997) @ 2015-09-08 21:14:30 UTC
  - 20a48f7f2e Merge pull request #26899 from twangboy/fix_26730
  - 9d9b3bb47a file.symlink gets windows account instead of root
• PR #26960: (rallytime) Fix bash code block formatting in CherryPy netapi docs @ 2015-09-08 18:14:11 UTC
  – dbc6b862f4 Merge pull request #26960 from rallytime/cherrypy-docs
  – c1420711db Fix bash code block formatting
• PR #26940: (rallytime) Fix minor doc typo in client api @ 2015-09-08 04:15:00 UTC
  – f733e048c9 Merge pull request #26940 from rallytime/api-doc-fix
  – 00fe6a225c Fix minor doc typo in client api
• ISSUE #26850: (jfindlay) salt-ssh error on 2015.8 (refs: #26852)
• PR #26871: (rallytime) Back-port #26852 to 2015.5 @ 2015-09-08 03:43:08 UTC
  – PR #26852: (basepi) [2015.8] Only reference msgpack if it imported successfully (refs: #26871)
  – de9350466e Merge pull request #26871 from rallytime/bp-26852
  – 5a4c882d2f5 Only reference msgpack if it imported successfully
• ISSUE #26644: (gravyboat) pkgrepo should note that for ubuntu/debian all options should not be used (refs: #26800, #26851)
• ISSUE #26638: (WackyOne) Suse install documentation (refs: #26800, #26851)
• PR #26851: (jacobhammons) states/pkgrepo examples, suse installation updates @ 2015-09-02 18:29:09 UTC
  – a563a929d3 Merge pull request #26851 from jacobhammons/doc-bugs
  – ac39d47440 states/pkgrepo examples, suse installation updates Refs #26644 Refs #26638
• ISSUE #26804: (lrhazi) gpasswd error on RHEL 5 (refs: #26817)
• PR #26817: (jfindlay) modify groupadd for rhel 5 @ 2015-09-02 14:52:53 UTC
  – 5b1b934912 Merge pull request #26817 from jfindlay/grouparg
  – 82d3993f3 modify groupadd for rhel 5
• ISSUE #22724: (ty2u) digital_ocean_v2.py doesn’t restore snapshot (refs: #26824)
• PR #26824: (systembell) [salt-cloud] Fix creating droplet from snapshot in digital_ocean provider @ 2015-09-02 05:18:37 UTC
  – cdc0e2af3 Merge pull request #26824 from pravka/fixedroplet-creation-from-snapshot-in-dov2
  – 00e3192536 removing log
  – e4a82d78d9 removing stringification of every value in the image dict
  – cdc2b4584a fixing condition for slug check
• ISSUE #26805: (joejulian) cur_param referenced before assignment (refs: #26823, #26820)
• PR #26823: (joejulian) use dbus instead of localectl @ 2015-09-02 00:25:25 UTC
  – 4af6951a4c Merge pull request #26823 from joejulian/ctlfix
  – a9928cb143 pep8 fixes
  – 6108ec4280 Gated dbus for os families that use it
  – e154c7b16f remove trailing spaces
  – c1c1266cc3 fix indent change
  – 0a35320aa7 Use dbus directly
• ISSUE #26805: (joejulian) cur_param referenced before assignment (refs: #26823, #26820)
• PR #26820: (jfindlay) add default param in _parse_localectl in locale mod @ 2015-09-01 22:02:17 UTC
  – a1749b76b8 Merge pull request #26820 from jfindlay/ctlfix
  – 3a2c0d5fb add default param in _parse_localectl in locale mod
• ISSUE #26788: (ssgward) Windows minion user.rename gives exception (refs: #26821)
• PR #26821: (twangboy) Fixed user.rename function in windows @ 2015-09-01 22:01:50 UTC
  – ff733547c4 Merge pull request #26821 from twangboy/fix_26788
  – c979e4877 Fixed user.rename function in windows
• ISSUE #26754: (jefftucker) MySQLdb-python package should be included with windows minion installer (refs: #26803)
• PR #26803: (twangboy) Added check for PyMySQL if MySQLdb import fails @ 2015-09-01 21:44:41 UTC
  – c892be3255 Merge pull request #26803 from twangboy/fix_26754
  – 23576c65eb Added check for PyMySQL if MySQLdb import fails
• ISSUE #26798: (jfindlay) stack trace from linode driver (refs: #26815)
• PR #26815: (jfindlay) stringify linode id before performing str actions @ 2015-09-01 17:56:29 UTC
  – 6edfa36083 Merge pull request #26815 from jfindlay/linstr
  – 2ff5823944 stringify linode id before performing str actions
• ISSUE #26644: (gravyboat) pkgrepo should note that for ubuntu/debian all options should not be used (refs: #26800, #26851)

• ISSUE #24021: (arthurlogilab) [salt-cloud saltify] AttributeError: 'str' object has no attribute 'setdefault' (refs: #26793)
• PR #26793: (rallytime) Don’t stacktrace if ”name” is specified as a minion id in a map file @ 2015-08-31 19:24:25 UTC
  – da161b9516 Merge pull request #26793 from rallytime/fix-name-stacktrace
  – 86014b341 Don’t stacktrace if ”name” is specified as a minion id in a map file
• ISSUE #24020: (arthurlogilab) [salt-cloud saltify] cannot use –profile saltify machine[1..3] without a map (refs: #26790)
• PR #26790: (rallytime) Update Saltify docs to be more accurate and helpful @ 2015-08-31 18:17:31 UTC
  – 7c8d0a09f6 Merge pull request #26790 from rallytime/saltify_docs
  – d53754f2b7 Update Saltify docs to be more accurate and helpful
• ISSUE #26773: (styro) salt-call minor breakage on Windows (refs: #26775)

• PR #26787: (jfindlay) merge #26775 @ 2015-08-31 17:52:45 UTC
  - PR #26775: (styro) Fix some leftover non portable exitcodes. (refs: #26787)
  - 70d0268c83 Merge pull request #26787 from jfindlay/imp
  - e5bbf59ec7 disable import lint in run.py
  - 8ae7f25243 Restore blank lines again.
  - 1710070f61 Restore blank line.
  - 59d61a8dea os module no longer required.
  - f1b8d0d509 Add missing imports.
  - 7bd8809e23 Fix some non portable exitcodes. Fixes #26773

• PR #26759: (terminalmage) Backport PR #26726 to 2015.5 branch @ 2015-08-31 14:39:20 UTC
  - PR #26726: (terminalmage) Redact HTTPS Basic Auth in states/funcs which deal with git remotes (refs: #26759)
  - 645998dbd3 Merge pull request #26759 from terminalmage/bp-26726
  - d7f7fca7e5 More cleanup from moving auth redaction to salt.utils.url
  - 07db5a7038 fix redaction
  - 399871e6dd Add auth redaction flags to git exec module and use them in git state
  - 776dc38d73 check for ValueError when adding http basic auth
  - d2eb1f4340 Rename arguments in salt.utils.url.add_http_basic_auth
  - b4f37a467 Add http basic auth tests
  - 1ed42e44fd Remove git unit tests, moving them to salt.utils.url tests
  - 96a55c5b59 Remove unused imports
  - 1f25a859bd Redact HTTPS Basic Auth data from remote URLs in comments and changes dict
  - eafeb6c7bf Automatically redact HTTPS basic auth
  - 6be3f89e1 Add support for callbacks to influence what information about commands is logged
  - c36f240a87 Add HTTPS Basic Auth funcs to salt.utils.url

• ISSUE #26628: (MadsRC) state.ipset tries to parse wrong data (refs: #26768)

• PR #26768: (garethgreenaway) Fixes to ipset in 2015.5 for #26628 @ 2015-08-29 03:24:07 UTC
  - 46a4bbd0e7 Merge pull request #26768 from garethgreenaway/26628_2015_5_ipset_fixes
  - f0c6090c7e Fixing issue when information returned from ipset isn’t in the format we expect and it causes an exception.

• ISSUE #26732: (saltstack-bot) SmartOS pkgsrc dependency (refs: #26753)

• PR #26753: (jfindlay) import elementree from _compat in ilo exec mod @ 2015-08-28 20:56:45 UTC
  - 7a58878ea8 Merge pull request #26753 from jfindlay/iloet
  - 211a02754f import elementree from _compat in ilo exec mod

• ISSUE #21256: (dhs-rec) win.exe package for RH 6 (refs: #26736)

• PR #26736: (twangboy) Changed import from smbconnection to smb3 @ 2015-08-28 17:23:42 UTC
Salt Documentation, Release 3000.1

- 22dbce8d61 Merge pull request #26736 from twangboy/fix_21256
- 86f425c669 Changed import from smbconnection to smb3

- **ISSUE #26705**: (Galser) Salt-Master 2015.5.5-1 on Scientific Linux 6 fails loading some primitive pillars from YAML (refs: #26714)

- **PR #26714**: (jfindlay) add exception placeholder for older msgpacks @ 2015-08-28 16:02:35 UTC
  - 16d4e035d0 Merge pull request #26714 from jfindlay/pack_except
  - ebcafa9050 add exception placeholder for older msgpacks

- **PR #26710**: (rallytime) Update GCE driver to return True, False or a new name in __virtual__() @ 2015-08-27 20:08:17 UTC
  - 47faa8c16 Merge pull request #26710 from rallytime/gce_virtual_return
  - e6b74879d7 Remove unused import
  - 78e31585cf Update GCE driver to return True, False or a new name in __virtual__() (refs: #26710)

- **ISSUE #14612**: (cachedout) Catch provider errors in salt cloud (refs: #26709)

- **PR #26709**: (rallytime) Ensure VM name is valid before trying to create Linode VM @ 2015-08-27 20:07:49 UTC
  - cf487c0f5 Merge pull request #26709 from rallytime/fix-14612
  - bc21094e0 versionadded and more efficient checks
  - a3ac8e7008 Whitespace fix
  - 9a4228d906 Added unit tests for new _validate_name function and adjusted regex
  - 388815112c Ensure VM name is valid before trying to create Linode VM

- **ISSUE #9592**: (otrempe) pip module fails on Windows because of quoting (refs: #26617)

- **PR #26617**: (terminalmage) Fix Windows failures in pip module due to raw string formatting @ 2015-08-27 19:24:53 UTC
  - c3a6280f8c Merge pull request #26617 from terminalmage/issue9592
  - 96c3df1ed5 Don’t accept non-list input for pkgs arg
  - 41922135db Lint fix
  - ede057eebc Fix tests to reflect args being passed as lists instead of strings
  - 03250dbd9f Pass command to cmd.run_all as list instead of joining
  - 1c90cdb07e salt/modules/pip.py: Remove raw string format flags
  - cd35df88f8 Catch TypeErrors in timed_subprocess

- **PR #26700**: (kev009) Ignore the first element of kern.disks split, which is the sysctl name @ 2015-08-27 17:48:02 UTC
  - 24a4f54f39 Merge pull request #26700 from kev009/fbsd-disks-fix-2015.5
  - 3ac97f9de4 Ignore the first element of kern.disks split, which is the sysctl name

- **PR #26695**: (terminalmage) Better HTTPS basic auth redaction for 2015.5 branch @ 2015-08-27 15:10:38 UTC
  - 58945131b5 Merge pull request #26695 from terminalmage/better-https-auth-redaction-2015.5
  - 752d60209 Use versioninfo tuple for comparison
  - b75d253483e Better HTTPS basic auth redaction for 2015.5 branch
- **PR #26694**: (terminalmage) Backport #26693 to 2015.5 @ 2015-08-27 08:16:30 UTC
  - **PR #26693**: (serge-p) Update openbsdpgk.py (refs: #26694)
  - 4040a312f9 Merge pull request #26694 from terminalmage/bp-26693
  - 4ae926476 Update openbsdpgk.py
- **PR #26681**: (basepi) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2015-08-26 22:03:07 UTC
  - 0b17f80fe9 Merge pull request #26681 from basepi/merge-forward-2015.5
  - 64cad371f0 Remove overmocked test
  - 40718af1d5 Merge remote-tracking branch 'upstream/2014.7' into merge-forward-2015.5
  - c2c7fe06c8 Merge pull request #26667 from nmadhok/doc-fix-2014.7
    - 26be189689 Doc fix. Fixes #26656
    - 6bd3dcaea8 Merge pull request #26663 from jacobhammons/2014.7-version
      - b6af538070 version change for latest branch
  - 071a6112e5 Merge pull request #26636 from rallytime/cloud-test-fixes
    - c0d83d558d Don’t use id as variable
    - 2b4bc1679d Keep ec2 instance creation test the same - it works better for the ec2 output
    - b5b58eb31f Skip digital ocean tests since we can’t use API v1 with v2 tests
    - 9ae1539c62 Update cloud tests to be more efficient and accurate
  - 304542bc4c Merge pull request #26640 from efficks/fixws2014
    - ebe5d9d85c Fix function spacing
- **PR #26676**: (rallytime) Back-port #26648 to 2015.5 @ 2015-08-26 19:46:01 UTC
  - **PR #26648**: (whiteinge) Free 'fun' from the function signature namespace (refs: #26676)
  - 75675a6ba9 Merge pull request #26676 from rallytime/bp-26648
  - 1af42eed36 Free 'fun' from the function signature namespace
- **PR #26677**: (rallytime) Back-port #26653 to 2015.5 @ 2015-08-26 19:45:54 UTC
  - **PR #26653**: (dmyerscough) You can provide a X-Auth-Token when requesting jobs (refs: #26677)
  - d7f682cb5b Merge pull request #26677 from rallytime/bp-26653
  - 497ca96039 You can provide a X-Auth-Token when requesting jobs
- **PR #26675**: (rallytime) Back-port #26631 to 2015.5 @ 2015-08-26 19:44:59 UTC
  - **PR #26631**: (PierreR) Fix get_load in postgres returner (refs: #26675)
  - 960dbba7ed Merge pull request #26675 from rallytime/bp-26631
  - 20eecc6cbe Fix get_load
- **PR #26655**: (damonzheng) Update win_dns_client.py @ 2015-08-26 16:05:26 UTC
  - db30926ac9 Merge pull request #26655 from cheng0919/2015.5
  - fdebc01def Update win_dns_client.py
  - 1d23d5e79c Update win_dns_client.py
  - 1a45db0fb7 Update win_dns_client.py
• PR #26662: (jacobhammons) update version to 2015.5 @ 2015-08-26 13:45:44 UTC

  - PR #26481: (TheBigBear) minor note: added (refs: #26537)
  - 7da87fabf1 Merge pull request #26537 from jfindlay/notes
- 662e723ae0 fixup note lint in file.replace state mod
- 332535f2e6 Update file.py
- 598500034f Update file.py
- ec7c7d738d minor note: added

- **PR #26528**: (zmalone) Fixing encrypt to instructions in the 2015.5 branch @ 2015-08-20 21:49:06 UTC
  - c6d8e34730 Merge pull request #26528 from zmalone/2015.5
  - 39b111c465 Fixing encrypt to instructions in the 2015.5 branch, --homendir is not necessary here.

### 28.2.70 Salt 2015.5.7 Release Notes

**release** 2015-10-13

Version 2015.5.7 is a bugfix release for 2015.5.0.

**Statistics**

- Total Merges: **103**
- Total Issue References: **66**
- Total PR References: **135**
- **Contributors**: 46 (0xf10e, JaseFace, MasterNayru, MrCitron, Sacro, ajacoutot, arthurlogilab, basepi, belvedere-trading, beverlcl, blast-hardcheese, blueyed, bogdanr, cachedout, cbuechler, chrigl, dmyerscough, eguven, elasp, erchn, eyj, garethgreenaway, gashev, gnubyexample, gracinet, gravyboat, gwaters, hedinfaok, iggy, jacksontj, jacobhammons, jfindlay, loренgordon, mbologna, msiciel, nmadhok, pass-by-value, plastikos, rallytime, rominf, s0undt3ch, silenius, sjmh, stephen144, terminalmage, twangboy)

**Important**: A significant orchestrate issue (issue #29110) was discovered during the release process of 2015.5.7, so it has not been officially released. Please use 2015.5.8 instead.

### Changelog for v2015.5.6..v2015.5.7

*Generated at: 2018-05-27 22:16:54 UTC*

- **PR #28864**: (jfindlay) add 2015.5.7 release notes @ 2015-11-13 17:15:00 UTC
  - ec7fcd539b Merge pull request #28864 from jfindlay/2015.5
  - 648b697951 add 2015.5.7 release notes

- **ISSUE #27392**: (ahammond) schedule running state.orchestrate fails (refs: #28731)

- **PR #28731**: (garethgreenaway) Fixes to salt scheduler in 2015.5, ensuring that return_job is only used on minion scheduler @ 2015-11-13 16:38:06 UTC
  - bed45f4208 Merge pull request #28731 from garethgreenaway/27392_2015_5_scheduler_return_job_master
  - 771e9f76f6 Fixing the salt scheduler so that it only attempts to return the job data to the master if the scheduled job is running from a minion’s scheduler.

- **PR #28857**: (rallytime) Back-port #28851 to 2015.5 @ 2015-11-13 13:56:53 UTC
  - **PR #28851**: (rominf) [states/schedule] docstring: args, kwargs -> job_args, job_kwargs (refs: #28857)
- 06f4932876 Merge pull request #28857 from rallytime/bp-28851
- aa4b193f87 [states/schedule] doctest: args, kwargs -> job_args, job_kwargs

**PR #28856**: (rallytime) Back-port #28853 to 2015.5 @ 2015-11-13 13:46:10 UTC
- **PR #28853**: (eliasp) Typo (with → which) (refs: #28856)
- 0934a52b34 Merge pull request #28856 from rallytime/bp-28853
- 37eeab2683 Typo (with → which)

**ISSUE #28828**: (basepi) salt-ssh doesn’t package tornado’s new deps in the thin (refs: #28826)

**PR #28832**: (basepi) [2015.5] Backport #28826 @ 2015-11-12 19:32:03 UTC
- **PR #28826**: (basepi) [2015.8] Add new tornado deps to salt-ssh thin (refs: #28832)
- eb904665dc Merge pull request #28832 from basepi/backport.28826
- 57be72eb91 Add backports_abc and singledispatch_helpers to thin as well
- 897cad627b Add singledispatch to the thin

**ISSUE #8647**: (Mrten) salt '*' highstate returns 'minion did not return', salt [minion] highstate works (refs: #28833)

**PR #28833**: (basepi) [2015.5] Increase the default gather_job_timeout @ 2015-11-12 19:31:58 UTC
- eff811a0ad Merge pull request #28833 from basepi/increase.gather_job_timeout.8647
- c09243dd01 Increase the default gather_job_timeout

**PR #28829**: (basepi) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2015-11-12 18:50:51 UTC
- e4a036365d Merge pull request #28829 from basepi/merge-forward-2015.5
- f8b441485 Merge remote-tracking branch 'upstream/2014.7' into merge-forward-2015.5
- 76e69b4bff Merge pull request #28777 from rallytime/bp-28740-2014.7
  - da5fac2b36 Back-port #28740 to 2014.7
- 45c7eb2f2f Merge pull request #28716 from rallytime/bp-28705
  - 32e7bd3ea0 Account for new headers class in tornado 4.3
- f4fe921965 Merge pull request #28717 from cachedout/umask_note
  - 1874300e08 Add note about recommended umask

**ISSUE #25775**: (MrCitron) blockdev.formatted formats but fails. Second highstate shows success. (refs: #28756)

**ISSUE #28783**: (chrigl) iptables.get_saved_rules does not handle family=ipv6 (refs: #28786)

**PR #28786**: (chrigl) closes #28783 @ 2015-11-11 21:01:19 UTC
- 30cc48e37f Merge pull request #28786 from chrigl/fix-28783
- ba6d814553 closes #28783
• PR #28776: (rallytime) Back-port #28740 to 2015.5 @ 2015-11-11 18:02:03 UTC
  - PR #28740: (MasterNayru) Add missing S3 module import (refs: #28776, #28777)
  - 8fd1db636e Merge pull request #28776 from rallytime/bp-28740-2015.5
  - 4925b7d90 Back-port #28740 to 2015.5
• ISSUE #28732: (dmyerscough) cherrypy API endpoint (refs: #28776)
• ISSUE #22452: (whiteinge) rest_cherrypy /keys URL returns empty keys for minion IDs that already exist (refs: #28760)
• ISSUE #22451: (whiteinge) rest_cherrypy /keys URL throws a 500 on the first request (refs: #28760)
• ISSUE #22442: (allanliu) rest_cherrypy /keys URL does not handle JSON requests (refs: #28760)
• PR #28760: (dmyerscough) Fixing CherryPy key bug @ 2015-11-11 15:11:18 UTC
  - 77d4b980f1 Merge pull request #28760 from dmyerscough/28732-Fix-cherrypypi-api-keys-endpoint
  - 206d1684b2 Fixing CherryPy key bug
• ISSUE #28714: (gravyboat) Salt-api doesn’t work with post unless data is included. (refs: #28718)
• PR #28746: (rallytime) Back-port #28718 to 2015.5 @ 2015-11-10 18:16:40 UTC
  - PR #28718: (sjmh) Account for no POST data (refs: #28746)
  - 6fb04975f Merge pull request #28718 from rallytime/bp-28718
  - 092f441cad Account for no POST data
• PR #28705: (cachedout) Account for new headers class in tornado 4.3 (refs: #28716) @ 2015-11-09 19:24:34 UTC
  - f40c617bad Merge pull request #28705 from cachedout/tornado_http_headers
  - 7ac6cde1ee Account for new headers class in tornado 4.3
• PR #28699: (rallytime) Back-port #28670 to 2015.5 @ 2015-11-09 18:10:58 UTC
  - PR #28670: (plastikos) psutil can fail to look-up a uid and raise a KeyError (refs: #28699)

    #28563)

• PR #28563: (s0undt3ch) [2015.5] Update to latest bootstrap script v2015.11.04 @ 2015-11-04 15:16:31 UTC
  - 08295de5a5 Merge pull request #28563 from s0undt3ch/2015.5
  - 16f4db79a0 Update to latest bootstrap script v2015.11.04

• ISSUE #28173: (twangboy) system.computer_name does not work in windows (refs: #28541)

• PR #28541: (twangboy) Fixed problem with system.set_computer_name @ 2015-11-04 14:48:54 UTC
  - 1e09f186ce Merge pull request #28541 from twangboy/fix_28173
  - 7edf5ce370 Fixed problem with system.set_computer_name

• ISSUE #28524: (bmcorser) UnicodeDecodeError in states.file (refs: #28538, #28537)
  - PR #28538: (jfindlay) decode path and url to utf-8 in url.create (refs: #28537)

• PR #28537: (jfindlay) decode filename to utf-8 in file.recurse state @ 2015-11-04 14:48:18 UTC
  - f44ed780b5 Merge pull request #28537 from jfindlay/decode_state_2015.5
  - 06e514940c decode filename to utf-8 in file.recurse state

• ISSUE #28272: (gravyboat) Update documentation contributing docs to explain how to PR against different
  releases (refs: #28529)

• PR #28529: (rallytime) Update contributing and documentation pages to recommend submitting against
  branches @ 2015-11-04 14:47:21 UTC
  - 6acf8759f3 Merge pull request #28529 from rallytime/fix-28272
  - a959681858 Add link to Sending a GH PR to documentation docs
  - 1c612e2772 Update contributing and documentation pages to recommend submitting against branches

• ISSUE #28511: (nghgd) vmware clone task fails instead of waiting to completion (refs: #28546)

• PR #28548: (nmadhok) [Backport] [2015.5] Tasks can be in queued state instead of running @ 2015-11-04
  04:14:25 UTC
  - PR #28546: (nmadhok) Tasks can be in queued state instead of running. (refs: #28548)
  - 025bf2bf0 Merge pull request #28548 from nmadhok/2015.5-task-error
  - 804a0a6537 Tasks can be in queued state instead of running. Fixes #28511

• ISSUE #24585: (utahcon) No version data for SALT.STATES.VIRTUALENV in wiki (refs: #28531)

• PR #28531: (rallytime) Add versionadded directives to virtualenv_mod state/module @ 2015-11-03 21:34:49
  UTC
  - 63bd3e52b3 Merge pull request #28531 from rallytime/fix-24585
  - bc577b2531 Add versionadded directives to virtualenv_mod state/module
• **PR #28508**: (twangboy) Fixed windows tests @ 2015-11-03 19:31:12 UTC
  - ea3bf972c4 Merge pull request #28508 from twangboy/fix_unit_tests_windows
  - 0da6ff7c50 Fixed some logic
  - cfe059be5 Fixed windows tests

• **PR #28525**: (rallytime) Fix spacing in doc examples for boto_route53 state and module @ 2015-11-03 19:30:24 UTC
  - 73c5735fc1 Merge pull request #28525 from rallytime/route53_spacing
  - 6a2ce615c Fixed spacing in doc examples for boto_route53 state and module

• **ISSUE #28243**: (guettli) Docs: default value of state_auto_order ? (refs: #28517)

• **PR #28517**: (rallytime) Add state_auto_order defaults to True note to ordering docs @ 2015-11-03 14:04:40 UTC
  - 2d7f934f67 Merge pull request #28517 from rallytime/fixed-28243
  - be8f650911 Punctuation.
  - fd846822c1 Add state_auto_order defaults to True note to ordering docs

• **PR #28512**: (basepi) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2015-11-03 00:38:08 UTC
  - 63ce8f78d5 Merge pull request #28512 from basepi/merge-forward-2015.5
  - 61c382133a Merge remote-tracking branch 'upstream/2014.7' into merge-forward-2015.5
  - 4bf56cad3f Merge pull request #28461 from cachedout/issue_28455
    * 097838ec0c Wrap all cache calls in state.sls in correct umask
    - f3e61db045 Merge pull request #28407 from DSRCompany/issues/24910_token_auth_fix_2014
      * b7b5bec309 Don’t request creds if auth with key.

• **PR #28448**: (gwaters) added a note to the tutorial for redhat derivatives @ 2015-10-30 18:49:53 UTC
  - 37ceae1e88 Merge pull request #28448 from gwaters/add-redhat-notes
  - e70990704a added a note to the tutorial for those that redhat so they can use the state file too.

• **PR #28406**: (rallytime) Back-port #28381 to 2015.5 @ 2015-10-29 19:10:37 UTC
  - **PR #28381**: (JaseFace) Add FreeBSD detection for VirtualBox (refs: #28406)
  - 5ef50d60cd Merge pull request #28406 from rallytime/bp-28381
  - e5322d2c44 Add FreeBSD detection for VirtualBox

• **PR #28413**: (rallytime) Back-port #28400 to 2015.5 @ 2015-10-29 18:06:46 UTC
  - **PR #28400**: (msciciel) State pkg.installed: do not execute _preflight_check if not_installed list is empty in _find_install_targets (refs: #28413)
    - 30d57bbae Merge pull request #28413 from rallytime/bp-28400
    - ae1921b922 Do not execute _preflight_check if not_installed list is empty in _find_install_targets. Calling with empty list on rhel/centos cause execution of repoquery -whatprovides without pkg list which is memory consumptive task for host and also for red hat satellite server.

• **PR #28366**: (erchn) mark repo not enabled when pkgrepo state passes in disable: True @ 2015-10-29 15:55:54 UTC
  - 045d540aff Merge pull request #28366 from erchn/fix_yumpkg_mod_repo_disabled
  - 8187a4ce20 re-arrange things a bit to have less overall changes
- f1d570ff18 move todelete above disabled check, add comment
- 64feec413f also remove disabled key from repo_opts
- 2f2ebb7bb6 mark repo not enabled when pkgrepo state passes in disable: True

- **ISSUE #28372**: (beverlcl) use_carrier option for bonding network interfaces are setting invalid values (refs: #28373)
- **PR #28373**: (beverlcl) Fixing bug #28372 for use_carrier option on bonding network interfaces. @ 2015-10-29 14:45:57 UTC
  - 3923f4a569 Merge pull request #28373 from beverlcl/fix-use_carrier-28372
  - 32cffece6b Fixing bug #28372 for use_carrier option on bonding network interfaces.
- **PR #28359**: (rallytime) Back-port #28358 to 2015.5 @ 2015-10-28 20:43:05 UTC
  - **PR #28358**: (arthurlogilab) docstring typo fix - list returners not runners (refs: #28359)
  - e07e3f257b Merge pull request #28359 from rallytime/bp-28358
  - 9cachf582b docstring typo fix - list returners not runners
- **ISSUE #28000**: (hrumph) No option to stop windows minion installer from starting service in silent mode. (refs: #28346)
- **ISSUE #27923**: (twangboy) Salt Windows Installer fails to grab existing config (refs: #28346)
- **PR #28346**: (twangboy) Fix installer @ 2015-10-28 14:21:34 UTC
  - 282be7ba5a Merge pull request #28346 from twangboy/fix_installer
  - f65e3e527b Updated documentation to reflect the new parameter
  - a0e5223554 Fixes #27923 and #28000
- **PR #28315**: (gwaters) Adding a working example of setting pillar data on the cli @ 2015-10-27 15:27:49 UTC
  - 7858f04ebc Merge pull request #28315 from gwaters/update-pillar-doc
  - b15288ec0b adding a working example of setting pillar data on the cli
- **ISSUE #28209**: (basepi) Legacy git_pillar configs cause duplicate ext_pillar calls (refs: #28210)
- **PR #28211**: (terminalmage) Fix for ext_pillar being compiled twice in legacy git_pillar code (2015.5 branch) @ 2015-10-26 14:14:02 UTC
  - **PR #28210**: (terminalmage) Fix for ext_pillar being compiled twice in legacy git_pillar code (refs: #28211)
  - 45305ccf29 Merge pull request #28211 from terminalmage/legacy_git_pillar-2015.5
  - 0d6a4ac115 Remove non-functional test
  - ab991d01d9 Fix for ext_pillar being compiled twice in legacy git_pillar code (2015.5 branch)
- **ISSUE #26411**: (whiteinge) salt-call cannot send custom events without Minion daemon running (refs: #28263)
- **PR #28263**: (cachedout) New channel for event.send @ 2015-10-26 14:07:06 UTC
  - a66c84c40f Merge pull request #28263 from cachedout/issue_26411-1
  - 3b880a5f07 New channel for event.fire_master
  - 29e9533aab Stand up a new channel if using salt-call
- **PR #28293**: (cachedout) Minor grammar changes @ 2015-10-26 12:15:42 UTC
  - **PR #28271**: (gwaters) Update tutorial documentation (refs: #28293)
- 788e1463d8 Merge pull request #28293 from cachedout/fix_28271
- 499ed8519b Minor grammar changes to #28271

- **PR #28271**: (gwaters) Update tutorial documentation (refs: #28293) @ 2015-10-26 12:12:37 UTC
  - e178a0f809 Merge pull request #28271 from gwaters/update-tutorial-documentation
  - f96d39483d updated the tutorial with gravyboat's suggestions
  - b1fa42bf44 i think i changed the wrong header, updated to fix
  - 846b3aece1 I found you can not run the cp.push commands until after enabling the feature in the conf, so I wanted to update the docs so others who try these commands wont bump into the same issue I had.

- **ISSUE #28248**: (0xf10e) conventions/formula.rst: "Gather external data" suggests unavailable jinja functionality (refs: #28280)

- **PR #28280**: (0xf10e) Correct Jinja function load_* to import_* @ 2015-10-25 04:11:10 UTC
  - e3eff9b909 Merge pull request #28280 from 0xf10e/patch-1
  - 6d4316b0ac Correct Jinja function load_* to import_*

- **PR #28255**: (cachedout) Add __cli opt @ 2015-10-23 18:44:30 UTC
  - 909fa3dc97 Merge pull request #28255 from cachedout/cli_opt
  - a2408157de Add __cli opt

- **ISSUE #27374**: (mool) boto_route53 state doesn't create a record (refs: #28213)

- **PR #28213**: (rallytime) If record returned None, don’t continue with the state. Something went wrong @ 2015-10-23 13:54:50 UTC
  - 0fa094ae11 Merge pull request #28213 from rallytime/boto_route53_state
  - 237d64ff11 If record returned None, don’t continue with the state. Something went wrong.

- **ISSUE #28217**: (Ch3LL) Scheduler.present tries to add the scheudler each time (refs: #28238)

- **PR #28238**: (basepi) [2015.5] Fix schedule.present always diffing @ 2015-10-23 13:31:32 UTC
  - 1768014705 Merge pull request #28238 from basepi/schedule.present.28217
  - 087a8dc3c2 Only insert enabled if it’s a dict
  - 5b49f41fab Fix schedule comparison to adjust for ‘enabled’ being added in schedule.list
  - 2dc1226ab8 Build new item with ‘enabled’ if available

- **ISSUE #8051**: (regilero) Problems with fileinput.input inplace editing in salt.states.file.replace (refs: #28174)

- **ISSUE #7999**: (regilero) MULTILINE pattern cannot work in file.replace, fileinput always reads line by line. (refs: #28174)

- **PR #28174**: (lorengordon) Add support for multiline regex in file.replace (refs: #28666) @ 2015-10-22 14:02:43 UTC
  - bdd48c92de Merge pull request #28174 from lorengordon/file-replace-multiline
  - acdef2da60 Update docstrings with new guidance
  - 0835b005b7 Use a test that makes the extra file read unnecessary
  - 6d6121a6e5 Use flags when checking whether content was added previously
  - b25e609e99 Set flags=8 since now the file is read as a MULTILINE string by default
  - 89e8dcdfdf Use finally block to ensure mmap object is closed
- 5aea6647c9 Add support for multiline regex in file.replace

- **ISSUE #19673**: (holyzhou) partition.mkpart in parted modules doesn’t work (refs: #28175)

- **PR #28175**: (twangboy) Fixes #19673 @ 2015-10-21 20:48:24 UTC
  - 2225925fb5 Merge pull request #28175 from twangboy/fix_19673
  - ae8fb208f Fixes #19673

- **PR #28140**: (rallytime) Add OpenBSD installation documentation to 2015.5 branch @ 2015-10-21 20:48:24 UTC
  - PR #28103: (ajacoutot) OpenBSD salt package: update list of dependencies. (refs: #28140)
  - ab18dcf637 Merge pull request #28140 from rallytime/bsd-installation-doc
  - 458a544d83 Add OpenBSD installation documentation to 2015.5 branch

- **ISSUE #28101**: (bogdarm) salt-cloud ec2 list-sizes doesn’t show all available sizes (refs: #28138)

- **PR #28138**: (rallytime) Back-port #28130 EC2 Sizes Only portion to 2015.5 @ 2015-10-20 16:29:09 UTC
  - PR #28130: (bogdarm) Ec2 upload public key and updated instances size list (refs: #28138)
  - fad38eb3c3 Merge pull request #28138 from rallytime/bp-28130-sizes-only
  - 6ab31e1886 Pylint
  - 37e4ed58a9 Added missing comma
  - 6675e669f Added a bunch of instance sizes and updated some outdated ones

- **ISSUE #26844**: (double-yaya) The function "state.sls" is running as PID XXXX and was started at .... with jid XXXXX always shows the current jid (refs: #28097)

- **PR #28097**: (jacksontj) For all multi-part messages, check the headers. If the header is not ... @ 2015-10-20 15:00:18 UTC
  - ce8f858536 Merge pull request #28097 from jacksontj/2015.5
  - 75e04bcbcf For all multi-part messages, check the headers. If the header is not your minion_id, skip the message

- **ISSUE #23655**: (arthurlogilab) salt-cloud with lxc should not traceback when minion is unreacheable (refs: #28117)

- **PR #28117**: (rallytime) Clean up stacktrace when master can’t be reached in lxc cloud driver @ 2015-10-20 12:41:12 UTC
  - 9cdb970289 Merge pull request #28117 from rallytime/fix-23655
  - dbf908e405 Clean up stacktrace when master can’t be reached in lxc cloud driver

- **PR #28110**: (terminalmage) Add explanation of file_client: local setting masterless mode @ 2015-10-20 12:28:05 UTC
  - bf7ed0a397 Merge pull request #28110 from terminalmage/masterless-mode
  - ed90103124 Add explanation of file_client: local setting masterless mode

- **ISSUE #27940**: (multani) salt-cloud creating lxc containers doesn’t fire "salt/cloud/*/created" event (refs: #28109)

- **PR #28109**: (rallytime) Add created reactor event to lxc cloud driver @ 2015-10-19 20:32:41 UTC
  - a569ef4980 Merge pull request #28109 from rallytime/fix-27940
  - 18b2245611 Add created reactor event to lxc cloud driver
- ISSUE #21845: (kitsemets) pip.install: fails in v2015.2.0rc1 when the package is already installed (pip v1.0) (refs: #27996)
- PR #27996: (rallytime) Don’t fail if pip package is already present and pip1 is installed @ 2015-10-19 12:59:17 UTC
  - d4604fdb26 Merge pull request #27996 from rallytime/fix-21845
  - f8380d75e Provide empty string as default stdout instead of None
  - f9406b5828 Don’t fail if pip package is already present and pip1 is installed
- PR #28056: (rallytime) Back-port #28033 to 2015.5 @ 2015-10-19 12:55:10 UTC
  - PR #28033: (twangboy) Fixed win_useradd.py (refs: #28056)
  - 28b97c514f Merge pull request #28056 from rallytime/bp-28033
  - af2c5ab759 Fixed win_useradd.py
- PR #28059: (rallytime) Back-port #28040 to 2015.5 @ 2015-10-18 16:17:29 UTC
  - PR #28040: (erchn) Swift rackspace fixes (refs: #28059)
  - dfc3aaec74 Merge pull request #28059 from rallytime/bp-28040
  - 76a0d4937b Revert "Allow passing in auth_version, defaulting to 2."
  - 63d5675d34 default auth_version = 2
  - 8072716888 remove extra spaces
  - 9770f56f04 cleanup whitespace, default to None to be consistent with profile
  - f4adfe98c0 Allow passing in auth_version, defaulting to 2.
  - fab1ad39af Rackspace support for switft module.

  - b59c03d20d regenerated man pages

### 28.2.71 Salt 2015.5.8 Release Notes

**release** 2015-12-01

Version 2015.5.8 is a bugfix release for 2015.5.0.

**Statistics**

- Total Merges: 17
- Total Issue References: 12
- Total PR References: 27
- Contributors: 12 (MasterNayru, TronPaul, basepi, cachedout, cxmcc, jfindlay, kevinlondon, messa, rallytime, tehmaspc, twangboy, whiteinge)

**Security Fix**

CVE-2015-8034 Saving `state.sls` cache data to disk with insecure permissions
This affects users of the `state.sls` function. The state run cache on the minion was being created with incorrect permissions. This file could potentially contain sensitive data that was inserted via jinja into the state SLS files. The permissions for this file are now being set correctly. Thanks to `zmalone` for bringing this issue to our attention.

Changelog for v2015.5.7..v2015.5.8

- **ISSUE #28883**: (idelossa) Issues running select states - local variable 'salt' referenced before assignment (refs: #29113)
- **PR #29164**: (jfindlay) Backport #29113 @ 2015-11-24 21:26:17 UTC
  - PR #29113: (TronPaul) Kill unneeded import (refs: #29164)
  - PR #28740: (MasterNayru) Add missing S3 module import (refs: #28839, #29113)
  - a26c10a811 Merge pull request #29164 from jfindlay/bp-29113
  - 50fab35188 kill unneeded import
- **PR #29138**: (jfindlay) add 2015.5.8 release notes @ 2015-11-23 23:22:48 UTC
  - 4f03196e7d Merge pull request #29138 from jfindlay/2015.5
  - be045f5cb1 add 2015.5.8 release notes
- **ISSUE #29110**: (mohshami) 2015.8.2 broke orchestration (refs: #29122)
- **ISSUE #28010**: (vakulich) Error "KeyError: 'ret'" appeared during salt.state run in orchestrate module if minion had an exception (refs: #28012)
- **PR #29128**: (cachedout) Set a safer default value for ret in saltmod @ 2015-11-23 17:07:40 UTC
  - PR #29122: (cachedout) Fix broken state orchestration (refs: #29128)
  - PR #28012: (rallytime) Clean up stack trace when something goes wrong with minion output (refs: #29122)
  - 219367a23d Merge pull request #29128 from cachedout/tweak_29122
  - b08858b040 Missed check
  - 584efe81ee Set a safer default value for ret in saltmod
- **ISSUE #29110**: (mohshami) 2015.8.2 broke orchestration (refs: #29122)
- **ISSUE #28010**: (vakulich) Error "KeyError: 'ret'" appeared during salt.state run in orchestrate module if minion had an exception (refs: #28012)
- **PR #29122**: (cachedout) Fix broken state orchestration (refs: #29128) @ 2015-11-23 16:24:18 UTC
  - PR #28012: (rallytime) Clean up stack trace when something goes wrong with minion output (refs: #29122)
  - 2250a36647 Merge pull request #29122 from cachedout/issue_29110
  - 4b9302d794 Fix broken state orchestration
- **PR #29096**: (rallytime) Back-port #29093 to 2015.5 @ 2015-11-22 17:02:51 UTC
  - PR #29093: (cxmcc) Compare gem versions as a string. (refs: #29096)
  - 200e771efb Merge pull request #29096 from rallytime/bp-29093
  - f5734423a4 Compare gem versions as a string.
• PR #29084: (rallytime) Back-port #29055 to 2015.5 @ 2015-11-20 20:57:54 UTC
  - PR #29055: (cachedout) Add section to style guide (refs: #29084)
  - d8a2018bc8 Merge pull request #29084 from rallytime/bp-29055
  - 52e650a9d9 Add section to style guide
• PR #29083: (rallytime) Back-port #29053 to 2015.5 @ 2015-11-20 20:57:38 UTC
  - PR #29053: (kevinlondon) Update rabbitmq_user.py (refs: #29083)
  - b5e61a351 Merge pull request #29083 from rallytime/bp-29053
  - f1884de0e7 Update rabbitmq_user.py
• ISSUE #28928: (twangboy) Fix user.present 2015.5 (refs: #28932)
• PR #28932: (twangboy) Fixed user.present / user.absent in windows @ 2015-11-18 21:45:53 UTC
  - PR #28627: (twangboy) Backport win_useradd (refs: #28932)
  - b3e3bebef0 Merge pull request #28932 from twangboy/fix_28928
  - 065a048877 Fixed user.present / user.absent in windows
• ISSUE #26911: (dsumsky) file.manage state does not work with Amazon S3 URLs on Windows (refs: #28630)
• ISSUE #13850: (ryan-lane) s3:// urls in file.managed (and likely elsewhere) require s3.key and s3.keyid to be in minion config (refs: #28630)
• PR #29011: (rallytime) Back-port #28630 to 2015.5 @ 2015-11-18 17:50:05 UTC
  - PR #28630: (messa) Use S3 credentials from Pillar (refs: #29011)
  - a2e4a227e0 Merge pull request #28630 from cachedout/merge-forward-2014.7
  - 7bac1be85f Lint - newline before def
  - 9e5c16d4da Reading S3 credentials from Pillar
  - a3216f813d Added missing import mmap required by file.py
• ISSUE #28947: (dmyerscough) sdb modules are not synced out (refs: #28949)
• PR #28949: (whiteinge) Add sync_sdb execution function @ 2015-11-17 15:35:38 UTC
  - edd2d763a Merge pull request #28949 from whiteinge/sync-sdb
  - b0ec9ab25b Add sync_sdb execution function
• ISSUE #28888: (twangboy) Fix file.comment (refs: #28930)
• PR #28908: (rallytime) A couple of spelling fixes for doc conventions page. @ 2015-11-16 02:29:35 UTC

28.2. Previous Releases
- 2488b873b8 Merge pull request #28908 from rallytime/doc-convention-spelling
- 60e6edd77 A couple of spelling fixes for doc conventions page.

• ISSUE #22442: (allanlu) rest_cherrypy /keys URL does not handle JSON requests (refs: #28902)

• PR #28902: (whiteinge) Fix missing JSON support for /keys endpoint @ 2015-11-15 15:36:05 UTC
  - 827a1ae020 Merge pull request #28902 from whiteinge/json-keys
  - 9745903301 Fix missing JSON support for /keys endpoint

• PR #28897: (rallytime) Back-port #28873 to 2015.5 @ 2015-11-15 00:43:35 UTC
  - PR #28873: (tehmaspc) Fix salt-cloud help output typo (refs: #28897)
  - d23bd49130 Merge pull request #28897 from rallytime/bp-28873
  - 077e671ead Fix salt-cloud help output typo

• ISSUE #28870: (basepi) mdadm commands failing (refs: #28871)

• PR #28871: (basepi) [2015.5] Fix command generation for mdadm.assemble @ 2015-11-13 21:54:33 UTC
  - a9dc8b6ca6 Merge pull request #28871 from basepi/mdadm.fix.28870
  - 323bc2d2ac Fix command generation for mdadm.assemble

28.2.72 Salt 2015.5.9 Release Notes

release 2016-01-11

Version 2015.5.9 is a bugfix release for 2015.5.0.

Statistics

- Total Merges: 45
- Total Issue References: 21
- Total PR References: 48
- Contributors: 21 (abednarik, aletourneau, attiasr, basepi, cachedout, clan, clarkperkins, cro, dmyerscough, jacobhammons, jfindlay, jsutton, justinta, lorengordon, markckimball, mpreziuso, rallytime, terminalmage, titilambert, twangboy, zmalone)

Changelog for v2015.5.8..v2015.5.9

• PR #30248: (jfindlay) add 2015.5.9 release notes @ 2016-01-08 23:13:10 UTC
  - 92889db638 Merge pull request #30248 from jfindlay/2015.5
  - 741f7aba31 Merge pull request #30248 from jfindlay/2015.5

• PR #30237: (jacobhammons) Updated man pages and doc version for 2015.5.9 @ 2016-01-08 18:10:05 UTC
  - 7a329d89d7 Merge pull request #30237 from jacobhammons/man-pages-prev
  - 2431c4c5c3 Merge pull request #30237 from jacobhammons/man-pages-prev
  - fe3da1c174 Merge pull request #30237 from jacobhammons/man-pages-prev
- **PR #30207**: (rallytime) Use correct spacing in rabbitmq state examples @ 2016-01-07 18:37:35 UTC
  - 2c0b725924 Merge pull request #30207 from rallytime/rabbitmq_states_doc_fix
  - 8d48c24182 Use correct spacing in rabbitmq state examples
- **PR #30191**: (jacobhammons) Updated doc site banners @ 2016-01-06 22:37:40 UTC
  - b49cf910f4 Merge pull request #30191 from jacobhammons/banner-prev
  - c3390955b0 Updated doc site banners
- **ISSUE #29633**: (twellspring) user.present does not modify home directory (refs: #30125)
- **PR #30125**: (abednarik) Update user home event when createhome is set to False @ 2016-01-05 18:15:38 UTC
  - 9363d65b6 Merge pull request #30125 from abednarik/update_user_home
  - 56544a77f6 Update user home event when createhome is set to False
- **ISSUE #10155**: (jhenry82) Option to select a random master in multi-master mode (refs: #30127)
- **PR #30127**: (jsutton) Updating documentation and example minion config for random_master/master_shuffle. @ 2016-01-04 19:30:50 UTC
  - 1a5d585d91 Merge pull request #30127 from jsutton/clarify-documentation-for-random_master
  - 01dbf385ef Adding random_master to reference and updating master_shuffle. Adding master_shuffle to the minion example config file as it is needed for multi-master PKI.
- **PR #30110**: (markckimball) Fixed flag sent to salt.utils.http in order for verify_ssl to work correctly @ 2015-12-31 21:17:53 UTC
  - 28b1bbbe77 Merge pull request #30110 from markckimball/fix-verify_ssl-in-joyent-cloud
  - e1c08cb269 Fixed flag sent to salt.utils.http in order for verify_ssl to work appropriately.
- **PR #30093**: (zmalone) Noting that file_roots and "state tree" should both be avoided @ 2015-12-30 22:40:05 UTC
  - 040412b0b1 Merge pull request #30093 from zmalone/pillar-notes
  - cbfd58afe Noting that file_roots and "state tree" should both be avoided, because in some environments, the actual states show up another level down. Adding notes about why this is undesirable.
- **ISSUE #28120**: (jtylers) Clear text passwords (refs: #30097)
- **PR #30097**: (cachedout) Note concern about cleartext password in docs for shadow.gen_password @ 2015-12-30 22:37:33 UTC
  - 25edefc93a Merge pull request #30097 from cachedout/note_on_password_process_list
  - 58ae884ef Note concern about cleartext password in docs for shadow.gen_password
- **PR #30089**: (mprezioso) Fixes terminology and adds more accurate details about the algorithms @ 2015-12-30 20:02:18 UTC
  - 6b1c3a6bf2 Merge pull request #30089 from mprezioso/patch-1
  - 5053add40 Fixes terminology and adds more accurate details about the algorithms
- **ISSUE #29921**: (anlutro) pygit 0.21 not fully supported? (refs: #30086)
- **PR #30086**: (cachedout) Document that gitfs needs recent libs @ 2015-12-30 19:26:05 UTC
  - 200d9385d Merge pull request #30086 from cachedout/issue_29921
  - 8c29e2d6a Document that gitfs needs recent libs
- **ISSUE #27835**: (bertjwregeer) [FreeBSD] salt-ssh hangs forever (refs: #30070)
• PR #30070: (cachedout) Add documentation on debugging salt-ssh @ 2015-12-29 23:00:06 UTC
  - 404414bf57 Merge pull request #30070 from cachedout/issue_27835
  - 60431e342a Add documentation on debugging salt-ssh
• PR #30059: (mpriziuso) Fixes wrong function scope @ 2015-12-29 16:12:06 UTC
  - 84db12212d Merge pull request #30059 from mpriziuso/patch-1
  - 1cb1c2da07 Fixes wrong function scope
• PR #30025: (justinta) Skipping some Boto tests until resolved moto issue @ 2015-12-28 15:21:45 UTC
  - PR #29725: (cachedout) Disable some boto tests per resolution of moto issue (refs: #30025)
  - 1c6e9b1a6 Merge pull request #30025 from jtan/boto_tests
  - e706642152 Skipping some Boto tests until resolved moto issue
• ISSUE #28956: (racooper) Netscaler module doc enhancements (refs: #29949)
• PR #29949: (aletourneau) Enhanced netscaler docstring @ 2015-12-22 20:26:52 UTC
  - 0f91021c59 Merge pull request #29949 from aletourneau/2015.5
  - cf855fe262 Fixed trailing white spaces
  - 864801e002 fixed version
  - 041d934b44 Enhanced netscaler docstring
• PR #29941: (cachedout) Fix spelling error in boto_vpc @ 2015-12-22 15:49:54 UTC
  - 229d3eb60b Merge pull request #29941 from cachedout/boto_vpc
  - b11bf078 Fix spelling error in boto_vpc
• ISSUE #29880: (githubcdr) Salt pkg.uptodate fails on Arch linux (refs: #29908)
• PR #29908: (cachedout) Allow kwargs to be passed to pacman provide for update func @ 2015-12-22 15:04:18 UTC
  - 69c5ada636 Merge pull request #29908 from cachedout/issue_29880
  - 4cd77ba41b Allow kwargs to be passed to pacman provide for update func
• ISSUE #27056: (oogali) pkgng provider on FreeBSD does not do BATCH=yes (refs: #29909)
• PR #29909: (abednarik) FreeBSD pkgng fix for non-interactive install. @ 2015-12-22 15:03:50 UTC
  - ad0de4563 Merge pull request #29909 from abednarik/freebsd_pkng_non_interactive_fix
  - 8ac213001a FreeBSD pkgng fix for non-interactive install.
• ISSUE #24698: (cmhe) docker.installed not working (salt 2015.5.0, docker 1.6.2, dockerpy 0.5.3) (refs: #29730)
• PR #29730: (rallytime) Update docker-py version requirement to 0.6.0 for dockerio.py files @ 2015-12-16 14:44:40 UTC
  - f43fd166c Merge pull request #29730 from rallytime/fixed-24698
  - 120fd5df0 Update docker-py version requirement to 0.6.0 for dockerio.py files
• ISSUE #23343: (micaelbergeron) npm state ignore the requested version (refs: #29715)
• ISSUE #18647: (hundt) Version number in npm state name does not result in correct version being installed (refs: #29715)
• PR #29715: (rallytime) Install correct package version, if provided, for npm state. @ 2015-12-15 23:19:45 UTC
- c393a4175a Merge pull request #29715 from rallytime/fix-23343
- a0ed857c37 Install correct package version, if provided, for npm state.

- **PR #29721:** (terminalmage) Fix display of multiline strings when iterating over a list @ 2015-12-15 22:16:10 UTC
  - 1310afbbc2 Merge pull request #29721 from terminalmage/nested-output-multiline-fix
  - 761be9cb93 Fix display of multiline strings when iterating over a list

- **ISSUE #29488:** (Shad0w1nk) salt.cloud.clouds.vmware.revert_to_snapshot crash when using the default value (refs: #29646)

- **PR #29646:** (rallytime) Don’t stacktrace on kwargs.get if kwargs=None @ 2015-12-15 19:02:58 UTC
  - 52c07cec9 Merge pull request #29646 from rallytime/fix-29488
  - c5fa9351 Don’t stacktrace on kwargs.get if kwargs=None

- **ISSUE #29661:** (mosuowhq) bug report when creating VM in /salt/cloud/clouds/nova.py (refs: #29673)

- **PR #29673:** (rallytime) Default value should be False and not 'False' @ 2015-12-14 18:08:44 UTC
  - f606c23ea8 Merge pull request #29673 from rallytime/fix-29661
  - e4faa1157 Default value should be False and not 'False'

- **PR #29527:** (jfindlay) 2015.5.7 notes: add note about not being released @ 2015-12-08 21:08:26 UTC
  - f7ce8e7baf Merge pull request #29527 from jfindlay/2015.5
  - 1a8049f0c9 2015.5.7 notes: add note about not being released

- **PR #29539:** (basepi) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2015-12-08 16:54:33 UTC
  - 867d550271 Merge pull request #29539 from basepi/merge-forward-2015.5
  - 2c9cda4a30 Merge remote-tracking branch 'upstream/2014.7' into merge-forward-2015.5
  - 85aa90a6cb Merge pull request #29392 from jacobhammons/2014.7
  - d7f0db1dd8 updated version number to not reference a specific build from the latest branch

- **ISSUE #12072:** (vk00226) Passing user-data when provisioning ec2 instances (refs: #29504)

- **PR #29504:** (rallytime) Document userdata_file option for EC2 driver @ 2015-12-08 16:54:33 UTC
  - de7f3d5a59 Merge pull request #29504 from rallytime/fix-12072
  - 8357c95dc2 Document userdata_file option for EC2 driver

- **ISSUE #29101:** (jessbreckenridge) Salt-cloud 2015.8.0 - del_*_vols_on_destroy does not work according to docs (refs: #29507)

- **PR #29507:** (rallytime) Switch volumes and del_*_on_destroy example ordering @ 2015-12-08 16:50:11 UTC
  - 65deba8b5 Merge pull request #29507 from rallytime/ec2-doc-fix
  - 90f9b25e8c Switch volumes and del_*_on_destroy example ordering

- **ISSUE #28862:** (trevor-h) salt-cloud uppercase timeout options no longer recognized (refs: #29469)

- **PR #29469:** (abednarik) Added Documentation note in salt cloud. @ 2015-12-07 18:27:46 UTC
  - 0918e929ff Merge pull request #29469 from abednarik/doc_note_for_saltcloud_connection_timeout
  - 85e5c3266a Added Documentation note in salt cloud.

- **PR #29461:** (dmyerscough) Fix resource limits, systemd sets the default too small @ 2015-12-05 16:26:34 UTC
- e43c7c05a6 Merge pull request #29461 from dmyerscough/fix-resource-limits
- 85a8a3b033 Fix resource limits, systemd sets the default number of open files to 4096 causing te master to complain about limits when you have a large number of keys

**ISSUE #28526:** (clarkperkins) yumpkg.installed broken in salt v2015.8.1 on CentOS 6 minions (refs: #28656)

**PR #29439:** (rallytime) Back-port #28656 to 2015.5 @ 2015-12-04 22:56:17 UTC
- **PR #28656:** (clarkperkins) #28526 fixed yumpkg module issue with pkg.installed (refs: #29439)
- 730f02fbd Merge pull request #29439 from rallytime/bp-28656
- 2f11bb021f #28526 fixed yumpkg module

**PR #29418:** (jacobhammons) Added CVE 2015-8034 to 2015.5.8 release notes @ 2015-12-04 03:02:53 UTC
- 197210d52e Merge pull request #29418 from jacobhammons/dot8
- 4f51a737f9 Added CVE 2015-8034 to 2015.5.8 release notes

**PR #29389:** (jacobhammons) updated version numbers in documentation @ 2015-12-03 16:27:23 UTC
- b3452f2a1a Merge pull request #29389 from jacobhammons/2015.5
- 824721ff36 updated version numbers

**ISSUE #26898:** (twangboy) Symlinks in Windows (2015.8) (refs: #28420, #28501)
- 6a7a95f28a Merge pull request #26898 from twangboy/jmoney_26898
- c0fcf3332c Fixed some Lint...
- df17fe59d3 Merge pull request #6 from jfindlay/twang_test
  - bc7e0cf64 add file.symlink unit tests
  - 9381d7215 orthogonalize file.symlink unit tests
- 8f462ba044 Merge pull request #5 from cachedout/fix_twangboy_test
  - 5293150d25 Fix tests
- 7d39091c91 Fixed some more lint
- 3dbd62af2c Fixed some tests... hopefully
- f187db3288 Removed unnecessary logic
- 89ebd268e6 Added file attributes restore on fail
- 9ec72ca724 fix file state unit tests for win symlink feature
- 69c32a663e Fixed some lint
- 638dec5027 Fixed some tests... let’s see if they’re really are
- 5ed7a99792 Replaced instances of shutil.rmtree in file state
- 2651ce509f Fix file.remove for windows

**ISSUE #29344:** (justinta) file.search broken on python 2.6 with empty files (refs: #29348)

**PR #29348:** (justinta) Fixes an file.search on python2.6 @ 2015-12-02 23:26:36 UTC
- 760a521603 Merge pull request #29348 from jtand/file_search_fix
- 04f82bd4fd Fixes an file.search on python2.6

- **ISSUE #29206**: (mschiff) ssh_known_hosts.present creates wrong known_hosts lines (refs: #29276)

- **PR #29336**: (rallytime) Back-port #29276 to 2015.5 @ 2015-12-02 19:37:42 UTC
  - PR #29276: (abednarik) Prevent adding port twice when adding entry in known hosts (refs: #29336)
  - 51ea88d489 Merge pull request #29336 from rallytime/bp-29276
  - 3a0e19deb7 Prevent adding port twice when adding entry in known hosts

- **PR #29333**: (rallytime) Back-port #29280 to 2015.5 @ 2015-12-02 19:37:05 UTC
  - PR #29280: (cachedout) [Doc] Add note for SVN state (refs: #29333)
  - PR #29165: (titilambert) [Doc] Add note for SVN state (refs: #29280, #29333)
  - 28255af52a Merge pull request #29333 from rallytime/bp-29280
  - 722d02f4a Lint
  - 4a040c1b4 [Doc] Add note for SVN state

- **PR #29316**: (basepi) [2015.5] Merge forward from 2014.7 to 2015.5 @ 2015-12-01 20:20:23 UTC
  - 14e94b3593 Merge pull request #29316 from basepi/merge-forward-2015.5
  - 33f40b3c47 Merge remote-tracking branch 'upstream/2014.7' into merge-forward-2015.5
  - d2fb2109a3 Merge pull request #29296 from douardda/patch-3
  - d2855930f4 Use process KillMode on Debian systems also

- **PR #29216**: (clan) size is 0 doesn’t mean no data, e.g. /proc/version @ 2015-11-30 20:01:43 UTC
  - 6a2ffbf7c Merge pull request #29216 from clan/file_search_on_proc_file
  - 91a20c07a1 try mmap first
  - 8aaf2053e remove extra space to fix lint failure
  - d34e6b1a9a use read only if has read() method
  - 3209c1d5b5 size is 0 doesn’t mean no data, e.g. /proc/version

- **PR #29261**: (attiasr) fix incorrect reinstallation of windows pkg @ 2015-11-30 18:28:42 UTC
  - d6aae8d7b Merge pull request #29261 from attiasr/patch-1
  - 7a99b90596 add log and return if pkg already installed
  - 1843c7a8be fix incorrect reinstallation of windows pkg

- **PR #29214**: (cro) Doc for salt.utils.http should say verify_ssl not ssl_verify. @ 2015-11-25 23:55:38 UTC
  - 9236188867 Merge pull request #29214 from cro/ssl_verify_ssl

- **ISSUE #29202**: (loren Gordon) Broken ca bundle lookup in salt.utils.http.get_ca_bundle (refs: #29204)

- **PR #29204**: (loren Gordon) Use os.path.join to return full path to ca bundle @ 2015-11-25 20:00:42 UTC
  - df7b35a86b Merge pull request #29204 from loren Gordon/fix-29202
  - b1dae5e6fe Use os.path.join to return full path to ca bundle
28.2.73 Salt 2014.7.0 Release Notes - Codename Helium

This release is the largest Salt release ever, with more features and commits than any previous release of Salt. Everything from the new RAET transport to major updates in Salt Cloud and the merging of Salt API into the main project.

**Important:** The Fedora/RHEL/CentOS salt-master package has been modified for this release. The following components of Salt have been broken out and placed into their own packages:

- salt-syndic
- salt-cloud
- salt-ssh

When the salt-master package is upgraded, these components will be removed, and they will need to be manually installed.

**Important:** Compound/pillar matching have been temporarily disabled for the mine and publish modules for this release due to the possibility of inferring pillar data using pillar glob matching. A proper fix is now in the 2014.7 branch and scheduled for the 2014.7.1 release, and compound matching and non-globbing pillar matching will be re-enabled at that point.

Compound and pillar matching for normal salt commands are unaffected.

### New Transport!

**RAET Transport Option**

This has been a HUGE amount of work, but the beta release of Salt with RAET is ready to go. RAET is a reliable queuing transport system that has been developed in partnership with a number of large enterprises to give Salt an alternative to ZeroMQ and a way to get Salt to scale well beyond tens of thousands of servers. Unlike ZeroMQ, RAET is completely asynchronous in every aspect of its operation and has been developed using the flow programming paradigm. This allows for many new capabilities to be added to Salt in the upcoming releases.

Please keep in mind that this is a beta release of RAET and we hope for bugs to be worked out, performance to be better realized and more in the 2015.5.0 release.

Simply stated, users running Salt with RAET should expect some hiccups as we hammer out the update. This is a BETA release of Salt RAET.

### Salt SSH Enhancements

Salt SSH has just entered a new league, with substantial updates and improvements to make salt-ssh more reliable and easier than ever! From new features like the ansible roster and files server backends to the new pip salt-ssh installer to lowered deps and a swath of bugfixes, salt-ssh is basically reborn!

### Install salt-ssh Using pip

Salt-ssh is now pip-installable!

https://pypi.python.org/pypi/salt-ssh/
Pip will bring in all of the required deps, and while some deps are compiled, they all include pure python implementations, meaning that any compile errors which may be seen can be safely ignored.

```
pip install salt-ssh
```

**Fileserver Backends**

Salt-ssh can now use the salt fileserver backend system. This allows for the gitfs, hgfs, s3, and many more ways to centrally store states to be easily used with salt-ssh. This also allows for a distributed team to easily use a centralized source.

**Saltfile Support**

The new saltfile system makes it easy to have a user specific custom extended configuration.

**Ext Pillar**

Salt-ssh can now use the external pillar system. Making it easier then ever to use salt-ssh with teams.

**No More sshpass**

Thanks to the enhancements in the salt vt system, salt-ssh no longer requires sshpass to send passwords to ssh. This also makes the manipulation of ssh calls substantially more flexible, allowing for intercepting ssh calls in a much more fluid way.

**Pure Python Shim**

The salt-ssh call originally used a shell script to discover what version of python to execute with and determine the state of the ssh code deployment. This shell script has been replaced with a pure python version making it easy to increase the capability of the code deployment without causing platform inconsistency issues with different shell interpreters.

**Custom Module Delivery**

Custom modules are now seamlessly delivered. This makes the deployment of custom grains, states, execution modules and returners a seamless process.

**CP Module Support**

Salt-ssh now makes simple file transfers easier then ever! The cp module allows for files to be conveniently sent from the salt fileserver system down to systems.
More Thin Directory Options

Salt ssh functions by copying a subset of the salt code, or salt thin down to the target system. In the past this was always transferred to /tmp/.salt and cached there for subsequent commands.

Now, salt thin can be sent to a random directory and removed when the call is complete with the -W option. The new -W option still uses a static location but will clean up that location when finished.

The default salt thin location is now user defined, allowing multiple users to cleanly access the same systems.

State System Enhancements

New Imperative State Keyword "Listen"

The new listen and listen_in keywords allow for completely imperative states by calling the mod_watch() routine after all states have run instead of re-ordering the states.

Mod Aggregate Runtime Manipulator

The new mod_aggregate system allows for the state system to rewrite the state data during execution. This allows for state definitions to be aggregated dynamically at runtime.

The best example is found in the pkg state. If mod_aggregate is turned on, then when the first pkg state is reached, the state system will scan all of the other running states for pkg states and take all other packages set for install and install them all at once in the first pkg state.

These runtime modifications make it easy to run groups of states together. In future versions, we hope to fill out the mod_aggregate system to build in more and more optimizations.

For more documentation on mod_aggregate, see the documentation.

New Requisites: onchanges and onfail

The new onchanges and onchanges_in requisites make a state apply only if there are changes in the required state. This is useful to execute post hooks after changes occur on a system.

The other new requisites, onfail, and onfail_in, allow for a state to run in reaction to the failure of another state.

For more information about these new requisites, see the requisites documentation.

Global onlyif and unless

The onlyif and unless options can now be used for any state declaration.

Use names to expand and override values

The names declaration in Salt’s state system can now override or add values to the expanded data structure. For example:
my_users:
  user.present:
    - names:
      - larry
      - curly
      - moe:
        - shell: /bin/zsh
        - groups:
          - wheel
        - shell: /bin/bash

Major Features

Scheduler Additions

The Salt scheduler system has received MAJOR enhancements, allowing for cron-like scheduling and much more granular timing routines. See here for more info.

Red Hat 7 Family Support

All the needed additions have been made to run Salt on RHEL 7 and derived OSes like CentOS and Scientific.

Fileserver Backends in salt-call

Fileserver backends like gits can now be used without a salt master! Just add the fileserver backend configuration to the minion config and execute salt-call. This has been a much-requested feature and we are happy to finally bring it to our users.

Amazon Execution Modules

An entire family of execution modules further enhancing Salt’s Amazon Cloud support. They include the following:

- Autoscale Groups (includes state support) - related: Launch Control states
- Cloud Watch (includes state support)
- Elastic Cache (includes state support)
- Elastic Load Balancer (includes state support)
- IAM Identity and Access Management (includes state support)
- Route53 DNS (includes state support)
- Security Groups (includes state support)
- Simple Queue Service (includes state support)

LXC Runner Enhancements

BETA The Salt LXC management system has received a number of enhancements which make running an LXC cloud entirely from Salt an easy proposition.

28.2. Previous Releases
Next Gen Docker Management

The Docker support in Salt has been increased at least ten fold. The Docker API is now completely exposed and Salt ships with Docker data tracking systems which make automating Docker deployments very easy.

Peer System Performance Improvements

The peer system communication routines have been refined to make the peer system substantially faster.

SDB

Encryption at rest for configs

GPG Renderer

Encrypted pillar at rest

OpenStack Expansion

Lots of new OpenStack stuff

Queues System

Ran change external queue systems into Salt events

Multi Master Failover Additions

Connecting to multiple masters is more dynamic then ever

Chef Execution Module

Managing Chef with Salt just got even easier!

salt-api Project Merge

The salt-api project has been merged into Salt core and is now available as part of the regular salt-master package install. No API changes were made, the salt-api script and init scripts remain intact.

salt-api has always provided Yet Another Pluggable Interface to Salt (TM) in the form of “netapi” modules. These are modules that bind to a port and start a service. Like many of Salt’s other module types, netapi modules often have library and configuration dependencies. See the documentation for each module for instructions.

See also:

The full list of netapi modules.
Synchronous and Asynchronous Execution of Runner and Wheel Modules

`salt.runner.RunnerClient` and `salt.wheel.WheelClient` have both gained complimentary `cmd_sync` and `cmd_async` methods allowing for synchronous and asynchronous execution of any Runner or Wheel module function, all protected using Salt’s external authentication system. `salt-api` benefits from this addition as well.

**rest_cherrypy** Additions

The `rest_cherrypy` netapi module provides the main REST API for Salt.

**Web Hooks**

This release of course includes the Web Hook additions from the most recent `salt-api` release, which allows external services to signal actions within a Salt infrastructure. External services such as Amazon SNS, Travis-CI, or GitHub, as well as internal services that cannot or should not run a Salt minion daemon can be used as first-class components in Salt’s rich orchestration capabilities.

The raw HTTP request body is now available in the event data. This is sometimes required information for checking an HMAC signature in order to verify a HTTP request. As an example, Amazon or GitHub requests are signed this way.

**Generating and Accepting Minion Keys**

The `/key` convenience URL generates a public and private key for a minion, automatically pre-accepts the public key on the Salt Master, and returns both keys as a tarball for download.

This allows for easily bootstrapping the key on a new minion with a single HTTP call, such as with a Kickstart script, all using regular shell tools.

```
curl -sS http://salt-api.example.com:8000/keys \
  -d mid=jerry \ 
  -d username=kickstart \ 
  -d password=kickstart \ 
  -d eauth=pam \ 
  -o jerry-salt-keys.tar
```

**Fileserver Backend Enhancements**

All of the fileserver backends have been overhauled to be faster, lighter, and more reliable. The VCS backends (`gitfs`, `hgfs`, and `svnfs`) have also received a lot of new features.

Additionally, most config parameters for the VCS backends can now be configured on a per-remote basis, allowing for global config parameters to be overridden for a specific `gitfs/hgfs/svnfs` remote.

**New gitfs Features**
Pygit2 and Dulwich

In addition to supporting GitPython, support for pygit2 (0.20.3 and newer) and dulwich have been added. Provided a compatible version of pygit2 is installed, it will now be the default provider. The config parameter `gitfs_provider` has been added to allow one to choose a specific provider for gitfs.

Mountpoints

Prior to this release, to serve a file from gitfs at a salt fileserver URL of `salt://foo/bar/baz.txt`, it was necessary to ensure that the parent directories existed in the repository. A new config parameter `gitfs_mountpoint` allows gitfs remotes to be exposed starting at a user-defined `salt://` URL.

Environment Whitelisting/Blacklisting

By default, gitfs will expose all branches and tags as Salt fileserver environments. Two new config parameters, `gitfs_env_whitelist` and `gitfs_env_blacklist`, allow more control over which branches and tags are exposed. More detailed information on how these two options work can be found in the Gitfs Walkthrough.

Expanded Authentication Support

As of pygit2 0.20.3, both http(s) and SSH key authentication are supported, and Salt now also supports both authentication methods when using pygit2. Keep in mind that pygit2 0.20.3 is not yet available on many platforms, so those who had been using authenticated git repositories with a passphraseless key should stick to GitPython if a new enough pygit2 is not yet available for the platform on which the master is running.

A full explanation of how to use authentication can be found in the Gitfs Walkthrough.

New hgfs Features

Mountpoints

This feature works exactly like its gitfs counterpart. The new config parameter is called `hgfs_mountpoint`.

Environment Whitelisting/Blacklisting

This feature works exactly like its gitfs counterpart. The new config parameters are called `hgfs_env_whitelist` and `hgfs_env_blacklist`.

New svnfs Features

Mountpoints

This feature works exactly like its gitfs counterpart. The new config parameter is called `svnfs_mountpoint`. 
Environment Whitelisting/Blacklisting

This feature works exactly like its gitfs counterpart. The new config parameters are called `svnfs_env_whitelist` and `svnfs_env_blacklist`.

Configurable Trunk/Branches/Tags Paths

Prior to this release, the paths where trunk, branches, and tags were located could only be in directories named "trunk", "branches", and "tags" directly under the root of the repository. Three new config parameters (`svnfs_trunk`, `svnfs_branches`, and `svnfs_tags`) allow SVN repositories which are laid out differently to be used with svnfs.

New minionfs Features

Mountpoint

This feature works exactly like its gitfs counterpart. The new config parameter is called `minionfs_mountpoint`. The one major difference is that, as minionfs doesn’t use multiple remotes (it just serves up files pushed to the master using `cp.push`) there is no such thing as a per-remote configuration for `minionfs_mountpoint`.

Changing the Saltenv from Which Files are Served

A new config parameter (`minionfs_env`) allows minionfs files to be served from a Salt fileserver environment other than `base`.

Minion Whitelisting/Blacklisting

By default, minionfs will expose the pushed files from all minions. Two new config parameters, `minionfs_whitelist`, and `minionfs_blacklist`, allow minionfs to be restricted to serve files from only the desired minions.

Pyobjects Renderer

Salt now ships with with the Pyobjects Renderer that allows for construction of States using pure Python with an idiomatic object interface.

New Modules

In addition to the Amazon modules mentioned above, there are also several other new execution modules:

- Oracle
- Random
- Redis
- Amazon Simple Queue Service
- Block Device Management
- CoreOS etcd
- Genesis
- InfluxDB
- Server Density
- Twilio Notifications
- Varnish
- ZNC IRC Bouncer
- SMTP

New Runners

- Map/Reduce Style
- Queue

New External Pillars

- CoreOS etcd

New Salt-Cloud Providers

- Aliyun ECS Cloud
- LXC Containers
- Proxmox (OpenVZ containers & KVM)

Salt Call Change

When used with a returner, salt-call now contacts a master if --local is not specified.

Deprecations

**salt.modules.virtualenv_mod**

- Removed deprecated memoize function from salt/utils/__init__.py (deprecated)
- Removed deprecated no_site_packages argument from create function (deprecated)
- Removed deprecated check_dns argument from minion_config and apply_minion_config functions (deprecated)
- Removed deprecated OutputOptionsWithTextMixIn class from salt/utils/parsers.py (deprecated)
- Removed the following deprecated functions from salt/modules/ps.py: - physical_memory_usage (deprecated) - virtual_memory_usage (deprecated) - cached_physical_memory (deprecated) - physical_memory_buffers (deprecated)
- Removed deprecated cloud arguments from cloud_config function in salt/config.py: - vm_config (deprecated) - vm_config_path (deprecated)
• Removed deprecated libcloud_version function from salt/cloud/libcloudfuncts.py (deprecated)
• Removed deprecated CloudConfigMixIn class from salt/utils/parsers.py (deprecated)

28.2.74 Salt 2014.7.1 Release Notes

release 2015-01-12

Version 2014.7.1 is a bugfix release for 2014.7.0.

The changes include:
• Fixed gitfs serving symlinks in file.recurse states (issue #17700)
• Fixed holding of multiple packages (YUM) when combined with version pinning (issue #18468)
• Fixed use of Jinja templates in masterless mode with non-roots fileserv backend (issue #17963)
• Re-enabled pillar and compound matching for mine and publish calls. Note that pillar gloving is still disabled for those modes, for security reasons. (issue #17194)
• Fix for tty: True in salt-ssh (issue #16847)
• Fix for supervisord states when supervisor not installed to system python (issue #18044)
• Fix for logging when log_level='quiet' for cmd.run (issue #19479)

28.2.75 Salt 2014.7.2 Release Notes

release 2015-02-09

Version 2014.7.2 is a bugfix release for 2014.7.0.

The changes include:
• Fix erroneous warnings for systemd service enabled check (issue #19606)
• Fix FreeBSD kernel module loading, listing, and persistence kmod (issue #197151, issue #19682)
• Allow case-sensitive npm package names in the npm state. This may break behavior for people expecting the state to lowercase their npm package names for them. The npm module was never affected by mandatory lowercasing. (issue #20329)
• Deprecate the activate parameter for pip.install for both the module and the state. If bin_env is given and points to a virtualenv, there is no need to activate that virtualenv in a shell for pip to install to the virtualenv.
• Fix a file-locking bug in gitfs (issue #18839)
• Deprecated archive_user in favor of standardized user parameter in state and added group parameter.

28.2.76 Salt 2014.7.3 Release Notes

release 2015-03-25

Version 2014.7.3 is a bugfix release for 2014.7.0.

Changes:
• Multi-master minions mode no longer route fileclient operations asymmetrically. This fixes the source of many multi-master bugs where the minion would become unresponsive from one or more masters.
• Fix bug wherein network.iface could produce stack traces.
• net.arp will no longer be made available unless arp is installed on the system.
• Major performance improvements to SaltNado
• Allow KVM module to operate under KVM itself or VMware Fusion
• Various fixes to the Windows installation scripts
• Fix issue where the syndic would not correctly propagate loads to the master job cache.
• Improve error handling on invalid /etc/network/interfaces file in salt networking modules
• Fix bug where a response status was not checked for in fileclient.get_url
• Enable eauth when running salt in batch mode
• Increase timeout in Boto Route53 module
• Fix bugs with Salt’s ‘tar’ module option parsing
• Fix parsing of NTP servers on Windows
• Fix issue with blockdev tuning not reporting changes correctly
• Update to the latest Salt bootstrap script
• Update Linode salt-cloud driver to use either linode-python or apache-libcloud
• Fix for s3.query function to return correct headers
• Fix for s3.head returning None for files that exist
• Fix the disable function in win_service module so that the service is disabled correctly
• Fix race condition between master and minion when making a directory when both daemons are on the same host
• Fix an issue where file.recurse would fail at the root of an svn repo when the repo has a mountpoint
• Fix an issue where file.recurse would fail at the root of an hgfs repo when the repo has a mountpoint
• Fix an issue where file.recurse would fail at the root of an gitfs repo when the repo has a mountpoint
• Add status.master capability for Windows.
• Various fixes to ssh_known_hosts
• Various fixes to states.network bonding for Debian
• The debian_ip.get_interfaces module no longer removes nameservers.
• Better integration between grains.virtual and systemd-detect-virt and virt-what
• Fix traceback in sysctl.present state output
• Fix for issue where mount.mounted would fail when superopts were not a part of mount.active (extended=True). Also mount.mounted various fixes for Solaris and FreeBSD.
• Fix error where datetimes were not correctly safeguarded before being passed into msgpack.
• Fix file.replace regressions. If the pattern is not found, and if dry run is False, and if backup is False, and if a pre-existing file exists with extension .bak, then that backup file will be overwritten. This backup behavior is a result of how fileinput works. Fixing it requires either passing through the file twice (the first time only to search for content and set a flag), or rewriting file.replace so it doesn’t use fileinput
- VCS fileserver fixes/optimizations
- Catch fileserver configuration errors on master start
- Raise errors on invalid gitfs configurations
- set_locale when locale file does not exist (Redhat family)
- Fix to correctly count active devices when created mdadm array with spares
- Fix to correctly target minions in batch mode
- Support ssh:// urls using the gitfs dulwhich backend
- New fileserver runner
- Fix various bugs with argument parsing to the publish module.
- Fix disk.usage for Synology OS
- Fix issue with tags occurring twice with docker.pulled
- Fix incorrect key error in SMTP returner
- Fix condition which would remount loopback filesystems on every state run
- Remove requisites from listens after they are called in the state system
- Make system implementation of service.running aware of legacy service calls
- Fix issue where publish.publish would not handle duplicate responses gracefully.
- Accept Kali Linux for aptpkg salt execution module
- Fix bug where cmd.which could not handle a dirname as an argument
- Fix issue in ps.pgrep where exceptions were thrown on Windows.

Known issues:

- In multimaster mode, a minion may become temporarily unresponsive if modules or pillars are refreshed at the same time that one or more masters are down. This can be worked around by setting 'auth_timeout' and 'auth_tries' down to shorter periods.

28.2.77 Salt 2014.7.4 Release Notes

release 2015-03-30

Version 2014.7.4 is a bugfix release for 2014.7.0.

This is a security release. The security issues fixed have only been present since 2014.7.0, and only users of the two listed modules are vulnerable. The following CVEs have been resolved:

- CVE-2015-1838 SaltStack: insecure /tmp file handling in salt/modules/serverdensity_device.py
- CVE-2015-1839 SaltStack: insecure /tmp file handling in salt/modules/chef.py

Changes:

- Multi-master minions mode no longer route fileclient operations asymetrically. This fixes the source of many multi-master bugs where the minion would become unresponsive from one or more masters.
- Fix bug wherein network.iface could produce stack traces.
- net.arp will no longer be made available unless arp is installed on the system.
- Major performance improvements to Saltnado
• Allow KVM module to operate under KVM itself or VMware Fusion
• Various fixes to the Windows installation scripts
• Fix issue where the syndic would not correctly propagate loads to the master job cache.
• Improve error handling on invalid /etc/network/interfaces file in salt networking modules
• Fix bug where a response status was not checked for in fileclient.get_url
• Enable eauth when running salt in batch mode
• Increase timeout in Boto Route53 module
• Fix bugs with Salt’s ‘tar’ module option parsing
• Fix parsing of NTP servers on Windows
• Fix issue with blockdev tuning not reporting changes correctly
• Update to the latest Salt bootstrap script
• Update Linode salt-cloud driver to use either linode-python or apache-libcloud
• Fix for s3.query function to return correct headers
• Fix for s3.head returning None for files that exist
• Fix the disable function in win_service module so that the service is disabled correctly
• Fix race condition between master and minion when making a directory when both daemons are on the same host
• Fix an issue where file.recurse would fail at the root of an svn repo when the repo has a mountpoint
• Fix an issue where file.recurse would fail at the root of an hgfs repo when the repo has a mountpoint
• Fix an issue where file.recurse would fail at the root of an gitfs repo when the repo has a mountpoint
• Add status.master capability for Windows.
• Various fixes to ssh_known_hosts
• Various fixes to states.network bonding for Debian
• The debian_ip.get_interfaces module no longer removes nameservers.
• Better integration between grains.virtual and systemd-detect-virt and virt-what
• Fix traceback in sysctl.present state output
• Fix for issue where mount.mounted would fail when superopts were not a part of mount.active (extended=True). Also mount.mounted various fixes for Solaris and FreeBSD.
• Fix error where datetimes were not correctly safeguarded before being passed into msgpack.
• Fix file.replace regressions. If the pattern is not found, and if dry run is False, and if backup is False, and if a pre-existing file exists with extension .bak, then that backup file will be overwritten. This backup behavior is a result of how fileinput works. Fixing it requires either passing through the file twice (the first time only to search for content and set a flag), or rewriting file.replace so it doesn’t use fileinput
• VCS fileservicer fixes/optimizations
• Catch fileservicer configuration errors on master start
• Raise errors on invalid gitfs configurations
• set_locale when locale file does not exist (Redhat family)
• Fix to correctly count active devices when created mdadm array with spares
• Fix to correctly target minions in batch mode
• Support ssh:// urls using the gitfs dulwhich backend
• New filesaver runner
• Fix various bugs with argument parsing to the publish module.
• Fix disk.usage for Synology OS
• Fix issue with tags occurring twice with docker.pulled
• Fix incorrect key error in SMTP returner
• Fix condition which would remount loopback filesystems on every state run
• Remove requisites from listens after they are called in the state system
• Make system implementation of service.running aware of legacy service calls
• Fix issue where publish.publish would not handle duplicate responses gracefully.
• Accept Kali Linux for aptpkg salt execution module
• Fix bug where cmd.which could not handle a dirname as an argument
• Fix issue in ps.pgrep where exceptions were thrown on Windows.

Known issues:
• In multimaster mode, a minion may become temporarily unresponsive if modules or pillars are refreshed at the same time that one or more masters are down. This can be worked around by setting 'auth_timeout' and 'auth_tries' down to shorter periods.
• There are known issues with batch mode operating on the incorrect number of minions. This bug can be patched with the change in Pull Request #22464.
• The fun, state, and unless keywords are missing from the state internals, which can cause problems running some states. This bug can be patched with the change in Pull Request #22365.

28.2.78 Salt 2014.7.5 Release Notes

release 2015-04-16

Version 2014.7.5 is a bugfix release for 2014.7.0.

Changes:
• Fixed a key error bug in salt-cloud
• Updated man pages to better match documentation
• Fixed bug concerning high CPU usage with salt-shh
• Fixed bugs with remounting cvfs and fuse filesystems
• Fixed bug with allowing requisite tracking of entire sls files
• Fixed bug with aptpkg.mod_repo returning OK even if apt-add-repository fails
• Increased frequency of ssh terminal output checking
• Fixed malformed locale string in localmod module
• Fixed checking of available version of package when accept_keywords were changed
• Fixed bug to make git.latest work with empty repositories
- Added **kwargs to service.mod_watch which removes warnings about enable and __reqs__ not being supported by the function
- Improved state comments to not grow so quickly on failed requisites
- Added force argument to service to trigger force_reload
- Fixed bug to andle pkgrepo keyids that have been converted to int
- Fixed module.portage_config bug with appending accept_keywords
- Fixed bug to correctly report disk usage on windows minion
- Added the ability to specify key prefix for S3 ext_pillar
- Fixed issues with batch mode operating on the incorrect number of minions
- Fixed a bug with the proxmox cloud provider stacktracing on disk definition
- Fixed a bug with the changes dictionary in the file state
- Fixed the TCP keep alive settings to work better with SREQ caching
- Fixed many bugs within the iptables state and module
- Fixed bug with states by adding fun, state, and unless to the state runtime internal keywords listing
- Added ability to eAuth against Active Directory
- Fixed some salt-ssh issues when running on Fedora 21
- Fixed grains.get_or_set_hash to work with multiple entries under same key
- Added better explanations and more examples of how the Reactor calls functions to docs
- Fixed bug to not pass ex_config_drive to libcloud unless it’s explicitly enabled
- Fixed bug with pip.install on windows
- Fixed bug where puppet.run always returns a 0 retcode
- Fixed race condition bug with minion scheduling via pillar
- Made efficiency improvements and bug fixes to the windows installer
- Updated environment variables to fix bug with pygit2 when running salt as non-root user
- Fixed cas behavior on data module – data.cas was not saving changes
- Fixed GPG rendering error
- Fixed strace error in virt.query
- Fixed stacktrace when running chef-solo command
- Fixed possible bug wherein uncaught exceptions seem to make zmq3 tip over when threading is involved
- Fixed argument passing to the reactor
- Fixed glibc caching to prevent bug where salt-minion getaddrinfo in dns_check() never got updated nameservers

Known issues:

- In multimaster mode, a minion may become temporarily unresponsive if modules or pillars are refreshed at the same time that one or more masters are down. This can be worked around by setting 'auth_timeout' and 'auth_tries' down to shorter periods.
28.2.79 Salt 2014.7.6 Release Notes

release 2015-05-18

Version 2014.7.6 is a bugfix release for 2014.7.0.

Statistics

- Total Merges: 122
- Total Issue References: 66
- Total PR References: 166
- Contributors: 49 (0xf10e, Azidburn, F30, JaseFace, JohannesEbke, aletourneau, aneeshusa, basepi, bastichelaar, bersace, cachedout, cedwards, cellscape, chris-prince, clan, clinta, cr1st1p, cro, dr4Ke, ericfode, ether42, gareth-greenaway, gtmanfred, hvnsweeting, jfindlay, jleroy, joeljulian, justinta, kaithar, lorengordon, martinhoefling, mguegan, multani, notpeter, panticz, rallytime, rominf, rubic, s0undt3ch, skizunov, slinu3d, tørrant, techhat, teizz, terminalmage, thatch45, twangboy, vdesjardins, vr-jack)

Security Fix

CVE-2015-4017 Certificates are not verified when connecting to server in the Aliyun and Proxmox modules

Only users of the Aliyun or Proxmox cloud modules are at risk. The vulnerability does not exist in the latest 2015.5.0 release of Salt.

Changelog for v2014.7.5..v2014.7.6

- PR #23810: (rallytime) Backport #23757 to 2014.7 @ 2015-05-18 15:30:21 UTC
  - PR #23757: (clan) use abspath, do not eliminating symlinks (refs: #23810)
  - aee00c83df Merge pull request #23810 from rallytime/bp-23757
  - fb32c32065 use abspath, do not eliminating symlinks
- ISSUE #20198: (jcftang) virt.get_graphics, virt.get_nics are broken, in turn breaking other things (refs: #23809, #21469)
- PR #23809: (rallytime) Fix virtualport section of virt.get_nics loop @ 2015-05-18 15:30:09 UTC
  - PR #21487: (rallytime) Backport #21469 to 2014.7 (refs: #23809)
  - PR #21469: (vdesjardins) fixes #20198: virt.get_graphics and virt.get_nics calls in module virt (refs: #21487)
  - 6b3352b1ba Merge pull request #23809 from rallytime/virt_get_nics_fix
  - 0616fb7884 Fix virtualport section of virt.get_nics loop
- PR #23823: (gtmanfred) add link local for ipv6 @ 2015-05-17 12:48:25 UTC
  - 188f03f567 Merge pull request #23823 from gtmanfred/2014.7
  - 5e0f06d59d add link local for ipv6
- PR #23802: (gtmanfred) if it is ipv6 ip_to_int will fail @ 2015-05-16 04:06:59 UTC
  - PR #23573: (techhat) Scan all available networks for public and private IPs (refs: #23802)
- f3ca682f92 Merge pull request #23802 from gtmanfred/2014.7
- 2da98b58c8 if it is ipv6 ip_to_int will fail

- **PR #23488**: (cellscape) LXC cloud fixes @ 2015-05-15 18:09:35 UTC
  - d9af0c3e82 Merge pull request #23488 from cellscape/lxc-cloud-fixes
  - 64250a67e5 Remove profile from opts after creating LXC container
  - c4047d2a71 Set destroy=True in opts when destroying cloud instance
  - 9e1311a7cd Store instance names in opts when performing cloud action
  - 934be57c73 Correctly pass custom env to lxc-attach
  - 7fb85f7be1 Preserve test=True option in cloud states
  - 9771b5a313 Fix detection of absent LXC container in cloud state
  - fb24f0cf02 Report failure when failed to create/clone LXC container
  - 2d9aa2bb97 Avoid shadowing variables in lxc module
  - 792e1021f2 Allow to override profile options in lxc.cloud_init_interface
  - 42bd64b9b3 Return changes on successful lxc.create from salt-cloud
  - 4409eabb83 Return correct result when creating cloud LXC container
  - 377015c881 Issue #16424: List all providers when creating salt-cloud instance without profile

- **ISSUE #22332**: (rallytime) [salt-ssh] Add a check for host in /etc/salt/roster (refs: #23748)

- **PR #23748**: (basepi) [2014.7] Log salt-ssh roster render errors more assertively and verbosely @ 2015-05-14 22:38:10 UTC
  - 808bbe1cb2 Merge pull request #23748 from basepi/salt-ssh.roster.host.check
  - bc53e049e0 Log entire exception for render errors in roster
  - 753de6a621 Log render errors in roster to error level
  - e01a7a90b3 Always let the real YAML error through

- **ISSUE #22959**: (highlyunavailable) Windows Salt hangs if file.directory is trying to write to a drive that doesn’t exist (refs: #23731)

- **PR #23731**: (twangboy) Fixes #22959: Trying to add a directory to an unmapped drive in windows @ 2015-05-14 21:59:14 UTC
  - 72cf360255 Merge pull request #23731 from twangboy/fix_22959
  - 88e5495b2d Fixes #22959: Trying to add a directory to an unmapped drive in windows

- **PR #23730**: (rallytime) Backport #23729 to 2014.7 @ 2015-05-14 21:58:34 UTC
  - **PR #23729**: (rallytime) Partially merge #23437 (grains fix) (refs: #23730)
  - **PR #23437**: (cedwards) Grains item patch (refs: #23729)
  - 2610195262 Merge pull request #23730 from rallytime/bp-23729
  - 187c4ca8cb1a4 Adding support for nested grains to grains.item

- **PR #23688**: (twangboy) Added inet_pton to utils/validate/net.py for ip.set_static_ip in windows @ 2015-05-14 16:15:56 UTC
  - 3e9df883d6 Merge pull request #23688 from twangboy/fix_23415
• ISSUE #23403: (iamfil) salt.runners.cloud.action fun parameter is replaced (refs: #23680)
• PR #23680: (cachedout) Rename kwarg in cloud runner @ 2015-05-13 19:44:02 UTC
  - 1b86460d73 Merge pull request #23680 from cachedout/issue_23403
  - d5986c21b4 Rename kwarg in cloud runner
• ISSUE #23548: (kkaig) grains.list_present produces incorrect (?) output (refs: #23674)
• PR #23674: (cachedout) Handle lists correctly in grains.list_present @ 2015-05-13 18:34:58 UTC
  - cd64af0ce4 Merge pull request #23674 from cachedout/issue_23548
  - da8a2f5cb3 Handle lists correctly in grains.list_present
• PR #23672: (twangboy) Fix user present @ 2015-05-13 18:30:09 UTC
  - d322a19213 Merge pull request #23672 from twangboy/fixed_user_present
  - 731e7a63dd Merge branch '2014.7' of https://github.com/saltstack/salt into fixed_user_present
  - d6f70a4545 Fixed user.present to create password in windows
• ISSUE #23604: (Azidburn) service.dead on systemd Minion create an Error Message (refs: #23607)
• PR #23670: (rallytime) Backport #23607 to 2014.7 @ 2015-05-13 18:27:17 UTC
  - PR #23607: (Azidburn) Fix for #23604. No error reporting. Exitcode !=0 are ok (refs: #23670)
  - 43f70a4545 Merge pull request #23670 from rallytime/bp-23607
  - ed30dc4642 Fix for #23604. No error reporting. Exitcode !=0 are ok
• ISSUE #22141: (Deshke) grains.get_or_set_hash render error if hash begins with "%" (refs: #23640)
• PR #23661: (rallytime) Merge #23640 with whitespace fix @ 2015-05-13 15:47:30 UTC
  - PR #23640: (cachedout) Add warning to get_or_set_hash about reserved chars (refs: #23661)
  - 0f006ac1d8 Merge pull request #23661 from rallytime/merge-23640
  - 442f42bb6 Whitespace fix
  - dd911546e Add warning to get_or_set_hash about reserved chars
• ISSUE #23452: (landergate) minion crashed with empty grain (refs: #23639)
• PR #23639: (cachedout) Handle exceptions raised by __virtual__ @ 2015-05-13 15:11:12 UTC
  - 84e2ef88f0 Merge pull request #23639 from cachedout/issue_23452
  - 458b4015d7d Handle exceptions raised by __virtual__
• ISSUE #23611: (huvez) master_type set to 'failover' but 'master' is not of type list but of type <type 'str'> (refs: #23637)
• PR #23637: (cachedout) Convert str master to list @ 2015-05-13 15:08:19 UTC
  - bd9b94ba8c Merge pull request #23637 from cachedout/issue_23611
  - 56cb1f52e3 Fix typo
- f6fcf19a7f Convert str master to list

- **PR #23595**: (rallytime) Backport #23549 to 2014.7 @ 2015-05-12 21:19:40 UTC
  - PR #23549: (vr-jack) Update __init__.py (refs: #23595)
  - f20c0e42ce Merge pull request #23595 from rallytime/bp-23549
  - 6efcac09ad Update __init__.py

- **ISSUE #23110**: (martinhoefling) Copying files from gitfs in file.recurse state fails (refs: #23496)

- **PR #23594**: (rallytime) Backport #23442 to 2014.7 @ 2015-05-12 21:19:34 UTC
  - PR #23442: (clan) add directory itself to keep list (refs: #23593)
  - 2c221c73ce Merge pull request #23442 from rallytime/bp-23442
  - 304cc499e9 another fix for file defined w/ id, but require name
  - 88144180ae add directory itself to keep list

- **PR #23606**: (twangboy) Fixed checkbox for starting service and actually starting it @ 2015-05-12 21:18:50 UTC
  - fadd1ef63c Merge pull request #23606 from twangboy/fix_installer
  - 038331edab Fixed checkbox for starting service and actually starting it

- **ISSUE #22908**: (karanjag) Add failhard option to salt orchestration (refs: #23389)

- **PR #23592**: (rallytime) Backport #23389 to 2014.7 @ 2015-05-12 16:44:42 UTC
  - PR #23389: (cachedout) Correct fail_hard typo (refs: #23592)
  - 10b3f0f643 Merge pull request #23592 from rallytime/bp-23389
  - 734cc43801 Correct fail_hard typo

- **PR #23573**: (techhat) Scan all available networks for public and private IPs (refs: #23802) @ 2015-05-12 15:22:22 UTC
  - cd34b9b6c4 Merge pull request #23573 from techhat/novaquery
  - f92db5e92f Linting
  - 26e00d3ccc Scan all available networks for public and private IPs

- **ISSUE #23479**: (danielmorlock) Typo in pkg.removed for Gentoo? (refs: #23558)

- **PR #23558**: (jfindlay) reorder emerge command line @ 2015-05-12 15:17:46 UTC
  - 2a72cd71c2 Merge pull request #23558 from jfindlay/fix_ebuild
  - 45404b2a6 reorder emerge command line

- **ISSUE #23355**: (dr4Ke) salt-ssh: 'sources: salt://' files from 'pkg' state are not included in salt_state.tgz (refs: #23530)

- **PR #23530**: (dr4Ke) salt-ssh state: fix including all salt:// references @ 2015-05-12 15:13:43 UTC
- a664a3c6fd Merge pull request #23530 from dr4Ke/fix_salt-ssh_to_include_pkg_sources
- 5df6a8008c fix pylint warning
- d0549e56ba salt-ssh state: fix including all salt:// references

- **ISSUE #23004**: (b18) 2014.7.5 - Windows - pkg.list_pkgs - "nxlog" never shows up in output. (refs: #23433)
- **PR #23433**: (twangboy) Obtain all software from the registry @ 2015-05-11 22:47:52 UTC
  - 55c3869861 Merge pull request #23433 from twangboy/list_pkgs_fix
  - 8ab5b1b86f Fix pylint error
  - 2d11d6545e Obtain all software from the registry
- **PR #23554**: (jleroy) Debian: Hostname always updated @ 2015-05-11 21:57:00 UTC
  - 755bed0abd Merge pull request #23554 from jleroy/debian-hostname-fix
  - 5ff749e487 Debian: Hostname always updated
- **ISSUE #23411**: (dr4Ke) grains.append should work at any level of a grain (refs: #23440, #23474)
- **PR #23551**: (dr4Ke) grains.append unit tests, related to #23474 @ 2015-05-11 21:54:25 UTC
  - PR #23474: (dr4Ke) Fix grains.append in nested dictionary grains #23411 (refs: #23551)
  - PR #23440: (dr4Ke) fix grains.append in nested dictionary grains #23411 (refs: #23474)
  - 6ec87ce9f5 Merge pull request #23551 from dr4Ke/grains.append_unit_tests
  - ebf9df5b2 fix pylint errors
  - c49504ad6 unit tests for grains.append module function
  - 0c9a32326 use MagickMock
  - c838a22377 unit tests for grains.append module function
- **ISSUE #23411**: (dr4Ke) grains.append should work at any level of a grain (refs: #23440, #23474)
- **PR #23474**: (dr4Ke) Fix grains.append in nested dictionary grains #23411 (refs: #23551) @ 2015-05-11 18:00:21 UTC
  - PR #23440: (dr4Ke) fix grains.append in nested dictionary grains #23411 (refs: #23474)
  - e96c5c5bf3 Merge pull request #23474 from dr4Ke/fix_grains.append_nested
  - a01a5bb51e grains.get, parameter delimititer, versionadded: 2014.7.6
  - b39f50475d remove debugging output
  - b6e15e295c fix grains.append in nested dictionary grains #23411
- **PR #23537**: (t0rrant) Update changelog @ 2015-05-11 17:02:16 UTC
  - ab7e1a8d8e Merge pull request #23537 from t0rrant/patch-1
  - 8e03cc99d3 Update changelog
- **PR #23538**: (cro) Update date in LICENSE file @ 2015-05-11 15:19:25 UTC
  - b79fed3a92 Merge pull request #23538 from cro/licupdate
  - 345e25c9 Update date in LICENSE file
- **ISSUE #23159**: (aneeshusa) Unused validator (refs: #23505)
- **PR #23505**: (aneeshusa) Remove unused ssh config validator. Fixes #23159. @ 2015-05-09 13:24:15 UTC
• ISSUE #20518: (ekle) module s3.get does not support eu-central-1 (refs: #23467)
• PR #23467: (slim3d) Added AWS v4 signature support @ 2015-05-08 14:36:19 UTC
  – ca2c21a63c Merge pull request #23467 from slim3d/2014.7
  – 0b4081d8f4 Fixed pylint error at line 363
  – 5be5eb5b14 Fixed pylink errors
  – e64f374ffe Fixed lint errors
  – b9d1ac4ff1 Added AWS v4 signature support
• PR #23444: (techhat) Add create_attach_volume to nova driver @ 2015-05-07 19:51:32 UTC
  – e6f9e00e2e Merge pull request #23444 from techhat/novacreateattach
  – ebdb7ead2d Add create_attach_volume to nova driver
• ISSUE #529: (rubic) run salt in user space (refs: #543)
  – PR saltstack/salt-bootstrap#563: (notpeter) Ubuntu alternate ppas (refs: #23460)
  – PR #543: (rubic) updated documentation for user, fixed configuration template links (refs: #saltstack/salt-bootstrap#563)
• PR #23460: (s0undt3ch) [2014.7] Update to latest stable bootstrap script v2015.05.07 @ 2015-05-07 19:10:54 UTC
  – e33163319 Merge pull request #23460 from s0undt3ch/bootstrap-script-2014.7
  – edcd0c4f2 Update to latest stable bootstrap script v2015.05.07
• PR #23439: (techhat) Add wait_for_passwd_maxtries variable @ 2015-05-07 07:28:56 UTC
  – 7a8ce1a954 Merge pull request #23439 from techhat/maxtries
  – 0ad3ff2c88 Add wait_for_passwd_maxtries variable
• PR #23422: (cro) $HOME should not be used, some shells don’t set it. @ 2015-05-06 21:02:36 UTC
  – 644eb75ec Merge pull request #23422 from cro/gce_sh_home
  – 4e9f6ba06 Don’t use $HOME to find user’s directory, some shells don’t set it
• PR #23425: (basepi) [2014.7] Fix typo in FunctionWrapper @ 2015-05-06 20:38:03 UTC
  – ef17ab4bb2a Merge pull request #23425 from basepi/functionwrapper_typo
  – c390737f3e Fix typo in FunctionWrapper
• PR #23385: (rallytime) Backport #23346 to 2014.7 @ 2015-05-06 20:12:29 UTC
  – PR #23346: (ericfode) Allow file_map in salt-cloud to handle folders. (refs: #23385)
  – 1b13ec04c2 Merge pull request #23385 from rallytime/bp-23346
  – 9efc13c810 more linting fixes
  – cf13c9a5a cleaned up some pylint errors
  – f981699c75 added logic to sftp_file and file_map to allow folder uploads using file_map
• PR #23414: (jfindlay) 2015.2 -> 2015.5 @ 2015-05-06 20:04:02 UTC
  – f8c7a62089 Merge pull request #23414 from jfindlay/update_branch
- 8074d16d52 2015.2 -> 2015.5

- **PR #23404**: (hvnsweeting) saltapi cherrypy: initialize var when POST body is empty @ 2015-05-06 17:35:56 UTC
  - 54b3bd43e4 Merge pull request #23404 from hvnsweeting/cherrypy-post-emptybody-fix
  - f85f8f954c initialize var when POST body is empty

- **PR #23409**: (terminalmage) Update Lithium docstrings in 2014.7 branch @ 2015-05-06 16:20:46 UTC
  - 160f703296 Merge pull request #23409 from terminalmage/update-lithium-docstrings-2014.7
  - bc97d011ba Fix sphinx typo
  - 2006b06f66 Update Lithium docstrings in 2014.7 branch

- **ISSUE #17245**: (tomashavlas) localemod does not generate locale for Arch (refs: #23397, #23307)

- **PR #23397**: (jfindlay) add more flexible whitespace to locale_gen search @ 2015-05-06 03:44:11 UTC
  - aa5fb0aa46 Merge pull request #23397 from jfindlay/fix_locale_gen
  - 0941fefd2b add more flexible whitespace to locale_gen search

- **PR #23368**: (kaithar) Backport #23367 to 2014.7 @ 2015-05-05 21:42:26 UTC
  - **PR #23367**: (kaithar) Put the sed insert statement back in to the output. (refs: #23368)
  - **PR #18368**: (basepi) Merge forward from 2014.7 to develop (refs: #23368, #23367)
  - 0c76dd4d8a Merge pull request #23368 from kaithar/bp-23367
  - 577f41972e Pylint fix
  - 8d9acd1f89 Put the sed insert statement back in to the output.

- **ISSUE #23294**: (variia) file.replace fails to append if repl string partially available (refs: #23350)

- **PR #23350**: (lorengordon) Append/prepend: search for full line @ 2015-05-05 21:42:11 UTC
  - 3493cc1fca Merge pull request #23350 from lorengordon/file.replace_assume_line
  - b60e224beb Append/prepend: search for full line

- **ISSUE #23026**: (adelcast) Incorrect salt-syndic logfile and pidfile locations (refs: #23341)

- **PR #23341**: (cachedout) Fix syndic pid and logfile path @ 2015-05-05 21:29:10 UTC
  - 7be5c48ad5 Merge pull request #23341 from cachedout/issue_23026
  - e98e65e787 Fix tests
  - 6011b437ca Fix syndic pid and logfile path

- **ISSUE #19114**: (pykler) salt-ssh and gpg pillar renderer (refs: #23347, #23272, #23188)

- **PR #23272**: (basepi) [2014.7] Allow salt-ssh minion config overrides via master config and roster (refs: #23347) @ 2015-05-05 21:28:47 UTC
  - **PR #23188**: (basepi) [2014.7] Work around bug in salt-ssh in config.get for gpg renderer (refs: #23272)
    - ea61abfa68 Merge pull request #23272 from basepi/salt-ssh.minion.config.19114
    - c223309bb7 Add versionadded
    - be7407feae Lint
    - c2c337567e Missing comma
    - 8e3e8e073a Pass the minion_opts through the FunctionWrapper

---

**28.2. Previous Releases**
- cb69cd07de Match the master config template in the master config reference
- 87fc3161f9 Add Salt-SSH section to master config template
- 91dd9dbdc Add ssh_minion_opts to master config ref
- c273ea14c6 Add minion config to salt-ssh doc
- a0b6b760c3 Add minion_opts to roster docs
- 5212c35260 Accept minion_opts from the target information
- e2099b6e1b Process ssh_minion_opts from master config
- 3b64214377 Revert "Work around bug in salt-ssh in config.get for gpg renderer"
- 494953a208 Remove the strip (embracing multi-line YAML dump)
- fe87f0fe39 Dump multi-line yaml into the SHIM
- b751a7281c Inject local minion config into shim if available

- **ISSUE #19114** (pykler) salt-ssh and gpg pillar renderer (refs: #23347, #23272, #23188)
- **PR #23347** (basepi) [2014.7] Salt-SSH Backport FunctionWrapper.__contains__ @ 2015-05-05 14:13:21 UTC
  - **PR #23272** (basepi) [2014.7] Allow salt-ssh minion config overrides via master config and roster (refs: #23347)
  - **PR #23188** (basepi) [2014.7] Work around bug in salt-ssh in config.get for gpg renderer (refs: #23272)
  - 4f760dd9cb Merge pull request #23347 from basepi/salt-ssh.functionwrapper.contains.19114
  - 30595e3ff7 Backport FunctionWrapper.__contains__

- **ISSUE #22742** (hvnswetting) salt-master says: "This master address: ‘salt’ was previously resolvable but now fails to resolve!" (refs: #23344)
- **PR #23344** (cachedout) Explicitely set file_client on master @ 2015-05-04 23:21:48 UTC
  - 02658b1e60 Merge pull request #23344 from cachedout/issue_22742
  - 5adc96ce7f Explicitely set file_client on master

- **PR #23318** (cellscape) Honor seed argument in LXC container initializaton @ 2015-05-04 20:58:12 UTC
  - **PR #23311** (cellscape) Fix new container initialization in LXC runner (refs: #23318)
  - ba7605d1cb Merge pull request #23318 from cellscape/honor-seed-argument
  - 228b1be299 Honor seed argument in LXC container initializaton

- **ISSUE #17245** (tomashavlas) localemod does not generate locale for Arch (refs: #23397, #23307)
- **PR #23307** (jfindlay) check for /etc/locale.gen @ 2015-05-04 20:56:32 UTC
  - 4ac4509c57 Merge pull request #23307 from jfindlay/fix_locale_gen
  - 101199a1c4 check for /etc/locale.gen

- **ISSUE saltstack/salt-bootstrap#580** (bradthurber) git develop broken in centos6/rhel6/others? due to missing python tornado dep (refs: #23324)
- **ISSUE saltstack/salt-bootstrap#560** (bradthurber) param to avoid git install on CentOS/RHEL? (refs: #23324)
- **ISSUE #552** (jhutchins) Support require and watch under the same state dec (refs: #23324)
  - **PR saltstack/salt-bootstrap#589** (panticz) Fix Debian Squeeze backports mirror (refs: #23324)
  - **PR saltstack/salt-bootstrap#504** (rominf) opensuse 13.2: fix installation (refs: #23324)
• PR #567: (bastichelaar) Added upstart module (refs: #23324)

• PR #23324: (s0undt3ch) [2014.7] Update to the latest stable release of the bootstrap script v2015.05.04 @ 2015-05-04 16:28:30 UTC
  – f790f42ed6 Merge pull request #23324 from s0undt3ch/hotfix/bootstrap-script-2014.7
  – 6643e47ce5 Update to the latest stable release of the bootstrap script v2015.05.04

• PR #23329: (cro) Require requests to verify cert when talking to aliyun and proxmox cloud providers @ 2015-05-04 16:18:17 UTC
  – 5487367b9a Merge pull request #23329 from cro/cloud_verify_cert
  – 860d3473d4f0c73a7 Fix on ssl verify for requests.

• PR #23311: (cellscape) Fix new container initialization in LXC runner (refs: #23318) @ 2015-05-04 09:55:29 UTC
  – ea201767da Merge pull request #23311 from cellscape/fix-salt-cloud-lxc-init
  – 76fbb3c47d2 Fix new container initialization in LXC runner

• ISSUE #18880: (johtso) npm installed breaks when a module is missing (refs: #23298)

• PR #23298: (chris-prince) Fixed issue #18880 in 2014.7 branch @ 2015-05-03 15:49:41 UTC
  – 0fa25db58c Merge pull request #23298 from chris-prince/2014.7
  – 08f54d79c6c Log stdout and stderr to trace
  – 9b9c30f5ad Reduce salt-ssh debug log verbosity

• PR #23274: (basepi) [2014.7] Reduce salt-ssh debug log verbosity @ 2015-05-01 20:19:23 UTC
  – ce24315a4b Merge pull request #23274 from basepi/salt-ssh.debug.verbosity
  – ece668f4 Log stdout and stderr to trace
  – 8af679c6c5 Log stdout and stderr to trace as well
  – 9bc30f5ad Reduce salt-ssh debug log verbosity

• ISSUE #22605: (mavenAtHouzz) Tornado websockets event Handlers registration are incorrect (refs: #23261)

• PR #23261: (rallytime) Fix tornado websocket event handler registration @ 2015-05-01 18:20:31 UTC
  – 7b55e4310f Merge pull request #23261 from rallytime/fix-22605
  – 4950f92b3 Merge tornadowebsocket event handler registration

• PR #23258: (teizz) TCP keepalives on the ret side, Revisited. @ 2015-05-01 16:13:49 UTC
  – 83ef7cb114 Merge pull request #23258 from teizz/ret_keepalive_2014_7_5
  – 0b9f6bb98 The fixes by cachedout which were backported into 2015_2 were missing a single parameter thus not setting up the TCP keepalive for the ZeroMQ Channel by default.

• ISSUE #23224: (twellspring) iptables.append –log parameters must be after –jump LOG (refs: #23241)

• PR #23241: (techhat) Move iptables log options after the jump @ 2015-05-01 01:31:59 UTC
- 8de3c83956 Merge pull request #23241 from techhat/issue23224
- 87f7948c99 Move iptables log options after the jump
• PR #23228: (rallytime) Backport #23171 to 2014.7 @ 2015-04-30 21:09:45 UTC
  - PR #23171: (skizunov) Bugfix: 'clean_proc_dir' is broken (refs: #23228)
  - f20210e499 Merge pull request #23228 from rallytime/bp-23171
  - e67e99506 Bugfix: 'clean_proc_dir' is broken
• ISSUE #22703: (Xiol) salt-ssh does not work with list matcher (refs: #22808)
• PR #23227: (rallytime) Backport #22808 to 2014.7 @ 2015-04-30 21:09:14 UTC
  - PR #22808: (basepi) [2015.2] Add list targeting to salt-ssh flat roster (refs: #23227)
  - 721cc285ee Merge pull request #23227 from rallytime/bp-22808
  - d208a00b2a Dict, not list
  - a3f529e003 It's already been converted to a list
  - dd57f2d1c1 Add list targeting to salt-ssh flat roster
• PR #22823: (hvnsweeting) 22822 file directory clean @ 2015-04-30 15:25:51 UTC
  - 82c22afacc Merge pull request #22823 from hvnsweeting/22822-file-directory-clean
  - c749c276b4 fix lint - remove unnecessary parenthesis
  - cb3dfee969 refactor
  - 8924b5a911 refactor: use relpath instead of do it manually
  - d3060a51a3 refactor
  - 5759a0e8f0 bugfix: fix file.directory clean=True when it require parent dir
• ISSUE saltstack/salt#22941: (bersace) _pillar func breaks fileserver globals (refs: #22942)
• ISSUE #22941: (bersace) _pillar func breaks fileserver globals (refs: #22977)
• PR #22977: (bersace) Fix fileserver backends __opts__ overwritten by _pillar @ 2015-04-30 15:24:56 UTC
  - PR #22942: (bersace) Fix fileserver backends global overwritten by _pillar (refs: #22977)
  - f6c0728bfb Merge pull request #22977 from bersace/fix-fileserver-backends-pillar-side-effect
  - 5f451f63cf Fix fileserver backends __opts__ overwritten by _pillar
• ISSUE #23166: (claudiupopescu) "Error in function _minion_event" resulting in modules not loaded (refs: #23180)
• PR #23180: (jfindlay) fix typos from 36841bdd in masterapi.py @ 2015-04-30 15:22:41 UTC
  - 34206f7ae3 Merge pull request #23180 from jfindlay/remote_event
  - 72066e1073 fix typos from 36841bdd in masterapi.py
• ISSUE #23153: (cr1st1p) cmdmod : run_chroot - broken in 2014.7.5 - missing kwargs (refs: #23176)
• PR #23176: (jfindlay) copy standard cmd.run* kwargs into cmd.run_chroot @ 2015-04-30 15:22:12 UTC
  - b6b82165c8 Merge pull request #23176 from jfindlay/run_chroot
  - 7dc3417b44 copy standard cmd.run* kwargs into cmd.run_chroot
• ISSUE #23192: (joejulian) supervisord mod_watch does not accept sfun (refs: #23193)
• PR #23193: (joejulian) supervisord.mod_watch should accept sfun @ 2015-04-30 04:34:21 UTC
  - efacbe294 Merge pull request #23193 from joejulian/2014.7_supervisord_accept_sfun
  - eb59d99d supervisord.mod_watch should accept sfun

• ISSUE #19114: (pykler) salt-ssh and gpg pillar renderer (refs: #23347, #23272, #23188)

• PR #23188: (basepi) [2014.7] Work around bug in salt-ssh in config.get for gpg renderer (refs: #23272) @ 2015-04-30 04:34:10 UTC
  - 72fe88e5c6 Merge pull request #23188 from basepi/salt-ssh.function.wrapper.gpg.19114
  - d73979ee12 Work around bug in salt-ssh in config.get for gpg renderer

• ISSUE #21480: (msciciel) TypeError: string indices must be integers, not str (refs: #23154)

• PR #23154: (cachedout) Re-establish channel on interruption in fileclient @ 2015-04-29 16:18:59 UTC
  - 168508ecc2 Merge pull request #23154 from cachedout/refesh_channel
  - 9f8dd8c38 Re-establish channel on interruption in fileclient

• ISSUE #20647: (ryan-lane) file.serialize fails to serialize due to ordered dicts (refs: #20779)

• PR #23146: (rallytime) Backport #20779 to 2014.7 @ 2015-04-28 20:45:06 UTC
  - PR #20779: (cachedout) Use declared yaml options (refs: #23146)
  - 3b53e04534 Merge pull request #23146 from rallytime/bp-20779
  - ffd184938e compare OrderedDicts in serializer unit test
  - a22170627c Just change serialize
  - a11198e8e Use declared yaml options

• PR #23145: (rallytime) Backport #23089 to 2014.7 @ 2015-04-28 20:44:56 UTC
  - PR #23089: (cachedout) Stringify version number before lstrip (refs: #23145)
  - 8bb4664bf9 Merge pull request #23145 from rallytime/bp-23089
  - 93c41afd38 Stringify version number before lstrip

• ISSUE #16188: (drawks) salt.modules.parted has various functions with bogus input validation. (refs: #23124)

• PR #23120: (terminalmage) Don’t run os.path.relpath() if repo doesn’t have a "root" param set @ 2015-04-28 15:46:54 UTC
  - a27b158153 Merge pull request #23120 from terminalmage/fix-gitfs-reopath
  - 1860ff9d68 Don’t run os.path.relpath() if repo doesn’t have a "root" param set

• PR #23132: (clinta) Backport b27c176 @ 2015-04-28 15:00:30 UTC
  - fcb6a79f78 Merge pull request #23132 from clinta/patch-2
  - a824d727d1 Backport b27c176

• ISSUE #18476: (Auha) Upgrading salt on my master caused dependency issues (refs: #18610, #23114)
- PR #23114: (rallytime) Adjust ZeroMQ 4 docs to reflect changes to Ubuntu 12 packages @ 2015-04-28 03:59:24 UTC
  - PR #18610: (rallytime) Make ZMQ 4 installation docs for ubuntu more clear (refs: #23114)
  - b0f4b2847 Merge pull request #23114 from rallytime/remove_ubuntu_zmq4_docs
  - f6ec7c8f8a Adjust ZeroMQ 4 docs to reflect changes to Ubuntu 12 packages
- ISSUE #23085: (xenophonf) Use "s3fs" (not "s3") in fileserver_roots (refs: #23097)
- PR #23108: (rallytime) Backport #23097 to 2014.7 @ 2015-04-28 03:58:05 UTC
  - PR #23097: (rallytime) Change s3 to s3fs in fileserver_roots docs example (refs: #23108)
  - 399857f20b Merge pull request #23108 from rallytime/bp-23097
  - fa889845df Change s3 to s3fs in fileserver_roots docs example
- ISSUE #22171: (basepi) We should only call returner.save_load once per jid (refs: #22199)
- PR #23112: (basepi) [2014.7] Backport #22199 to fix mysql returner save_load errors @ 2015-04-28 03:55:44 UTC
  - PR #22199: (basepi) [2015.2] Put a bandaid on the save_load duplicate issue (mysql returner) (refs: #23112)
  - 5541537c32 Merge pull request #23112 from basepi/mysql_returner_save_load
  - 0127012ed3 Put a bandaid on the save_load duplicate issue
  - PR saltstack/salt#22925: (rallytime) Backport #22895 to 2014.7 (refs: #23113)
- PR #23113: (rallytime) Revert "Backport #22895 to 2014.7" @ 2015-04-28 03:27:29 UTC
  - PR #22895: (aletourneau) pam_tally counter was not reset to 0 after a succesfull login (refs: #23113, #22925, saltstack/salt#22925)
  - dfe2066b25 Merge pull request #23113 from saltstack/revert-22925-bp-22895
  - b957ea8977 Revert "Backport #22895 to 2014.7"
- ISSUE #23013: (ghost) gitfs regression with authenticated repos (refs: #23094)
- PR #23094: (terminalmage) pygit2: disable cleaning of stale refs for authenticated remotes @ 2015-04-27 20:51:28 UTC
  - 21515f3c23 Merge pull request #23094 from terminalmage/issue23013
  - aaf7b04f79 pygit2: disable cleaning of stale refs for authenticated remotes
- PR #23048: (jfjndlay) py-2.6 compat for utils/boto.py ElementTree exception @ 2015-04-25 16:56:45 UTC
  - d45aa21dca Merge pull request #23048 from jfjndlay/ET_error
  - 64c42cbb5f py-2.6 compat for utils/boto.py ElementTree exception
- ISSUE #22981: (syphernl) Locale state throwing traceback when generating not (yet) existing locale (refs: #23025)
- PR #23025: (jfjndlay) catch exceptions on bad system locales/encodings @ 2015-04-25 16:56:30 UTC
  - d25a5c102f Merge pull request #23025 from jfjndlay/fix_sys_locale
  - 9cd4d6bb00 catch exceptions on bad system locales/encodings
- PR #22932: (hvnsweeting) bugfix: also manipulate dir_mode when source not defined @ 2015-04-25 16:54:58 UTC
  - 5e44b59a14 Merge pull request #22932 from hvnsweeting/file-append-bugfix
– 3f368de14a do not use assert in execution module
– 9d4fd4a8c8 bugfix: also manipulate dir_mode when source not defined

- **ISSUE #23021**: (ether42) ps.pgrep raises NoSuchProcess (refs: #23055)
- **PR #23055**: (jffindlay) prevent ps module errors on accessing dead procs @ 2015-04-24 22:39:49 UTC
  - c2416a425f Merge pull request #23055 from jffindlay/fix_ps
  - c2dc7adeb1 prevent ps module errors on accessing dead procs
- **PR #23031**: (jffindlay) convert exception e.message to just e @ 2015-04-24 18:38:13 UTC
  - bfd9158a83 Merge pull request #23031 from jffindlay/exception
  - 856bad1c31 convert exception e.message to just e
- **PR #23015**: (hvnsweeting) if status of service is stop, there is not an error with it @ 2015-04-24 14:35:10 UTC
  - 7747f3342e Merge pull request #23015 from hvnsweeting/set-non-error-lvl-for-service-status-log
  - 92ea163513 if status of service is stop, there is not an error with it
- **ISSUE #22993**: (jetpak) salt-minion restart causes all spawned daemons to die on centos7 (systemd) (refs: #23000)
- **PR #23000**: (jffindlay) set systemd service killMode to process for minion @ 2015-04-24 03:42:39 UTC
  - 2e09789156 Merge pull request #23000 from jffindlay/systemd_kill
  - 3d575e29c4 set systemd service killMode to process for minion
- **ISSUE #22707**: (arthurlogilab) retry_dns of master configuration is missing from the documentation (refs: #22999)
- **PR #22999**: (justinta) Added retry_dns to minion doc. @ 2015-04-24 03:30:24 UTC
  - b5c059ab26 Merge pull request #22999 from jtand/fix_22707
  - 8486e17ab3 Added retry_dns to minion doc.
- **PR #22990**: (techhat) Use the proper cloud conf variable @ 2015-04-23 17:48:07 UTC
  - 27dc877b9d Merge pull request #22990 from techhat/2014.7
  - d3bb09ad25 Use the proper cloud conf variable
- **PR #22976**: (multani) Improve state_output documentation @ 2015-04-23 12:24:22 UTC
  - 13d6f652c6 Merge pull request #22976 from multani/fix/state-output-doc
  - 19ef4199b5 Improve state_output documentation
- **PR #22955**: (terminalmage) Fix regression introduced yesterday in dockerio module @ 2015-04-22 18:56:39 UTC
  - 89fa18500c Merge pull request #22955 from terminalmage/dockerio-run-fix
  - b4472ad1b2 Fix regression introduced yesterday in dockerio module
- **PR #22954**: (rallytime) Backport #22909 to 2014.7 @ 2015-04-22 18:56:20 UTC
  - **PR #22909**: (mguegan) Fix compatibility with pkgin > 0.7 (refs: #22954)
  - 46ef227911 Merge pull request #22954 from rallytime/bp-22909
  - 70e1c3dc969 Fix compatibility with pkgin > 0.7
- **ISSUE #18720**: (Reiner030) timeouts when setting Route53 records (refs: #22856)
- **PR #22856**: (jffindlay) increase timeout and decrease tries for route53 records @ 2015-04-22 16:47:01 UTC

28.2. Previous Releases
PR #22946: (s0undt3ch) Test with a more recent pip version to avoid a traceback @ 2015-04-22 16:25:17 UTC
- a178d444b8 Merge pull request #22946 from s0undt3ch/2014.7
- ba4a786984 add route53 record sync wait, default=False
- ea2fd50660 increase timeout and tries for route53 records

ISSUE #22571: (BoomerB) same error message as on issue #18504 (refs: #22945)

PR #22945: (garethgreenaway) Fixes to scheduler @ 2015-04-22 16:25:00 UTC
- de339bef0a Merge pull request #22945 from garethgreenaway/22571_2014_7_schedule_pillar_refresh_seconds_exceptions
- bfa6d25ed8 Fixing a reported issue when using a scheduled job from pillar with splay. _seconds element that acted as a backup of the actual seconds was being removed when pillar was refreshed and causing exceptions. This fix moves some splay related code out of the if else condition so it’s checked whether the job is in the job queue or not.

ISSUE #18843: (calvinhp) State user.present will fail to create home if user exists and homedir doesn’t (refs: #22933, #22887)

PR #22887: (hvnsweeting) fix #18843 @ 2015-04-22 15:47:05 UTC
- 12d2b91d85 Merge pull request #22887 from hvnsweeting/18843-fix-user-present-home
- 7fe7b089fd run user.chhome once to avoid any side-effect when run it twice
- 19de995ee clarify the usage of home arg
- d6dc09af64 enhance doc, as usermod on ubuntu 12.04 will not CREATE home
- 0ce4d7fe66 refactor: force to use boolean
- 849d19edd7 log debug the creating dir process
- c4e95b9f48 fix #18843: usermod won’t create a dir if old home does not exist

ISSUE #2417: (ffa) Module standards (refs: #22829)

ISSUE #21140: (holms) locale.present state executed successfully, although originally fails (refs: #22930, #22829)

PR #22930: (jfindlay) localemod.gen_locale now always returns a boolean @ 2015-04-22 15:37:39 UTC
- PR #22829: (F30) Always return a boolean in gen_locale() (refs: #22930)
- b7de7bdf47 Merge pull request #22930 from jfindlay/localelegen_bool
- 399399f89e localemod.gen_locale now always returns a boolean

ISSUE #18843: (calvinhp) State user.present will fail to create home if user exists and homedir doesn’t (refs: #22933, #22887)

PR #22933: (hvnsweeting) add test for #18843 @ 2015-04-22 15:27:18 UTC
- 11bcf14979 Merge pull request #22933 from hvnsweeting/18843-test
- b13db32fde add test for #18843

PR #22925: (rallytime) Backport #22895 to 2014.7 @ 2015-04-22 02:30:26 UTC
- PR #22895: (aletourneau) pam_tally counter was not reset to 0 after a succesfull login (refs: #23113, #22925, saltstack/salt#22925)
### Previous Releases

- 6890752dd3 Merge pull request #22925 from rallytime/bp-22895
- 3852d96213 Pylint fix
- 90f7829ad3 Fixed pylint issues
- 5ebf159554 Cleaned up pull request
- a08ac478f6 `pam_tally` counter was not reset to 0 after a successful login

#### ISSUE #22790: (whiteinge) `jobs.list_jobs` runner tracebacks on 'missing' argument (refs: #22914)

#### PR #22914: (cachedout) Call proper returner function in `jobs.list_jobs` @ 2015-04-22 00:49:01 UTC
- eca37e6c11 Merge pull request #22914 from cachedout/issue_22790
- d828d6d58 Call proper returner function in `jobs.list_jobs`

#### PR #22918: (JaseFace) Add a note to the `git_pillar` docs stating that GitPython is the only currently supported provider @ 2015-04-22 00:48:26 UTC
- 44f3409b01 Merge pull request #22918 from JaseFace/git-pillar-provider-doc-note
- 0aee5c23d4 Add a note to the `git_pillar` docs stating that GitPython is the only currently supported provider

#### PR #22907: (techhat) Properly merge cloud configs to create profiles @ 2015-04-21 22:02:44 UTC
- 31c461f573 Merge pull request #22907 from techhat/cloudconfig
- 3bf4e66112 Properly merge cloud configs to create profiles

#### ISSUE #22782: (0xf10e) Turning everything into `OrderedDicts` broke `states.keystone.user_present()` (refs: #22894)

#### PR #22894: (0xf10e) Fix issue #22782 @ 2015-04-21 18:55:18 UTC
- f0939754a0 Merge pull request #22894 from 0xf10e/2014.7
- 58fa24c7fa Clarify doc on kwarg 'roles' for `user_present()`.  
  - f0ae2eb84f Improve readability by renaming `tenant_role`

#### ISSUE #12003: (MarkusMuellerAU) [state.dockerio] docker.run TypeError: run() argument after ** must be a mapping, not str (refs: #22902)

#### PR #22902: (rallytime) Change state example to use proper kwarg @ 2015-04-21 18:50:47 UTC
- c802ba7514 Merge pull request #22902 from rallytime/docker_doc_fix
- 8f703461b0 Change state example to use proper kwarg

#### PR #22898: (terminalmage) dockerio: better error message for native exec driver @ 2015-04-21 18:02:58 UTC
- 81771a7769 Merge pull request #22898 from terminalmage/issue12003
- c375309434 dockerio: better error message for native exec driver

#### ISSUE #22825: (paolodina) Issue using `file.replace` in state file (refs: #22897)

#### PR #22897: (rallytime) Add param documentation for `file.replace` state @ 2015-04-21 17:31:04 UTC
- e2e4e4e55 Merge pull request #22897 from rallytime/fixed-22825
- 9c51630002 Add param documentation for `file.replace` state

#### ISSUE saltstack/salt#22844: (bersace) LocalClient file cache confuse pillar and state files (refs: #22850)

#### PR #22850: (bersace) Fix pillar and salt fileserver mixed @ 2015-04-21 17:04:33 UTC
- fd5389f0e Merge pull request #22850 from bersace/fix-pillar-salt-mixed
- 31b98e72eb Initialize state file client after pillar loading
- 6f6bebb7a31 Use saltenv

**PR #22818:** (twangboy) Added documentation regarding pip in windows @ 2015-04-21 03:58:59 UTC
- 1380fec1b9 Merge pull request #22818 from twangboy/upd_pip_docs
- cb999c7d70 Update pip.py
- 3cc5c970ad Added documentation regarding pip in windows

**PR #22872:** (rallytime) Prevent stacktrace on os.path.exists in hosts module @ 2015-04-21 02:54:40 UTC
- b2bf17f5d5 Merge pull request #22872 from rallytime/fix_hosts_stacktrace
- c88ae1a423 Prevent stacktrace on os.path.exists in hosts module

**PR #22853:** (s0undt3ch) Don’t assume package installation order. @ 2015-04-21 02:42:41 UTC
- 03af523de9 Merge pull request #22853 from s0undt3ch/2014.7
- b62b6e2615 Don’t assume package installation order.

**PR #22877:** (s0undt3ch) Don’t fail on make clean just because the directory does not exist @ 2015-04-21 02:40:47 UTC
- 9211e36564 Merge pull request #22877 from s0undt3ch/hotfix/clean-docs-fix
- 95d6887949 Don’t fail on make clean just because the directory does not exist

**PR #22873:** (thatch45) Type check the version since it will often be numeric @ 2015-04-21 02:38:11 UTC
- 5b3bd08bd Merge pull request #22873 from thatch45/type_check
- 53b5376626 Type check the version since it will often be numeric

**PR #22870:** (twangboy) Added ability to send a version with a space in it @ 2015-04-20 23:18:28 UTC
- c95bba035 Merge pull request #22870 from twangboy/fixed_installer_again
- 3f180fcaee Added ability to send a version with a space in it

**PR #22863:** (rallytime) Backport #20974 to 2014.7 @ 2015-04-20 19:29:37 UTC
- PR #20974: (JohannesEbke) Fix expr_match usage in salt.utils.check_whitelist_blacklist (refs: #22863)
- 2973eb18bc Merge pull request #22863 from rallytime/bp-20974
- 1493a4cb4 Fix expr_match usage in salt.utils.check_whitelist_blacklist

**PR #22578:** (hvnsweeting) gracefully handle when salt-minion cannot decrypt key @ 2015-04-20 15:24:45 UTC
- c45b92bb4b Merge pull request #22578 from hvnsweeting/2014.7-fix-compile-pillar
- f75b24ad68 gracefully handle when salt-minion cannot decrypt key

**ISSUE #21979:** (yrdevops) gitfs: error message not descriptive enough when libgit2 was compiled without libssh2 (refs: #22800)

**PR #22800:** (terminalmage) Improve error logging for pygit2 SSH-based remotes @ 2015-04-18 17:18:55 UTC
- 900c7a510f Merge pull request #22800 from terminalmage/issue21979
- 8f1c0084cd Clarify that for pygit2, receiving 0 objects means repo is up-to-date
- 98885f713e6 Add information about libssh2 requirement for pygit2 ssh auth
- 09468d2607 Fix incorrect log message
- 2093bf8d96 Adjust loglevels for gitfs errors
- 9d394de46 Improve error logging for pygit2 SSH-based remotes

- **PR #22813**: (twangboy) Updated instructions for building salt @ 2015-04-18 04:10:07 UTC
  - e99f2f6b28 Merge pull request #22813 from twangboy/win_doc_fix
  - adc421acdd Fixed some formatting issues
  - 8901b3b5a6 Updated instructions for building salt

- **ISSUE #22708**: (Bilge) salt-ssh file.accumulated error: NameError: global name 'msgpack' is not defined (refs: #22810)

- **PR #22810**: (basepi) [2014.7] More msgpack gating for salt-ssh @ 2015-04-17 22:28:24 UTC
  - fe1de89ad7 Merge pull request #22810 from basepi/salt-ssh.more.msgpack.gating
  - d4da8e66a4 Gate msgpack in salt/modules/saltutil.py
  - 0230b22ce Gate msgpack in salt/modules/data.py
  - d7e8741f02 Gate salt.states.file.py msgpack

- **ISSUE #17144**: (xpender) salt-cloud -m fails with softlayer (refs: #22803)

- **PR #22803**: (rallytime) Allow map file to work with softlayer @ 2015-04-17 20:34:42 UTC
  - 11df71e16d Merge pull request #22803 from rallytime/fix-17144
  - ce88b6ad41 Allow map file to work with softlayer

- **PR #22807**: (rallytime) Add 2014.7.5 links to windows installation docs @ 2015-04-17 20:32:13 UTC
  - cd43a95212 Merge pull request #22807 from rallytime/windows_docs_update
  - 5931a582d1 Replace all 4s with 5s
  - e6adea755 Add 2014.7.5 links to windows installation docs

- **PR #22795**: (rallytime) Added release note for 2014.7.5 release @ 2015-04-17 18:05:36 UTC
  - 0b295e2c87 Merge pull request #22795 from rallytime/release_notes
  - fde1feed46 Remove extra line
  - b19b95d992 Added release note for 2014.7.5 release

- **ISSUE #22740**: (lorengordon) New Windows installer assumes salt is installed to the current directory (refs: #22759)

- **PR #22759**: (twangboy) Final edits to the batch files for running salt @ 2015-04-17 04:31:15 UTC
  - PR #22754: (twangboy) Removed redundant \ and " (refs: #22759)
  - 3c91459de2 Merge pull request #22759 from twangboy/fix_bat_one_last_time
  - 075f82e046 Final edits to the batch files for running salt

- **PR #22760**: (thatch45) Fix issues with the syndic @ 2015-04-17 04:30:48 UTC
  - 20df2fbb83 Merge pull request #22760 from thatch45/syndic_fix
  - e2d624b37 Fix issues with the syndic not resolving the master when the interface is set

- **PR #22762**: (twangboy) Fixed version not showing in Add/Remove Programs @ 2015-04-17 04:29:46 UTC
  - 54c45845ab Merge pull request #22762 from twangboy/fix_installer
  - 4d25a8acf Fixed version not showing in Add/Remove Programs
28.2.80 Salt 2014.7.7 Release Notes

release 2015-10-13

Version 2014.7.7 is a bugfix release for 2014.7.0.

Statistics

- Total Merges: 54
- Total Issue References: 20
- Total PR References: 60
- Contributors: 28 (AkhterAli, BretFisher, MrCitron, alekti, basepi, bersace, cachedout, corux, cro, davidjb, dudemol, efficks, garethgreenaway, hvnsweeting, jacksontj, jacobhammons, jaybocc2, jfindlay, jquast, justinta, msteed, nmadhok, notpeter, puneetk, runtime, techhat, trevor-h, twangboy)

Changelog for v2014.7.6..v2014.7.7

Generated at: 2019-05-27 20:45:04 UTC

- **PR #27335**: (rallytime) [2014.7] Fixup salt-cloud logging @ 2015-09-24 20:33:53 UTC
  - e90412d3b8 Merge pull request #27335 from rallytime/cloud-logging-7
  - adeb1dca4 Pylint Fix
  - 588c13783c Salt-cloud logging clean up for windows functions
  - 9b6000135c [2014.7] Fixup salt-cloud logging

- **PR #27252**: (jfindlay) 2014.7 -> 2014.7.0 @ 2015-09-18 23:44:39 UTC
  - c186e51764 Merge pull request #27252 from jfindlay/version.2014.7
  - 3d28307a00 2014.7 -> 2014.7.0

- **PR #27117**: (jacobhammons) made 2014.7 an archived release @ 2015-09-15 07:35:12 UTC
  - a971f8901a Merge pull request #27117 from jacobhammons/release-docs-2014.7
  - b69e11e04 made 2014.7 an archived release minor doc site updates

- **PR #27114**: (cachedout) Issue warning that some log levels may contain sensitive data @ 2015-09-15 07:30:43 UTC
  - 69d758e2e2b Merge pull request #27114 from cachedout/warn_on_insecure_log
  - 507b04683 Issue warning that some log levels may contain sensitive data

- **PR #27075**: (twangboy) Replaced password with redacted when displayed @ 2015-09-14 18:36:10 UTC
  - 507b04683 Issue warning that some log levels may contain sensitive data

- **ISSUE #26656**: (ari) [documentation] error in example for salt.runner.pillar (refs: #26667)

- **PR #26667**: (nmadhok) [doc-fix] Removing special character from salt.runners.pillar and other changes @ 2015-08-26 18:24:37 UTC
  - c2c7fe06c8 Merge pull request #26667 from nmadhok/doc-fix-2014.7
  - 26be189689 Doc fix. Fixes #26656
• **PR #26663**: (jacobhammons) version change for latest branch @ 2015-08-26 14:03:35 UTC
  - 6bd3dcca8 Merge pull request #26663 from jacobhammons/2014.7-version
  - b6af38070 version change for latest branch

• **PR #26636**: (rallytime) Refactor cloud provider tests to be more accurate @ 2015-08-25 21:28:34 UTC
  - 071a6112e5 Merge pull request #26636 from rallytime/cloud-test-fixes
  - c0d83d558d Don’t use id as variable
  - 2b4bc1679d Keep ec2 instance creation test the same - it works better for the ec2 output
  - b5b58eb31f Skip digital ocean tests since we can’t use API v1 with v2 tests
  - 9ae1539c62 Update cloud tests to be more efficient and accurate

• **ISSUE #26630**: (efficks) win_service: Function has_powershell does not work on Windows XP (refs: #26640)

• **PR #26640**: (efficks) Fix function spacing @ 2015-08-25 20:01:39 UTC
  - 304542b4c6 Merge pull request #26640 from efficks/fixws2014
  - ebe5d9d85c Fix function spacing

• **PR #26515**: (bersace) Defaults to current saltenv in state.sls @ 2015-08-25 16:35:50 UTC
  - 4532f98a76 Merge pull request #26515 from bersace/salt-env-local-sls
  - 0727af9e3d Defaults to current saltenv in state.sls

• **PR #26242**: (cro) Remove dead code @ 2015-08-12 15:14:20 UTC
  - da8bca09aa Merge pull request #26242 from cro/anonldap4
  - a0d2ab1ee0 Remove dead code

• **PR #26216**: (cro) Fix LDAP configuration issue. @ 2015-08-11 18:33:43 UTC
  - 1ecf23773e Merge pull request #26216 from cro/anonldap3
  - a2f1327b99 Documentation update for anonymous bind issue.
  - 2ef54b6b13 Documentation update for anonymous bind issue.
  - 5b13b36bb00 Fix issue with LDAP anonymous binds.

• **PR #26116**: (corux) file.replace fails if repl string is an invalid regex and append/prepend is used @ 2015-08-10 16:44:12 UTC
  - abdf2935c4 Merge pull request #26116 from corux/fix-escape-content
  - fd915ddc36 Append/prepend: search for full line with escaped content

• **ISSUE #25751**: (basepi) Document master_finger more prominently (refs: #26088)

• **PR #26088**: (jacobhammons) Master finger @ 2015-08-07 14:31:33 UTC
  - 106356d98d Merge pull request #26088 from jacobhammons/master-finger
  - 133d5f7885 some small changes
  - d220c83777 master_finger configuration docs switch a script to use https:// instead of http:// Refs #25751

• **ISSUE #25961**: (getabc) [2015.5.3-2] salt-winrepo.git/salt-minion.sls fails certificate ‘*.wpengine.com’ or ‘wpengine.com’ (refs: #26047)

• **PR #26047**: (jacobhammons) Updated windows download links in the docs to https://repo.saltstack.com @ 2015-08-05 22:59:44 UTC
- 4bd4bc41f2 Merge pull request #26047 from jacobhammons/win-downloads
- 7c162d181c Updated windows download links in the docs to https://repo.saltstack.com Refs #25961

- **ISSUE #25701:** (alekti) Issue #23764 regression (refs: #25750)
- **ISSUE #23764:** (es1o) source_hash from local file is not supported. (refs: #25750)
- **PR #25750:** (alekti) Add file as supported protocol for file source_hash. Fixes #25701. @ 2015-07-29 02:31:27 UTC
  - d93eb87c16 Merge pull request #25750 from alekti/2014.7
  - 9ec3ae96d4 Add file as supported protocol for file source_hash. Fixes #23764.
- **PR #25704:** (cachedout) Ensure prior alignment with master_type in 2014.7 @ 2015-07-27 16:06:35 UTC
  - 3a15df22ac Merge pull request #25704 from cachedout/master_type_2014_7
  - c95886c9a7 Ensure prior alignment with master_type in 2014.7
- **PR #25657:** (MrCitron) Add the ability to specify a base pattern for carbon returner @ 2015-07-24 16:32:58 UTC
  - d1b9362a73 Merge pull request #25657 from MrCitron/pattern-carbon-returner-2014.7
  - f8b2f8079f Add the ability to specify a base pattern for metrics path used by the carbon returner
- **PR #25633:** (AkhterAli) Update loader.py @ 2015-07-22 20:02:41 UTC
  - 9634351fc2 Merge pull request #25633 from AkhterAli/2014.7
  - 29be4bbe11 Update loader.py
- **PR #25416:** (cachedout) Fix broken keyword @ 2015-07-14 19:47:10 UTC
  - 09ebaceca8 Merge pull request #25416 from cachedout/str_2014_7
  - cc514938a8 Fix broken keyword
- **PR #25375:** (cachedout) Fix error in config.py for master_type @ 2015-07-13 16:49:27 UTC
  - 2a1dd1113f Merge pull request #25375 from cachedout/config_fix_2014_7
  - c041f2905f Fix error in config.py for master_type
- **PR #25324:** (jacobhammons) Latest help theme updates @ 2015-07-10 16:11:31 UTC
  - 2590e23d48 Merge pull request #25324 from jacobhammons/doc-theme-updates
  - 88f5fcf58d Latest help theme updates
- **ISSUE #18447:** (ryan-lane) Can’t install salt with raet using pip -e git (refs: #25093)
- **PR #25093:** (jaybocc2) quick fix for issue #18447 @ 2015-07-01 15:56:53 UTC
  - 36d53ef59e Merge pull request #25093 from jaybocc2/2014.7
  - c6a501edba quick fix for issue #18447
- **PR #25069:** (puneetk) Add a helper module function called list_enabled @ 2015-06-30 20:53:51 UTC
  - 38903a94a1 Merge pull request #25069 from puneetk/patch-1
  - f0b4e6006e Update Documentation to clarify version added
  - f8dc6030e7 Pylint updates, removing whitespace
  - 532d315dd1 [Code Review update] renamed function to is Enabled from list_enabled
  - 20b0462289 Update schedule.py
- 4f1471d7fb Add a helper module function called list_enabled

- **ISSUE** #15209: (hubez) file.manage: source_hash not working with s3:// (2014.7.0rc1) (refs: #25011)

- **PR** #25011: (notpeter) Add s3 to protocols for remote source_hash (2014.7 backport) @ 2015-06-27 22:35:44 UTC
  - a7154e7471 Merge pull request #25011 from notpeter/s3_2014.7_backport
  - 8b8af640f6 Add s3 to protocols for remote source_hash

- **ISSUE** #24915: (justinta) Salt-cloud not working in 2014.7.6 (refs: #24944)

- **PR** #24944: (techhat) Double-check main_cloud_config @ 2015-06-25 12:29:55 UTC
  - a11e406e6a Merge pull request #24944 from techhat/issue24915
  - 59c3081e49 Double-check main_cloud_config

- **PR** #24936: (justinta) Fixed ps module to not use depreciated psutil commands @ 2015-06-24 22:38:19 UTC
  - d26a5447ba Merge pull request #24936 from jtand/psutil

- **ISSUE** saltstack/salt-bootstrap#473: (s1kbr0) salt-bootstrap.sh […] git v2014.1.11 on SmartOS base64 is broken (refs: #24918)

- **PR** #24918: (BretFisher) SmartOS SMF minion startup fix @ 2015-06-24 15:44:26 UTC
  - eeb05a1b10 Merge pull request #24918 from BretFisher/minion-start-smartos-smf-fix
  - d7bfb07c7d Smartos smf minion fix

- **ISSUE** #24776: (nmadhok) –static option in salt raises ValueError and has been broken for a very long time (refs: #24777)

- **PR** #24780: (nmadhok) Backporting PR #24777 to 2014.7 branch @ 2015-06-18 14:52:56 UTC
  - PR #24779: (nmadhok) Backporting Changes to 2014.7 branch (refs: #24777)
  - PR #24778: (nmadhok) Backporting PR #24777 to 2015.2 branch (refs: #24777)
  - PR #24777: (nmadhok) Fixing issue where –static option fails with ValueError Fixes #24776 (refs: #24778, #24780)
  - 4281dff0f0 Merge pull request #24780 from nmadhok/backport-2014.7-24777
  - c53bd9a22 Backporting PR #24777 to 2014.7 branch

- **ISSUE** #21318: (thanatos) get_full_returns raises KeyError (refs: #24769)

- **ISSUE** #18994: (njhartwell) salt.client.get_cli_returns errors when called immediately after run_job (refs: #24769)

- **PR** #24769: (msteed) Fix stacktrace in get_cli_returns() @ 2015-06-18 14:31:46 UTC
  - f3c5eb2d41 Merge pull request #24769 from msteed/issue-21318
  - f40a9d5cc0 Fix stacktrace in get_cli_returns()

- **ISSUE** #17041: (xenophonf) Confusing Salt error messages due to limited/incomplete PowerShell command error handling (refs: #24690)

- **PR** #24690: (twangboy) Report powershell output instead of error @ 2015-06-17 16:33:49 UTC
  - 59db24602f Merge pull request #24690 from twangboy/fix_17041
  - 7a015389af Added additional reporting
  - d84ad5d519 Fixed capitalization... Failed and Already
- e9552455c4 Merge branch ’2014.7’ of https://github.com/saltstack/salt into fix_17041
- ISSUE #24196: (johnccfm) Exception when using user.present with Windows (refs: #24646)
- PR #24646: (twangboy) Fixed user.present on existing user @ 2015-06-15 15:04:43 UTC
  - a18dad71 Merge pull request #24646 from twangboy/fix_24196
  - a208e1d60f Fixed user.present on existing user
  - 144bf2f67 Report powershell output instead of error
- PR #24643: (cro) Add reference to salt-announce mailing list @ 2015-06-12 20:21:15 UTC
  - b99484fde2 Merge pull request #24643 from cro/saltannounce
  - ecb0623d7f Add salt-announce mailing list.
- PR #24620: (twangboy) Fixed comment and uncomment functions in file.py @ 2015-06-12 19:36:26 UTC
  - 635121e85d Merge pull request #24620 from twangboy/fix_24215
  - d7a9999be1 Fixed comment and uncomment functions in file.py
- PR #24589: (BretFisher) Fixed Mine example for jinja code block @ 2015-06-11 15:48:02 UTC
  - d83928a7f9 Merge pull request #24589 from BretFisher/patch-1
  - 65a11336dc Fixed Mine example for jinja code block
- ISSUE #24427: (fayetted) 2015.5.1-3 Windows 64Bit Minion fails to start after install (refs: #24530)
- PR #24530: (twangboy) Start Minion Service on Silent Install @ 2015-06-09 21:30:08 UTC
  - d376390f76 Merge pull request #24530 from twangboy/fix_24427
  - 673e1d809e Added missing panel.bmp for installer
  - cc50218b01 Start Minion Service on Silent Install
- PR #24513: (jquast) bugfix use of ’iteritem’ in 2014.7 branch @ 2015-06-09 04:06:36 UTC
  - PR #24511: (jquast) bugfix: trailing ”...done” in rabbitmq output (refs: #24513)
  - 6ebc476bb3 Merge pull request #24513 from jquast/2014.7-bugfix-iteritem
  - 2be0180e5e bugfix use of ’iteritem’ in 2014.7 branch
- ISSUE #24276: (markuskramerIgitt) Live salt-master Profiling with SIGUSR2 fails (refs: #24405)
- PR #24405: (jacksontj) Fix for #24276 @ 2015-06-04 20:50:42 UTC
  - 83f853b6ea Merge pull request #24405 from jacksontj/2014.7
  - 2c7afac6bf Fix for #24276
- PR #24395: (hvnsweeting) handle exceptions when received data is not in good shape @ 2015-06-04 20:08:22 UTC
  - cef919c602 Merge pull request #24395 from hvnsweeting/handle-exception-get-file
  - bb798a0224 handle exceptions when received data is not in good shape
- PR #24305: (twangboy) Added documentation, fixed formatting @ 2015-06-04 19:40:54 UTC
  - efba1a94b4 Merge pull request #24305 from twangboy/win_path_docs
  - 36804253e6 Fixed pylint error caused by P... added r
  - bc42a4bb11 triple double quotes to triple single quotes
- 77cd930bba Added documentation, fixed formatting

- **PR #24178**: (rallytime) Backport #24118 to 2014.7, too. @ 2015-05-27 17:49:45 UTC
  - PR #24118: (trevor-h) removed deprecated pymongo usage (refs: #24178)
  - 9d7331c87d Merge pull request #24178 from rallytime/bp-24118
  - e2217a09e8 removed deprecated pymongo usage as no longer functional with pymongo > 3.x

- **PR #24159**: (rallytime) Fill out modules/keystone.py CLI Examples @ 2015-05-27 15:07:11 UTC
  - 4e8c5031b0 Merge pull request #24159 from rallytime/keystone_doc_examples
  - dadac8d076 Fill out modules/keystone.py CLI Examples

- **PR #24158**: (rallytime) Fix test_valid_docs test for tls module @ 2015-05-27 15:06:05 UTC
  - fc10ee8ed5 Merge pull request #24158 from rallytime/fix_doc_error
  - 49a517e2ca Fix test_valid_docs test for tls module

- **PR #24125**: (hvnsweeting) Fix rabbitmq test mode @ 2015-05-26 15:40:18 UTC
  - c0d32e0b5e Merge pull request #24125 from hvnsweeting/fix-rabbitmq-test-mode
  - 71862c69b9 enhance log
  - 28e2594162 change according to new output of rabbitmq module functions
  - cd0212e8ed processes and returns better output for rabbitmq module

- **ISSUE #23464**: (tibold) cmd_iter_no_block() blocks (refs: #24093)

- **PR #24093**: (msteed) Make LocalClient.cmd_iter_no_block() not block @ 2015-05-25 15:56:42 UTC
  - 39a8f30f06 Merge pull request #24093 from msteed/issue-23464
  - fdf5903d75 Fix failing test
  - 41b344c7d3 Make LocalClient.cmd_iter_no_block() not block

- **PR #24008**: (davidjb) Correct reST formatting for states.cmd documentation @ 2015-05-21 04:19:01 UTC
  - 5bffd3045e Merge pull request #24008 from davidjb/2014.7
  - 8b8d0293d4 Correct reST formatting for documentation

- **PR #23933**: (jacobhammons) sphinx saltstack2 doc theme @ 2015-05-20 18:19:19 UTC
  - 1aa0420040 Merge pull request #23933 from jacobhammons/2014.7
  - a3613e68e4 removed numbering from doc TOC
  - 78b737c5e6 removed 2015.7 release from release notes, updated index page to remove PDF/epub links
  - e8677f7d77 Changed build settings to use saltstack2 theme and update release versions.
  - 81ed9c9f59 sphinx saltstack2 doc theme

- **PR #23965**: (hvnsweeting) handle all exceptions gitpython can raise @ 2015-05-20 15:08:03 UTC
  - 314e4db512 Merge pull request #23965 from hvnsweeting/20147-fix-gitfs-gitpython-exception
  - 2576301631 handle all exception gitpython can raise

- **PR #23939**: (basepi) Add extended changelog to 2014.7.6 release notes @ 2015-05-19 21:21:00 UTC

  - d7f0ebbb2 Remove ability of authenticating user to specify pam service

- PR #29392: (jacobhammons) updated version number to not reference a specific build from the latest branch also @ 2015-12-03 15:54:31 UTC
  - 85aa70a6cb Merge pull request #29392 from jacobhammons/2014.7
  - d7f0db1dd8 updated version number to not reference a specific build from the latest branch

- ISSUE #29295: (douardda) systemd’s service file should use the 'process' KillMode option on Debian also (refs: #29296)

- PR #29296: (douardda) Use process KillMode on Debian systems also @ 2015-12-01 16:00:16 UTC
  - d2fb2109a3 Merge pull request #29296 from douardda/patch-3
  - d2885390f4 Use process KillMode on Debian systems also

28.2.83 Salt 2014.1.0 Release Notes - Codename Hydrogen

**Note:** Due to a change in master to minion communication, 2014.1.0 minions are not compatible with older-version masters. Please upgrade masters first. More info on backwards-compatibility policy [here](#), under the "Upgrading Salt" subheading.

**Note:** A change in the grammar in the state compiler makes `module.run` in requisites illegal syntax. Its use is replaced simply with the word `module`. In other words you will need to change requisites like this:

```
require:
    module.run: some_module_name
```

to:

```
require:
    module: some_module_name
```

This is a breaking change. We apologize for the inconvenience, we needed to do this to remove some ambiguity in parsing requisites.
The 2014.1.0 release of Salt is a major release which not only increases stability but also brings new capabilities in virtualization, cloud integration, and more. This release brings a great focus on the expansion of testing making roughly double the coverage in the Salt tests, and comes with many new features.

2014.1.0 is the first release to follow the new date-based release naming system. See the version numbers page for more details.

**Major Features**

**Salt Cloud Merged into Salt**

Salt Cloud is a tool for provisioning salted minions across various cloud providers. Prior to this release, Salt Cloud was a separate project but this marks its full integration with the Salt distribution. A Getting Started guide and additional documentation for Salt Cloud can be found [here](#).

**Google Compute Engine**

Alongside Salt Cloud comes new support for the Google Compute Engine. Salt Stack can now deploy and control GCE virtual machines and the application stacks that they run.

For more information on Salt Stack and GCE, please see [this blog post](#).

Documentation for Salt and GCE can be found [here](#).

**Salt Virt**

Salt Virt is a cloud controller that supports virtual machine deployment, inspection, migration, and integration with many aspects of Salt.

Salt Virt has undergone a major overhaul with this release and now supports many more features and includes a number of critical improvements.

**Docker Integration**

Salt now ships with states and an execution module to manage Docker containers.

**Substantial Testing Expansion**

Salt continues to increase its unit/regression test coverage. This release includes over 300 new tests.

**BSD Package Management**

BSD package management has been entirely rewritten. FreeBSD 9 and older now default to using pkg_add, while FreeBSD 10 and newer will use pkgng. FreeBSD 9 can be forced to use pkgng, however, by specifying the following option in the minion config file:

```
providers:
  pkg: pkgng
```
In addition, support for installing software from the ports tree has been added. See the documentation for the ports
\textit{state} and \textit{execution module} for more information.

\textbf{Network Management for Debian/Ubuntu}

Initial support for management of network interfaces on Debian-based distros has been added. See the documenta-
tion for the \textit{network state} and the \textit{debian_ip} for more information.

\textbf{IPv6 Support for iptables State/Module}

The iptables \textit{state} and \textit{module} now have IPv6 support. A new parameter \texttt{family} has been added to the states and
execution functions, to distinguish between IPv4 and IPv6. The default value for this parameter is \texttt{ipv4}, specifying
\texttt{ipv6} will use ip6tables to manage firewall rules.

\textbf{GitFS Improvements}

Several performance improvements have been made to the \textit{Git fileserver backend}. Additionally, file states
can now use any SHA1 commit hash as a fileserver environment:

\begin{verbatim}
/etc/httpd/httpd.conf:
  file.managed:
    - source: salt://webserver/files/httpd.conf
    - saltenv: 45af879
\end{verbatim}

This applies to the functions in the \texttt{cp module} as well:

\begin{verbatim}
salt '*' cp.get_file salt://readme.txt /tmp/readme.txt saltenv=45af879
\end{verbatim}

\textbf{MinionFS}

This new fileserver backend allows files which have been pushed from the minion to the master (using \texttt{cp.push})
to be served up from the salt fileserver. The path for these files takes the following format:

\begin{verbatim}
salt://minion-id/path/to/file
\end{verbatim}

\texttt{minion-id} is the id of the "source" minion, the one from which the files were pushed to the master. \texttt{/path/to/
file} is the full path of the file.

The \textit{MinionFS Walkthrough} contains a more thorough example of how to use this backend.

\texttt{saltenv}

To distinguish between fileserver environments and execution functions which deal with environment variables, file-
server environments are now specified using the \texttt{saltenv} parameter. \texttt{env} will continue to work, but is deprecated
and will be removed in a future release.
Grains Caching

A caching layer has been added to the Grains system, which can help speed up minion startup. Disabled by default, it can be enabled by setting the minion config option `grains_cache`:

<table>
<thead>
<tr>
<th>grains_cache: True</th>
</tr>
</thead>
<tbody>
<tr>
<td># Seconds before grains cache is considered to be stale.</td>
</tr>
<tr>
<td>grains_cache_expiration: 300</td>
</tr>
</tbody>
</table>

If set to `True`, the grains loader will read from/write to a msgpack-serialized file containing the grains data.

Additional command-line parameters have been added to salt-call, mainly for testing purposes:

- `--skip-grains` will completely bypass the grains loader when salt-call is invoked.
- `--refresh-grains-cache` will force the grains loader to bypass the grains cache and refresh the grains, writing a new grains cache file.

Improved Command Logging Control

When using the `cmd module`, either on the CLI or when developing Salt execution modules, a new keyword argument `output_loglevel` allows for greater control over how (or even if) the command and its output are logged. For example:

```bash
salt '*' cmd.run 'tail /var/log/messages' output_loglevel=debug
```

The package management modules (apt, yumpkg, etc.) have been updated to log the copious output generated from these commands at loglevel `debug`.

Note: To keep a command from being logged, `output_loglevel=quiet` can be used.

Prior to this release, this could be done using `quiet=True`. This argument is still supported, but will be removed in a future Salt release.

PagerDuty Support

Initial support for firing events via PagerDuty has been added. See the documentation for the `pagerduty` module.

Virtual Terminal

Sometimes the subprocess module is not good enough, and, in fact, not even `askpass` is. This virtual terminal is still in its infant childhood, needs quite some love, and was originally created to replace `askpass`, but, while developing it, it immediately proved that it could do so much more. It's currently used by salt-cloud when bootstrapping salt on clouds which require the use of a password.

Proxy Minions

Initial basic support for Proxy Minions is in this release. Documentation can be found here.
Proxy minions are a developing feature in Salt that enables control of devices that cannot run a minion. Examples include network gear like switches and routers that run a proprietary OS but offer an API, or “dumb” devices that just don’t have the horsepower or ability to handle a Python VM.

Proxy minions can be difficult to write, so a simple REST-based example proxy is included. A Python bottle-based webserver can be found at https://github.com/cro/salt-proxy-rest as an endpoint for this proxy.

This is an ALPHA-quality feature. There are a number of issues with it currently, mostly centering around process control, logging, and inability to work in a masterless configuration.

Additional Bugfixes (Release Candidate Period)

Below are many of the fixes that were implemented in salt during the release candidate phase.

- Fix mount.mounted leaving conflicting entries in fstab (issue #7079)
- Fix mysql returner serialization to use json (issue #9590)
- Fix `ZMQError: Operation cannot be accomplished in current state` errors (issue #6306)
- Rbenv and ruby improvements
- Fix quoting issues with mysql port (issue #9568)
- Update mount module/state to support multiple swap partitions (issue #9520)
- Fix archiverate to work with bsdarch
- Clarify logs for minion ID caching
- Add numeric revision support to git state (issue #9718)
- Update master_uri with master_ip (issue #9694)
- Add comment to Debian mod_repo (issue #9923)
- Fix potential undefined loop variable in rabbitmq state (issue #8703)
- Fix for salt-virt runner to delete key on VM deletion
- Fix for `salt-run -d` to limit results to specific runner or function (issue #9975)
- Add tracebacks to jinja renderer when applicable (issue #10010)
- Fix parsing in monit module (issue #10041)
- Fix highstate output from syndic minions (issue #9732)
- Quiet logging when dealing with passwords/hashes (issue #10000)
- Fix for multiple remotes in git_pillar (issue #9932)
- Fix npm installed command (issue #10109)
- Add safeguards for utf8 errors in zcbuildout module
- Fix compound commands (issue #9746)
- Add systemd notification when master is started
- Many doc improvements
28.2.84 Salt 2014.1.1 Release Notes

release 2014-03-18

Version 2014.1.1 is a bugfix release for 2014.1.0. The changes include:

- Various doc fixes, including up-to-date Salt Cloud installation documentation.
- Renamed state.sls runner to state.orchestrate, to reduce confusion with the state.sls execution function
- Fix various bugs in the dig module (issue #10367)
- Add retry for query on certain EC2 status codes (issue #10154)
- Fix various bugs in mongodb_user state module (issue #10430)
- Fix permissions on ~/.salt_token (issue #10422)
- Add PyObjects support
- Fix launchctl module crash with missing files
- Fix saltutil.find_job for Windows (issue #10581)
- Fix OS detection for OpenSolaris (issue #10601)
- Fix broken salt-ssh key_deploy
- Add support for multiline cron comments (issue #10721)
- Fix timezone module for Arch (issue #10789)
- Fix symlink support for file.recurse (issue #10809)
- Fix multi-master bugs (issue #10732 and issue #10969)
- Fix file.patch to error when source file is unavailable (issue #10380)
- Fix pkg to handle packages set as purge in pkg.installed (issue #10719)
- Add zmqversion grain
- Fix highstate summary for masterless minions (issue #10945)
- Fix saltutil.find_job for 2014.1 masters talking to 0.17 minions (issue #11020)
- Fix file.recurse states with trailing slashes in source (issue #11002)
- Fix pkg states to allow pkgname.x86_64 (issue #7306)
- Make iptables states set a default table for flush (issue #11037)
- Added iptables --reject-with after final iptables call in iptables states (issue:10757)
- Fix improper passing of “family” in iptables states (issue #10774)
- Fix traceback in iptables.insert states (issue #10988)
- Fix zombie processes (issue #10867 and others)
- Fix batch mode to obey --return settings (issue #9146)
- Fix localclient issue that was causing batch mode breakage (issue #11094, issue #10470, and others)
- Multiple salt-ssh fixes
- FreeBSD: look in /usr/local/etc/salt for configuration by default, if installed using pip --editable.
- Add a skip_suggestions parameter to pkg.installed states which allows pre-flight check to be skipped (issue #11106)
- Fixed tag-based gitfs fileserver environments regression (issue #10956)
- Yum: fix cache of available pkgs not cleared when repos are changed (issue #11001)
- Yum: fix for plugin-provided repositories (i.e. RHN/Spacewalk) (issue #11145)
- Fix regression in chocolatey.bootstrap (issue #10541)
- Fix fail on unknown target in jobs runner (issue #11151)
- Don’t log errors for commands which are expected to sometimes exit with non-zero exit status (issue #11154, issue #11090)
- Fix test=True CLI override of config option (issue #10877)
- Log sysctl key listing at loglevel TRACE (issue #10931)

28.2.85 Salt 2014.1.10 Release Notes

release 2014-08-01

Note: Version 2014.1.9 contained a regression which caused inaccurate Salt version detection, and thus was never packaged for general release. This version contains the version detection fix, but is otherwise identical to 2014.1.9.

Version 2014.1.10 is another bugfix release for 2014.1.0. Changes include:
- Ensure salt-ssh will not continue if permissions on a temporary directory are not correct.
- Use the bootstrap script distributed with Salt instead of relying on an external resource
- Remove unused testing code
- Ensure salt states are placed into the .salt directory in salt-ssh
- Use a randomized path for temporary files in a salt-cloud deployment
- Clean any stale directories to ensure a fresh copy of salt-ssh during a deployment

Salt 2014.1.10 fixes security issues documented by CVE-2014-3563: "Insecure tmp-file creation in seed.py, salt-ssh, and salt-cloud." Upgrading is recommended.

28.2.86 Salt 2014.1.11 Release Notes

release 2014-08-29

Version 2014.1.11 is another bugfix release for 2014.1.0. Changes include:
- Fix for minion_id with byte-order mark (BOM) (issue #12296)
- Fix runas deprecation in at module
- Fix trailing slash behavor for file.makedirs_ (issue #14019)
- Fix chocolatey path (issue #13870)
- Fix git_pillar infinite loop issues (issue #14671)
- Fix json outputter null case
- Fix for minion error if one of multiple masters are down (issue #14099)
28.2.87 Salt 2014.1.12 Release Notes

release 2014-10-08

Version 2014.1.12 is another bugfix release for 2014.1.0. Changes include:

- Fix `scp_file` always failing (which broke salt-cloud) (issue #16437)
- Fix regression in pillar in masterless (issue #16210, issue #16416, issue #16428)

28.2.88 Salt 2014.1.13 Release Notes

release 2014-10-14

Version 2014.1.13 is another bugfix release for 2014.1.0. Changes include:

- Fix `sftp_file` by checking the exit status code of `scp` (which broke salt-cloud) (issue #16599)

28.2.89 Salt 2014.1.2 Release Notes

release 2014-04-15

Version 2014.1.2 is another bugfix release for 2014.1.0. The changes include:

- Fix username detection when su’ed to root on FreeBSD (issue #11628)
- Fix minionfs backend for file.recurse states
- Fix 32-bit packages of different arches than the CPU arch, on 32-bit RHEL/CentOS (issue #11822)
- Fix bug with specifying alternate home dir on user creation (FreeBSD) (issue #11790)
- Don’t reload site module on module refresh for MacOS
- Fix regression with running execution functions in Pillar SLS (issue #11453)
- Fix some modules missing from Windows installer
- Don’t log an error for yum commands that return nonzero exit status on non-failure (issue #11645)
- Fix bug in rabbitmq state (issue #8703)
- Fix missing ssh config options (issue #10604)
- Fix top.sls ordering (issue #10810 and issue #11691)
- Fix `salt-key --list all` (issue #10982)
- Fix `win_servermanager` install/remove function (issue #11038)
- Fix interaction with tokens when running commands as root (issue #11223)
- Fix overstate bug with `find_job` and `**kwargs` (issue #10503)
- Fix saltenv for aptpkg.mod_repo from pkgrepo state
- Fix environment issue causing file caching problems (issue #11189)
- Fix bug in `__parse_key` in registry state (issue #11408)
- Add minion auth retry on rejection (issue #10763)
- Fix publish_session updating the encryption key (issue #11493)
- Fix for bad `AssertionError` raised by GitPython (issue #11473)
• Fix `debian_ip` to allow disabling and enabling networking on Ubuntu (issue #11164)
• Fix potential memory leak caused by saved (and unused) events (issue #11582)
• Fix exception handling in the MySQL module (issue #11616)
• Fix environment-related error (issue #11534)
• Include `psutil` on Windows
• Add `file.replace` and `file.search` to Windows (issue #11471)
• Add additional `file` module helpers to Windows (issue #11235)
• Add `pid` to `netstat` output on Windows (issue #10782)
• Fix Windows not caching new versions of installers in `winrepo` (issue #10597)
• Fix hardcoded md5 hashing
• Fix `git.latest` with `test=True` (issue #11595)
• Fix `file.check_perms` hardcoded `follow_symlinks` (issue #11387)
• Fix certain `pkg` states for RHEL5/Cent5 machines (issue #11719)

28.2.90 Salt 2014.1.3 Release Notes

release 2014-04-15

Version 2014.1.3 is another bugfix release for 2014.1.0. It was created as a hotfix for a regression found in 2014.1.2, which was not distributed. The only change made was as follows:

• Fix regression that caused `saltutil.find_job` to fail, causing premature terminations of salt CLI commands.

Changes in the not-distributed 2014.1.2, also included in 2014.1.3:

• Fix username detection when su’ed to root on FreeBSD (issue #11628)
• Fix minionfs backend for `file.recurse` states
• Fix 32-bit packages of different arches than the CPU arch, on 32-bit RHEL/CentOS (issue #11822)
• Fix bug with specifying alternate home dir on user creation (FreeBSD) (issue #11790)
• Don’t reload site module on module refresh for MacOS
• Fix regression with running execution functions in Pillar SLS (issue #11453)
• Fix some modules missing from Windows installer
• Don’t log an error for yum commands that return nonzero exit status on non-failure (issue #11645)
• Fix bug in rabbitmq state (issue #8703)
• Fix missing ssh config options (issue #10604)
• Fix `top.sls` ordering (issue #10810 and issue #11691)
• Fix `salt-key --list all` (issue #10982)
• Fix `win_servermanager` install/remove function (issue #11038)
- Fix interaction with tokens when running commands as root (issue #11223)
- Fix overstate bug with `find_job` and `**kwargs` (issue #10503)
- Fix `saltenv` for `aptpkg.mod_repo` from `pkgrepo` state
- Fix environment issue causing file caching problems (issue #11189)
- Fix bug in `__parse_key` in registry state (issue #11408)
- Add minion auth retry on rejection (issue #10763)
- Fix `publish_session` updating the encryption key (issue #11493)
- Fix for bad `AssertionError` raised by GitPython (issue #11473)
- Fix `debian_ip` to allow disabling and enabling networking on Ubuntu (issue #11164)
- Fix potential memory leak caused by saved (and unused) events (issue #11582)
- Fix exception handling in the MySQL module (issue #11616)
- Fix environment-related error (issue #11534)
- Include `psutil` on Windows
- Add `file.replace` and `file.search` to Windows (issue #11471)
- Add additional `file` module helpers to Windows (issue #11235)
- Add `pid` to `netstat` output on Windows (issue #10782)
- Fix Windows not caching new versions of installers in `winrepo` (issue #10597)
- Fix hardcoded md5 hashing
- Fix `kwargs` in `salt-ssh` (issue #11609)
- Fix file backup timestamps (issue #11745)
- Fix stacktrace on `sys.doc` with invalid eauth (issue #11293)
- Fix `git.latest` with `test=True` (issue #11595)
- Fix `file.check_perms` hardcoded `follow_symlinks` (issue #11387)
- Fix certain `pkg` states for RHEL5/Cent5 machines (issue #11719)

### 28.2.91 Salt 2014.1.4 Release Notes

**release** 2014-05-05

Version 2014.1.4 is another bugfix release for 2014.1.0. Changes include:

- Fix `setup.py` dependency issue (issue #12031)
- Fix handling for IOErrors under certain circumstances (issue #11783 and issue #11853)
- Fix fatal exception when `/proc/1/cgroup` is not readable (issue #11619)
- Fix os grains for OpenSolaris (issue #11907)
- Fix `lvs.zero` module argument pass-through (issue #9001)
- Fix bug in `debian_ip` interaction with `network.system` state (issue #11164)
- Remove bad binary package verification code (issue #12177)
- Fix traceback in solaris package installation (issue #12237)
• Fix *file.directory* state symlink handling (issue #12209)
• Remove *external_ip* grain
• Fix *file.managed* makedirs issues (issue #10446)
• Fix hang on non-existent Windows drive letter for *file* module (issue #9880)
• Fix salt minion caching all users on the server (issue #9743)
• Add strftime formatting for *ps.boot_time* (issue #12428)

28.2.92 Salt 2014.1.5 Release Notes

release 2014-06-11

Version 2014.1.5 is another bugfix release for 2014.1.0. Changes include:
• Add function for finding cached job on the minion
• Fix iptables save file location for Debian (issue #11730)
• Fix for minion caching jobs when master is down
• Bump default *syndic_wait* to 5 to fix syndic-related problems (issue #12262)
• Add OpenBSD, FreeBSD, and NetBSD support for *network.netstat* (issue #12121)
• Fix false positive error in logs for *makeconf* state (issue #9762)
• Fix for yum *fromrepo* package installs when repo is disabled by default (issue #12466)
• Fix for extra blank lines in *file.blockreplace* (issue #12422)
• Fix grain detection for OpenVZ guests (issue #11877)
• Fix *get_dns_servers* function for Windows *win_dns_client*
• Use system locale for ports package installations
• Use correct stop/restart procedure for Debian networking in *debian_ip* (issue #12614)
• Fix for *cmd_iter/cmd_iter_no_block* blocking issues (issue #12617)
• Fix traceback when syncing custom types (issue #12883)
• Fix cleaning directory symlinks in *file.directory*
• Add performance optimizations for *saltutil.sync_all* and *state.highstate*
• Fix possible error in *saltutil.running*
• Fix for kmod modules with dashes (issue #13239)
• Fix possible race condition for Windows minions in state module reloading (issue #12370)
• Fix bug with roster for *passwd* option that is loaded as a non-string object (issue #13249)
• Keep duplicate version numbers from showing up in *pkg.list_pkgs* output
• Fixes for Jinja renderer, timezone *module/state* (issue #12724)
• Fix timedatectl parsing for systemd>=210 (issue #12728)
• Fix *saltenv* being written to YUM repo config files (issue #12887)
• Removed the deprecated external nodes classifier (originally accessible by setting a value for *external_nodes* in the master configuration file). Note that this functionality has been marked deprecated for some time and was replaced by the more general *master tops* system.
• More robust escaping of ldap filter strings.
• Fix trailing slash in `gitfs_root` causing files not to be available (issue #13185)

## 28.2.93 Salt 2014.1.6 Release Notes

release 2014-07-08

Version 2014.1.6 is another bugfix release for 2014.1.0. Changes include:

• Fix extra `iptables --help` output (Sorry!) (issue #13648, issue #13507, issue #13527, issue #13607)
• Fix `mount.active` for Solaris
• Fix support for `allow-hotplug` statement in `debian_ip` network module
• Add sqlite3 to esky builds
• Fix `jobs.active` output (issue #9526)
• Fix the `virtual` grain for Xen (issue #13534)
• Fix `_ext_nodes` unavailable on master (issue #13535)
• Fix eauth for batch mode (issue #9605)
• Fix force-related issues with tomcat support (issue #12889)
• Fix KeyError when cloud mapping
• Fix salt-minion restart loop in Windows (issue #12086)
• Fix detection of `service` virtual module on Fedora minions
• Fix traceback with missing ipv4 grain (issue #13838)
• Fix issue in roots backend with invalid data in `mtime_map` (issue #13836)
• Fix traceback in `jobs.active` (issue #11151)
• Fix `master_tops` and `_ext_nodes` issue (issue #13535, issue #13673)

## 28.2.94 Salt 2014.1.7 Release Notes

release 2014-07-09

Version 2014.1.7 is another bugfix release for 2014.1.0. Changes include:

• Fix batch mode regression (issue #14046)

This release was a hotfix release for the regression listed above which was present in the 2014.1.6 release. The changes included in 2014.1.6 are listed below:

• Fix extra `iptables --help` output (Sorry!) (issue #13648, issue #13507, issue #13527, issue #13607)
• Fix `mount.active` for Solaris
• Fix support for `allow-hotplug` statement in `debian_ip` network module
• Add sqlite3 to esky builds
• Fix `jobs.active` output (issue #9526)
• Fix the `virtual` grain for Xen (issue #13534)
• Fix eauth for batch mode (issue #9605)
• Fix force-related issues with *tomcat* support ([issue #12889](#))
• Fix KeyError when cloud mapping
• Fix salt-minion restart loop in Windows ([issue #12086](#))
• Fix detection of *service* virtual module on Fedora minions
• Fix traceback with missing ipv4 grain ([issue #13838](#))
• Fix issue in roots backend with invalid data in *mtime_map* ([issue #13836](#))
• Fix traceback in *jobs.active* ([issue #11151](#))
• Fix *master_tops* and *_ext_nodes* issue ([issue #13535, issue #13673](#))

### 28.2.95 Salt 2014.1.8 Release Notes

**release** 2014-07-30

**Note:** This release contained a regression which caused inaccurate Salt version detection, and thus was never packaged for general release. Please use version 2014.1.10 instead.

Version 2014.1.8 is another bugfix release for 2014.1.0. Changes include:

• Ensure salt-ssh will not continue if permissions on a temporary directory are not correct.
• Use the bootstrap script distributed with Salt instead of relying on an external resource
• Remove unused testing code
• Ensure salt states are placed into the `.salt` directory in salt-ssh
• Use a randomized path for temporary files in a salt-cloud deployment
• Clean any stale directories to ensure a fresh copy of salt-ssh during a deployment

### 28.2.96 Salt 2014.1.9 Release Notes

**release** 2014-07-31

**Note:** This release contained a regression which caused inaccurate Salt version detection, and thus was never packaged for general release. Please use version 2014.1.10 instead.

**Note:** Version 2014.1.8 contained a regression which caused inaccurate Salt version detection, and thus was never packaged for general release. This version contains the version detection fix, but is otherwise identical to 2014.1.8.

Version 2014.1.9 is another bugfix release for 2014.1.0. Changes include:

• Ensure salt-ssh will not continue if permissions on a temporary directory are not correct.
• Use the bootstrap script distributed with Salt instead of relying on an external resource
• Remove unused testing code
• Ensure salt states are placed into the `.salt` directory in salt-ssh
• Use a randomized path for temporary files in a salt-cloud deployment
• Clean any stale directories to ensure a fresh copy of salt-ssh during a deployment

28.2.97 Salt 0.10.0 Release Notes

release 2012-06-16

0.10.0 has arrived! This release comes with MANY bug fixes, and new capabilities which greatly enhance performance and reliability. This release is primarily a bug fix release with many new tests and many repaired bugs. This release also introduces a few new key features which were brought in primarily to repair bugs and some limitations found in some of the components of the original architecture.

Major Features

Event System

The Salt Master now comes equipped with a new event system. This event system has replaced some of the back end of the Salt client and offers the beginning of a system which will make plugging external applications into Salt. The event system relies on a local ZeroMQ publish socket and other processes can connect to this socket and listen for events. The new events can be easily managed via Salt’s event library.

Unprivileged User Updates

Some enhancements have been added to Salt for running as a user other than root. These new additions should make switching the user that the Salt Master is running as very painless, simply change the user option in the master configuration and restart the master, Salt will take care of all of the particulars for you.

Peer Runner Execution

Salt has long had the peer communication system used to allow minions to send commands via the salt master. 0.10.0 adds a new capability here, now the master can be configured to allow for minions to execute Salt runners via the peer_run option in the salt master configuration.

YAML Parsing Updates

In the past the YAML parser for sls files would return the incorrect numbers when the file mode was set with a preceding 0. The YAML parser used in Salt has been modified to no longer convert these number into octal but to keep them as the correct value so that sls files can be a little cleaner to write.

State Call Data Files

It was requested that the minion keep a local cache of the most recent executed state run. This has been added and now with state runs the data is stored in a msgpack file in the minion’s cachedir.

Turning Off the Job Cache

A new option has been added to the master configuration file. In previous releases the Salt client would look over the Salt job cache to read in the minion return data. With the addition of the event system the Salt client can now watch for events directly from the master worker processes.
This means that the job cache is no longer a hard requirement. Keep in mind though, that turning off the job cache means that historic job execution data cannot be retrieved.

Test Updates

Minion Swarms Are Faster

To continue our efforts with testing Salt’s ability to scale the minionswarm script has been updated. The minion-swarm can now start up minions much faster than it could before and comes with a new feature allowing modules to be disabled, thus lowering the minion’s footprint when making a swarm. These new updates have allows us to test

```
# python minionswarm.py -m 20 --master salt-master
```

Many Fixes

To get a good idea for the number of bugfixes this release offers take a look at the closed tickets for 0.10.0, this is a very substantial update:

https://github.com/saltstack/salt/issues?milestone=12&state=closed

Master and Minion Stability Fixes

As Salt deployments grow new ways to break Salt are discovered. 0.10.0 comes with a number of fixes for the minions and master greatly improving Salt stability.

28.2.98 Salt 0.10.1 Release Notes

release 2012-06-19

28.2.99 Salt 0.10.2 Release Notes

release 2012-07-30

0.10.2 is out! This release comes with enhancements to the pillar interface, cleaner ways to access the salt-call capabilities in the API, minion data caching and the event system has been added to salt minions.

There have also been updates to the ZeroMQ functions, many more tests (thanks to sponsors, the code sprint and many contributors) and a swath of bug fixes.

Major Features

Ext Pillar Modules

The ranks of available Salt modules directories sees a new member in 0.10.2. With the popularity of pillar a higher demand has arisen for ext_pillar interfaces to be more like regular Salt module additions. Now ext_pillar interfaces can be added in the same way as other modules, just drop it into the pillar directory in the salt source.
Minion Events

In 0.10.0 an event system was added to the Salt master. 0.10.2 adds the event system to the minions as well. Now event can be published on a local minion as well.

The minions can also send events back up to the master. This means that Salt is able to communicate individual events from the minions back up to the Master which are not associated with command.

Minion Data Caching

When pillar was introduced the landscape for available data was greatly enhanced. The minion’s began sending grain data back to the master on a regular basis.

The new config option on the master called minion_data_cache instructs the Salt master to maintain a cache of the minion’s grains and pillar data in the cachedir. This option is turned off by default to avoid hitting the disk more, but when enabled the cache is used to make grain matching from the salt command more powerful, since the minions that will match can be predetermined.

Backup Files

By default all files replaced by the file.managed and file.recurse states we simply deleted. 0.10.2 adds a new option. By setting the backup option to minion the files are backed up before they are replaced.

The backed up files are located in the cachedir under the file_backup directory. On a default system this will be at: /var/cache/salt/file_backup

Configuration files

salt-master and salt-minion automatically load additional configuration files from master.d/*.conf respective minion.d/*.conf where master.d/minion.d is a directory in the same directory as the main configuration file.

Salt Key Verification

A number of users complained that they had inadvertently deleted the wrong salt authentication keys. 0.10.2 now displays what keys are going to be deleted and verifies that they are the keys that are intended for deletion.

Key auto-signing

If autosign_file is specified in the configuration file incoming keys will be compared to the list of keynames in autosign_file. Regular expressions as well as globbing is supported.

The file must only be writable by the user otherwise the file will be ignored. To relax the permission and allow group write access set the permissive_pki_access option.

Module changes
Improved OpenBSD support

New modules for managing services and packages were provided by Joshua Elsasser to further improve the support for OpenBSD.

Existing modules like the `disk` module were also improved to support OpenBSD.

SQL Modules

The MySQL and PostgreSQL modules have both received a number of additions thanks to the work of Avi Marcus and Roman Imankulov.

ZFS Support on FreeBSD

A new ZFS module has been added by Kurtis Velarde for FreeBSD supporting various ZFS operations like creating, extending or removing zpools.

Augeas

A new Augeas module by Ulrich Dangel for editing and verifying config files.

Native Debian Service module

The support for the Debian was further improved with a new service module for Debian by Ahmad Khayyat supporting `disable` and `enable`.

Cassandra

Cassandra support has been added by Adam Garside. Currently only status and diagnostic information are supported.

Networking

The networking support for RHEL has been improved and supports bonding support as well as zeroconf configuration.

Monit

Basic monit support by Kurtis Velarde to control services via monit.

nzbget

Basic support for controlling nzbget by Joseph Hall
Bluetooth

Basic bluez support for managing and controlling Bluetooth devices. Supports scanning as well as pairing/unpairing by Joseph Hall.

Test Updates

Consistency Testing

Another testing script has been added. A bug was found in pillar when many minions generated pillar data at the same time. The new `consist.py` script is the tests directory was created to reproduce bugs where data should always be consistent.

Many Fixes

To get a good idea for the number of bugfixes this release offers take a look at the closed tickets for 0.10.2, this is a very substantial update:

https://github.com/saltstack/salt/issues?milestone=24&page=1&state=closed

Master and Minion Stability Fixes

As Salt deployments grow new ways to break Salt are discovered. 0.10.2 comes with a number of fixes for the minions and master greatly improving Salt stability.

28.2.100 Salt 0.10.3 Release Notes

release 2012-09-30

The latest taste of Salt has come, this release has many fixes and feature additions. Modifications have been made to make ZeroMQ connections more reliable, the beginning of the ACL system is in place, a new command line parsing system has been added, dynamic module distribution has become more environment aware, the new `master_finger` option and many more!

Major Features

ACL System

The new ACL system has been introduced. The ACL system allows for system users other than root to execute salt commands. Users can be allowed to execute specific commands in the same way that minions are opened up to the peer system.

The configuration value to open up the ACL system is called `client_acl` and is configured like so:

```yaml
client_acl:
  fred:
    - test..*
    - pkg.list_pkgs
```

Where `fred` is allowed access to functions in the test module and to the `pkg.list_pkgs` function.
Master Finger Option

The *master_finger* option has been added to improve the security of minion provisioning. The *master_finger* option allows for the fingerprint of the master public key to be set in the configuration file to double verify that the master is valid. This option was added in response to a motivation to pre-authenticate the master when provisioning new minions to help prevent man in the middle attacks in some situations.

Salt Key Fingerprint Generation

The ability to generate fingerprints of keys used by Salt has been added to *salt-key*. The new option *finger* accepts the name of the key to generate and display a fingerprint for.

```
salt-key -F master
```

Will display the fingerprints for the master public and private keys.

Parsing System

Pedro Algavio, aka s0undt3ch, has added a substantial update to the command line parsing system that makes the help message output much cleaner and easier to search through. Salt parsers now have *--versions-report* besides usual *--version* info which you can provide when reporting any issues found.

Key Generation

We have reduced the requirements needed for *salt-key* to generate minion keys. You’re no longer required to have salt configured and it’s common directories created just to generate keys. This might prove useful if you’re batch creating keys to pre-load on minions.

Startup States

A few configuration options have been added which allow for states to be run when the minion daemon starts. This can be a great advantage when deploying with Salt because the minion can apply states right when it first runs. To use startup states set the *startup_states* configuration option on the minion to *highstate*.

New Exclude Declaration

Some users have asked about adding the ability to ensure that other sls files or ids are excluded from a state run. The exclude statement will delete all of the data loaded from the specified sls file or will delete the specified id:

```
exclude:
  - sls: http
  - id: /etc/vimrc
```

Max Open Files

While we’re currently unable to properly handle ZeroMQ’s abort signals when the max open files is reached, due to the way that’s handled on ZeroMQ’s, we have minimized the chances of this happening without at least warning the user.
More State Output Options

Some major changes have been made to the state output system. In the past state return data was printed in a very verbose fashion and only states that failed or made changes were printed by default. Now two options can be passed to the master and minion configuration files to change the behavior of the state output. State output can be set to verbose (default) or non-verbose with the `state_verbose` option:

```
state_verbose: False
```

It is noteworthy that the `state_verbose` option used to be set to `False` by default but has been changed to `True` by default in 0.10.3 due to many requests for the change.

The next option to be aware of new and called `state_output`. This option allows for the state output to be set to `full` (default) or `terse`.

The `full` output is the standard state output, but the new `terse` output will print only one line per state making the output much easier to follow when executing a large state system.

```
state_output: terse
```

**state.file.append Improvements**

The salt state `file.append()` tries **not** to append existing text. Previously the matching check was being made line by line. While this kind of check might be enough for most cases, if the text being appended was multi-line, the check would not work properly. This issue is now properly handled, the match is done as a whole ignoring any white space addition or removal except inside commas. For those thinking that, in order to properly match over multiple lines, salt will load the whole file into memory, that’s not true. For most cases this is not important but an erroneous order to read a 4GB file, if not properly handled, like salt does, could make salt chew that amount of memory. Salt has a buffered file reader which will keep in memory a maximum of 256KB and iterates over the file in chunks of 32KB to test for the match, more than enough, if not, explain your usage on a ticket. With this change, also `salt.modules.file.contains()`, `salt.modules.file.contains_regex()`, `salt.modules.file.contains_glob()` and `salt.utils.find` now do the searching and/or matching using the buffered chunks approach explained above.

Two new keyword arguments were also added, `makedirs`, and `source`. The first, `makedirs` will create the necessary directories in order to append to the specified file, of course, it only applies if we’re trying to append to a non-existing file on a non-existing directory:

```
/tmp/salttest/file-append-makedirs:
  file.append:
    text: foo
    makedirs: True
```

The second, `source`, allows one to append the contents of a file instead of specifying the text.

```
/tmp/salttest/file-append-source:
  file.append:
    source: salt://testfile
```

**Security Fix**

A timing vulnerability was uncovered in the code which decrypts the AES messages sent over the network. This has been fixed and upgrading is strongly recommended.
28.2.101 Salt 0.10.4 Release Notes

release 2012-10-23

Salt 0.10.4 is a monumental release for the Salt team, with two new module systems, many additions to allow granular access to Salt, improved platform support and much more.

This release is also exciting because we have been able to shorten the release cycle back to under a month. We are working hard to keep up the aggressive pace and look forward to having releases happen more frequently!

This release also includes a serious security fix and all users are very strongly recommended to upgrade. As usual, upgrade the master first, and then the minion to ensure that the process is smooth.

Major Features

External Authentication System

The new external authentication system allows for Salt to pass through authentication to any authentication system to determine if a user has permission to execute a Salt command. The Unix PAM system is the first supported system with more to come!

The external authentication system allows for specific users to be granted access to execute specific functions on specific minions. Access is configured in the master configuration file, and uses the new access control system:

```yaml
external_auth:
  pam:
    thatch:
      - 'web*':
        - test.*
        - network.*
```

The configuration above allows the user `thatch` to execute functions in the test and network modules on minions that match the `web*` target.

Access Control System

All Salt systems can now be configured to grant access to non-administrative users in a granular way. The old configuration continues to work. Specific functions can be opened up to specific minions from specific users in the case of external auth and client ACLs, and for specific minions in the case of the peer system.

Access controls are configured like this:

```yaml
client_acl:
  fred:
    - web\*: 
      - pkg.list_pkgs
      - test.*
      - apache.*
```

Target by Network

A new matcher has been added to the system which allows for minions to be targeted by network. This new matcher can be called with the `-S` flag on the command line and is available in all places that the matcher system is available. Using it is simple:
Nodegroup Nesting

Previously a nodegroup was limited by not being able to include another nodegroup, this restraint has been lifted and now nodegroups will be expanded within other nodegroups with the N@ classifier.

Salt Key Delete by Glob

The ability to delete minion keys by glob has been added to salt-key. To delete all minion keys whose minion name starts with 'web':

```
$ salt-key -d 'web*'
```

Master Tops System

The external_nodes system has been upgraded to allow for modular subsystems to be used to generate the top file data for a highstate run.

The external_nodes option still works but will be deprecated in the future in favor of the new master_tops option. Example of using master_tops:

```
master_tops:
  ext_nodes: cobbler-external-nodes
```

Next Level Solaris Support

A lot of work has been put into improved Solaris support by Romeo Theriault. Packaging modules (pkgadd/pkgrm and pkgutil) and states, cron support and user and group management have all been added and improved upon. These additions along with SMF (Service Management Facility) service support and improved Solaris grain detection in 0.10.3 add up to Salt becoming a great tool to manage Solaris servers with.

Security

A vulnerability in the security handshake was found and has been repaired, old minions should be able to connect to a new master, so as usual, the master should be updated first and then the minions.

Pillar Updates

The pillar communication has been updated to add some extra levels of verification so that the intended minion is the only one allowed to gather the data. Once all minions and the master are updated to salt 0.10.4 please activate pillar 2 by changing the pillar_version in the master config to 2. This will be set to 2 by default in a future release.
Salt 0.10.5 Release Notes

release 2012-11-15

Salt 0.10.5 is ready, and comes with some great new features. A few more interfaces have been modularized, like the outputter system. The job cache system has been made more powerful and can now store and retrieve jobs archived in external databases. The returner system has been extended to allow minions to easily retrieve data from a returner interface.

As usual, this is an exciting release, with many noteworthy additions!

Major Features

External Job Cache

The external job cache is a system which allows for a returner interface to also act as a job cache. This system is intended to allow users to store job information in a central location for longer periods of time and to make the act of looking up information from jobs executed on other minions easier.

Currently the external job cache is supported via the mongo and redis returners:

```
ext_job_cache: redis
redis.host: salt
```

Once the external job cache is turned on the new ret module can be used on the minions to retrieve return information from the job cache. This can be a great way for minions to respond and react to other minions.

OpenStack Additions

OpenStack integration with Salt has been moving forward at a blistering pace. The new nova, glance, and keystone modules represent the beginning of ongoing OpenStack integration.

The Salt team has had many conversations with core OpenStack developers and is working on linking to OpenStack in powerful new ways.

Wheel System

A new API was added to the Salt Master which allows the master to be managed via an external API. This new system allows Salt API to easily hook into the Salt Master and manage configs, modify the state tree, manage the pillar and more. The main motivation for the wheel system is to enable features needed in the upcoming web UI so users can manage the master just as easily as they manage minions.

The wheel system has also been hooked into the external auth system. This allows specific users to have granular access to manage components of the Salt Master.

Render Pipes

Jack Kuan has added a substantial new feature. The render pipes system allows Salt to treat the render system like unix pipes. This new system enables sls files to be passed through specific render engines. While the default renderrer is still recommended, different engines can now be more easily merged. So to pipe the output of Mako used in YAML use this shebang line:

```
#!mako|yaml
```
Salt Key Overhaul

The Salt Key system was originally developed as only a CLI interface, but as time went on it was pressed into becoming a clumsy API. This release marks a complete overhaul of Salt Key. Salt Key has been rewritten to function purely from an API and to use the outputter system. The benefit here is that the outputter system works much more cleanly with Salt Key now, and the internals of Salt Key can be used much more cleanly.

Modular Outputters

The outputter system is now loaded in a modular way. This means that output systems can be more easily added by dropping a python file down on the master that contains the function `output`.

Gzip from Fileserver

Gzip compression has been added as an option to the `cp.get_file` and `cp.get_dir` commands. This will make file transfers more efficient and faster, especially over slower network links.

Unified Module Configuration

In past releases of Salt, the minions needed to be configured for certain modules to function. This was difficult because it required pre-configuring the minions. 0.10.5 changes this by making all module configs on minions search the master config file for values.

Now if a single database server is needed, then it can be defined in the master config and all minions will become aware of the configuration value.

Salt Call Enhancements

The `salt-call` command has been updated in a few ways. Now, `salt-call` can take the `--return` option to send the data to a returner. Also, `salt-call` now reports executions in the minion proc system, this allows the master to be aware of the operation salt-call is running.

Death to pub_refresh and sub_timeout

The old configuration values `pub_refresh` and `sub_timeout` have been removed. These options were in place to alleviate problems found in earlier versions of ZeroMQ which have since been fixed. The continued use of these options has proven to cause problems with message passing and have been completely removed.

Git Revision Versions

When running Salt directly from git (for testing or development, of course) it has been difficult to know exactly what code is being executed. The new versioning system will detect the git revision when building and how many commits have been made since the last release. A release from git will look like this:

0.10.4-736-gec74d69
Svn Module Addition

Anthony Cornehl (twinshadow) contributed a module that adds Subversion support to Salt. This great addition helps round out Salt's VCS support.

Noteworthy Changes

Arch Linux Defaults to Systemd

Arch Linux recently changed to use systemd by default and discontinued support for init scripts. Salt has followed suit and defaults to systemd now for managing services in Arch.

Salt, Salt Cloud and Openstack

With the releases of Salt 0.10.5 and Salt Cloud 0.8.2, OpenStack becomes the first (non-OS) piece of software to include support both on the user level (with Salt Cloud) and the admin level (with Salt). We are excited to continue to extend support of other platforms at this level.

28.2.103 Salt 0.11.0 Release Notes

Salt 0.11.0 is here, with some highly sought after and exciting features. These features include the new overstate system, the reactor system, a new state run scope component called __context__, the beginning of the search system (still needs a great deal of work), multiple package states, the MySQL returner and a better system to arbitrarily reference outputters.

It is also noteworthy that we are changing how we mark release numbers. For the life of the project we have been pushing every release with features and fixes as point releases. We will now be releasing point releases for only bug fixes on a more regular basis and major feature releases on a slightly less regular basis. This means that the next release will be a bugfix only release with a version number of 0.11.1. The next feature release will be named 0.12.0 and will mark the end of life for the 0.11 series.

Major Features

OverState

The overstate system is a simple way to manage rolling state executions across many minions. The overstate allows for a state to depend on the successful completion of another state.

Reactor System

The new reactor system allows for a reactive logic engine to be created which can respond to events within a salted environment. The reactor system uses sls files to match events fired on the master with actions, enabling Salt to react to problems in an infrastructure.

Your load-balanced group of webservers is under extra load? Spin up a new VM and add it to the group. Your fileserver is filling up? Send a notification to your sysadmin on call. The possibilities are endless!
Module Context

A new component has been added to the module loader system. The module context is a data structure that can hold objects for a given scope within the module.

This allows for components that are initialized to be stored in a persistent context which can greatly speed up ongoing connections. Right now the best example can be found in the `cp` execution module.

Multiple Package Management

A long desired feature has been added to package management. By definition Salt States have always installed packages one at a time. On most platforms this is not the fastest way to install packages. Erik Johnson, aka terminalmage, has modified the package modules for many providers and added new capabilities to install groups of packages. These package groups can be defined as a list of packages available in repository servers:

```python
python_pkgs:
    pkg.installed:
        - pkgs:
            - python-mako
            - whoosh
            - python-git
```

or specify based on the location of specific packages:

```python
python_pkgs:
    pkg.installed:
        - sources:
            - python-mako: http://some-rpms.org/python-mako.rpm
            - whoosh: salt://whoosh/whoosh.rpm
            - python-git: ftp://companyserver.net/python-git.rpm
```

Search System

The bones to the search system have been added. This is a very basic interface that allows for search backends to be added as search modules. The first supported search module is the whoosh search backend. Right now only the basic paths for the search system are in place, making this very experimental. Further development will involve improving the search routines and index routines for whoosh and other search backends.

The search system has been made to allow for searching through all of the state and pillar files, configuration files and all return data from minion executions.

Notable Changes

All previous versions of Salt have shared many directories between the master and minion. The default locations for keys, cached data and sockets has been shared by master and minion. This has created serious problems with running a master and a minion on the same systems. 0.11.0 changes the defaults to be separate directories. Salt will also attempt to migrate all of the old key data into the correct new directories, but if it is not successful it may need to be done manually. If your keys exhibit issues after updating make sure that they have been moved from `/etc/salt/pki` to `/etc/salt/pki/{master,minion}`.

The old setup will look like this:
With the accepted minion keys in /etc/salt/pki/minions, the new setup places the accepted minion keys in /etc/salt/pki/master/minions.

### 28.2.104 Salt 0.11.1 Release Notes

*release* 2012-12-19

### 28.2.105 Salt 0.12.0 Release Notes

*release* 2013-01-15

Another feature release of Salt is here! Some exciting additions are included with more ways to make salt modular and even easier management of the salt file server.

**Major Features**

**Modular Fileservier Backend**

The new modular fileservier backend allows for any external system to be used as a salt file server. The main benefit here is that it is now possible to tell the master to directly use a git remote location, or many git remote locations, automatically mapping git branches and tags to salt environments.

**Windows is First Class!**

A new Salt Windows installer is now available! Much work has been put in to improve Windows support. With this much easier method of getting Salt on your Windows machines, we hope even more development and progress will occur. Please file bug reports on the Salt GitHub repo issue tracker so we can continue improving.
One thing that is missing on Windows that Salt uses extensively is a software package manager and a software package repository. The Salt pkg state allows sys admins to install software across their infrastructure and across operating systems. Software on Windows can now be managed in the same way. The SaltStack team built a package manager that interfaces with the standard Salt pkg module to allow for installing and removing software on Windows. In addition, a software package repository has been built on top of the Salt fileserver. A small YAML file provides the information necessary for the package manager to install and remove software.

An interesting feature of the new Salt Windows software package repository is that one or more remote git repositories can supplement the master’s local repository. The repository can point to software on the master’s fileserver or on an HTTP, HTTPS, or ftp server.

**New Default Outputter**

Salt displays data to the terminal via the outputter system. For a long time the default outputter for Salt has been the python pretty print library. While this has been a generally reasonable outputter, it did have many failings. The new default outputter is called "nested", it recursively scans return data structures and prints them out cleanly.

If the result of the new nested outputter is not desired any other outputter can be used via the `–out` option, or the output option can be set in the master and minion configs to change the default outputter.

**Internal Scheduler**

The internal Salt scheduler is a new capability which allows for functions to be executed at given intervals on the minion, and for runners to be executed at given intervals on the master. The scheduler allows for sequences such as executing state runs (locally on the minion or remotely via an overstate) or continually gathering system data to be run at given intervals.

The configuration is simple, add the schedule option to the master or minion config and specify jobs to run, this in the master config will execute the state.over runner every 60 minutes:

```
schedule:
  overstate:
    function: state.over
    minutes: 60
```

This example for the minion configuration will execute a highstate every 30 minutes:

```
schedule:
  highstate:
    function: state.highstate
    minutes: 30
```

**Optional DSL for SLS Formulas**

Jack Kuan, our renderer expert, has created something that is astonishing. Salt, now comes with an optional Python based DSL, this is a very powerful interface that makes writing SLS files in pure python easier than it was with the raw py renderer. As usual this can be used with the renderer shebang line, so a single sls can be written with the DSL if pure python power is needed while keeping other sls files simple with YAML.
Set Grains Remotely

A new execution function and state module have been added that allows for grains to be set on the minion. Now grains can be set via a remote execution or via states. Use the `grains.present` state or the `grains.setval` execution functions.

Gentoo Additions

Major additions to Gentoo specific components have been made. The encompasses executions modules and states ranging from supporting the make.conf file to tools like layman.

28.2.106 Salt 0.12.1 Release Notes

```
release 2013-01-21
```

28.2.107 Salt 0.13.0 Release Notes

```
release 2013-02-12
```

The lucky number 13 has turned the corner! From CLI notifications when quitting a salt command, to substantial improvements on Windows, Salt 0.13.0 has arrived!

Major Features

Improved file.recurse Performance

The file.recurse system has been deployed and used in a vast array of situations. Fixes to the file state and module have led towards opening up new ways of running file.recurse to make it faster. Now the file.recurse state will download fewer files and will run substantially faster.

Windows Improvements

Minion stability on Windows has improved. Many file operations, including file.recurse, have been fixed and improved. The network module works better, to include network.interfaces. Both 32bit and 64bit installers are now available.

Nodegroup Targeting in Peer System

In the past, nodegroups were not available for targeting via the peer system. This has been fixed, allowing the new nodegroup expr_form argument for the publish.publish function:

```
salt-call publish.publish group1 test.ping expr_form=nodegroup
```

Blacklist Additions

Additions allowing more granular blacklisting are available in 0.13.0. The ability to blacklist users and functions in client_acl have been added, as well as the ability to exclude state formulas from the command line.
Command Line Pillar Embedding

Pillar data can now be embedded on the command line when calling `state.sls` and `state.highstate`. This allows for on the fly changes or settings to pillar and makes parameterizing state formulas even easier. This is done via the keyword argument:

```
salt '*' state.highstate pillar='{"cheese": "spam"}'
```

The above example will extend the existing pillar to hold the `cheese` key with a value of `spam`. If the `cheese` key is already specified in the minion’s pillar then it will be overwritten.

CLI Notifications

In the past hitting ctrl-C and quitting from the `salt` command would just drop to a shell prompt, this caused confusion with users who expected the remote executions to also quit. Now a message is displayed showing what command can be used to track the execution and what the job id is for the execution.

Version Specification in Multiple-Package States

Versions can now be specified within multiple-package `pkg.installed` states. An example can be found below:

```
mpkgs:
  pkg.installed:
    - pkgs:
        - foo
        - bar: 1.2.3-4
        - baz
```

Noteworthy Changes

The configuration subsystem in Salt has been overhauled to make the `opts` dict used by Salt applications more portable, the problem is that this is an incompatible change with salt-cloud, and salt-cloud will need to be updated to the latest git to work with Salt 0.13.0. Salt Cloud 0.8.5 will also require Salt 0.13.0 or later to function.

The SaltStack team is sorry for the inconvenience here, we work hard to make sure these sorts of things do not happen, but sometimes hard changes get in.

```
release 2013-03-18
```
28.2.111 Salt 0.14.0 Release Notes

release 2013-03-23

Salt 0.14.0 is here! This release was held up primarily by PyCon, Scale, and illness, but has arrived! 0.14.0 comes with many new features and is breaking ground for Salt in the area of cloud management with the introduction of Salt providing basic cloud controller functionality.

Major Features

Salt - As a Cloud Controller

This is the first primitive inroad to using Salt as a cloud controller is available in 0.14.0. Be advised that this is alpha, only tested in a few very small environments.

The cloud controller is built using kvm and libvirt for the hypervisors. Hypervisors are autodetected as minions and only need to have libvirt running and kvm installed to function. The features of the Salt cloud controller are as follows:

- Basic vm discovery and reporting
- Creation of new virtual machines
- Seeding virtual machines with Salt via qemu-nbd or libguestfs
- Live migration (shared and non shared storage)
- Delete existing VMs

It is noteworthy that this feature is still Alpha, meaning that all rights are reserved to change the interface if needs be in future releases!

Libvirt State

One of the problems with libvirt is management of certificates needed for live migration and cross communication between hypervisors. The new libvirt state makes the Salt Master hold a CA and manage the signing and distribution of keys onto hypervisors, just add a call to the libvirt state in the sls formulas used to set up a hypervisor:

```
libvirt_keys:
 libvirt.keys
```

New get Functions

An easier way to manage data has been introduced. The pillar, grains, and config execution modules have been extended with the new get function. This function works much in the same way as the get method in a python dict, but with an enhancement, nested dict components can be extracted using a : delimiter.

If a structure like this is in pillar:

```
foo:
 bar:
   baz: quo
```

Extracting it from the raw pillar in an sls formula or file template is done this way:
Now with the new get function the data can be safely gathered and a default can be set allowing the template to fall back if the value is not available:

```
{{ pillar['foo'][bar][baz] }}
```

This makes handling nested structures much easier, and defaults can be cleanly set. This new function is being used extensively in the new formulae repository of salt sls formulas.

### 28.2.112 Salt 0.14.1 Release Notes

**release** 2013-04-13

### 28.2.113 Salt 0.15.0 Release Notes

**release** 2013-05-03

The many new features of Salt 0.15.0 have arrived! Salt 0.15.0 comes with many smaller features and a few larger ones.

These features range from better debugging tools to the new Salt Mine system.

#### Major Features

#### The Salt Mine

First there was the peer system, allowing for commands to be executed from a minion to other minions to gather data live. Then there was the external job cache for storing and accessing long term data. Now the middle ground is being filled in with the Salt Mine. The Salt Mine is a system used to execute functions on a regular basis on minions and then store only the most recent data from the functions on the master, then the data is looked up via targets.

The mine caches data that is public to all minions, so when a minion posts data to the mine all other minions can see it.

#### IPV6 Support

0.13.0 saw the addition of initial IPV6 support but errors were encountered and it needed to be stripped out. This time the code covers more cases and must be explicitly enabled. But the support is much more extensive than before.

#### Copy Files From Minions to the Master

Minions have long been able to copy files down from the master file server, but until now files could not be easily copied from the minion up to the master.

A new function called `cp.push` can push files from the minions up to the master server. The uploaded files are then cached on the master in the master cachedir for each minion.
Better Template Debugging

Template errors have long been a burden when writing states and pillar. 0.15.0 will now send the compiled template data to the debug log, this makes tracking down the intermittent stage templates much easier. So running state.sls or state.highstate with `-l debug` will now print out the rendered templates in the debug information.

State Event Firing

The state system is now more closely tied to the master’s event bus. Now when a state fails the failure will be fired on the master event bus so that the reactor can respond to it.

Major Syndic Updates

The Syndic system has been basically re-written. Now it runs in a completely asynchronous way and functions primarily as an event broker. This means that the events fired on the syndic are now pushed up to the higher level master instead of the old method used which waited for the client libraries to return.

This makes the syndic much more accurate and powerful, it also means that all events fired on the syndic master make it up the pipe as well making a reactor on the higher level master able to react to minions further downstream.

Peer System Updates

The Peer System has been updated to run using the client libraries instead of firing directly over the publish bus. This makes the peer system much more consistent and reliable.

Minion Key Revocation

In the past when a minion was decommissioned the key needed to be manually deleted on the master, but now a function on the minion can be used to revoke the calling minion’s key:

```
$ salt-call saltutil.revoke_auth
```

Function Return Codes

Functions can now be assigned numeric return codes to determine if the function executed successfully. While not all functions have been given return codes, many have and it is an ongoing effort to fill out all functions that might return a non-zero return code.

Functions in Overstate

The overstate system was originally created to just manage the execution of states, but with the addition of return codes to functions, requisite logic can now be used with respect to the overstate. This means that an overstate stage can now run single functions instead of just state executions.
Pillar Error Reporting

Previously if errors surfaced in pillar, then the pillar would consist of only an empty dict. Now all data that was successfully rendered stays in pillar and the render error is also made available. If errors are found in the pillar, states will refuse to run.

Using Cached State Data

Sometimes states are executed purely to maintain a specific state rather than to update states with new configs. This is grounds for the new cached state system. By adding cache=True to a state call the state will not be generated fresh from the master but the last state data to be generated will be used. If no previous state data is available then fresh data will be generated.

Monitoring States

The new monitoring states system has been started. This is very young but allows for states to be used to configure monitoring routines. So far only one monitoring state is available, the disk.status state. As more capabilities are added to Salt UI the monitoring capabilities of Salt will continue to be expanded.

28.2.114 Salt 0.15.1 Release Notes

release 2013-05-08

The 0.15.1 release has been posted, this release includes fixes to a number of bugs in 0.15.1 and a three security patches.

Security Updates

A number of security issues have been resolved via the 0.15.1 release.

Path Injection in Minion IDs

Salt masters did not properly validate the id of a connecting minion. This can lead to an attacker uploading files to the master in arbitrary locations. In particular this can be used to bypass the manual validation of new unknown minions. Exploiting this vulnerability does not require authentication.

This issue affects all known versions of Salt.

This issue was reported by Ronald Volgers.

Patch

The issue is fixed in Salt 0.15.1. Updated packages are available in the usual locations.

Specific commits:

https://github.com/saltstack/salt/commit/5427b9438e452a5a8910d9128c6aaf8d8fd5d3

https://github.com/saltstack/salt/commit/7560908ee62351769c3cd43b03d74c1ca772cc52

https://github.com/saltstack/salt/commit/e200b8a7ff53780124e08d2bdefde7587e52bfca
RSA Key Generation Fault

RSA key generation was done incorrectly, leading to very insecure keys. It is recommended to regenerate all RSA keys.

This issue can be used to impersonate Salt masters or minions, or decrypt any transferred data.

This issue can only be exploited by attackers who are able to observe or modify traffic between Salt minions and the legitimate Salt master.

A tool was included in 0.15.1 to assist in mass key regeneration, the manage.regen_keys runner.

This issue affects all known versions of Salt.

This issue was reported by Ronald Volgers.

Patch

The issue is fixed in Salt 0.15.1. Updated packages are available in the usual locations.

Specific commits:

https://github.com/saltstack/salt/commit/5dd304276ba5745ec21fc1e6686a0b28da29e6fc

Command Injection Via ext_pillar

Arbitrary shell commands could be executed on the master by an authenticated minion through options passed when requesting a pillar.

Ext pillar options have been restricted to only allow safe external pillars to be called when prompted by the minion.

This issue affects Salt versions from 0.14.0 to 0.15.0.

This issue was reported by Ronald Volgers.

Patch

The issue is fixed in Salt 0.15.1. Updated packages are available in the usual locations.

Specific commits:

https://github.com/saltstack/salt/commit/43d8c16bd26159d827d1a945c83ae28159ec5865

28.2.115  Salt 0.15.2 Release Notes

release 2013-05-29

28.2.116  Salt 0.15.3 Release Notes

release 2013-06-01
28.2.117 Salt 0.16.0 Release Notes

release 2013-07-01

The 0.16.0 release is an exciting one, with new features in master redundancy, and a new, powerful requisite.

Major Features

Multi-Master

This new capability allows for a minion to be actively connected to multiple salt masters at the same time. This allows for multiple masters to send out commands to minions and for minions to automatically reconnect to masters that have gone down. A tutorial is available to help get started here:

Multi Master Tutorial

Prereq, the New Requisite

The new prereq requisite is very powerful! It allows for states to execute based on a state that is expected to make changes in the future. This allows for a change on the system to be preempted by another execution. A good example is needing to shut down a service before modifying files associated with it, allowing, for instance, a webserver to be shut down allowing a load balancer to stop sending requests while server side code is updated. In this case, the prereq will only run if changes are expected to happen in the prerequired state, and the prerequired state will always run after the prereq state and only if the prereq state succeeds.

Peer System Improvements

The peer system has been revamped to make it more reliable, faster, and like the rest of Salt, async. The peer calls when an updated minion and master are used together will be much faster!

Relative Includes

The ability to include an sls relative to the defined sls has been added, the new syntax id documented here:

Includes

More State Output Options

The state_output option in the past only supported full and terse, 0.16.0 add the mixed and changes modes further refining how states are sent to users' eyes.

Improved Windows Support

Support for Salt on Windows continues to improve. Software management on Windows has become more seamless with Linux/UNIX/BSD software management. Installed software is now recognized by the short names defined in the repository SLS. This makes it possible to run salt '*' pkg.version firefox and get back results from Windows and non-Windows minions alike.

When templating files on Windows, Salt will now correctly use Windows appropriate line endings. This makes it much easier to edit and consume files on Windows.
When using the cmd state the `shell` option now allows for specifying Windows Powershell as an alternate shell to execute cmd.run and cmd.script. This opens up Salt to all the power of Windows Powershell and its advanced Windows management capabilities.

Several fixes and optimizations were added for the Windows networking modules, especially when working with IPv6.

A system module was added that makes it easy to restart and shutdown Windows minions.

The Salt Minion will now look for its config file in `c:\salt\conf` by default. This means that it’s no longer necessary to specify the `-c` option to specify the location of the config file when starting the Salt Minion on Windows in a terminal.

**Multiple Targets for pkg.removed, pkg.purged States**

Both `pkg.removed` and `pkg.purged` now support the `pkgs` argument, which allow for multiple packages to be targeted in a single state. This, as in `pkg.installed`, helps speed up these states by reducing the number of times that the package management tools (apt, yum, etc.) need to be run.

**Random Times in Cron States**

The temporal parameters in `cron.present` states (minute, hour, etc.) can now be randomized by using `random` instead of a specific value. For example, by using the `random` keyword in the `minute` parameter of a cron state, the same cron job can be pushed to hundreds or thousands of hosts, and they would each use a randomly-generated minute. This can be helpful when the cron job accesses a network resource, and it is not desirable for all hosts to run the job concurrently.

```
/path/to/cron/script:
cron.present:
  - user: root
  - minute: random
  - hour: 2
```

Since Salt assumes a value of `*` for unspecified temporal parameters, adding a parameter to the state and setting it to `random` will change that value from `*` to a randomized numeric value. However, if that field in the cron entry on the minion already contains a numeric value, then using the `random` keyword will not modify it.

**Confirmation Prompt on Key Acceptance**

When accepting new keys with `salt-key -a minion-id` or `salt-key -A`, there is now a prompt that will show the affected keys and ask for confirmation before proceeding. This prompt can be bypassed using the `-y` or `--yes` command line argument, as with other `salt-key` commands.

**Support for Setting Password Hashes on BSD Minions**

FreeBSD, NetBSD, and OpenBSD all now support setting passwords in `user.present` states.

# 28.2.118 Salt 0.16.1 Release Notes

```
release 2013-07-29
```
28.2.119 Salt 0.16.2 Release Notes

release 2013-08-01

Version 0.16.2 is a bugfix release for 0.16.0, and contains a number of fixes.

Windows

- Only allow Administrator’s group and SYSTEM user access to C:salt. This eliminates a race condition where a non-admin user could modify a template or managed file before it is executed by the minion (which is running as an elevated user), thus avoiding a potential escalation of privileges. (issue #6361)

Grains

- Fixed detection of virtual grain on OpenVZ hardware nodes
- Gracefully handle lsb_release data when it is enclosed in quotes
- LSB grains are now prefixed with lsb_distrib_ instead of simply lsb_. The old naming is not preserved, so SLS may be affected.
- Improved grains detection on MacOS

Pillar

- Don’t try to load `git_pillar` if not enabled in master config (issue #6052)
- Functions `pillar.item` and `pillar.items` added for parity with `grains.item/grains.items`. The old function `pillar.data` is preserved for backwards compatibility.
- Fixed minion traceback when Pillar SLS is malformed (issue #5910)

Peer Publishing

- More gracefully handle improperly quoted publish commands (issue #5958)
- Fixed traceback when timeout specified via the CLI for `publish.publish, publish.full_data` (issue #5959)
- Fixed unintended change in output of `publish.publish` (issue #5928)

Minion

- Fixed salt-key usage in minionswarm script
- Quieted warning about SALT_MINION_CONFIG environment variable on minion startup and for CLI commands run via `salt-call` (issue #5956)
- Added minion config parameter `random_reauth_delay` to stagger re-auth attempts when the minion is waiting for the master to approve its public key. This helps prevent SYN flooding in larger environments.
User/Group Management

- Implement previously-ignored unique option for user.present states in FreeBSD
- Report in state output when a group.present state attempts to use a gid in use by another group
- Fixed regression that prevents a user.present state to set the password hash to the system default (i.e. an unset password)
- Fixed multiple group.present states with the same group (issue #6439)

File Management

- Fixed file.mkdir setting incorrect permissions (issue #6033)
- Fixed cleanup of source files for templates when /tmp is in file_roots (issue #6118)
- Fixed caching of zero-byte files when a non-empty file was previously cached at the same path
- Added HTTP authentication support to the cp module (issue #5641)
- Diffs are now suppressed when binary files are changed

Package/Repository Management

- Fixed traceback when there is only one target for pkg.latest states
- Fixed regression in detection of virtual packages (apt)
- Limit number of pkg database refreshes to once per state.sls/state.highstate
- YUM: Allow 32-bit packages with arches other than i686 to be managed on 64-bit systems (issue #6299)
- Fixed incorrect reporting in pkgrepo.managed states (issue #5517)
- Fixed 32-bit binary package installs on 64-bit RHEL-based distros, and added proper support for 32-bit packages on 64-bit Debian-based distros (issue #6303)
- Fixed issue where requisites were inadvertently being put into YUM repo files (issue #6471)

Service Management

- Fixed inaccurate reporting of results in service.running states when the service fails to start (issue #5894)
- Fixed handling of custom initscripts in RHEL-based distros so that they are immediately available, negating the need for a second state run to manage the service that the initscript controls

Networking

- Function network.hwaddr renamed to network.hw_addr to match network.ip_addr and network.ip_addrs. All three functions also now work without the underscore in the name, as well.
- Fixed traceback in bridge.show when interface is not present (issue #6326)
SSH

- Fixed incorrect result reporting for some `ssh_known_hosts.present` states
- Fixed inaccurate reporting when `ssh_auth.present` states are run with `test=True`, when rsa/dss is used for the `enc` param instead of ssh-rsa/ssh-dss (issue #5374)

pip

- Properly handle `-f` lines in pip freeze output
- Fixed regression in pip.installed states with specifying a requirements file (issue #6003)
- Fixed use of `editable` argument in `pip.installed` states (issue #6025)
- Deprecated `runas` parameter in execution function calls, in favor of `user`

MySQL

- Allow specification of MySQL connection arguments via the CLI, overriding/bypassing minion config params
- Allow `mysql_user.present` states to set a passwordless login (issue #5550)
- Fixed endless loop when `mysql.processlist` is run (issue #6297)

PostgreSQL

- Fixed traceback in `postgres.user_list` (issue #6352)

Miscellaneous

- Don’t allow `npm states` to be used if `npm module` is not available
- Fixed `alternatives.install` states for which the target is a symlink (issue #6162)
- Fixed traceback in `sysbench module` (issue #6175)
- Fixed traceback in job cache
- Fixed tempfile cleanup for windows
- Fixed issue where SLS files using the `pydsl renderer` were not being run
- Fixed issue where returners were being passed incorrect information (issue #5518)
- Fixed traceback when numeric args are passed to `cmd.script` states
- Fixed bug causing `cp.get_dir` to return more directories than expected (issue #6048)
- Fixed traceback when `supervisord.running` states are run with `test=True` (issue #6053)
- Fixed tracebacks when Salt encounters problems running rbenv (issue #5888)
- Only make the `monit module` available if monit binary is present (issue #5871)
- Fixed incorrect behavior of `img.mount_image`
- Fixed traceback in `tomcat.deploy_war` in Windows
- Don’t re-write `/etc/fstab` if mount fails
- Fixed tracebacks when Salt encounters problems running gem (issue #5886)
• Fixed incorrect behavior of `selinux.boolean` states (issue #5912)
• *RabbitMQ*: Quote passwords to avoid symbols being interpolated by the shell (issue #6338)
• Fixed tracebacks in `extfs.mkfs` and `extfs.tune` (issue #6462)
• Fixed a regression with the `module.run` state where the `m_name` and `m_fun` arguments were being ignored (issue #6464)

### 28.2.120 Salt 0.16.3 Release Notes

**release** 2013-08-09

Version 0.16.3 is another bugfix release for 0.16.0. The changes include:

• Various documentation fixes
• Fix proc directory regression (issue #6502)
• Properly detect Linaro Linux (issue #6496)
• Fix regressions in `mount.mounted` (issue #6522, issue #6545)
• Skip malformed state requisites (issue #6521)
• Fix regression in `gitfs` from bad import
• Fix for watching prereq states (including recursive requisite error) (issue #6507)
• Fix `mod_watch` not overriding prereq (issue #6520)
• Don’t allow functions which compile states to be called within states (issue #5623)
• Return error for malformed top.sls (issue #6544)
• Fix traceback in `mysql.query`
• Fix regression in binary package installation for 64-bit packages on Debian-based Linux distros (issue #6563)
• Fix traceback caused by running `cp.push` without having set `file_recv` in the master config file
• Fix scheduler configuration in pillar (issue #6201)

### 28.2.121 Salt 0.16.4 Release Notes

**release** 2013-09-07

Version 0.16.4 is another bugfix release for 0.16.0, likely to be the last before 0.17.0 is released. The changes include:

• Multiple documentation improvements/additions
• Added the `osfinger` and `osarch` grains
• Properly handle 32-bit packages for debian32 on x86_64 (issue #6607)
• Fix regression in yum package installation in CentOS 5 (issue #6677)
• Fix bug in `hg.latest` state that would erroneously delete directories (issue #6661)
• Fix bug related to pid not existing for `ps.top` (issue #6679)
• Fix regression in MySQL returner (issue #6695)
• Fix IP addresses grains (`ipv4` and `ipv6`) to include all addresses (issue #6656)
• Fix regression preventing authenticated FTP (issue #6733)
• Fix setting password for windows users ([issue #6824])
• Fix `file.contains` on values YAML parses as non-string ([issue #6817])
• Fix `file.get_gid`, `file.get_uid`, and `file.chown` for broken symlinks ([issue #6826])
• Fix comment for service reloads in service state ([issue #6851])

28.2.122 Salt 0.17.0 Release Notes

release 2013-09-26

The 0.17.0 release is a very exciting release of Salt, this brings to Salt some very powerful new features and advances. The advances range from the state system to the test suite, covering new transport capabilities and making states easier and more powerful, to extending Salt Virt and much more!

The 0.17.0 release will also be the last release of Salt to follow the old 0.XX.X numbering system, the next release of Salt will change the numbering to be date based following this format:

<Year>.<Month>.<Minor>

So if the release happens in November of 2013 the number will be 13.11.0, the first bugfix release will be 13.11.1 and so forth.

Major Features

Halite

The new Halite web GUI is now available on PyPI. A great deal of work has been put into Halite to make it fully event driven and amazingly fast. The Halite UI can be started from within the Salt Master (after being installed from PyPI), or standalone, and does not require an external database to run. It is very lightweight!

This initial release of Halite is primarily the framework for the UI and the communication systems, making it easy to extend and build the UI up. It presently supports watching the event bus and firing commands over Salt.

At this time, Halite is not available as a package, but installation documentation is available at: [http://docs.saltstack.com/topics/tutorials/halite.html](http://docs.saltstack.com/topics/tutorials/halite.html)

Halite is, like the rest of Salt, Open Source!

Much more will be coming in the future of Halite!

Salt SSH

The new `salt-ssh` command has been added to Salt. This system allows for remote execution and states to be run over ssh. The benefit here being, that salt can run relying only on the ssh agent, rather than requiring a minion to be deployed.

The `salt-ssh` system runs states in a compatible way as Salt and states created and run with salt-ssh can be moved over to a standard salt deployment without modification.

Since this is the initial release of salt-ssh, there is plenty of room for improvement, but it is fully operational, not just a bootstrap tool.
Rosters

Salt is designed to have the minions be aware of the master and the master does not need to be aware of the location of the minions. The new salt roster system was created and designed to facilitate listing the targets for salt-ssh.

The roster system, like most of Salt, is a plugin system, allowing for the list of systems to target to be derived from any pluggable backend. The rosters shipping with 0.17.0 are flat and scan. Flat is a file which is read in via the salt render system and the scan roster does simple network scanning to discover ssh servers.

State Auto Order

This is a major change in how states are evaluated in Salt. State Auto Order is a new feature that makes states get evaluated and executed in the order in which they are defined in the sls file. This feature makes it very easy to see the finite order in which things will be executed, making Salt now, fully imperative AND fully declarative.

The requisite system still takes precedence over the order in which states are defined, so no existing states should break with this change. But this new feature can be turned off by setting `state_auto_order: False` in the master config, thus reverting to the old lexicographical order.

state.sls Runner

The `state.sls` runner has been created to allow for a more powerful system for orchestrating state runs and function calls across the salt minions. This new system uses the state system for organizing executions.

This allows for states to be defined that are executed on the master to call states on minions via `salt-run state.sls`.

Salt Thin

Salt Thin is an exciting new component of Salt, this is the ability to execute Salt routines without any transport mechanisms installed, it is a pure python subset of Salt.

Salt Thin does not have any networking capability, but can be dropped into any system with Python installed and then `salt-call` can be called directly. The Salt Thin system, is used by the `salt-ssh` command, but can still be used to just drop salt somewhere for easy use.

Event Namespacing

Events have been updated to be much more flexible. The tags in events have all been namespaced allowing easier tracking of event names.

Mercurial Fileserver Backend

The popular git fileserver backend has been joined by the mercurial fileserver backend, allowing the state tree to be managed entirely via mercurial.

External Logging Handlers

The external logging handler system allows for Salt to directly hook into any external logging system. Currently supported are sentry and logstash.
Jenkins Testing

The testing systems in Salt have been greatly enhanced, tests for salt are now executed, via jenkins.saltstack.com, across many supported platforms. Jenkins calls out to salt-cloud to create virtual machines on Rackspace, then the minion on the virtual machine checks into the master running on Jenkins where a state run is executed that sets up the minion to run tests and executes the test suite.

This now automates the sequence of running platform tests and allows for continuous destructive tests to be run.

Salt Testing Project

The testing libraries for salt have been moved out of the main salt code base and into a standalone codebase. This has been done to ease the use of the testing systems being used in salt based projects other than Salt itself.

StormPath External Authentication

The external auth system now supports the fantastic Stormpath cloud based authentication system.

LXC Support

Extensive additions have been added to Salt for LXC support. This included the backend libs for managing LXC containers. Addition into the salt-virt system is still in the works.

macOS User/Group Support

Salt is now able to manage users and groups on Minions running macOS. However, at this time user passwords cannot be managed.

Django ORM External Pillar

Pillar data can now be derived from Django managed databases.

Fixes from RC to release

- Multiple documentation fixes
- Add multiple source files + templating for `file.append` ([issue #6905](#6905))
- Support sysctl configuration files in systemd>=207 ([issue #7351](#7351))
- Add `file.search` and `file.replace`
- Fix cross-calling execution functions in provider overrides
- Fix locale override for postgres ([issue #4543](#4543))
- Fix Raspbian identification for service/pkg support ([issue #7371](#7371))
- Fix `cp.push` file corruption ([issue #6495](#6495))
- Fix ALT Linux password hash specification ([issue #3474](#3474))
- Multiple salt-ssh-related fixes and improvements
28.2.123  Salt 0.17.1 Release Notes

release  2013-10-17

Note:  THIS RELEASE IS NOT COMPATIBLE WITH PREVIOUS VERSIONS. If you update your master to 0.17.1, you must update your minions as well. Sorry for the inconvenience – this is a result of one of the security fixes listed below.

The 0.17.1 release comes with a number of improvements to salt-ssh, many bugfixes, and a number of security updates.

Salt SSH has been improved to be faster, more featureful and more secure. Since the original release of Salt SSH was primarily a proof of concept, it has been very exciting to see its rapid adoption. We appreciate the willingness of security experts to review Salt SSH and help discover oversights and ensure that security issues only exist for such a tiny window of time.

SSH Enhancements

Shell Improvements

Improvements to Salt SSH’s communication have been added that improve routine execution regardless of the target system’s login shell.

Performance

Deployment of routines is now faster and takes fewer commands to execute.

Security Updates

Be advised that these security issues all apply to a small subset of Salt users and mostly apply to Salt SSH.

Insufficient Argument Validation

This issue allowed for a user with limited privileges to embed executions inside of routines to execute routines that should be restricted. This applies to users using external auth or client ACL and opening up specific routines.

Be advised that these patches address the direct issue. Additional commits have been applied to help mitigate this issue from resurfacing.

MITM SSH attack in salt-ssh

SSH host keys were being accepted by default and not enforced on future SSH connections. These patches set SSH host key checking by default and can be overridden by passing the -i flag to salt-ssh.

CVE

CVE-2013-4436

Affected Versions

0.17.0

Found By

Insecure Usage of /tmp in salt-ssh

The initial release of salt-ssh used the /tmp directory in an insecure way. These patches not only secure usage of files under /tmp in salt-ssh, but also add checksum validation for all packages sent into the now secure locations on target systems.

**YAML Calling Unsafe Loading Routine**

It has been argued that this is not a valid security issue, as the YAML loading that was happening was only being called after an initial gateway filter in Salt has already safely loaded the YAML and would fail if non-safe routines were embedded. Nonetheless, the CVE was filed and patches applied.

**CVE**

CVE-2013-4438

Fix Reference

Version 0.17.1 is the first bugfix release for 0.17.0. The changes include:

• Fix symbolic links in thin.tgz (issue #7482)
• Pass env through to file.patch state (issue #7452)
• Service provider fixes and reporting improvements (issue #7361)
• Add --priv option for specifying salt-ssh private key
• Fix salt-thin’s salt-call on setuptools installations (issue #7516)
• Fix salt-ssh to support passwords with spaces (issue #7480)
• Fix regression in wildcard includes (issue #7455)
• Fix salt-call outlier regression (issue #7456)
• Fix custom returner support for startup states (issue #7540)
• Fix value handling in augeas (issue #7605)
• Fix regression in apt (issue #7624)
• Fix minion ID guessing to use socket.getfqdn() first (issue #7558)
• Add minion ID caching (issue #7558)
• Fix salt-key race condition (issue #7304)
• Add --include-all flag to salt-key (issue #7399)
• Fix custom grains in pillar (part of issue #5716, issue #6083)
• Fix race condition in salt-key (issue #7304)
• Fix regression in minion ID guessing, prioritize socket.getfqdn() (issue #7558)
• Cache minion ID on first guess (issue #7558)
• Allow trailing slash in file.directory state
• Fix reporting of file_roots in pillar return (issue #5449 and issue #5951)
• Remove pillar matching for mine.get (issue #7197)
• Sanitize args for multiple execution modules
• Fix yumpkg mod_repo functions to filter hidden args (issue #7656)
• Fix conflicting IDs in state includes (issue #7526)
• Fix mysql_grants.absent string formatting issue (issue #7827)
• Fix postgres.version so it won’t return None (issue #7695)
• Fix for trailing slashes in mount.mounted state
• Fix rogue AttributErrors in the outputter system (issue #7845)
• Fix for incorrect ssh key encodings resulting in incorrect key added (issue #7718)
• Fix for pillar/grains naming regression in python renderer (issue #7693)
• Fix args/kwargas handling in the scheduler (issue #7422)
• Fix logfile handling for file://, tcp://, and udpe:// (issue #7754)
• Fix error handling in config file parsing (issue #6714)
• Fix RVM using sudo when running as non-root user (issue #2193)
• Fix client ACL and underlying logging bugs (issue #7706)
• Fix scheduler bug with returner (issue #7367)
• Fix user management bug related to default groups (issue #7690)
• Fix various salt-ssh bugs (issue #7528)
• Many various documentation fixes

28.2.124 Salt 0.17.2 Release Notes

release 2013-11-14

Version 0.17.2 is another bugfix release for 0.17.0. The changes include:

• Add ability to delete key with grains.delval (issue #7872)
• Fix possible state compiler stack trace (issue #5767)
• Fix architecture regression in yumpkg (issue #7813)
• Use correct `ps` on Debian to prevent truncating (issue #5646)
• Fix grains targeting for new grains (issue #5737)
• Fix bug with merging in `git_pillar` (issue #6992)
• Fix `print_jobs` duplicate results
• Fix `apt` version specification for `pkg.install`
• Fix possible `KeyError` from `ext_job_cache` missing option
• Fix `auto_order` for `names` states (issue #7649)
• Fix regression in new `gitfs` installs (directory not found error)
• Fix escape pipe issue on Windows for `file.recurse` (issue #7967)
• Fix `fileclient` in case of master restart (issue #7987)
• Try to output warning if CLI command malformed (issue #6538)
• Fix `--out=quiet` to actually be quiet (issue #8000)
• Fix for state.sls in `salt-ssh` (issue #7991)
• Fix for MySQL grants ordering issue (issue #5817)
• Fix traceback for certain missing CLI args (issue #8016)
• Add ability to disable `lspci` queries on master (issue #4906)
• Fail if sls defined in `topfile` does not exist (issue #5998)
• Add ability to downgrade MySQL grants (issue #6606)
• Fix `ssh_auth.absent` traceback (issue #8043)
• Add upstart detection for Debian/Raspbian (issue #8039)
• Fix ID-related issues (issue #8052, issue #8050, and others)
• Fix for jinja rendering issues (issue #8066 and issue #8079)
• Fix argument parsing in `salt-ssh` (issue #7928)
• Fix some GPU detection instances (issue #6945)
• Fix bug preventing includes from other environments in SLS files
• Fix for kwargs with dashes (issue #8102)
• Fix `salt.utils.which` for windows `.exe` (issue #7904)
• Fix `apache.adduser` without `apachectl` (issue #8123)
• Fix issue with evaluating `test` kwarg in states (issue #7788)
• Fix regression in `salt.client.Caller()` (issue #8078)
• Fix apt-key silent failure
• Fix bug where `cmd.script` would try to run even if caching failed (issue #7601)
• Fix `apt pkg.latest` regression (issue #8067)
• Fix for mine data not being updated (issue #8144)
• Fix for noarch packages in yum
• Fix a Xen detection edge case ([issue #7839](#issue7839))
• Fix windows __opts__ dictionary persistence ([issue #7714](#issue7714))
• Fix version generation for when it’s part of another git repo ([issue #8090](#issue8090))
• Fix _handle_iorder stacktrace so that the real syntax error is shown ([issue #8114 and issue #7905](#issue8114issue7905))
• Fix git.latest state when a commit SHA is used ([issue #8163](#issue8163))
• Fix various small bugs in yumpkg.py ([issue #8201](#issue8201))
• Fix for specifying identify file in git.latest ([issue #8094](#issue8094))
• Fix for --output-file CLI arg ([issue #8205](#issue8205))
• Add ability to specify shutdown time for system.shutdown ([issue #7833](#issue7833))
• Fix for salt version using non-salt git repo info ([issue #8266](#issue8266))
• Add additional hints at impact of pkgrepo states when test=True ([issue #8247](#issue8247))
• Fix for salt-ssh files not being owned by root ([issue #8216](#issue8216))
• Fix retry logic and error handling in fileserver (related to [issue #7755](#issue7755))
• Fix file.replace with test=True ([issue #8279](#issue8279))
• Add flag for limiting file traversal in fileserver ([issue #6928](#issue6928))
• Fix for extra mine processes ([issue #5729](#issue5729))
• Fix for unloading custom modules ([issue #7691](#issue7691))
• Fix for salt-ssh opts ([issue #8005 and issue #8271](#issue8005issue8271))
• Fix compound matcher for grains ([issue #7944](#issue7944))
• Improve error reporting in ebuild module (related to [issue #5393](#issue5393))
• Add dir_mode to file.managed ([issue #7860](#issue7860))
• Improve traceroute support for FreeBSD and macOS ([issue #4927](#issue4927))
• Fix for matching minions under syndics ([issue #7671](#issue7671))
• Improve exception handling for missing ID ([issue #8259](#issue8259))
• Fix grain mismatch for ScientificLinux ([issue #8338](#issue8338))
• Add configuration option for minion_id_caching
• Fix open mode auth errors ([issue #8402](#issue8402))

### 28.2.125 Salt 0.17.3 Release Notes

**release** 2013-12-08

**Note:** 0.17.3 had some regressions which were promptly fixed in the 0.17.4 release. Please use 0.17.4 instead.

Version 0.17.3 is another bugfix release for 0.17.0. The changes include:

• Fix some jinja render errors ([issue #8418](#issue8418))
• Fix file.replace state changing file ownership ([issue #8399](#issue8399))
• Fix state ordering with the PyDSL renderer (issue #8446)
• Fix for new npm version (issue #8517)
• Fix for pip state requiring name even with requirements file (issue #8519)
• Fix yum logging to open terminals (issue #3855)
• Add sane maxrunning defaults for scheduler (issue #8563)
• Fix states duplicate key detection (issue #8053)
• Fix SUSE patch level reporting (issue #8428)
• Fix managed file creation umask (issue #8590)
• Fix logstash exception (issue #8635)
• Improve argument exception handling for salt command (issue #8016)
• Fix pecl success reporting (issue #8750)
• Fix launchctl module exceptions (issue #8759)
• Fix argument order in pw_user module
• Add warnings for failing grains (issue #8690)
• Fix hgfs problems caused by connections left open (issue #8811 and issue #8810)
• Add Debian iptables default for iptables-persistent package (issue #8889)
• Fix installation of packages with dots in pkg name (issue #8614)
• Fix noarch package installation on CentOS 6 (issue #8945)
• Fix portage_config.enforce_nice_config (issue #8252)
• Fix salt.util.copyfile umask usage (issue #8590)
• Fix rescheduling of failed jobs (issue #8941)
• Fix pkg on Amazon Linux (uses yumpkg5 now) (issue #8226)
• Fix conflicting options in postgres module (issue #8717)
• Fix ps modules for psutil >= 0.3.0 (issue #7432)
• Fix postgres module to return False on failure (issue #8778)
• Fix argument passing for args with pound signs (issue #8585)
• Fix pid of salt CLI command showing in status.pid output (issue #8720)
• Fix rvm to run gem as the correct user (issue #8951)
• Fix namespace issue in win_file module (issue #9060)
• Fix masterless state paths on windows (issue #9021)
• Fix timeout option in master config (issue #9040)

28.2.126 Salt 0.17.4 Release Notes

release 2013-12-10

Version 0.17.4 is another bugfix release for 0.17.0. The changes include:

• Fix file.replace bug when replacement str is numeric (issue #9101)
28.2.127 Salt 0.17.5 Release Notes

release 2014-01-27

Version 0.17.5 is another bugfix release for 0.17.0. The changes include:

• Fix user.present states with non-string fullname (issue #9085)
• Fix virt.init return value on failure (issue #6870)
• Fix reporting of file.blockreplace state when test=True
• Fix network.interfaces when used in cron (issue #7990)
• Fix bug in pkgrepo when switching to/from mirrorlist-based repo def (issue #9121)
• Fix infinite recursion when cache file is corrupted
• Add checking for rev and mirror/bare args in git.latest (issue #9107)
• Add cmd.watch alias (points to cmd.wait) (issue #8612)
• Fix stacktrace when prereq is not formed as a list (issue #8235)
• Fix stdin issue with lvdisplay command (issue #9128)
• Add pre-check function for range matcher (issue #9236)
• Add exception handling for psutil for processes that go missing (issue #9274)
• Allow _ in requisites to match both on ID and name (issue #9061)
• Fix multiple client timeout issues (issue #7157 and issue #9302, probably others)
• Fix ZMQError: Operation cannot be accomplished in current state errors (issue #6306)
• Multiple optimization in minion auth routines
• Clarify logs for minion ID caching

28.2.128 Salt 0.6.0 release notes

The Salt remote execution manager has reached initial functionality! Salt is a management application which can be used to execute commands on remote sets of servers.

The whole idea behind Salt is to create a system where a group of servers can be remotely controlled from a single master, not only can commands be executed on remote systems, but salt can also be used to gather information about your server environment.

Unlike similar systems, like Func and MCollective, Salt is extremely simple to setup and use, the entire application is contained in a single package, and the master and minion daemons require no running dependencies in the way that Func requires Certmaster and MCollective requires activeMQ.

Salt also manages authentication and encryption. Rather than using SSL for encryption, salt manages encryption on a payload level, so the data sent across the network is encrypted with fast AES encryption, and authentication uses RSA keys. This means that Salt is fast, secure, and very efficient.
Messaging in Salt is executed with ZeroMQ, so the message passing interface is built into salt and does not require an external ZeroMQ server. This also adds speed to Salt since there is no additional bloat on the networking layer, and ZeroMQ has already proven itself as a very fast networking system.

The remote execution in Salt is "Lazy Execution", in that once the command is sent the requesting network connection is closed. This makes it easier to detach the execution from the calling process on the master, it also means that replies are cached, so that information gathered from historic commands can be queried in the future.

Salt also allows users to make execution modules in Python. Writers of these modules should also be pleased to know that they have access to the impressive information gathered from Puppet Labs’ Facter application, making Salt module more flexible. In the future I hope to also allow Salt to group servers based on Facter information as well.

All in all Salt is fast, efficient, and clean, can be used from a simple command line client or through an API, uses message queue technology to make network execution extremely fast, and encryption is handled in a very fast and efficient manner. Salt is also VERY easy to use and VERY easy to extend.

You can find the source code for Salt on my GitHub page, I have also set up a few wiki pages explaining how to use and set up Salt. If you are using Arch Linux there is a package available in the Arch Linux AUR.

GitHub page: https://github.com/saltstack/salt
Wiki: https://github.com/saltstack/salt/wiki
Arch Linux Package: https://aur.archlinux.org/packages/salt-git/

I am very open to contributions, for instance I need packages for more Linux distributions as well as BSD packages and testers.

Give Salt a try, this is the initial release and is not a 1.0 quality release, but it has been working well for me! I am eager to get your feedback!

28.2.129 Salt 0.7.0 release notes

I am pleased to announce the release of Salt 0.7.0!

This release marks what is the first stable release of salt, 0.7.0 should be suitable for general use.

0.7.0 Brings the following new features to Salt:

- Integration with Facter data from puppet labs
- Allow for matching minions from the salt client via Facter information
- Minion job threading, many jobs can be executed from the master at once
- Preview of master clustering support - Still experimental
- Introduce new minion modules for stats, virtualization, service management and more
- Add extensive logging to the master and minion daemons
- Add sys.reload_functions for dynamic function reloading
- Greatly improve authentication
- Introduce the saltkey command for managing public keys
- Begin backend development preparatory to introducing butter
- Addition of man pages for the core commands
- Extended and cleaned configuration

0.7.0 Fixes the following major bugs:
• Fix crash in minions when matching failed
• Fix configuration file lookups for the local client
• Repair communication bugs in encryption
• Numerous fixes in the minion modules

The next release of Salt should see the following features:
• Stabilize the cluster support
• Introduce a remote client for salt command tiers
• salt-ftp system for distributed file copies
• Initial support for "butter"

Coming up next is a higher level management framework for salt called Butter. I want salt to stay as a simple and effective communication framework, and allow for more complicated executions to be managed via Butter.

Right now Butter is being developed to act as a cloud controller using salt as the communication layer, but features like system monitoring and advanced configuration control (a puppet manager) are also in the pipe.

Special thanks to Joseph Hall for the status and network modules, and thanks to Matthias Teege for tracking down some configuration bugs!

Salt can be downloaded from the following locations;
Arch Linux Package:
https://aur.archlinux.org/packages/salt-git/

Please enjoy the latest Salt release!

28.2.130 Salt 0.8.0 release notes

Salt 0.8.0 is ready for general consumption! The source tarball is available on GitHub for download:

A lot of work has gone into salt since the last release just 2 weeks ago, and salt has improved a great deal. A swath of new features are here along with performance and threading improvements!

The main new features of salt 0.8.0 are:
Salt-cp
Cython minion modules
Dynamic returners
Faster return handling
Lowered required Python version to 2.6
Advanced minion threading
Configurable minion modules

Salt-cp

The salt-cp command introduces the ability to copy simple files via salt to targeted servers. Using salt-cp is very simple, just call salt-cp with a target specification, the source file(s) and where to copy the files on the minions. For instance:

# salt-cp '*' /etc/hosts /etc/hosts
Will copy the local /etc/hosts file to all of the minions.

Salt-cp is very young, in the future more advanced features will be added, and the functionality will much more closely resemble the cp command.

**Cython minion modules**

Cython is an amazing tool used to compile Python modules down to c. This is arguably the fastest way to run Python code, and since pyzmq requires cython, adding support to salt for cython adds no new dependencies.

Cython minion modules allow minion modules to be written in cython and therefore executed in compiled c. Simply write the salt module in cython and use the file extension “.pyx” and the minion module will be compiled when the minion is started. An example cython module is included in the main distribution called cytest.pyx:

https://github.com/saltstack/salt/blob/master/salt/modules/cytest.pyx

**Dynamic Returners**

By default salt returns command data back to the salt master, but now salt can return command data to any system. This is enabled via the new returners modules feature for salt. The returners modules take the return data and sends it to a specific module. The returner modules work like minion modules, so any returner can be added to the minions.

This means that a custom data returner can be added to communicate the return data so anything from MySQL, Redis, MongoDB, and more!

There are 2 simple stock returners in the returners directory:

https://github.com/saltstack/salt/blob/master/salt/returners

The documentation on writing returners will be added to the wiki shortly, and returners can be written in pure Python, or in cython.

**Configurable Minion Modules**

Minion modules may need to be configured, now the options passed to the minion configuration file can be accessed inside of the minion modules via the __opt__ dict.

Information on how to use this simple addition has been added to the wiki: *Writing modules*

The test module has an example of using the __opts__ dict, and how to set default options:

https://github.com/saltstack/salt/blob/master/salt/modules/test.py

**Advanced Minion Threading**

In 0.7.0 the minion would block after receiving a command from the master, now the minion will spawn a thread or multiprocess. By default Python threads are used because for general use they have proved to be faster, but the minion can now be configured to use the Python multiprocessing module instead. Using multiprocessing will cause executions that are CPU bound or would otherwise exploit the negative aspects of the Python GIL to run faster and more reliably, but simple calls will still be faster with Python threading. The configuration option can be found in the minion configuration file:

https://github.com/saltstack/salt/blob/master/conf/minion
Lowered Supported Python to 2.6

The requirement for Python 2.7 has been removed to support Python 2.6. I have received requests to take the minimum Python version back to 2.4, but unfortunately this will not be possible, since the ZeroMQ Python bindings do not support Python 2.4.

Salt 0.8.0 is a very major update, it also changes the network protocol slightly which makes communication with older salt daemons impossible, your master and minions need to be upgraded together!

I could use some help bringing salt to the people! Right now I only have packages for Arch Linux, Fedora 14 and Gentoo. We need packages for Debian and people willing to help test on more platforms. We also need help writing more minion modules and returner modules. If you want to contribute to salt please hop on the mailing list and send in patches, make a fork on GitHub and send in pull requests! If you want to help but are not sure where you can, please email me directly or post to the mailing list!

I hope you enjoy salt, while it is not yet 1.0 salt is completely viable and usable!

- Thomas S. Hatch

28.2.131 Salt 0.8.7 release notes

It has been a month since salt 0.8.0, and it has been a long month! But Salt is still coming along strong. 0.8.7 has a lot of changes and a lot of updates. This update makes Salt’s ZeroMQ back end better, strips Facter from the dependencies, and introduces interfaces to handle more capabilities.

Many of the major updates are in the background, but the changes should shine through to the surface. A number of the new features are still a little thin, but the back end to support expansion is in place.

I also recently gave a presentation to the Utah Python users group in Salt Lake City, the slides from this presentation are available here:

The video from this presentation will be available shortly.

The major new features and changes in Salt 0.8.7 are:

- Revamp ZeroMQ topology on the master for better scalability
- State enforcement
- Dynamic state enforcement managers
- Extract the module loader into salt.loader
- Make Job ids more granular
- Replace Facter functionality with the new salt grains interface
- Support for “virtual” salt modules
- Introduce the salt-call command
- Better debugging for minion modules

The new ZeroMQ topology allows for better scalability, this will be required by the need to execute massive file transfers to multiple machines in parallel and state management. The new ZeroMQ topology is available in the aforementioned presentation.

0.8.7 introduces the capability to declare states, this is similar to the capabilities of Puppet. States in salt are declared via state data structures. This system is very young, but the core feature set is available. Salt states work around rendering files which represent Salt high data. More on the Salt state system will be documented in the near future.

The system for loading salt modules has been pulled out of the minion class to be a standalone module, this has enabled more dynamic loading of Salt modules and enables many of the updates in 0.8.7 –
Salt Job ids are now microsecond precise, this was needed to repair a race condition unveiled by the speed improvements in the new ZeroMQ topology.

The new grains interface replaces the functionality of Facter, the idea behind grains differs from Facter in that the grains are only used for static system data, dynamic data needs to be derived from a call to a salt module. This makes grains much faster to use, since the grains data is generated when the minion starts.

Virtual salt modules allows for a salt module to be presented as something other than its module name. The idea here is that based on information from the minion decisions about which module should be presented can be made. The best example is the pacman module. The pacman module will only load on Arch Linux minions, and will be called pkg. Similarly the yum module will be presented as pkg when the minion starts on a Fedora/RedHat system.

The new salt-call command allows for minion modules to be executed from the minion. This means that on the minion a salt module can be executed, this is a great tool for testing Salt modules. The salt-call command can also be used to view the grains data.

In previous releases when a minion module threw an exception very little data was returned to the master. Now the stack trace from the failure is returned making debugging of minion modules MUCH easier.

Salt is nearing the goal of 1.0, where the core feature set and capability is complete!

-Thomas S Hatch

28.2.132 Salt 0.8.8 release notes

Salt 0.8.8 is here! This release adds a great deal of code and some serious new features.

Improved Documentation has been set up for salt using sphinx thanks to the efforts of Seth House. This new documentation system will act as the back end to the salt website which is still under heavy development. The new sphinx documentation system has also been used to greatly clean up the salt manpages. The salt 7 manpage in particular now contains extensive information which was previously only in the wiki. The new documentation can be found at: http://docs.saltstack.com/ We still have a lot to add, and when the domain is set up I will post another announcement.

More additions have been made to the ZeroMQ setup, particularly in the realm of file transfers. Salt 0.8.8 introduces a built in, stateless, encrypted file server which allows salt minions to download files from the salt master using the same encryption system used for all other salt communications. The main motivation for the salt file server has been to facilitate the new salt state system.

Much of the salt code has been cleaned up and a new cleaner logging system has been introduced thanks to the efforts of Pedro Algarvio. These additions will allow for much more flexible logging to be executed by salt, and fixed a great deal of my poor spelling in the salt docstrings! Pedro Algarvio has also cleaned up the API, making it easier to embed salt into another application.

The biggest addition to salt found in 0.8.8 is the new state system. The salt module system has received a new front end which allows salt to be used as a configuration management system. The configuration management system allows for system configuration to be defined in data structures. The configuration management system, or as it is called in salt, the “salt state system” supports many of the features found in other configuration managers, but allows for system states to be written in a far simpler format, executes at blazing speeds, and operates via the salt minion matching system. The state system also operates within the normal scope of salt, and requires no additional configuration to use.

The salt state system can enforce the following states with many more to come: Packages Files Services Executing commands Hosts

The system used to define the salt states is based on a data structure, the data structure used to define the salt states has been made to be as easy to use as possible. The data structure is defined by default using a YAML file rendered via a Jinja template. This means that the state definition language supports all of the data structures that YAML
supports, and all of the programming constructs and logic that Jinja supports. If the user does not like YAML or Jinja the states can be defined in yaml-mako, json-jinja, or json-mako. The system used to render the states is completely dynamic, and any rendering system can be added to the capabilities of Salt, this means that a rendering system that renders XML data in a cheetah template, or whatever you can imagine, can be easily added to the capabilities of salt.

The salt state system also supports isolated environments, as well as matching code from several environments to a single salt minion.

The feature base for Salt has grown quite a bit since my last serious documentation push. As we approach 0.9.0 the goals are becoming very clear, and the documentation needs a lot of work. The main goals for 0.9.0 are to further refine the state system, fix any bugs we find, get Salt running on as many platforms as we can, and get the documentation filled out. There is a lot more to come as Salt moves forward to encapsulate a much larger scope, while maintaining supreme usability and simplicity.

If you would like a more complete overview of Salt please watch the Salt presentation: Slides:

-Thomas S Hatch

28.2.133 Salt 0.8.9 Release Notes

Salt 0.8.9 has finally arrived! Unfortunately this is much later than I had hoped to release 0.8.9, life has been very crazy over the last month. But despite challenges, Salt has moved forward!

This release, as expected, adds few new features and many refinements. One of the most exciting aspect of this release is that the development community for salt has grown a great deal and much of the code is from contributors.

Also, I have filled out the documentation a great deal. So information on States is properly documented, and much of the documentation that was out of date has been filled in.

Download!

The Salt source can be downloaded from PyPI:

https://pypi.python.org/packages/source/s/salt/salt-0.8.9.tar.gz

Here s the md5sum:

7d5aca4633bc22f59045f59e82f43b56

For instructions on how to set up Salt please see the Installation instructions.

New Features

Salt Run

A big feature is the addition of Salt run, the `salt-run` command allows for master side execution modules to be made that gather specific information or execute custom routines from the master.

Documentation for salt-run can be found here

Refined Outputters

One problem often complained about in salt was the fact that the output was so messy. Thanks to help from Jeff Schroeder a cleaner interface for the command output for the Salt CLI has been made. This new interface makes adding new printout formats easy and additions to the capabilities of minion modules makes it possible to set the printout mode or `outputter` for functions in minion modules.
Cross Calling Salt Modules

Salt modules can now call each other, the __salt__ dict has been added to the predefined references in minion modules. This new feature is documented in the modules documentation.

Watch Option Added to Salt State System

Now in Salt states you can set the watch option, this will allow watch enabled states to change based on a change in the other defined states. This is similar to subscribe and notify statements in puppet.

Root Dir Option

Travis Cline has added the ability to define the option root_dir which allows the salt minion to operate in a subdir. This is a strong move in supporting the minion running as an unprivileged user.

Config Files Defined in Variables

Thanks again to Travis Cline, the master and minion configuration file locations can be defined in environment variables now.

New Modules

Quite a few new modules, states, returners, and runners have been made.

New Minion Modules

apt

Support for apt-get has been added, this adds greatly improved Debian and Ubuntu support to Salt!

useradd and groupadd

Support for manipulating users and groups on Unix-like systems.

moosefs

Initial support for reporting on aspects of the distributed file system, MooseFS. For more information on MooseFS please see: http://www.moosefs.org

Thanks to Joseph Hall for his work on MooseFS support.

mount

Manage mounts and the fstab.
**puppet**

Execute puppet on remote systems.

**shadow**

Manipulate and manage the user password file.

**ssh**

Interact with ssh keys.

**New States**

**user and group**

Support for managing users and groups in Salt States.

**mount**

Enforce mounts and the fstab.

**New Returners**

**mongo_return**

Send the return information to a MongoDB server.

**New Runners**

**manage**

Display minions that are up or down.

### 28.2.134 Salt 0.9.0 Release Notes

**release** 2011-08-27

Salt 0.9.0 is here. This is an exciting release, 0.9.0 includes the new network topology features allowing peer salt commands and masters of masters via the syndic interface.

0.9.0 also introduces many more modules, improvements to the API and improvements to the ZeroMQ systems.
Download!

The Salt source can be downloaded from PyPI:
https://pypi.python.org/packages/source/s/salt/salt-0.9.0.tar.gz

Here is the md5sum:
9a925da04981e65a0f237f2e77ddab37

For instructions on how to set up Salt please see the *Installation* instructions.

New Features

Salt Syndic

The new *Syndic interface* allows a master to be commanded via another higher level salt master. This is a powerful solution allowing a master control structure to exist, allowing salt to scale to much larger levels then before.

Peer Communication

0.9.0 introduces the capability for a minion to call a publication on the master and receive the return from another set of minions. This allows salt to act as a communication channel between minions and as a general infrastructure message bus.

Peer communication is turned off by default but can be enabled via the *peer* option in the master configuration file. Documentation on the new *Peer interface*.

Easily Extensible API

The minion and master classes have been redesigned to allow for specialized minion and master servers to be easily created. An example on how this is done for the master can be found in the *master.py* salt module:
https://github.com/saltstack/salt/blob/master/salt/master.py

The *Master* class extends the *SMaster* class and set up the main master server.

The minion functions can now also be easily added to another application via the *SMinion* class, this class can be found in the *minion.py* module:
https://github.com/saltstack/salt/blob/master/salt/minion.py

Cleaner Key Management

This release changes some of the key naming to allow for multiple master keys to be held based on the type of minion gathering the master key.

The `-d` option has also been added to the salt-key command allowing for easy removal of accepted public keys.

The `-gen-keys` option is now available as well for salt-key, this allows for a salt specific RSA key pair to be easily generated from the command line.
Improved 0MQ Master Workers

The 0MQ worker system has been further refined to be faster and more robust. This new system has been able to handle a much larger load than the previous setup. The new system uses the IPC protocol in 0MQ instead of TCP.

New Modules

Quite a few new modules have been made.

New Minion Modules

apache

Work directly with apache servers, great for managing balanced web servers

cron

Read out the contents of a systems crontabs

mdadm

Module to manage raid devices in Linux, appears as the raid module

mysql

Gather simple data from MySQL databases

ps

Extensive utilities for managing processes

publish

Used by the peer interface to allow minions to make publications

28.2.135 Salt 0.9.1 Release Notes

release 2011-08-29
28.2.136 Salt 0.9.2 Release Notes

release 2011-09-17

Salt 0.9.2 has arrived! 0.9.2 is primarily a bugfix release, the exciting component in 0.9.2 is greatly improved support for salt states. All of the salt states interfaces have been more thoroughly tested and the new salt-states git repo is growing with example of how to use states.

This release introduces salt states for early developers and testers to start helping us clean up the states interface and make it ready for the world!

0.9.2 also fixes a number of bugs found on Python 2.6.

Download!

The Salt source can be downloaded from PyPI:
https://pypi.python.org/packages/source/s/salt/salt-0.9.2.tar.gz

For instructions on how to set up Salt please see the Installation instructions.

New Features

Salt-Call Additions

The salt-call command has received an overhaul, it now hooks into the outputter system so command output looks clean, and the logging system has been hooked into salt-call, so the -l option allows the logging output from salt minion functions to be displayed.

The end result is that the salt-call command can execute the state system and return clean output:

```
# salt-call state.highstate
```

State System Fixes

The state system has been tested and better refined. As of this release the state system is ready for early testers to start playing with. If you are interested in working with the state system please check out the (still very small) salt-states GitHub repo:

https://github.com/saltstack/salt-states

This git repo is the active development branch for determining how a clean salt-state database should look and act. Since the salt state system is still very young a lot of help is still needed here. Please fork the salt-states repo and help us develop a truly large and scalable system for configuration management!

Notable Bug Fixes

Python 2.6 String Formatting

Python 2.6 does not support format strings without an index identifier, all of them have been repaired.
Cython Loading Disabled by Default

Cython loading requires a development tool chain to be installed on the minion, requiring this by default can cause problems for most Salt deployments. If Cython auto loading is desired it will need to be turned on in the minion config.

28.2.137 Salt 0.9.3 Release Notes

release 2011-11-05

Salt 0.9.3 is finally arrived. This is another big step forward for Salt, new features range from proper FreeBSD support to fixing issues seen when attaching a minion to a master over the Internet.

The biggest improvements in 0.9.3 though can be found in the state system, it has progressed from something ready for early testers to a system ready to compete with platforms such as Puppet and Chef. The backbone of the state system has been greatly refined and many new features are available.

Download!

The Salt source can be downloaded from PyPI:
https://pypi.python.org/packages/source/s/salt/salt-0.9.3.tar.gz

For instructions on how to set up Salt please see the Installation instructions.

New Features

WAN Support

Recently more people have been testing Salt minions connecting to Salt Masters over the Internet. It was found that Minions would commonly lose their connection to the master when working over the internet. The minions can now detect if the connection has been lost and reconnect to the master, making WAN connections much more reliable.

State System Fixes

Substantial testing has gone into the state system and it is ready for real world usage. A great deal has been added to the documentation for states and the modules and functions available to states have been cleanly documented.

A number of State System bugs have also been found and repaired, the output from the state system has also been refined to be extremely clear and concise.

Error reporting has also been introduced, issues found in sls files will now be clearly reported when executing Salt States.

Extend Declaration

The Salt States have also gained the extend declaration. This declaration allows for states to be cleanly modified in a post environment. Simply said, if there is an apache.sls file that declares the apache service, then another sls can include apache and then extend it:
**Include**:

- apache

**Extend**:  
apache:  
  service:  
    - require:  
      - pkg: mod_python

**mod_python**:  
  pkg:  
    - installed

The notable behavior with the extend functionality is that it literally extends or overwrites a declaration set up in another sls module. This means that Salt will behave as though the modifications were made directly to the apache sls. This ensures that the apache service in this example is directly tied to all requirements.

**Highstate Structure Specification**

This release comes with a clear specification of the Highstate data structure that is used to declare Salt States. This specification explains everything that can be declared in the Salt SLS modules.

The specification is extremely simple, and illustrates how Salt has been able to fulfill the requirements of a central configuration manager within a simple and easy to understand format and specification.

**SheBang Renderer Switch**

It came to our attention that having many renderers means that there may be a situation where more than one State Renderer should be available within a single State Tree.

The method chosen to accomplish this was something already familiar to developers and systems administrators, a SheBang. The Python State Renderer displays this new capability.

**Python State Renderer**

Until now Salt States could only be declared in yaml or json using Jinja or Mako. A new, very powerful, renderer has been added, making it possible to write Salt States in pure Python:

```python
#!/py

def run():
    '''
    Install the python-mako package
    '''
    return {'include': ['python'],
            'python-mako': {'pkg': ['installed']}}
```

This renderer is used by making a run function that returns the Highstate data structure. Any capabilities of Python can be used in pure Python sls modules.

This example of a pure Python sls module is the same as this example in yaml:
FreeBSD Support

Additional support has been added for FreeBSD, this is Salt’s first branch out of the Linux world and proves the viability of Salt on non-Linux platforms.

Salt remote execution already worked on FreeBSD, and should work without issue on any Unix-like platform. But this support comes in the form of package management and user support, so Salt States also work on FreeBSD now.

The new freebsdpkg module provides package management support for FreeBSD and the new pw_user and pw_group provide user and group management.

Module and State Additions

Cron Support

Support for managing the system crontab has been added, declaring a cron state can be done easily:

```
date > /tmp/datestamp:
  cron:
    - present
    - user: fred
    - minute: 5
    - hour: 3
```

File State Additions

The file state has been given a number of new features, primarily the directory, recurse, symlink, and absent functions.

file.directory Make sure that a directory exists and has the right permissions.

```
/srv/foot:
  file:
    - directory
    - user: root
    - group: root
    - mode: 1755
```

file.symlink Make a symlink.

```
/var/lib/www:
  file:
    - symlink
    - target: /srv/www
    - force: True
```
file.recurse The recurse state function will recursively download a directory on the master file server and place it on the minion. Any change in the files on the master will be pushed to the minion. The recurse function is very powerful and has been tested by pushing out the full Linux kernel source.

```
/opt/code:
  file:
    - recurse
    - source: salt://linux
```

file.absent Make sure that the file is not on the system, recursively deletes directories, files, and symlinks.

```
/etc/httpd/conf.d/somebogusfile.conf:
  file:
    - absent
```

Sysctl Module and State

The sysctl module and state allows for sysctl components in the kernel to be managed easily. the sysctl module contains the following functions:

- **sysctl.show** Return a list of sysctl parameters for this minion
- **sysctl.get** Return a single sysctl parameter for this minion
- **sysctl.assign** Assign a single sysctl parameter for this minion
- **sysctl.persist** Assign and persist a simple sysctl parameter for this minion

The sysctl state allows for sysctl parameters to be assigned:

```
vm.swappiness:
  sysctl:
    - present
    - value: 20
```

Kernel Module Management

A module for managing Linux kernel modules has been added. The new functions are as follows:

- **kmod.available** Return a list of all available kernel modules
- **kmod.check_available** Check to see if the specified kernel module is available
- **kmod.lsmod** Return a dict containing information about currently loaded modules
- **kmod.load** Load the specified kernel module
- **kmod.remove** Unload the specified kernel module

The kmod state can enforce modules be either present or absent:

```
kvm_intel:
  kmod:
    - present
```
Ssh Authorized Keys

The ssh_auth state can distribute ssh authorized keys out to minions. Ssh authorized keys can be present or absent.

```
AAAAB3NzaC1kc3MAAACBAL0sQ9fJ5bYTEyYvlR8s3dD6o49CNfhlWfWXQRqlsrl6rwL4KIuPrhY7bWw8tV7UNC7j91ZRN04iGod9C+0xw6nqZfVmc2re5LeLw30KgxCQnojvYFHGUOYaQLBBM0sy0++tJe1KTAr3A2zGj2xbW093JhEzu8xvSdf8jM9e0NSSRZPzSyUQc8z7Ul8Q26iK5mRZzN616GwGTyzNIMBekGyQ5MrDcPv5dBIP/1M6fQDEQAXQ==:

ssh_auth:
  - present
  - user: frank
  - enc: dsa
  - comment: 'Frank's key'
```

28.2.138 Salt 0.9.4 Release Notes

**release** 2011-11-27

Salt 0.9.4 has arrived. This is a critical update that repairs a number of key bugs found in 0.9.3. But this update is not without feature additions as well! 0.9.4 adds support for Gentoo portage to the pkg module and state system. Also there are 2 major new state additions, the failhard option and the ability to set up finite state ordering with the `order` option.

This release also sees our largest increase in community contributions. These contributors have and continue to be the life blood of the Salt project, and the team continues to grow. I want to put out a big thanks to our new and existing contributors.

**Download!**

The Salt source can be downloaded from PyPi:

https://pypi.python.org/packages/source/s/salt/salt-0.9.4.tar.gz

For instructions on how to set up Salt please see the Installation instructions.

**New Features**

**Failhard State Option**

Normally, when a state fails Salt continues to execute the remainder of the defined states and will only refuse to execute states that require the failed state.

But the situation may exist, where you would want all state execution to stop if a single state execution fails. The capability to do this is called failing hard.

**State Level Failhard**

A single state can have a failhard set, this means that if this individual state fails that all state execution will immediately stop. This is a great thing to do if there is a state that sets up a critical config file and setting a require for each state that reads the config would be cumbersome. A good example of this would be setting up a package manager early on:
In this situation, the yum repo is going to be configured before other states, and if it fails to lay down the config file, than no other states will be executed.

Global Failhard

It may be desired to have failhard be applied to every state that is executed, if this is the case, then failhard can be set in the master configuration file. Setting failhard in the master configuration file will result in failing hard when any minion gathering states from the master have a state fail.

This is NOT the default behavior, normally Salt will only fail states that require a failed state.

Using the global failhard is generally not recommended, since it can result in states not being executed or even checked. It can also be confusing to see states failhard if an admin is not actively aware that the failhard has been set.

To use the global failhard set failhard: True in the master configuration

Finite Ordering of State Execution

When creating salt sls files, it is often important to ensure that they run in a specific order. While states will always execute in the same order, that order is not necessarily defined the way you want it.

A few tools exist in Salt to set up the correct state ordering, these tools consist of requisite declarations and order options.

The Order Option

Before using the order option, remember that the majority of state ordering should be done with requisite statements, and that a requisite statement will override an order option.

The order option is used by adding an order number to a state declaration with the option order:

```
vim:
  pkg:
    - installed
    - order: 1
```

By adding the order option to 1 this ensures that the vim package will be installed in tandem with any other state declaration set to the order 1.

Any state declared without an order option will be executed after all states with order options are executed.

But this construct can only handle ordering states from the beginning. Sometimes you may want to send a state to the end of the line, to do this set the order to last:
Substantial testing has gone into the state system and it is ready for real world usage. A great deal has been added to the documentation for states and the modules and functions available to states have been cleanly documented.

A number of State System bugs have also been founds and repaired, the output from the state system has also been refined to be extremely clear and concise.

Error reporting has also been introduced, issues found in sls files will now be clearly reported when executing Salt States.

Gentoo Support

Additional experimental support has been added for Gentoo. This is found in the contribution from Doug Renn, aka nestegg.

28.2.139 Salt 0.9.5 Release Notes

release 2012-01-15

Salt 0.9.5 is one of the largest steps forward in the development of Salt.

0.9.5 comes with many milestones, this release has seen the community of developers grow out to an international team of 46 code contributors and has many feature additions, feature enhancements, bug fixes and speed improvements.

Warning: Be sure to read the upgrade instructions about the switch to msgpack before upgrading!

Community

Nothing has proven to have more value to the development of Salt that the outstanding community that has been growing at such a great pace around Salt. This has proven not only that Salt has great value, but also the expandability of Salt is as exponential as I originally intended.

0.9.5 has received over 600 additional commits since 0.9.4 with a swath of new committers. The following individuals have contributed to the development of 0.9.5:

- Aaron Bull Schaefer
- Antti Kaihola
- Bas Tichelaar
- Brad Barden
- Brian Wagner
- Byron Clark
- Chris Scheller
- Christer Edwards
- Clint Savage
This makes 21 new developers since 0.9.4 was released!

To keep up with the growing community follow Salt on Ohloh ([http://www.ohloh.net/p/salt](http://www.ohloh.net/p/salt)), to join the Salt development community, fork Salt on GitHub, and get coding ([https://github.com/saltstack/salt](https://github.com/saltstack/salt))!

**Major Features**

**SPEED! Pickle to msgpack**

For a few months now we have been talking about moving away from Python pickles for network serialization, but a preferred serialization format had not yet been found. After an extensive performance testing period involving everything from JSON to protocol buffers, a clear winner emerged. Message Pack ([http://msgpack.org/](http://msgpack.org/)) proved to not only be the fastest and most compact, but also the most "salt like". Message Pack is simple, and the code involved is very small. The msgpack library for Python has been added directly to Salt.

This move introduces a few changes to Salt. First off, Salt is no longer a "noarch" package, since the msgpack lib is written in C. Salt 0.9.5 will also have compatibility issues with 0.9.4 with the default configuration.

We have gone through great lengths to avoid backwards compatibility issues with Salt, but changing the serialization medium was going to create issues regardless. Salt 0.9.5 is somewhat backwards compatible with earlier minions. A 0.9.5 master can command older minions, but only if the `serial` config value in the master is set to `pickle`. This will tell the master to publish messages in pickle format and will allow the master to receive messages in both msgpack and pickle formats.

Therefore the suggested methods for upgrading are either to just upgrade everything at once, or:
1. Upgrade the master to 0.9.5
2. Set `serial` to `pickle` in the master config
3. Upgrade the minions
4. Remove the `serial` option from the master config

Since pickles can be used as a security exploit the ability for a master to accept pickles from minions at all will be removed in a future release.

**C Bindings for YAML**

All of the YAML rendering is now done with the YAML C bindings. This speeds up all of the sls files when running states.

**Experimental Windows Support**

David Boucha has worked tirelessly to bring initial support to Salt for Microsoft Windows operating systems. Right now the Salt Minion can run as a native Windows service and accept commands.

In the weeks and months to come Windows will receive the full treatment and will have support for Salt States and more robust support for managing Windows systems. This is a big step forward for Salt to move entirely outside of the Unix world, and proves Salt is a viable cross platform solution. Big Thanks to Dave for his contribution here!

**Dynamic Module Distribution**

Many Salt users have expressed the desire to have Salt distribute in-house modules, states, renderers, returners, and grains. This support has been added in a number of ways:

**Modules via States**

Now when salt modules are deployed to a minion via the state system as a file, then the modules will be automatically loaded into the active running minion - no restart required - and into the active running state. So custom state modules can be deployed and used in the same state run.

**Modules via Module Environment Directories**

Under the file_roots each environment can now have directories that are used to deploy large groups of modules. These directories sync modules at the beginning of a state run on the minion, or can be manually synced via the Salt module `salt.modules.saltutil.sync_all`.

The directories are named:

- `_modules`
- `_states`
- `_grains`
- `_renderers`
- `_returners`

The modules are pushed to their respective scopes on the minions.
Module Reloading

Modules can now be reloaded without restarting the minion, this is done by calling the `salt.modules.sys.reload_modules` function.

But wait, there’s more! Now when a salt module of any type is added via states the modules will be automatically reloaded, allowing for modules to be laid down with states and then immediately used.

Finally, all modules are reloaded when modules are dynamically distributed from the salt master.

Enable / Disable Added to Service

A great deal of demand has existed for adding the capability to set services to be started at boot in the service module. This feature also comes with an overhaul of the service modules and initial systemd support.

This means that the `service state` can now accept `- enable: True` to make sure a service is enabled at boot, and `- enable: False` to make sure it is disabled.

Compound Target

A new target type has been added to the lineup, the compound target. In previous versions the desired minions could only be targeted via a single specific target type, but now many target specifications can be declared.

These targets can also be separated by and/or operators, so certain properties can be used to omit a node:

```
salt -C 'webserv* and G@os:Debian or E@db.*' test.ping
```

will match all minions with ids starting with webserv via a glob and minions matching the `os:Debian` grain. Or minions that match the `db.*` regular expression.

Node Groups

Often the convenience of having a predefined group of minions to execute targets on is desired. This can be accomplished with the new nodegroups feature. Nodegroups allow for predefined compound targets to be declared in the master configuration file:

```yaml
nodegroups:
  group1: 'L@foo.domain.com,bar.domain.com,baz.domain.com and bl*.domain.com'
  group2: 'G@os:Debian and foo.domain.com'
```

And then used via the `-N` option:

```
salt -N group1 test.ping
```

Minion Side Data Store

The data module introduces the initial approach into storing persistent data on the minions, specific to the minions. This allows for data to be stored on minions that can be accessed from the master or from the minion.

The Minion datastore is young, and will eventually provide an interface similar to a more mature key/value pair server.
Major Grains Improvement

The Salt grains have been overhauled to include a massive amount of extra data. This includes hardware data, os data and salt specific data.

Salt -Q is Useful Now

In the past the salt query system, which would display the data from recent executions would be displayed in pure Python, and it was unreadable.

0.9.5 has added the outputter system to the -Q option, thus enabling the salt query system to return readable output.

Packaging Updates

Huge strides have been made in packaging Salt for distributions. These additions are thanks to our wonderful community where the work to set up packages has proceeded tirelessly.

FreeBSD

Salt on FreeBSD? There a port for that:

http://svnweb.freebsd.org/ports/head/sysutils/py-salt/

This port was developed and added by Christer Edwards. This also marks the first time Salt has been included in an upstream packaging system!

Fedora and Red Hat Enterprise

Salt packages have been prepared for inclusion in the Fedora Project and in EPEL for Red Hat Enterprise 5 and 6. These packages are the result of the efforts made by Clint Savage (herlo).

Debian/Ubuntu

A team of many contributors have assisted in developing packages for Debian and Ubuntu. Salt is still actively seeking inclusion in upstream Debian and Ubuntu and the package data that has been prepared is being pushed through the needed channels for inclusion.

These packages have been prepared with the help of:

- Corey
- Aaron Toponce
- and’

More to Come

We are actively seeking inclusion in more distributions. Primarily getting Salt into Gentoo, SUSE, OpenBSD, and preparing Solaris support are all turning into higher priorities.
Refinement

Salt continues to be refined into a faster, more stable and more usable application. 0.9.5 comes with more debug logging, more bug fixes and more complete support.

More Testing, More Bug Fixes

0.9.5 comes with more bug fixes due to more testing than any previous release. The growing community and the introduction a dedicated QA environment have unearthed many issues that were hiding under the covers. This has further refined and cleaned the state interface, taking care of things from minor visual issues to repairing misleading data.

Custom Exceptions

A custom exception module has been added to throw salt specific exceptions. This allows Salt to give much more granular error information.

New Modules

data

The new data module manages a persistent datastore on the minion. Big thanks to bastichelaar for his help refining this module.

freebsdkmod

FreeBSD kernel modules can now be managed in the same way Salt handles Linux kernel modules. This module was contributed thanks to the efforts of Christer Edwards.

gentoo_service

Support has been added for managing services in Gentoo. Now Gentoo services can be started, stopped, restarted, enabled, disabled, and viewed.

pip

The pip module introduces management for pip installed applications. Thanks goes to whitinge for the addition of the pip module.

rh_service

The rh_service module enables Red Hat and Fedora specific service management. Now Red Hat like systems come with extensive management of the classic init system used by Red Hat.
**saltutil**

The saltutil module has been added as a place to hold functions used in the maintenance and management of salt itself. Saltutil is used to salt the salt minion. The saltutil module is presently used only to sync extension modules from the master server.

**systemd**

Systemd support has been added to Salt, now systems using this next generation init system are supported on systems running systemd.

**virtualenv**

The virtualenv module has been added to allow salt to create virtual Python environments. Thanks goes to whitinge for the addition of the virtualenv module.

**win_disk**

Support for gathering disk information on Microsoft Windows minions The windows modules come courtesy of Utah_Dave

**win_service**

The win_service module adds service support to Salt for Microsoft Windows services.

**win_useradd**

Salt can now manage local users on Microsoft Windows Systems.

**yumpkg5**

The yumpkg module introduces in 0.9.4 uses the yum API to interact with the yum package manager. Unfortunately, on Red Hat 5 systems salt does not have access to the yum API because the yum API is running under Python 2.4 and Salt needs to run under Python 2.6.

The yumpkg5 module bypasses this issue by shelling out to yum on systems where the yum API is not available.

**New States**

**mysql_database**

The new mysql_database state adds the ability to systems running a mysql server to manage the existence of mysql databases.

The mysql states are thanks to syphernl
**mysql_user**

The mysql_user state enables mysql user management.

**virtualenv**

The virtualenv state can manage the state of Python virtual environments. Thanks to Whitinge for the virtualenv state

**New Returners**

**cassandra_returner**

A returner allowing Salt to send data to a cassandra server. Thanks to Byron Clark for contributing this returner

---

### 28.2.140 Salt 0.9.6 Release Notes

**release** 2012-01-21

Salt 0.9.6 is a release targeting a few bugs and changes. This is primarily targeting an issue found in the names declaration in the state system. But a few other bugs were also repaired, like missing support for grains in extmods. Due to a conflict in distribution packaging msgpack will no longer be bundled with Salt, and is required as a dependency.

**New Features**

**HTTP and ftp support in files.managed**

Now under the source option in the file.managed state a HTTP or ftp address can be used instead of a file located on the salt master.

**Allow Multiple Returners**

Now the returner interface can define multiple returners, and will also return data back to the master, making the process less ambiguous.

**Minion Memory Improvements**

A number of modules have been taken out of the minion if the underlying systems required by said modules are not present on the minion system. A number of other modules need to be stripped out in this same way which should continue to make the minion more efficient.

**Minions Can Locally Cache Return Data**

A new option, cache_jobs, has been added to the minion to allow for all of the historically run jobs to cache on the minion, allowing for looking up historic returns. By default cache_jobs is set to False.
Pure Python Template Support For file.managed

Templates in the file.managed state can now be defined in a Python script. This script needs to have a run function that returns the string that needs to be in the named file.

28.2.141 Salt 0.9.7 Release Notes

release 2012-02-15

Salt 0.9.7 is here! The latest iteration of Salt brings more features and many fixes. This release is a great refinement over 0.9.6, adding many conveniences under the hood, as well as some features that make working with Salt much better.

A few highlights include the new Job system, refinements to the requisite system in states, the mod_init interface for states, external node classification, search path to managed files in the file state, and refinements and additions to dynamic module loading.

0.9.7 also introduces the long developed (and oft changed) unit test framework and the initial unit tests.

Major Features

Salt Jobs Interface

The new jobs interface makes the management of running executions much cleaner and more transparent. Building on the existing execution framework the jobs system allows clear introspection into the active running state of the running Salt interface.

The Jobs interface is centered in the new minion side proc system. The minions now store msgpack serialized files under /var/cache/salt/proc. These files keep track of the active state of processes on the minion.

Functions in the saltutil Module

A number of functions have been added to the saltutil module to manage and view the jobs:
run*ing - Returns the data of all running jobs that are found in the proc directory.
find_job - Returns specific data about a certain job based on job id.
signal_job - Allows for a given jid to be sent a signal.
term_job - Sends a termination signal (SIGTERM, 15) to the process controlling the specified job.
kill_job Sends a kill signal (SIGKILL, 9) to the process controlling the specified job.

The jobs Runner

A convenience runner front end and reporting system has been added as well. The jobs runner contains functions to make viewing data easier and cleaner.

The jobs runner contains a number of functions...
active

The active function runs `saltutil.running` on all minions and formats the return data about all running jobs in a much more usable and compact format. The active function will also compare jobs that have returned and jobs that are still running, making it easier to see what systems have completed a job and what systems are still being waited on.

lookup_jid

When jobs are executed the return data is sent back to the master and cached. By default is cached for 24 hours, but this can be configured via the `keep_jobs` option in the master configuration.

Using the `lookup_jid` runner will display the same return data that the initial job invocation with the salt command would display.

list_jobs

Before finding a historic job, it may be required to find the job id. `list_jobs` will parse the cached execution data and display all of the job data for jobs that have already, or partially returned.

External Node Classification

Salt can now use external node classifiers like Cobbler’s `cobbler-ext-nodes`.

Salt uses specific data from the external node classifier. In particular the classes value denotes which sls modules to run, and the environment value sets to another environment.

An external node classification can be set in the master configuration file via the `external_nodes` option: https://salt.readthedocs.io/en/latest/ref/configuration/master.html#external-nodes

External nodes are loaded in addition to the top files. If it is intended to only use external nodes, do not deploy any top files.

State Mod Init System

An issue arose with the pkg state. Every time a package was run Salt would need to refresh the package database. This made systems with slower package metadata refresh speeds much slower to work with. To alleviate this issue the `mod_init` interface has been added to salt states.

The `mod_init` interface is a function that can be added to a state file. This function is called with the first state called. In the case of the pkg state, the `mod_init` function sets up a tag which makes the package database only refresh on the first attempt to install a package.

In a nutshell, the `mod_init` interface allows a state to run any command that only needs to be run once, or can be used to set up an environment for working with the state.

Source File Search Path

The file state continues to be refined, adding speed and capabilities. This release adds the ability to pass a list to the source option. This list is then iterated over until the source file is found, and the first found file is used.

The new syntax looks like this:
The source option can take sources in the list from the salt file server as well as an arbitrary web source. If using an arbitrary web source the checksum needs to be passed as well for file verification.

**Refinements to the Requisite System**

A few discrepancies were still lingering in the requisite system, in particular, it was not possible to have a `require` and a `watch` requisite declared in the same state declaration.

This issue has been alleviated, as well as making the requisite system run more quickly.

**Initial Unit Testing Framework**

Because of the module system, and the need to test real scenarios, the development of a viable unit testing system has been difficult, but unit testing has finally arrived. Only a small amount of unit testing coverage has been developed, much more coverage will be in place soon.

A huge thanks goes out to those who have helped with unit testing, and the contributions that have been made to get us where we are. Without these contributions unit tests would still be in the dark.

**Compound Targets Expanded**

Originally only support for `and` and `or` were available in the compound target. 0.9.7 adds the capability to negate compound targets with `not`.

**Nodegroups in the Top File**

Previously the nodegroups defined in the master configuration file could not be used to match nodes for states. The nodegroups support has been expanded and the nodegroups defined in the master configuration can now be used to match minions in the top file.

**28.2.142 Salt 0.9.8 Release Notes**

Salt 0.9.8 is a big step forward, with many additions and enhancements, as well as a number of precursors to advanced future developments.

This version of Salt adds much more power to the command line, making the old hard timeout issues a thing of the past and adds keyword argument support. These additions are also available in the salt client API, making the available API tools much more powerful.

The new pillar system allows for data to be stored on the master and assigned to minions in a granular way similar to the state system. It also allows flexibility for users who want to keep data out of their state tree similar to 'external lookup' functionality in other tools.
A new way to extend requisites was added, the "requisite in" statement. This makes adding requires or watch statements to external state decs much easier.

Additions to requisites making them much more powerful have been added as well as improved error checking for sls files in the state system. A new provider system has been added to allow for redirecting what modules run in the background for individual states.

Support for openSUSE has been added and support for Solaris has begun serious development. Windows support has been significantly enhanced as well.

The matcher and target systems have received a great deal of attention. The default behavior of grain matching has changed slightly to reflect the rest of salt and the compound matcher system has been refined.

A number of impressive features with keyword arguments have been added to both the CLI and to the state system. This makes states much more powerful and flexible while maintaining the simple configuration everyone loves.

The new batch size capability allows for executions to be rolled through a group of targeted minions a percentage or specific number at a time. This was added to prevent the "thundering herd" problem when targeting large numbers of minions for things like service restarts or file downloads.

Upgrade Considerations

Upgrade Issues

There was a previously missed oversight which could cause a newer minion to crash an older master. That oversight has been resolved so the version incompatibility issue will no longer occur. When upgrading to 0.9.8 make sure to upgrade the master first, followed by the minions.

Debian/Ubuntu Packages

The original Debian/Ubuntu packages were called salt and included all salt applications. New packages in the ppa are split by function. If an old salt package is installed then it should be manually removed and the new split packages need to be freshly installed.

On the master:

```bash
# apt-get purge salt
# apt-get install salt-{master,minion}
```

On the minions:

```bash
# apt-get purge salt
# apt-get install salt-minion
```

And on any Syndics:

```bash
# apt-get install salt-syndic
```

The official Salt PPA for Ubuntu is located at: https://launchpad.net/~saltstack/+archive/salt

Major Features
Pillar

**Pillar** offers an interface to declare variable data on the master that is then assigned to the minions. The pillar data is made available to all modules, states, sls files etc. It is compiled on the master and is declared using the existing renderer system. This means that learning pillar should be fairly trivial to those already familiar with salt states.

CLI Additions

The **salt** command has received a serious overhaul and is more powerful than ever. Data is returned to the terminal as it is received, and the salt command will now wait for all running minions to return data before stopping. This makes adding very large **-timeout** arguments completely unnecessary and gets rid of long running operations returning empty `{}` when the timeout is exceeded.

When calling salt via sudo, the user originally running salt is saved to the log for auditing purposes. This makes it easy to see who ran what by just looking through the minion logs.

The **salt-key** command gained the **-D** and **–delete-all** arguments for removing all keys. Be careful with this one!

Running States Without a Master

The addition of running states without a salt-master has been added to 0.9.8. This feature allows for the unmodified salt state tree to be read locally from a minion. The result is that the UNMODIFIED state tree has just become portable, allowing minions to have a local copy of states or to manage states without a master entirely.

This is accomplished via the new file client interface in Salt that allows for the **salt://** URI to be redirected to custom interfaces. This means that there are now two interfaces for the salt file server, calling the master or looking in a local, minion defined **file_roots**.

This new feature can be used by modifying the minion config to point to a local **file_roots** and setting the **file_client** option to **local**.

Keyword Arguments and States

State modules now accept the **kwargs** argument. This results in all data in a sls file assigned to a state being made available to the state function.

This passes data in a transparent way back to the modules executing the logic. In particular, this allows adding arguments to the **pkg.install** module that enable more advanced and granular controls with respect to what the state is capable of.

An example of this along with the new debconf module for installing ldap client packages on Debian:

```
ldap-client-packages:
pkg:
  - debconf: salt://debconf/ldap-client.ans
  - installed
  - names:
    - nslcd
    - libpam-ldapd
    - libnss-ldapd
```

```
Keyword Arguments and the CLI

In the past it was required that all arguments be passed in the proper order to the `salt` and `salt-call` commands. As of 0.9.8, keyword arguments can be passed in the form of `kwarg=argument`.

```
# salt -G 'type:dev' git.clone |
    repository=https://github.com/saltstack/salt.git cwd=/tmp/salt user=jeff
```

Matcher Refinements and Changes

A number of fixes and changes have been applied to the Matcher system. The most noteworthy is the change in the grain matcher. The grain matcher used to use a regular expression to match the passed data to a grain, but now defaults to a shell glob like the majority of match interfaces in Salt. A new option is available that still uses the old style regex matching to grain data called `grain-pcre`. To use regex matching in compound matches use the letter `P`.

For example, this would match any ArchLinux or Fedora minions:

```
# salt --grain-pcre 'os:(Arch:Fed).*' test.ping
```

And the associated compound matcher suitable for `top.sls` is `P`:

```
P@os:(Arch|Fed).*
```

**NOTE:** Changing the grains matcher from pcre to glob is backwards incompatible.

Support has been added for matching minions with Yahoo’s range library. This is handled by passing range syntax with `-R` or `--range` arguments to salt.

More information at: https://github.com/ytoolshed/range/wiki/%22yamlfile%22-module-file-spec

Requisite "in"

A new means to updating requisite statements has been added to make adding watchers and requires to external states easier. Before 0.9.8 the only way to extend the states that were watched by a state outside of the sls was to use an extend statement:

```
include:
    - http
extend:
    apache:
        service:
            - watch:
                - pkg: tomcat
tomcat:
    pkg:
        - installed
```

But the new Requisite `in` statement allows for easier extends for requisites:

```
include:
    - http
```

(continues on next page)
tomcat:
  pkg:
    - installed
    - watch_in:
      - service: apache

Requisite in is part of the extend system, so still remember to always include the sls that is being extended!

Providers

Salt predetermines what modules should be mapped to what uses based on the properties of a system. These determinations are generally made for modules that provide things like package and service management. The apt module maps to pkg on Debian and the yum module maps to pkg on Fedora for instance.

Sometimes in states, it may be necessary for a non-default module to be used for the desired functionality. For instance, an Arch Linux system may have been set up with systemd support. Instead of using the default service module detected for Arch Linux, the systemd module can be used:

http:
  service:
    - running
    - enable: True
    - provider: systemd

Default providers can also be defined in the minion config file:

providers:
  service: systemd

When default providers are passed in the minion config, then those providers will be applied to all functionality in Salt, this means that the functions called by the minion will use these modules, as well as states.

Requisite Glob Matching

Requisites can now be defined with glob expansion. This means that if there are many requisites, they can be defined on a single line.

To watch all files in a directory:

http:
  service:
    - running
    - enable: True
    - watch:
      - file: /etc/http/conf.d/*

This example will watch all defined files that match the glob /etc/http/conf.d/*

Batch Size

The new batch size option allows commands to be executed while maintaining that only so many hosts are executing the command at one time. This option can take a percentage or a finite number:
This will only run test.ping on 10 of the targeted minions at a time and then restart apache on 25% of the minions matching os:RedHat at a time and work through them all until the task is complete. This makes jobs like rolling web server restarts behind a load balancer or doing maintenance on BSD firewalls using carp much easier with salt.

**Module Updates**

This is a list of notable, but non-exhaustive updates with new and existing modules.

Windows support has seen a flurry of support this release cycle. We’ve gained all new file, network, and shadow modules. Please note that these are still a work in progress.

For our ruby users, new rvm and gem modules have been added along with the associated states

The virt module gained basic Xen support.

The yum module gained Scientific Linux support.

The pkg module on Debian, Ubuntu, and derivatives force apt to run in a non-interactive mode. This prevents issues when package installation waits for confirmation.

A pkg module for OpenSUSE’s zypper was added.

The service module on Ubuntu natively supports upstart.

A new debconf module was contributed by our community for more advanced control over deb package deployments on Debian based distributions.

The mysql.user state and mysql module gained a password_hash argument.

The cmd module and state gained a shell keyword argument for specifying a shell other than /bin/sh on Linux / Unix systems.

New git and mercurial modules have been added for fans of distributed version control.

**In Progress Development**

**Master Side State Compiling**

While we feel strongly that the advantages gained with minion side state compiling are very critical, it does prevent certain features that may be desired. 0.9.8 has support for initial master side state compiling, but many more components still need to be developed, it is hoped that these can be finished for 0.9.9.

The goal is that states can be compiled on both the master and the minion allowing for compilation to be split between master and minion. Why will this be great? It will allow storing sensitive data on the master and sending it to some minions without all minions having access to it. This will be good for handling ssl certificates on front-end web servers for instance.

**Solaris Support**

Salt 0.9.8 sees the introduction of basic Solaris support. The daemon runs well, but grains and more of the modules need updating and testing.
Windows Support

Salt states on windows are now much more viable thanks to contributions from our community! States for file, service, local user, and local group management are more fully fleshed out along with network and disk modules. Windows users can also now manage registry entries using the new "reg" module.

28.2.143 Salt 0.9.9 Release Notes

release 2012-04-27

0.9.9 is out and comes with some serious bug fixes and even more serious features. This release is the last major feature release before 1.0.0 and could be considered the 1.0.0 release candidate.

A few updates include more advanced kwargs support, the ability for salt states to more safely configure a running salt minion, better job directory management and the new state test interface.

Many new tests have been added as well, including the new minion swarm test that allows for easier testing of Salt working with large groups of minions. This means that if you have experienced stability issues with Salt before, particularly in larger deployments, that these bugs have been tested for, found, and killed.

Major Features

State Test Interface

Until 0.9.9 the only option when running states to see what was going to be changed was to print out the highstate with state.show_highstate and manually look it over. But now states can be run to discover what is going to be changed.

Passing the option test=True to many of the state functions will now cause the salt state system to only check for what is going to be changed and report on those changes.

```bash
salt '*' state.highstate test=True
```

Now states that would have made changes report them back in yellow.

State Syntax Update

A shorthand syntax has been added to sls files, and it will be the default syntax in documentation going forward. The old syntax is still fully supported and will not be deprecated, but it is recommended to move to the new syntax in the future. This change moves the state function up into the state name using a dot notation. This is in-line with how state functions are generally referred to as well:

The new way:

```bash
/etc/sudoers:
file.present:
    - source: salt://sudo/sudoers
    - user: root
    - mode: 400
```
Use and Use_in Requisites

Two new requisite statements are available in 0.9.9. The use and use_in requisite and requisite-in allow for the transparent duplication of data between states. When a state “uses” another state it copies the other state’s arguments as defaults. This was created in direct response to the new network state, and allows for many network interfaces to be configured in the same way easily. A simple example:

```yaml
root_file:
  file.absent:
    - name: /tmp/nothing
    - user: root
    - mode: 644
    - group: root
    - use_in:
      - file: /etc/vimrc

fred_file:
  file.absent:
    - name: /tmp/nothing
    - user: fred
    - group: marketing
    - mode: 660

/files/marketing/district7.rst:
  file.present:
    - source: salt://marketing/district7.rst
    - template: jinja
    - use:
      - file: fred_file

/etc/vimrc:
  file.present:
    - source: salt://edit/vimrc
```

This makes the 2 lower state decs inherit the options from their respectively “used” state decs.

Network State

The new network state allows for the configuration of network devices via salt states and the ip salt module. This addition has been given to the project by Jeff Hutchins and Bret Palsson from Jive Communications.

Currently the only network configuration backend available is for Red Hat based systems, like Red Hat Enterprise, CentOS, and Fedora.

Exponential Jobs

Originally the jobs executed were stored on the master in the format: `<cachedir>/jobs/jid/{minion ids}`

But this format restricted the number of jobs in the cache to the number of subdirectories allowed on the filesystem. Ext3 for instance limits subdirectories to 32000. To combat this the new format for 0.9.9 is: `<cachedir>/jobs/jid_hash[:2]/jid_hash[2:]/{minion ids}` So that now the number of maximum jobs that can be run before the cleanup cycle hits the job directory is substantially higher.
ssh_auth Additions

The original ssh_auth state was limited to accepting only arguments to apply to a public key, and the key itself. This was restrictive due to the way we learned that many people were using the state, so the key section has been expanded to accept options and arguments to the key that over ride arguments passed in the state. This gives substantial power to using ssh_auth with names:

```
sshkeys:
  ssh_auth:
  - present
  - user: backup
  - enc: ssh-dss
  - options:
    - option1="value1"
    - option2="value2 flag2"
  - comment: backup
  - names:
    - names:
      - override
        ssh-rsa
      - override
        option3="value3", option4="value4 flag4"
```

LocalClient Additions

To follow up the recent additions in 0.9.8 of additional kwargs support, 0.9.9 also adds the capability to send kwargs into commands via a dict. This addition to the LocalClient api can be used like so:

```
import salt.client

client = salt.client.LocalClient('/etc/salt/master')
ret = client.cmd('*', 'cmd.run', ['ls -l'], kwarg={'cwd': '/etc'})
```

This update has been added to all cmd methods in the LocalClient class.
Better Self Salting

One problem faced with running Salt states, is that it has been difficult to manage the Salt minion via states, this is due to the fact that if the minion is called to restart while a state run is happening then the state run would be killed. 0.9.9 slightly changes the process scope of the state runs, so now when salt is executing states it can safely restart the salt-minion daemon.

In addition to daemonizing the state run, the apt module also daemonizes. This update makes it possible to cleanly update the salt-minion package on Debian/Ubuntu systems without leaving apt in an inconsistent state or killing the active minion process mid-execution.

Wildcards for SLS Modules

Now, when including sls modules in include statements or in the top file, shell globs can be used. This can greatly simplify listing matched sls modules in the top file and include statements:

```yaml
base:
  '*':
    - files*
    - core*

include:
  - users.dev.*
  - apache.ser*
```

External Pillar

Since the pillar data is just, data, it does not need to come expressly from the pillar interface. The external pillar system allows for hooks to be added making it possible to extract pillar data from any arbitrary external interface. The external pillar interface is configured via the `ext_pillar` option. Currently interfaces exist to gather external pillar data via hiera or via a shell command that sends yaml data to the terminal:

```yaml
ext_pillar:
  - cmd_yaml: cat /etc/salt/ext.yaml
  - hiera: /etc/hirea.yaml
```

The initial external pillar interfaces and extra interfaces can be added to the file salt/pillar.py, it is planned to add more external pillar interfaces. If the need arises a new module loader interface will be created in the future to manage external pillar interfaces.

Single State Executions

The new state.single function allows for single states to be cleanly executed. This is a great tool for setting up a small group of states on a system or for testing out the behavior of single states:

```bash
salt '*' state.single user.present name=wade uid=2000
```

The test interface functions here as well, so changes can also be tested against as:

```bash
salt '*' state.single user.present name=wade uid=2000 test=True
```
New Tests

A few exciting new test interfaces have been added, the minion swarm allows not only testing of larger loads, but also allows users to see how Salt behaves with large groups of minions without having to create a large deployment.

Minion Swarm

The minion swarm test system allows for large groups of minions to be tested against easily without requiring large numbers of servers or virtual machines. The minion swarm creates as many minions as a system can handle and roots them in the /tmp directory and connects them to a master.

The benefit here is that we were able to replicate issues that happen only when there are large numbers of minions. A number of elusive bugs which were causing stability issues in masters and minions have since been hunted down. Bugs that used to take careful watch by users over several days can now be reliably replicated in minutes, and fixed in minutes.

Using the swarm is easy, make sure a master is up for the swarm to connect to, and then use the minionswarm.py script in the tests directory to spin up as many minions as you want. Remember, this is a fork bomb, don’t spin up more than your hardware can handle!

```shell
python minionswarm.py -m 20 --master salt-master
```

Shell Tests

The new Shell testing system allows us to test the behavior of commands executed from a high level. This allows for the high level testing of salt runners and commands like salt-key.

Client Tests

Tests have been added to test the aspects of the client APIs and ensure that the client calls work, and that they manage passed data, in a desirable way.

Legacy salt-api release docs
29.1 Introduction

First, you need to configure the master file. This is because all module functions require either a configured api_key (for Cloud) or a ttp_user with a tpp_password and a base_url (for Trust Platform).

For Venafi Cloud:

```yaml
venafi:
  api_key: abcdef01-2345-6789-abcd-ef0123456789
  base_url: "https://cloud.venafi.example.com/"  # optional
```

If you don’t have a Venafi Cloud account, you can sign up for one on the enrollment page.

For Venafi Platform:

```yaml
venafi:
  base_url: "https://tpp.example.com/
  ttp_user: admin
  tpp_password: "Str0ngPa$$w0rd"
  trust_bundle: "/opt/venafi/bundle.pem"
```

It is not common for the Venafi Platform’s REST API (WebSDK) to be secured using a certificate issued by a publicly trusted CA, therefore establishing trust for that server certificate is a critical part of your configuration. Ideally this is done by obtaining the root CA certificate in the issuing chain in PEM format and copying that file to your Salt Master (e.g. /opt/venafi/bundle.pem). You then reference that file using the 'trust_bundle' parameter as shown above.

For the Venafi module to create keys and certificates it is necessary to enable external pillars. This is done by adding the following to the /etc/salt/master file:

```yaml
ext_pillar:
  - venafi: True
```

29.2 Runner Functions

29.2.1 request

This command is used to enroll a certificate from Venafi Cloud or Venafi Platform.

- **minion_id** ID of the minion for which the certificate is being issued. Required.
- **dns_name** DNS subject name for the certificate. Required if csr_path is not specified.
**csr_path** Full path name of certificate signing request file to enroll. Required if `dns_name` is not specified.

**zone** Venafi Cloud zone ID or Venafi Platform folder that specify key and certificate policy. Defaults to "Default". For Venafi Cloud, the Zone ID can be found in the Zone page for your Venafi Cloud project.

**org_unit** Business Unit, Department, etc. Do not specify if it does not apply.

**org** Exact legal name of your organization. Do not abbreviate.

**loc** City/locality where your organization is legally located.

**state** State or province where your organization is legally located. Must not be abbreviated.

**country** Country where your organization is legally located; two-letter ISO code.

**key_password** Password for encrypting the private key.

The syntax for requesting a new certificate with private key generation looks like this:

```bash
salt-run venafi.request minion.example.com dns_name=www.example.com \
country=US state=California loc=Sacramento org="Company Name" org_unit=DevOps \
zone=Internet key_password=SecretSauce
```

And the syntax for requesting a new certificate using a previously generated CSR looks like this:

```bash
salt-run venafi.request minion.example.com csr_path=/tmp/minion.req zone=Internet
```

### 29.2.2 show_cert

This command is used to show last issued certificate for domain.

**dns_name** DNS subject name of the certificate to look up.

```bash
salt-run venafi.show_cert www.example.com
```

### 29.2.3 list_domain_cache

This command lists domains that have been cached on this Salt Master.

```bash
salt-run venafi.list_domain_cache
```

### 29.2.4 del_cached_domain

This command deletes a domain from the Salt Master’s cache.

**domains** A domain name, or a comma-separated list of domain names, to delete from this master’s cache.

```bash
salt-run venafi.del_cached_domain www.example.com
```

### 29.3 Transfer certificate to a minion

To transfer a cached certificate to a minion, you can use Venafi pillar.

Example state (SLS) file:
/etc/ssl/cert/www.example.com.crt:
  file.managed:
    - contents_pillar: venafi:www.example.com:cert
    - replace: True

/etc/ssl/cert/www.example.com.key:
  file.managed:
    - contents_pillar: venafi:www.example.com:pkey
    - replace: True

/etc/ssl/cert/www.example.com-chain.pem:
  file.managed:
    - contents_pillar: venafi:www.example.com:chain
    - replace: True
Auto-Order  The evaluation of states in the order that they are defined in a SLS file. See also: ordering.

Bootstrap  A stand-alone Salt project which can download and install a Salt master and/or a Salt minion onto a host. See also: salt-bootstrap.

Compound Matcher  A combination of many target definitions that can be combined with boolean operators. See also: targeting.

EAuth  Shorthand for 'external authentication'. A system for calling to a system outside of Salt in order to authenticate users and determine if they are allowed to issue particular commands to Salt. See also: external auth.

Environment  A directory tree containing state files which can be applied to minions. See also: top file.

Execution Function  A Python function inside an Execution Module that may take arguments and performs specific system-management tasks. See also: the list of execution modules.

External Job Cache  An external data-store that can archive information about jobs that have been run. A default returner. See also: ext_job_cache, the list of returners.

Execution Module  A Python module that contains execution functions which directly perform various system-management tasks on a server. Salt ships with a number of execution modules but users can also write their own execution modules to perform specialized tasks. See also: the list of execution modules.

External Pillar  A module that accepts arbitrary arguments and returns a dictionary. The dictionary is automatically added to a pillar for a minion.

Event  A notice emitted onto an event bus. Events are often driven by requests for actions to occur on a minion or master and the results of those actions. See also: Salt Reactor.

File Server  A local or remote location for storing both Salt-specific files such as top files or SLS files as well as files that can be distributed to minions, such as system configuration files. See also: Salt’s file server.

Grain  A key-value pair which contains a fact about a system, such as its hostname, network addresses. See also: targeting with grains.

Highdata  The data structure in a SLS file the represents a set of state declarations. See also: state layers.

Highstate  The collection of states to be applied to a system. See also: state layers.

Idempotent  An action that ensures the system is in a well-known state regardless of the system’s state before the action is applied. A corollary to this is that applying the action multiple times results in no changes to the system. State module functions should be idempotent. Some state module functions, such as cmd.run are not idempotent by default but can be made idempotent with the proper use of requisites such as unless and onlyif. For more information, see wikipedia.

Jinja  A templating language which allows variables and simple logic to be dynamically inserted into static text files when they are rendered. See also: Salt's Jinja documentation.
Job  The complete set of tasks to be performed by the execution of a Salt command are a single job. See also: jobs runner.

Job Cache  A storage location for job results, which may then be queried by a salt runner or an external system. May be local to a salt master or stored externally.

Job ID  A unique identifier to represent a given job. This is often shortened to JID.

Low State  The collection of processed states after requisites and order are evaluated. See also: state layers.

Master  A central Salt daemon from which commands can be issued to listening minions.

Masterless  A minion which does not require a Salt master to operate. All configuration is local. See also: file_client.

Master Tops  A system for the master that allows hooks into external systems to generate top file data.

Mine  A facility to collect arbitrary data from minions and store that data on the master. This data is then available to all other minions. (Sometimes referred to as Salt Mine.) See also: Salt Mine.

Minion  A server running a Salt minion daemon which can listen to commands from a master and perform the requested tasks. Generally, minions are servers which are to be controlled using Salt.

Minion ID  A globally unique identifier for a minion. See also: id.

Multi-Master  The ability for a minion to be actively connected to multiple Salt masters at the same time in high-availability environments.

Node Group  A pre-defined group of minions declared in the master configuration file. See also: targeting.

Outputer  A formatter for defining the characteristics of output data from a Salt command. See also: list of outputters.

Peer Communication  The ability for minions to communicate directly with other minions instead of brokering commands through the Salt master. See also: peer communication.

Pillar  A simple key-value store for user-defined data to be made available to a minion. Often used to store and distribute sensitive data to minions. See also: Pillar, list of Pillar modules.

Proxy Minion  A minion which can control devices that are unable to run a Salt minion locally, such as routers and switches.

PyDSL  A Pythonic domain-specific-language used as a Salt renderer. PyDSL can be used in cases where adding pure Python into SLS files is beneficial. See also: PyDSL.

Reactor  An interface for listening to events and defining actions that Salt should taken upon receipt of given events. See also: Reactor.

Render Pipe  Allows SLS files to be rendered by multiple renderers, with each renderer receiving the output of the previous. See also: composing renderers.

Renderer  Responsible for translating a given data serialization format such as YAML or JSON into a Python data structure that can be consumed by Salt. See also: list of renderers.

Returner  Allows for the results of a Salt command to be sent to a given data-store such as a database or log file for archival. See also: list of returners.

Roster  A flat-file list of target hosts. (Currently only used by salt-ssh.)

Runner Module  A module containing a set of runner functions. See also: list of runner modules.

Runner Function  A function which is called by the salt-run command and executes on the master instead of on a minion. See also: Runner Module.

Salt Cloud  A suite of tools used to create and deploy systems on many hosted cloud providers. See also: salt-cloud.
Salt SSH A configuration management and remote orchestration system that does not require that any software besides SSH be installed on systems to be controlled.

Salt Thin A subset of the normal Salt distribution that does not include any transport routines. A Salt Thin bundle can be dropped onto a host and used directly without any requirement that the host be connected to a network. Used by Salt SSH. See also: thin runner.

Salt Virt Used to manage the creation and deployment of virtual machines onto a set of host machines. Often used to create and deploy private clouds. See also: virt runner.

SLS Module Contains a set of state declarations.

State Compiler Translates highdata into lowdata.

State Declaration A data structure which contains a unique ID and describes one or more states of a system such as ensuring that a package is installed or a user is defined. See also: highstate structure.

State Function A function contained inside a state module which can manages the application of a particular state to a system. State functions frequently call out to one or more execution modules to perform a given task.

State Module A module which contains a set of state functions. See also: list of state modules.

State Run The application of a set of states on a set of systems.

Syndic A forwarder which can relay messages between tiered masters. See also: Syndic.

Target Minion(s) to which a given salt command will apply. See also: targeting.

Top File Determines which SLS files should be applied to various systems and organizes those groups of systems into environments. See also: top file, list of master top modules.

__virtual__ A function in a module that is called on module load to determine whether or not the module should be available to a minion. This function commonly contains logic to determine if all requirements for a module are available, such as external libraries.

Worker A master process which can send notices and receive replies from minions. See also: worker_threads.

The text appears to be a list of modules and methods from the Salt documentation. It includes various methods such as `update()` and `update_api_key_description()` from different modules. The modules range from `salt.cloud.clouds.msazure` to `salt.modules.mac_softwareupdate`. The text is not formatted into paragraphs and seems to be a direct listing of modules and methods.

Example:
- `update()` (in module `salt.modules.boto_cloudfront`), 1347
- `update_account_password_policy()` (in module `salt.modules.boto_iam`), 1405
- `update_api_model_schema()` (in module `salt.modules.boto_apigateway`), 1340
- `update_all()` (in module `salt.modules.mac_softwareupdate`), 2047
- `update_api_key_description()` (in module `salt.modules.boto_apigateway`), 1340
- `update_assume_role_policy()` (in module `salt.modules.boto_iam`), 1405
- `update_available()` (in module `salt.modules.mac_softwareupdate`), 2047
- `update_ca_bundle()` (in module `salt.modules.boto_apigateway`), 1340
- `update_ca_bundle()` (in module `salt.runners.http`), 1851
- `update_cluster()` (in module `salt.modules.vsphere`), 2714
- `update_cname()` (in module `salt.modules.infoblox`), 1872
- `update_conf()` (in module `salt.modules.napalm_snmp`), 2185
- `update_conf()` (in module `salt.modules.boto_apigateway`), 1340
- `update_config()` (in module `salt.modules.boto3_elasticsearch`), 3837
- `update_config()` (in module `salt.modules.boto_apigateway`), 1340
- `update_ca_bundle()` (in module `salt.modules.boto_apigateway`), 1340
- `update_ca_bundle()` (in module `salt.cloud.clouds.msazure`), 1340
- `update_cdn()` (in module `salt.modules.boto_apigateway`), 1340
- `update_ca_bundle()` (in module `salt.modules.boto_apigateway`), 1340
- `update_api_key_description()` (in module `salt.modules.boto_apigateway`), 1340
- `update_assume_role_policy()` (in module `salt.modules.boto_iam`), 1405
- `update_available()` (in module `salt.modules.mac_softwareupdate`), 2047
